

ILLUMINATE

SANIPEXGROUP

SANIPEXGROUP

LIGHTING THAT ELEVATES MODERN LIVING

From fluid organic forms to industrial styling, the new lighting collection from SANIPEX GROUP comprises of a carefully curated selection of unique products that bridge the gap between art installation and interior design.

Blending aesthetic principles with technological innovation, every piece is crafted to both command attention and enhance the space in which it is placed, casting distinctive lighting effects to create a unique atmosphere and distinctive ambience indoors and out.

Representing innovative European brands, each selected for their quality, craftsmanship, and directional design approach, every product works as a stunning centrepiece across a variety of settings, from residential homes and restaurants through to hotels and retail premises.

Using the finest materials, including handblown Murano glass, textural ceramics, metal mesh, wood, and brass, the pieces in our lighting collection are expertly made by master craftsmen in Europe with a preference given to the use of local materials, resulting in exceptional pieces that will take pride of place in any space.

LIGHTING COLLECTIONS

TRANSFORMING SPACES. REDEFINING LUXURY.

Lighting does more than illuminate—it defines mood, enhances architecture, and elevates interior design. At SANIPEX GROUP, lighting is thoughtfully curated to bring clarity, warmth, and visual impact to every space. The collection spans elegant decorative pieces to refined architectural solutions, offering versatility for residential, commercial, and hospitality environments. Each product is chosen for its quality, durability, and ability to complement contemporary spaces with both function and style. Whether creating atmosphere, highlighting features, or supporting everyday tasks, lighting becomes an essential tool for turning interiors into inspiring, well-balanced environments.

Sanaura

LIGHTING FOR EVERY SPACE

Granada

The Granada pendant features a striking alabaster disc that casts a soft, diffused glow—an elegant statement piece bringing warmth and sophistication to any interior.

SANAURA has the power to inspire; to shed light on the possible; and illuminates the path towards innovation, creating beautiful spaces that connect everyone with their environment. Established in Dubai, UAE, SANAURA, the premium lighting brand by the renowned SANIPEX GROUP, blends form and function into every design. Derived from the name 'SANIPEX' and 'AURA'—meaning light and atmosphere—SANAURA offers luminaires for a range of needs and for every space, indoors and out. For homeowners seeking something high-end and luxurious, to architects and designers specifying with ambition, our pieces are perfectly suited for every space: within single homes, as well as contract hospitality, commercial, institutional spaces and beyond.

STORY OF ALABASTER

The Alabaster used is a purely natural stone, its texture and translucency allowing it to filter light in a unique way, creating fascinating light and shadow effects. Formed from calcium sulfate, it features delicate veins and a remarkable ability to diffuse light, producing warm, glowing effects. Its softness makes it highly workable, enabling artisans to craft sculptures, decorative panels, and lighting elements that highlight its elegance. Each alabaster light is truly one of a kind, as no two pieces are ever the same. Beyond its aesthetic appeal, alabaster is considered sustainable and enduring, bringing serenity and timeless refinement to both traditional and modern spaces.

Murcia

The Murcia pendant showcases a sleek alabaster cylinder that glows with soft warmth, adding elegance and vertical emphasis to modern interiors.

Seville

A pendant lamp with organic and evocative shapes. Made from natural alabaster, each shade in the collection is unique, thanks to the veins and textures characteristic of this ancient stone.

Luna

The Moon lamp was designed by connecting the shapes and shadows of Earth's only natural satellite that illuminates our nights and comparing them to the shapes and veins of alabaster. A unique design that will provide any space with contemporary lighting.

Carlyle

The Carlyle range has a design where the emission of light is 180° in order to enjoy the translucency of the alabaster and where work has been done to avoid shadows inside the lampshade, emitting a very pleasant ambient light to create relaxing environments. The soft translucency of alabaster diffuses light beautifully, creating a warm, ambient glow that enhances the atmosphere of any room.

Alabastro

This rechargeable outdoor table lamp features a hand-carved alabaster dome, integrated warm LED, 8-hour battery life, and IP65 rating.

J.ADAMS&Co

ENVISIONED IN LONDON, FORGED IN BIRMINGHAM

Every J. Adams & Co luminaire begins as an exploration of form, materiality, and light in their London studio. Once refined, their Birmingham workshop—drawing on over fifty years of experience—brings each piece to life. From concept to creation, they shape objects with permanence, designed to stand the test of time.

Flume

Taking inspiration from the mid-century and Art Deco eras, the Flume collection has an effortless contemporary silhouette crafted from machined brass and precision cut reeded glass.

SUSTAINABLE DESIGN MADE TO LAST

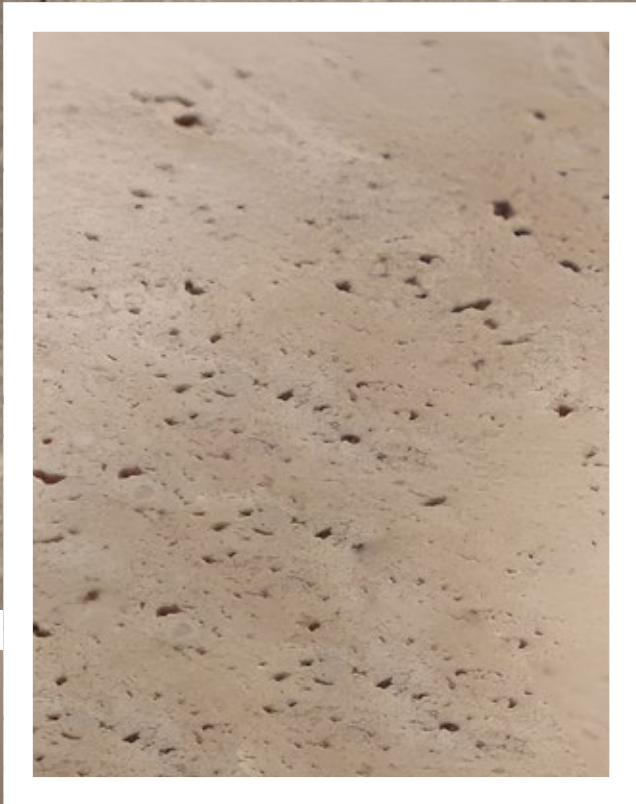

They are committed to using local materials and a Birmingham-based workforce, supporting both British industry and their local community. By manufacturing their products in the UK, they keep emissions low and significantly reduce their carbon footprint. J.Adams & Co pride themselves on designing and manufacturing lighting built for longevity.

Strata

The Strata collection is a celebration of craftsmanship and ingenuity. Playing with materiality and the beauty of light refraction through reeded glass, Strata provides an enchanting, linear focal point. Each piece is expertly produced at their workshop using precision-cut glass and engineered solid brass.

Orbit

Mastering a refined elegance, Orbit is a highly versatile collection of pendant and wall lights. The simple, paired back design showcases the expertly engineered materials, contrasting the pure opal glass sphere with the natural stone or brass surround.

Luna

Luna explores the beauty of concealed light and reflected illumination, drawing inspiration from the cosmos. Mimicking the effect of a total eclipse, stone discs partially obscure the LED light source. A large hand-spun brass disc reflects the light outward, casting a warm, ambient halo that enhances any space with its soft, inviting glow.

