About Scavenger Supplies

Scavenger Supplies is an Australian-owned industrial supply company group founded in 2002, headquartered in Mandurah, Western Australia.

From our origins as Conveyor Technology Services, we have grown into a multi-division group serving trade and business customers Australasia-wide across mining (iron ore, mineral sands, copper, coal & bauxite processing) fire and safety, civil marine, oil and gas, off shore operations, construction, and government sectors.

Our commitment to safety, quality, and integrity is unwavering. We operate certified Quality and Safety Management Systems and maintain a supplier network of over 1,500 partners giving our clients access to one of the largest industrial supply databases in Australasia. Whether you need a single product or a complete project solution, Scavenger Supplies is your single, dependable source.

Our Divisions & Brands

Division	Specialty
Scavenger Fire & Safety	Fire safety products, technical services & emergency management
Grating FRP Australia	Fibre Reinforced Polymer structural products & engineering
Conveyor Technology Services	Conveyor products, maintenance & efficiency solutions
Scavenger Maritime Services	Marine industrial supplies & support

Certifications & Accreditations

Certification	Details
ISO 9001:2015	Quality Management System Reg. No. 610006/Q/5, valid to 03/10/2028
ISO 45001:2018	Safety Management System Reg. No. 610006/W/3, valid to 03/10/2028
BAL-40 Certified	Bushfire Attack Level 40 FRP Grating Mini-Micro Mesh (AS 1530.8.1-2007)
JOSCAR-AU Registered	Joint Supply Chain Accreditation Register Renewal 1 August 2027
FPA Gold Corporate Member	Fire Protection Association Australia Member #27450 Gold Corporate Member valid until 31 October 2027
AS 1851:2012 Compliant	Fire system inspection & maintenance Certified by Ashburton Assurance Australasia (JAS-ANZ accredited), initial certification 2013.

Core Competencies

- Robust Quality Management System certified to ISO 9001:2015
- Occupational Health & Safety Management System certified to ISO 45001:2018
- Sourcing the latest, safest, and most cost-effective technologies through partnerships with innovative manufacturers
- Products with exceptional mechanical properties – lightweight, high-strength, impact-resistant, and low-maintenance
- End-to-end project delivery: design, supply, fabrication, installation, inspection, and maintenance
- National distribution with offices in Western Australia and New South Wales

SCAVENGER FIRE & SAFETY

Established in 2012, Scavenger Fire & Safety is a leading provider of fire safety products and technical services across Australia and the Pacific region. With offices in Mandurah WA and Unanderra NSW, our certified team delivers comprehensive solutions for local government, bushfire brigades, mining, oil & gas, and industrial sectors.

Our approach is built on zero-harm risk management and centralised business systems that ensure efficient, compliant service delivery.

Services

- **Fire System Installation & Maintenance** – sprinkler systems, fire suppression, fire detection
- **Inspection & Servicing** – diesel and electric fire pump inspections, hydrant flow testing, safety compliance audits
- **Emergency Management** - block plans, evacuation design, site-specific training, emergency risk management assessments
- **Chemical Compliance Audit & Inspections** – safe handling and storage of hazardous materials
- **Passive Fire Safety Maintenance** – inspections and testing to uphold fire safety in buildings

Products

Category	Description
DLX Rapid Deployment Shelters	Quick-setup shelters for emergency and disaster response
Extinguishers & Blankets	Variety of extinguisher types and fire blankets
Foam & Foam Equipment	High-quality foam solutions for fire suppression
Hose Reels, Hydrants & Cabinets	Organised and swift access during emergencies
Hose Fittings & Ancillary Equipment	Durable fittings for reliable water delivery
Nozzles & Monitors	Precise control for effective firefighting
Personal Protective Equipment	Helmets, gloves, boots, protective suits
Wildland Fire Products	Specialised tools for combating wildfires
Scavenger Elite Fire Products	Specialised Fire PPE
Pumps & Floating Strainers	Effective water extraction from various sources
Thermal Imaging Cameras	Heat source detection for early fire identification
First Aid & Medical	Comprehensive emergency medical supplies
Mining Heavy Duty Batteries	N150, N200, N70 Site Batteries
3M	All 3M Personal Protective Equipment
Honeywell	Honeywell Personal Protective Equipment
Onsite Employee Equipment	Rugged Xtremes - Bags, Cribb Equipment & Protective Gear

GRATING FRP AUSTRALIA

Grating FRP Australia is the only FRP supplier in Australia holding ISO 9001:2015, ISO 45001:2018, and BAL-40 certified practices. We specialise in the design, supply, fabrication, and installation of high-quality Fibre Reinforced Polymer (FRP) structural products and systems for industrial, marine, civil, and architectural applications nationwide.

What is FRP?

Fibre Reinforced Polymer (FRP) is a composite material made of a polymer matrix reinforced with fibres. It offers one of the highest strength-to-weight ratios of any material, with memory to spring back to its original shape when deflected – even under major impact.

