Welcome

Make the most of
your stay

THE IN-ROOM EXPERIENCE

One scan. A more personal stay.

Designed around your budget.

Make every room feel more connected.

Bring the services your guests value into one branded mobile experience, reached from a QR code in their room.

01 / ARRIVE

Scan in the room

A QR code on the TV opens the guest's room experience on their own phone.

02 / CONNECT

Open the experience

The phone becomes a simple remote for the menus displayed on the room TV.

03 / ENJOY

Enjoy the stay

Choose local food or a taxi, pay on the phone, or request help and extra towels.

Hospitality first. Technology in the background.

Give guests a convenient way to find what they need, while keeping your team available for the moments that need a human touch.

Scan the TV. Your phone becomes the remote.

Point your phone camera at the QR code on the television. Open the room experience and control its simple on-screen menus.

Illustrative screens and QR. Available controls depend on the connected TV system.

01 / SCAN

Scan the QR displayed on your room TV.

02 / CONTROL

Use the phone arrows and OK button to move through the TV menu.

03 / CHOOSE

Watch TV, explore local food, book a taxi or ask for room help.

Choose on the TV. Complete on your phone.

Bring everyday conveniences into the room, with simple choices for food, travel and help from the hotel team.

Illustrative experience. Food, taxi, payment and staff-request services require agreed provider connections and workflows.

Local food

Browse participating restaurants, choose your meal and pay on your phone.

Book a taxi

Enter journey details, review the fare and pay on your phone where supported.

Room help

Ask for help with air conditioning, request more towels or contact reception.

One welcoming story across the property.

Use Dhruv screens to inspire guests in shared spaces, while keeping the mobile remote focused on their room.

SHARED SPACES

Reception

Welcome messages, breakfast times, property highlights and useful local information.

SHARED SPACES

Restaurant & lounge

Seasonal menus, specials and experiences, with separate QR links to relevant mobile content.

SHARED SPACES

Local discovery

Weather, transport information and things to do, using the selected live data services.

From inspiration to action

A lobby display can introduce an experience. A venue QR link lets guests explore it on their phone. The in-room QR opens the room-specific experience and its supported remote controls.

Start with value. Grow with confidence.

Build the experience around your budget, your existing equipment and the services your guests will actually use.

01 Start small

Begin with a focused QR guest experience and essential room information.

02 Reuse what fits

Assess existing screens and TVs for compatibility before buying new hardware.

03 Add with purpose

Add local food, taxi bookings, mobile payment and staff requests where they add value.

04 Keep costs visible

Agree setup, licences, content, support and any third-party charges up front.

Your proposal should separate one-off and recurring costs. Hardware, integrations, payment processing and live data services may carry additional charges. Pricing is tailored to the agreed scope.

A better stay starts with one room.

See the complete in-room journey in a focused demonstration, then choose a rollout that suits your property.

01 / PLAN

Choose the essentials

Agree your guest priorities, room services and budget before selecting features.

02 / EXPERIENCE

Try one room

Try TV QR pairing, menu control, a food or taxi checkout and a request for towels.

03 / GROW

Expand thoughtfully

Review guest feedback and staff workload, then extend the experience at your pace.

Exceptional stays. Sensible investment.