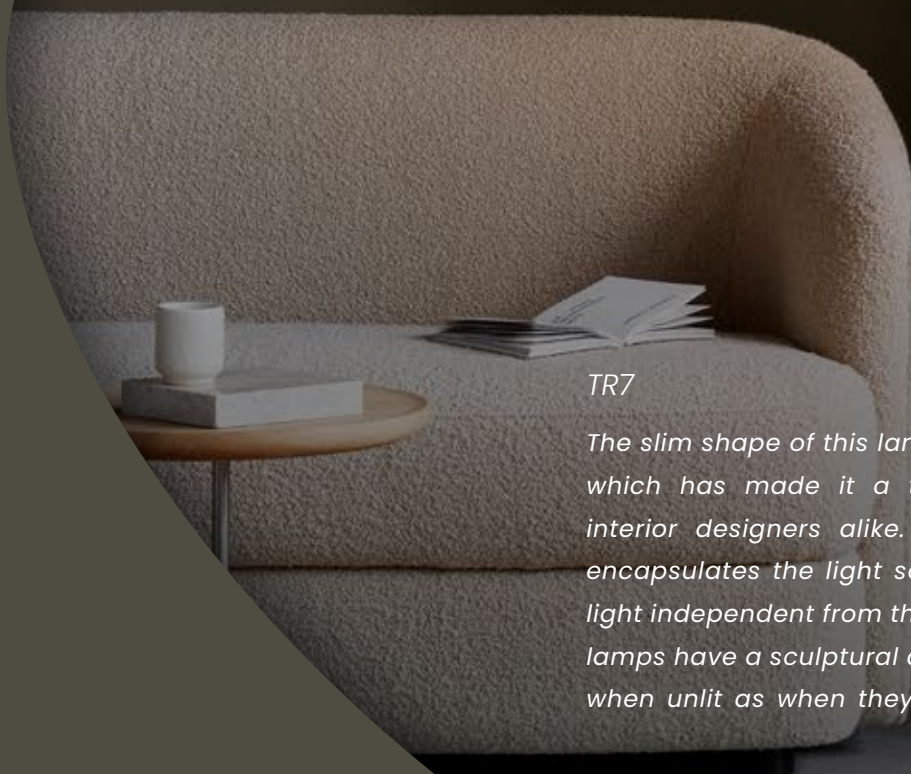

J.ADAMS & CO FINISHES

T O M R O S S A U

Tom Rossau was born in Odsherred, Denmark, famous for its curvaceous landscape and the light on the north-western coastline, which has attracted artists for centuries. The sculptural qualities of his native soil are part of his DNA and resonate in his design philosophy.

TR7

The slim shape of this lamp is ideal for corner placement, which has made it a true winner for architects and interior designers alike. The closed shade of the TR7 encapsulates the light sources and provides an indirect light independent from the choice of the material. The TR7 lamps have a sculptural and organic expression, as much when unlit as when they radiate light.

TR41

The design offers a new look that creates a special contrast to the soft slats. Here, the well-known cylinder is tightened up with a narrowing at the top, bottom and centre, which gives the lamp a special hourglass shape. However, the narrowing in the middle is located in the lower part of the lamp.

TR5

TR5 is one of the first and most iconic Tom Rossau lamps. The pendant is made in a number of different materials, colours and sizes. Plenty of opportunity to find the perfect match for any home decor.

ST903

The ST903 pendant consists of two screen materials, a white cylinder in the middle, made of coated paper and an outer screen made of birch veneer. The white center gives a soft and diffused light, as it lights up the open outer screen of birch veneer, creating a luminous space within the lamp.

ST906

ST906 is made in two materials, coated paper and birch veneer. Coated paper provides good and general lighting, in a pleasant white tone. The birch veneer gives a warm and cosy light.

ABOUT RESPONSIBLE DESIGN

Over 90% of Tom Rossau materials are responsibly sourced within Europe, including their most used material—birch, which is responsibly sourced in Finland. They prioritize reusing cutouts, recycling waste, and minimizing the use of plastic and steel. By focusing on sustainable materials, particularly wood, they reduce their carbon footprint while ensuring long-lasting quality.

TR19

The TR19 pendant has a sturdy and very elegant look. TR19 is available in two materials, coated paper and birch veneer. The materials provide different ambience and degrees of illumination. The white tone of coated paper provides a smooth and functional light, whereas the birch veneer gives a warm light, for a more cosy feel.

Cairo

Inspired by the geometric elegance of ancient Egyptian architecture and craftsmanship, the Cairo pendant features five-sided forms crafted from folded, hammered metal in a rich, warm gold.

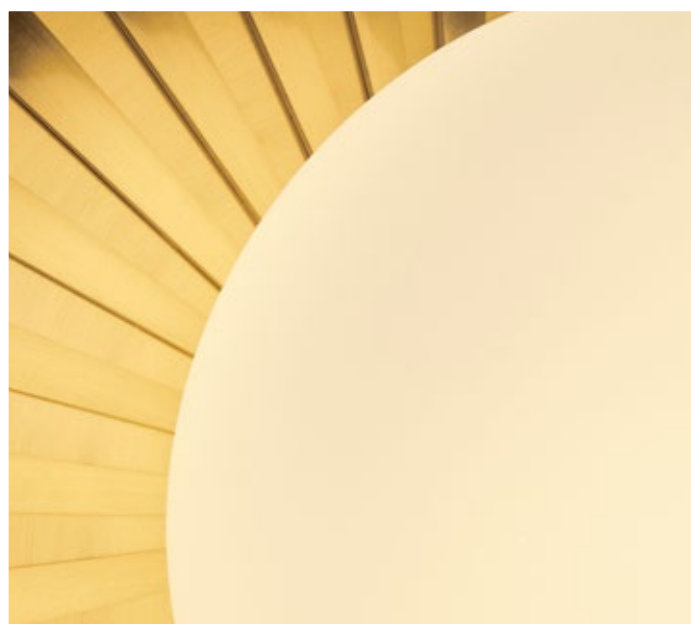

Northern Lights

BESPOKE LIGHTING SINCE 1987

Established in Chesterfield in 1987, Northern Lights started as a family business designing and hand-crafting products from stained glass with a small team of skilled artisans. With design & manufacture under one roof in their 38,000 square foot facility, they exercise unprecedented control and consistent quality.

Heslop

The Heslop range offers a refined selection of wall, table, and floor lamps, each featuring a stunning marble base paired with a reeded stem crafted from brass.