Key characteristics:

- **Lightweight** reduces transportation costs and OHS hazards
- **Non-conductive** eliminates electrocution risk; ideal for electrical environments
- **Corrosion resistant** proven durability in chemical, coastal, and industrial environments for 50+ years
- **High strength** exceeds specified performance requirements with high safety factors
- **Quick installation** prefabrication reduces project downtime and weather delays
- **Lower life cycle costs** minimal maintenance translates to long-term savings
- **Temperature & harsh environment resistance** withstands severe Australian conditions

Products

FRP Moulded Grating	Bi-directional mechanical properties; strength-to-weight ratio one-fourth of steel; customisable resins and surface finishes
FRP Pultruded Grating	High-strength, corrosion-resistant grating for walkways, platforms, ramps, and trench covers
FRP Pultruded Structural Profiles	Beams, channels, angles, and tubes; non-conductive; ideal for electrical and infrastructure applications
FRP Stair Treads & Handrail Systems	Corrosion-resistant, non-conductive; customisable for specific installation requirements
FRP Manhole Covers & Access Systems	Composite glass fibre and quartz; high wear resistance and climate resilience
FRP Roof Access System	Custom-built to Australian Standards; exceptional strength and stability
GrateMates 4WD Sand Bridging Tracks	1220 × 310 × 30/38mm; all-weather, durable self-recovery solution

Industry Applications

Industry	Applications
Mining & Minerals	Custom access structures, spill systems, equipment enclosures
Oil & Gas	Structural profiling, grating systems, offshore platforms
Civil Marine	FRP piles, docks, bridges, seawalls, port facilities, marinas
Architectural	Façade panels, cladding, screening, landscaping, interior finishes
Local & State Government	Trails, bridges, boardwalks, outdoor furniture
Food & Beverage	Processing equipment enclosures, hygiene-compliant flooring
Utilities & Rail	Bridges, cable management, non-slip station surfaces
Water & Waste Management	Treatment systems, access covers, wastewater enclosures
Power & Utilities	Non-conductive substations, trench and pit covers
Recreational	Marine, 4WD, and hobbyist FRP components

Project Engagement Process

1. **Project Initiation** – thorough consultation to define scope, goals, and communication channels
2. **Project Planning** – milestones, timelines, risk assessment, budget, and regulatory compliance
3. **Task Execution** – deployment of skilled engineers and technicians with rigorous quality control
4. **Monitoring & Control** – regular assessments and status updates throughout the project lifecycle
5. **Closure & Evaluation** – comprehensive inspections, client walkthrough, documentation, and feedback

BAL-40 Fire Certification

Grating FRP Australia is the only FRP supplier in Australia with BAL-40 certification (AS 1530.8.1-2007) for its FRP Grating Mini-Micro Mesh, tested by Ignis Labs Pty Ltd. Test results confirmed:

- No sustained flaming on the non-fire side
- No through-gaps greater than 3mm
- No excessive flame spread beyond 500mm
- Stable under extreme thermal conditions for up to 60 minutes
- Retained mechanical strength post-test

Case Studies

Conveyor Technology Services

Founded in 2002 as the original core of Scavenger Supplies, Conveyor Technology Services delivers advanced conveyor products and maintenance solutions across Australia, with a focus on safety, quality, and environmental stewardship. These solutions address common conveyor challenges such as carryback, spillage, mistracing, dust, belt wear, and unplanned maintenance, helping support safer, cleaner, and more consistent material flow.

Products & Services

Conveyor Belt Cleaner Systems
Mining & Industrial Mechanical Conveyor Belt Fasteners
Belt Tracking Devices and Clamps
Chain Conveyors
Dust Suppression Control Units
Conveyor Belt Maintenance Equipment (authorised MATO distributor)
Advanced conveyor skirt products and pulley lagging

Together, these products support practical conveyor upkeep—from cleaner belts and controlled tracking to dependable fastening, dust management, skirt sealing, and pulley protection. The range is suited to demanding operating environments where reliable material handling, access to the right equipment, and practical maintenance support are important.

Expertise

We specialise in reducing spillage, lowering friction, and decreasing overall conveyor maintenance costs. Our solutions are applied across mining, construction, and food industries where reliable material handling is fundamental. We help customers select practical solutions for their operating conditions, supporting improved housekeeping, equipment protection, and dependable day-to-day operations. Our maintenance focus also provides practical support for ongoing servicing, replacement planning, and keeping conveyor systems working effectively.

WHY SCAVENGER SUPPLIES

Differentiator	What It Means
Single-source capability	One supplier across fire safety, FRP, marine, and conveyor eliminating vendor management complexity
Founder-led accountability	Personal relationships, direct engagement, and honest communication from the top down
Certified quality & safety	ISO 9001:2015 and ISO 45001:2018 across all operations
Compliance-ready products	BAL-40, AS 1851:2012, FPA Gold Member – procurement confidence built in
In-house engineering	Custom design, rapid prototyping, and full project management under one roof
National reach	Operations in WA and NSW; supply, installation, and maintenance Australia-wide
1,500+ supplier network	Catalogue depth of a large distributor with the accountability of a founder-run business
Scavenger Elite own-label	Premium, compliance-ready gear developed to our own standard