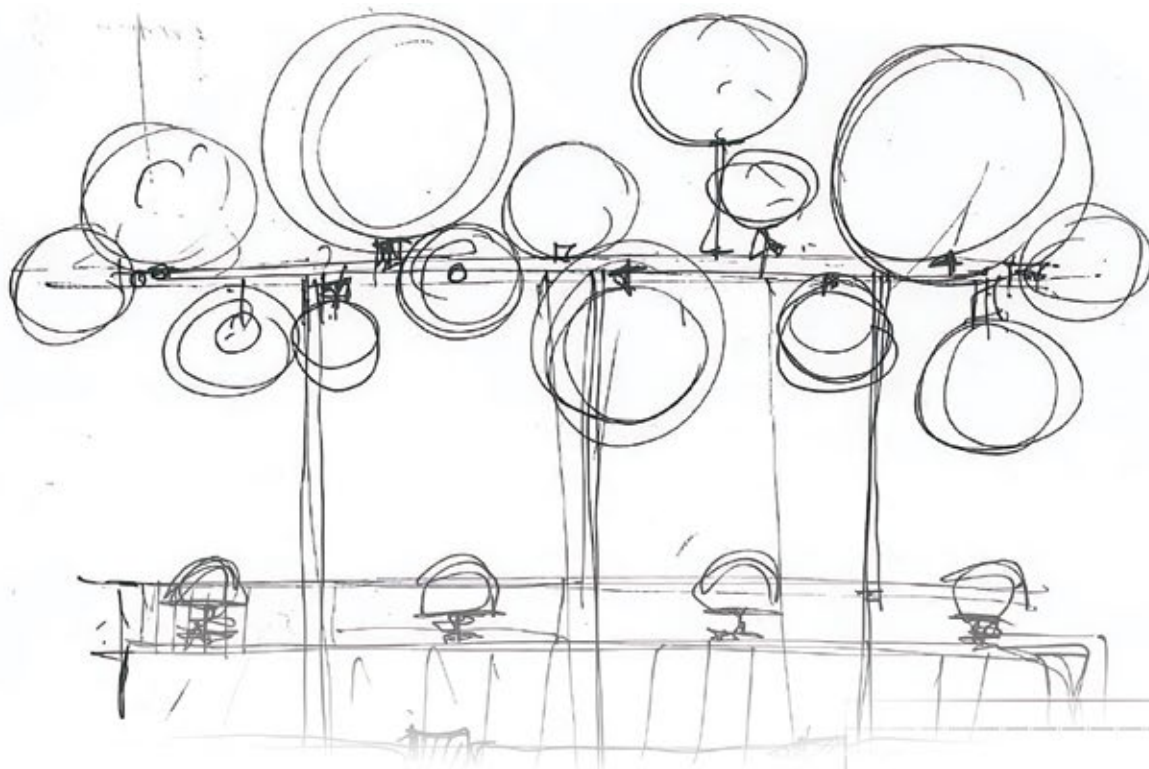

Vistal

Inspired by the tranquil beauty of scenic horizons, Vistal embodies the artistry of light and texture. A softly diffused opal glass globe radiates a serene glow, framed by a handcrafted brass base. Completed with a hand-applied brushed finish, the design evokes the mesmerizing glow of a setting sun over a distant horizon, bringing sculptural, refined elegance to interiors.

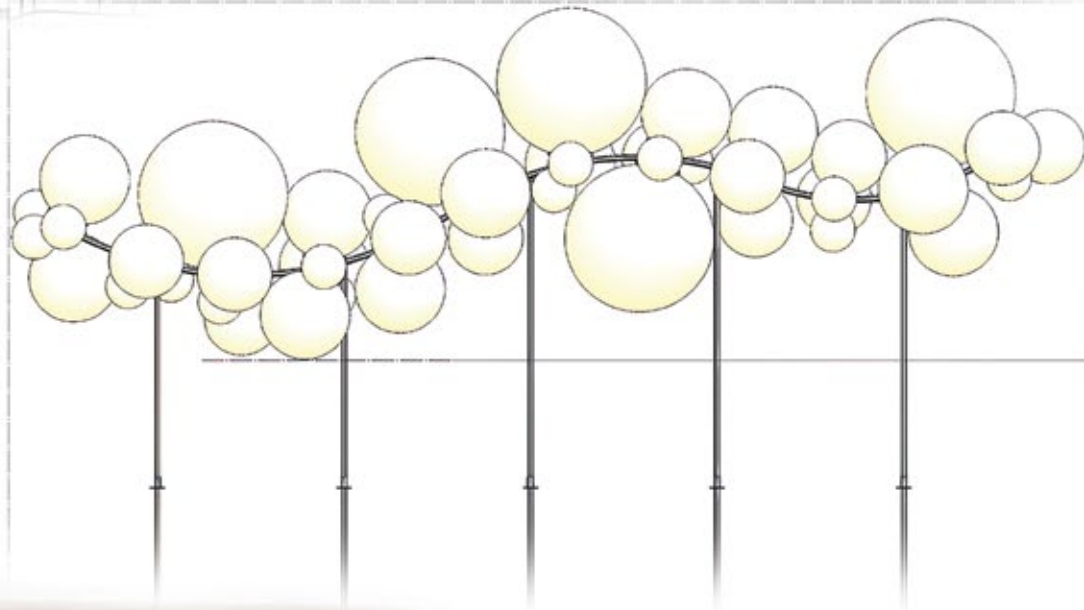

A COLLABORATIVE APPROACH

Collaboration is at the heart of what they do; the ultimate goal is to exceed their clients' expectations. Their services are offered globally with expertise spanning luxury hospitality, restaurant, residential, marine, retail and commercial lighting design. Working closely with clients to understand every element of the project, enabling them to create lighting designs that look exquisite, are built to last and can be safely installed.

Final

Virgin Hotels Glasgow

Thirty-six bespoke, handcrafted pieces including illuminated three-tier bar gantry, external canopy, VIP corridor mirror wall & lift surrounds, bar feature chandeliers & pendant, various fixed table lamps, wall lamps & pendants.

Studio Frantzén Harrods

Inspired by the beauty of Swedish Christmas lights, this stunning chandelier is engineered by their designers and artisan fabricators to float effortlessly in mid-air, with only 14 fine suspension wires for such a large statement piece. Northern Lights used mild steel to construct the arms to maintain structural strength, keeping each arm floating in space as straight and true as possible.

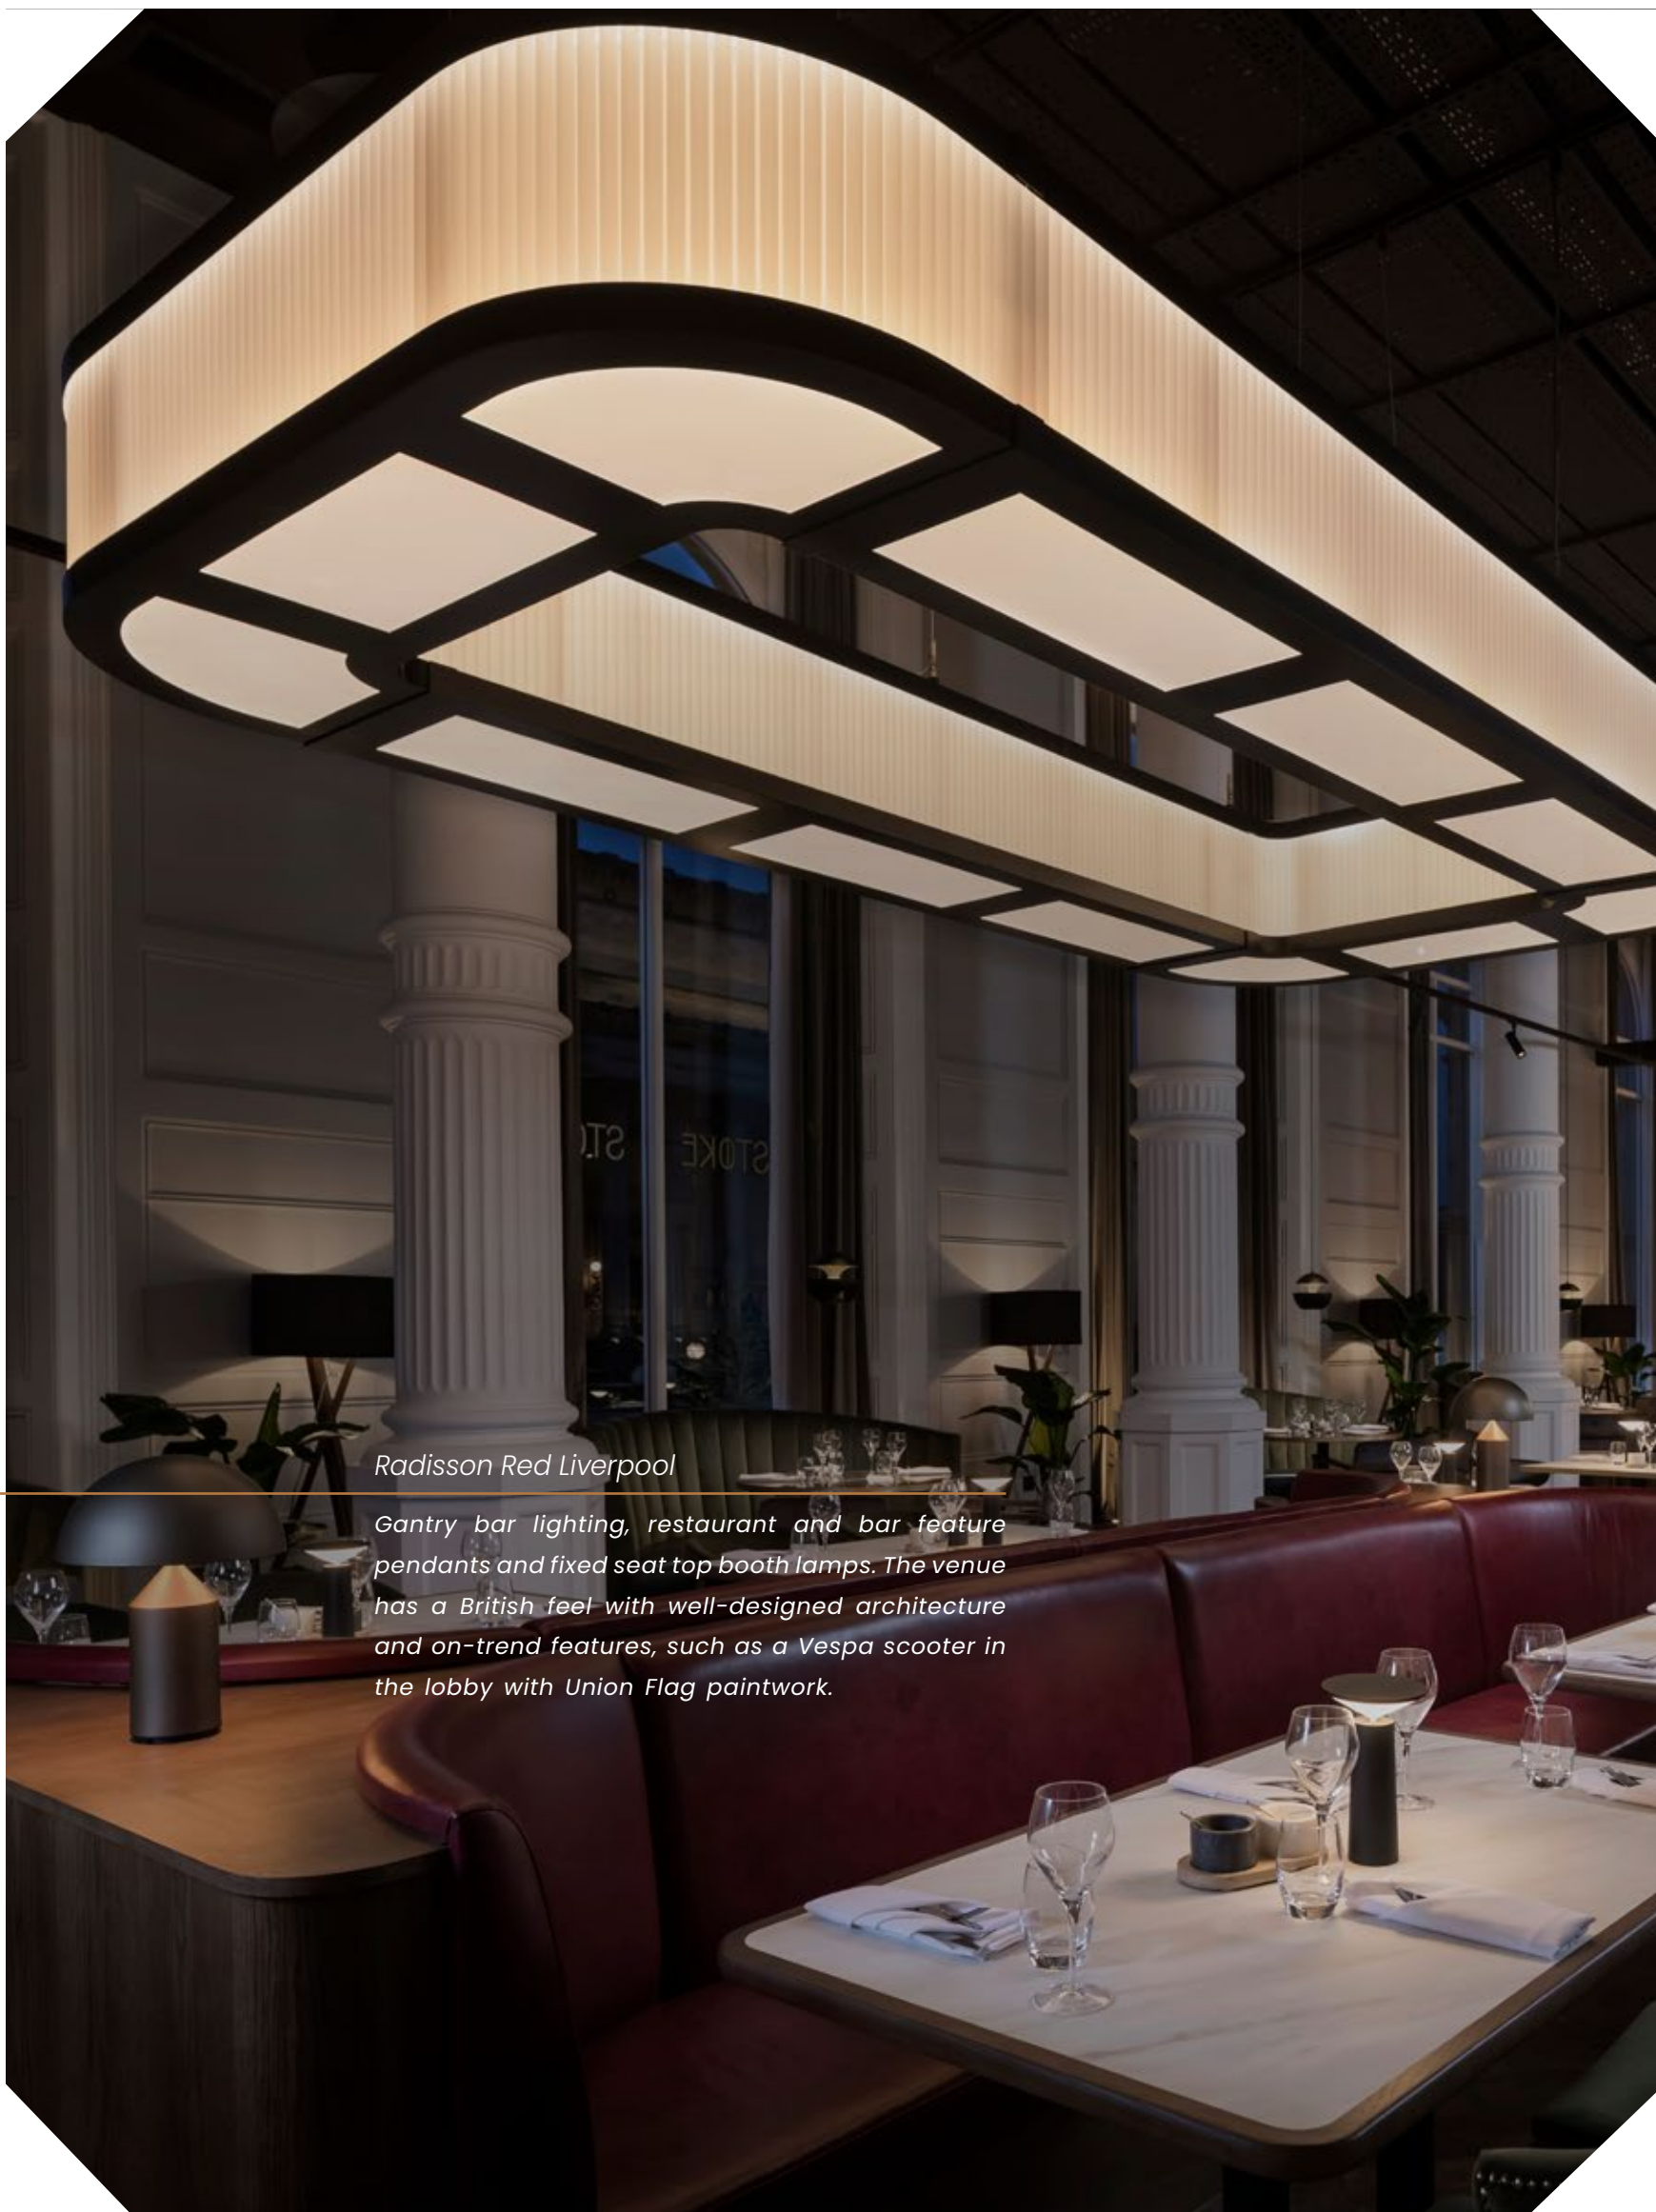

Gaia London

Bespoke globe ceiling light and matching single and multi-globe pendants, dome table lamp, fabric shade wall light, tassel trim wall light. The space exudes the warm hospitality authentic to Greek culture. Simplicity collides with luxury in every detail, blending history with contemporary design principles to reflect the understated beauty of Greece.

The Rosarium

Rattan feature pendants, large-scale private dining pendants, fixed floral table lamps, booth lanterns, parasol pendants and neon feature light. The design draws from the architecture of the quintessential English gardens of Lewis Carroll's era, where luxury and the surreal blend to create a magical effect.

Radisson Red Liverpool

Gantry bar lighting, restaurant and bar feature pendants and fixed seat top booth lamps. The venue has a British feel with well-designed architecture and on-trend features, such as a Vespa scooter in the lobby with Union Flag paintwork.

HR HIND RABII

LIGHTING STUDIO

Created in 1997, the company takes its name from its founder and current owner, who runs it together with her husband, Michel Orban. The company's history is closely linked to the life of Hind Rabii, who breathes her creativity and inspiration into each project. Born in 1973 in Morocco, she lived there until she went to Belgium, where she studied industrial engineering. The main characteristic is the variety of the materials and the elegance of the details. Worked using manual tools, the metal parts have a perfect finish, whether in gold, chrome or copper.

Ice Absolut

This Italian-made glass light fixture exudes a unique transparency and poetic charm. Crafted with meticulous attention to detail, the glasswork reveals a delicate interplay of light and shadow, creating a warm, atmospheric glow.

Espirit

These pendant lights, like jewels suspended in air, capture light with a refined elegance. The metal, hot-dip galvanized, gleams in radiant gold.. Floating gracefully, they cast a gentle glow, merging luxury and mystery, like gems suspended in the night sky.

Ya-Ya

Wall lights or ceiling fixtures, with soft and organic shapes, forms that can evolve over time, alive like branches in dynamic motion. They come to life, transforming into sculptures, changing canvases. A single source, its brilliance emerges, illuminating the space with an exquisite gesture.

Meridiana

Meridiana is not merely a sundial, though it plays with the dance of light. Here, the process is reversed: light is not the tool, but the goal. A vast disc, reminiscent of the sun, hides behind a large clock hand—or what appears to be one. From this mysterious form emanates a gentle, soothing light, never blinding, a radiance that invites contemplation rather than averting the gaze.

Fico

Like its namesake, the fig—fico in Italian—this light cradles a lush core beneath a firm, protective skin. Suspended like ripe fruit from a slender belt, it evokes the branch it might have grown from, veiled yet luminous. It blooms in three distinct forms, each shape a tribute to nature's quiet elegance.

Segno

A majestic outdoor wall light where elegance meets innovation. A large, suspended disk, like a quiet celestial body, gently guides the light with precision. Each turn of the disk creates a dance of shadows and glimmers, reshaping the contours of the garden or façade.

Blossom

Each Blossom Chandelier has been made and textured in forged steel, with every arm carrying individually formed shards of glass.

Flynn

The Flynn Lamp has a skeletal structure that's just over a metre high. Like other pieces in the Flynn Caged family, each spire is forged, beaten, then painted in a decorative finish.

PORTA ROMANA

BRITISH MADE

Founded in 1988 by Andrew and Sarah Hills, Porta Romana has continuously grown and evolved. From humble beginnings in a small UK workshop, to creating a lighting installation for the Royal Academy of Arts in London, they have designed iconic and unique pieces for countless homes, galleries and hotels across the world. At Porta Romana, every piece is handcrafted and unique. Whether you select from one of their existing designs, or customise your own, every product is made to order. This means that every detail can be tailored to work perfectly with your interior, from finishes and fabrics, to creating something completely bespoke.

Giacometti

The Giacometti Pendant is formed of two interlinking frames, each textured with geometric grooves that characterise Porta Romana's Giacometti pieces. This design can be custom sized.

Kelly

Statuesque and beautifully engineered, the Kelly is an icon of the PR collection. Introducing two new textured versions, wrapped in cane or leather which have been coloured using plant-based materials and environmentally friendly techniques.

Salperton

The Salperton lamp takes its inspiration from the compositions found in geometric abstract sculpture. Built in solid metal, textured and hand-finished in Porta Romana's painting studio, the Salperton is part of a wider family featuring wall, ceiling and table lamps.

A EMOTIONAL LIGHT

Onn

The Onn pendant lamp is one of the luminaires of the eponymous collection made of painted stainless steel mesh. The Onn Collection is extensive, offering not only suspension versions but also table, wall and ceiling models in various sizes to suit diverse spaces and styles.

a·emotional light

At a-emotional light, emotion takes on a unique value. It's the value of craftsmanship, of the singular and the exclusive. Light is a medium for evoking emotions, as music or art does. This perspective leads them to perceive their designs as bespoke creations, individually handcrafted pieces meticulously designed to illuminate spaces, touch people's hearts, and capture special moments. Each creation is proudly handmade in Spain, where artisanal tradition and contemporary design come together to shape lighting with soul.

Nevo

A collection that reflects the extreme malleability of painted stainless steel mesh better than any other. The unrepeatable organic shapes of the Nevo, with its handmade curves, make each of the lamps unique, different from all the others.

CUSTOM & BESPOKE

Customized or tailor-made lighting for your project. Modify colours, finishes, and sizes. You will be able to choose the colour that matches your project's colour palette, from the lampshade to the metallic finishes, so it can perfectly fit with the rest of the elements of your project.

Brétéma

Inspired by the superimposition of clouds and the Atlantic sky, the interplay of overlapping layers and volumes, combined with a light that bathes the ensemble, allows for unlimited configurations with a high degree of expressiveness.

Tempo Vivace

Tempo Vivace is a pendant lamp from the collection with the same name designed by Arturo Álvarez. Made of painted stainless steel mesh.

Tempo Andante

This material, crafted in fine pleats, forms two overlapped layers that create two different lamps full of dynamism.

Gea

The Gea collection takes its name from the primordial goddess, mother earth. The stylized luminaires that compose it resemble upright female figures that defy verticality, wrapped in a ribbed veil of painted stainless steel mesh.

Hipatia

Hipatia is the first portable LED lamp of the brand a-emotional light. This lamp with IP64 valid for outdoor use is a tribute to the philosopher and teacher precursor of modern science. This luminaire is handmade in Spain with high quality materials.

Coral

The Coral collection unites volumes of 10 of its pieces to generate a hanging composition inspired by the beauty of coral reefs. The natural charm of its volumes, handmade in painted stainless steel mesh and made in Spain, is intensified when combined in harmonious and ample compositions.

MATERIALS

a-emotional light work with the highest quality materials that allow them to make their lamps by hand innovating shapes and processes. They decontextualize materials such as metal mesh, wood or glass and by applying artisanal techniques, transform them, fold them and bend them until they obtain warm, delicate and vivid shapes that allow them to produce unique design lamps.

OLEV is a Made in Italy company that produces lamps with an original design and LED light. OLEV is not limited to creating simple bodies that emit light, but always adds a plus-value: some lamps can absorb noise, purify the air and imitate the variations of sunlight. OLEV design lamps that, in addition to being aesthetically original, are able to imitate the sunlight and its variations in color and intensity during the day, to create the same level of well-being that you feel in an open and natural environment.

Beam Stick Metal

Beam Stick is a series of cylindrical-shaped LED suspensions produced in a wide range of diameters and heights. The light beam, available with different powers, is suitable to illuminate a surface with punctual precision, for an essential and pure style. Beam Stick Metal features an all-aluminium body that can be customized in a wide range of finishes.

Beam Stick Glass

Illuminate your space with the Beam Stick Glass LED suspension series. Featuring a sleek, cylindrical design, this fixture provides lighting with pinpoint precision, making it ideal for accenting surfaces such as counters or tables. The elegant glass terminal at the base allows light to diffuse laterally, combining focused functionality with a soft, essential glow.

Beam Stick Nuance

Beam Stick Nuance is a suspension lamp made by mouth-blown glass. The lamp is Made in Italy with pride, using 3 different layers of expertly crafted glass to achieve the unique gradient effect. The black ring is enhanced with fluted engravings, which create geometric reflections under the light.

Blancnoir

LED pendant lamps in four different shapes with downward light diffusion. Whether suspended over a dining table or anchoring a cosy corner, the Blancnoir Pendant is designed to illuminate your home with minimalism and sophistication.

Ottomano

Ottomano is a wall luminaire, designed for indoor use. Built from aluminium, this "luminous handrail" boasts a unique and striking aesthetic. Thanks to an 8-sided ergonomic shape and a double light source, it adds functionality and style to any staircase.

*Diadema*

Light in motion. Combining rods of different sizes, the light is reflected and conveys the desired dynamism. Several variants and possibilities for customization are available.

A timeless style dressed up with design. The discovery of a fusion between shape and unexplored materials. Each of their collections are unique, just as unique is the story that gave rise to it. Since 1585, Vistosi has been shaping Murano glass, transforming its timeless magic into a continuous dialogue between liquid and solid, dream and reality. With five centuries of history woven into its name, Vistosi doesn't follow trends: it creates them, interpreting the desire for uniqueness and beauty of those who seek the extraordinary. Venice is its muse, but Vistosi is always looking to the world in search of new design frontiers.

Puppet

Collection of lamps with a blown and irregular striped glass diffuser. The three sizes of the spheres and the different cable heights are designed to create elegant compositions.

THE ART OF GLASS

The prestige that the whole world recognizes today in Venetian glass is first of all thanks to the people: the master glassmakers, keepers of local craftsmanship, are still the beating heart of the company today. Just as the furnace, the place for glass par excellence, has remained at the center of the contemporary production process.

Plissè

The silhouette and the play of overlapping different materials are evocative of the graceful and harmonious shapes of the jellyfish's movement. The blown glass of the oversized diffuser encloses an inner fabric lampshade. An effect of transparencies, shades and textures, whose preciousness makes Plissè an elegant and characteristic element of the spaces where it is installed.

reddot winner 2025

Armonia

A collection with contemporary connotations that incorporates precious historical features: those of glass working such as the "balloton" and the straight and twisted "rigadin". The collection is completed by a large new suspension in which the oval frame supports four colored and textured cylinders in pure crystal.

Futura

A collection of lamps made from a single piece of blown glass, whose particular workmanship, though, allows a double chromatic effect: transparent at the top, satin effect at the bottom.

Jube

Jube is a prestigious collection that defines timeless style. With its elegant and refined design, this exquisite series stands apart, guaranteeing a look that is both classic and perpetually in fashion.

Calypso

Calypso is a collection of lamps inspired by the Art Deco period, featuring fabrics with black and white geometric patterns combined with vibrant colours inspired by South American and tropical cultures, it results in a truly original design.

Contardi is a young company with a long history. Their first Contardi branded product dates back to 2006, thereafter the company began to constantly grow year after year, and the expansion has consolidated in the last six years. Contardi is now a well-established company headquartered in the Brianza district. Before then, Contardi had a 30-year history of successful collaborations, providing its lighting expertise to some of the most iconic companies on the Italian design scene. Contardi is now synonymous with service, quality and flexibility, having become a reliable reference point for architects, interior decorators and lighting consultants who are in search of original and well-designed decorative and functional lighting as well as an unparalleled expertise and service.

Arcipelago

Arcipelago embodies the refined aesthetic of Servomuto, featuring a satin brass body and fire-resistant Trevira CS fringes. This collection is distinguished by its curved design, allowing for harmonious compositions that seamlessly adapt to warm and enveloping colour palettes, making any space feel welcoming and sophisticated.

Stick

Inspired by the simplest of shapes, the Stick lamps start from a basic module with a triangular section - a repeated object, which allows for infinite configurations and always conveys fresh expressive power.

Clara

The lacquered metal and Vienna straw-like texture evoke a refined Italian style. With its warm and evocative glow, Clara is a lantern with immense emotional appeal, enhanced by the innovative technology employed. The diffuser is crafted from waterproof, UV-treated resin with a Vienna straw effect.

Cube

This embodies Contardi's philosophy of bringing interior design to the outside, for a functional and stylish outdoor area. The battery model presents a new and innovative ignition system, without a switch: positioning the battery body on the support alone allows automatic ignition with a slight rotation.

Muse

A distinctive and innovative lantern, featuring elements, such as the braided leather handle, for an exclusive and refined outdoor area.

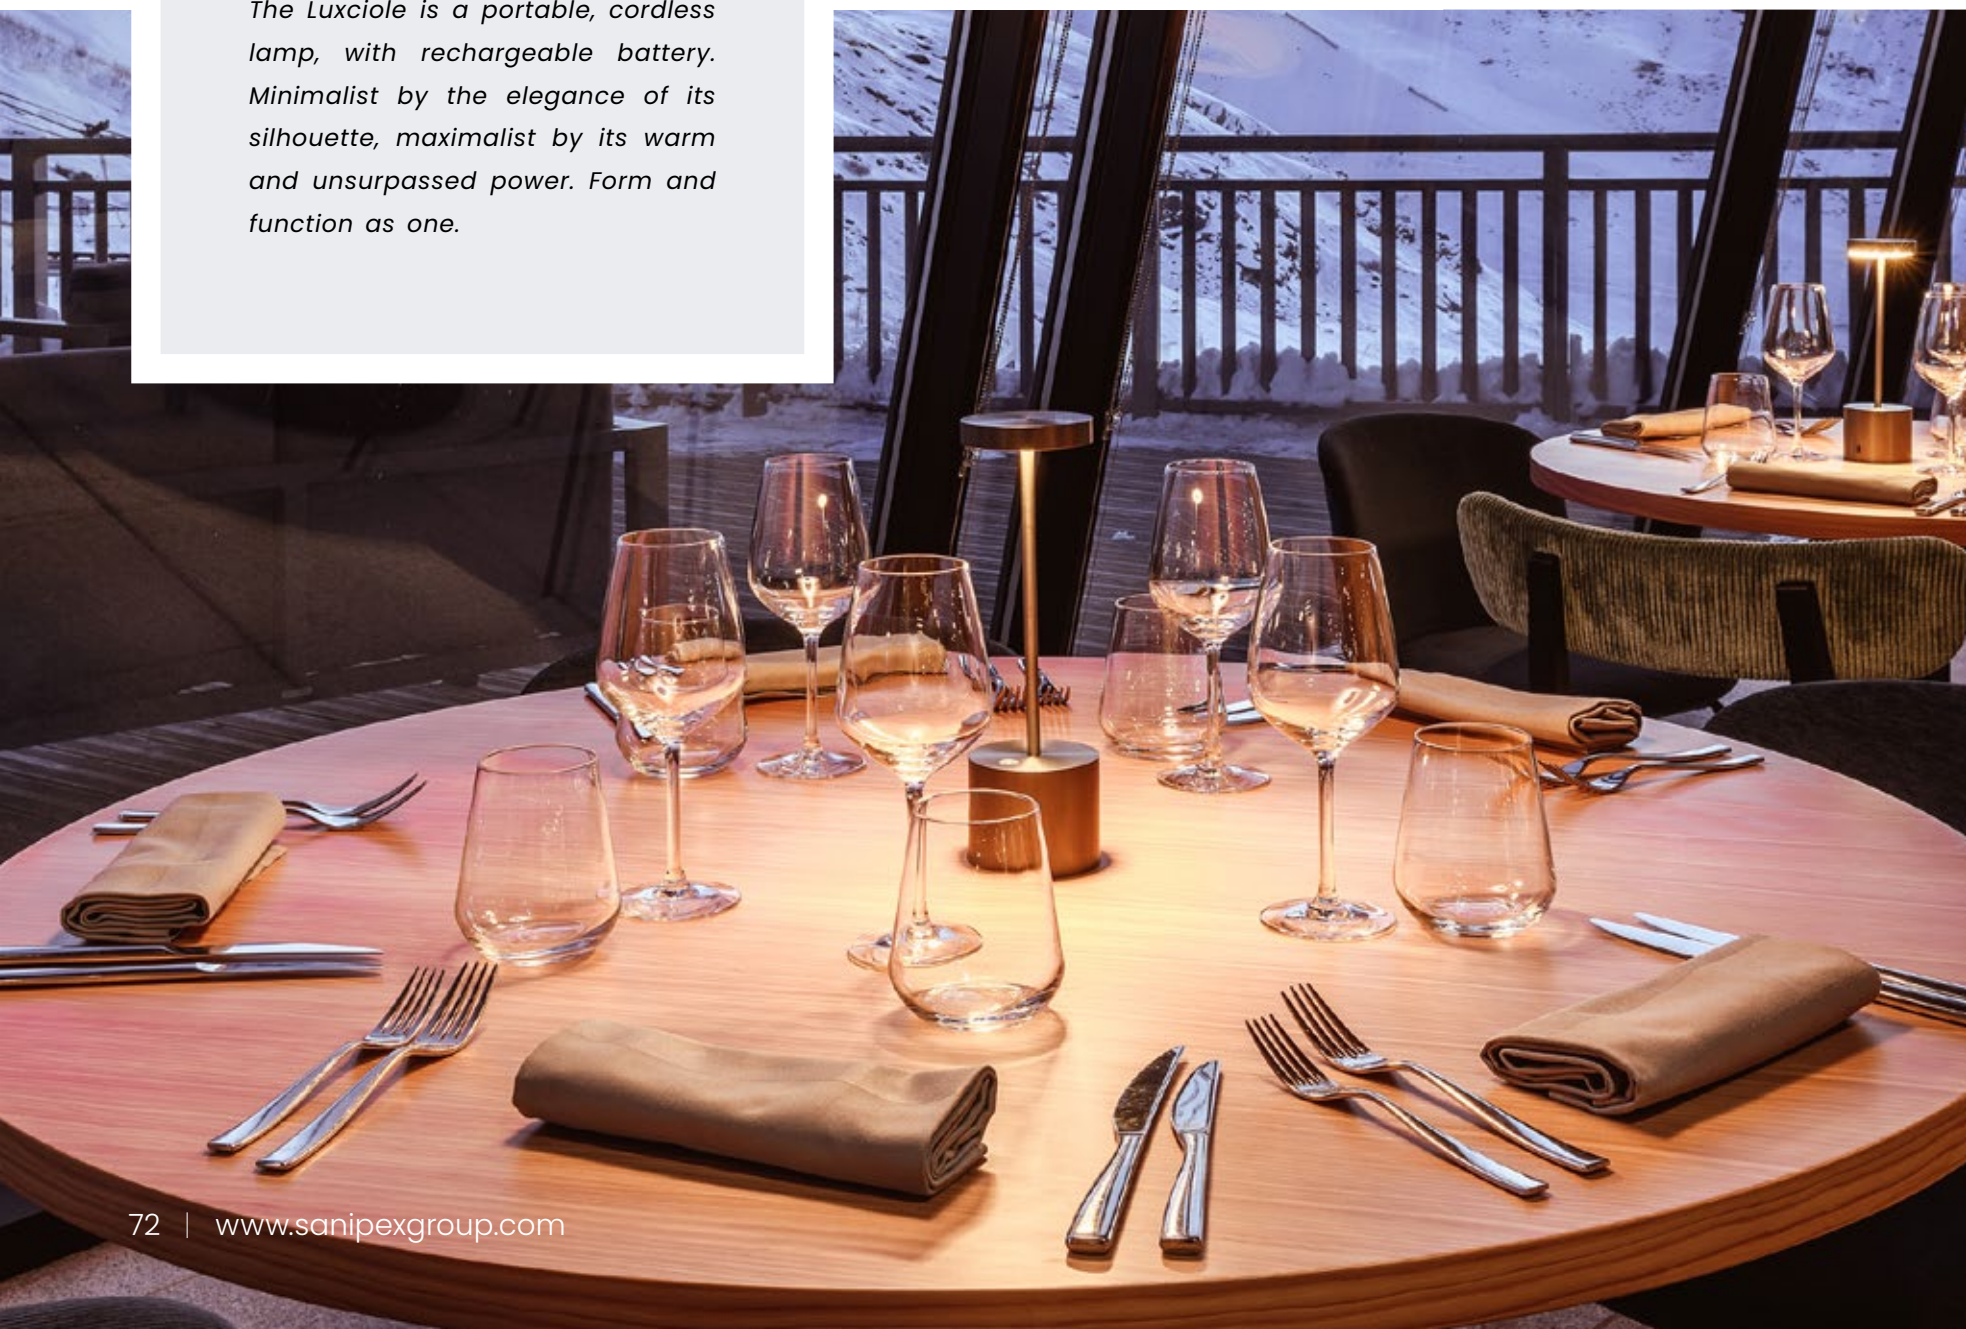

HISLE

A self-taught designer with a background in industrial drawing, Hervé Isle de Beauchaine founded the HISLE brand in 1994 with his wife, Marie de Foucauld. Guided by a minimalist vision and a passion for noble materials, he began by creating unique lighting pieces from salvaged industrial components. The brand quickly evolved toward small-series production and gained recognition through prestigious projects, blending technical innovation with artistic expression. From the outset, HISLE has embodied a singular, uncompromising vision of light. Remaining true to the brand's DNA, they carry forward its commitment to purposeful, responsible, and lasting light—guided by the founding values of simplicity, elegance, modernity, and innovation.

Luxicole

The Luxicole is a portable, cordless lamp, with rechargeable battery. Minimalist by the elegance of its silhouette, maximalist by its warm and unsurpassed power. Form and function as one.

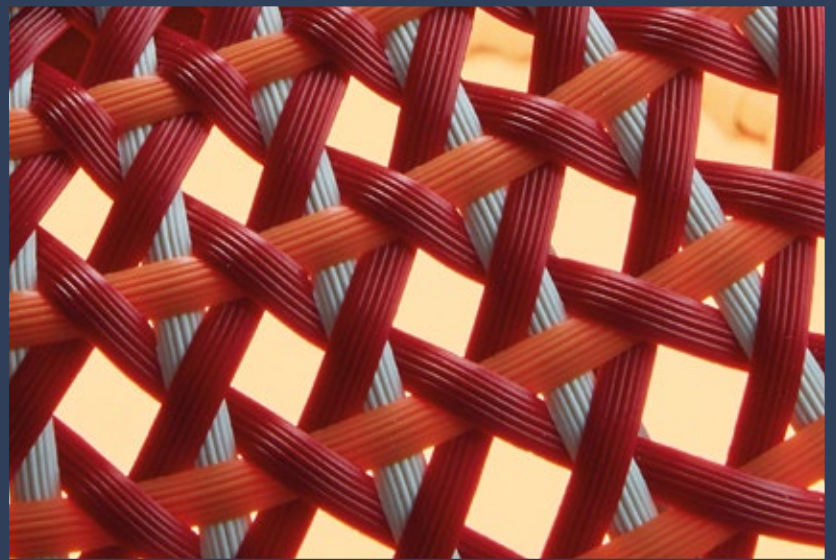

Bolacha

The BOLACHA is the perfect fit to create a sophisticated indoor atmosphere, with its rounded lampshade and anodized finish. A touch-sensitive switch at the top allows dimming.

hover

Bover is a story of entrepreneurship, learning, and courage, founded in 1996 by Joana Bover, who created the company with a clear vision and a deep entrepreneurial spirit. Over the years, they have created a space for continuous learning, where every challenge has become an opportunity to learn and grow, reflecting the passion and perseverance that define their identity. Bover understands light as a fundamental element for well-being, not only as a tool for illumination but as an essential part of quality of life. They are dedicated to creating lighting products that provide comfort, beauty, and serenity, contributing to a healthy and mindful environment. Since the beginning, they have been committed to designing timeless pieces that transform spaces, with a holistic approach that seeks to enrich daily lives.

Nans

Nans is an extensive collection of luminaires that pay tribute to a hidden and discreet place on the Costa Brava. Cala Nans is a small cove in Cadaquès, only accessible by footpaths or by sea. Nans are woven in a handmade way. They like to combine their colours and weave the weft with different openings.

Mediterrània

The Mediterrània lamp is an ode to the light, Mediterranean breeze and smell. A soft wave that pays homage to the Mediterranean light, so heterogeneous throughout the day; that light that always combines bright flashes with very warm beams, especially in the sunrise and sunset.

Amphora

The Amphora collection was designed to create warm environments for the outdoors. Its shape and size pay a subtle and discreet tribute to the terracotta amphoras that were used in the past for food storage.

Nut

The Nut is a collection of discreet luminaires that are characterized by their ergonomic and forceful body. It is ideal to be installed in gardens and outdoor environments.

Kando

Kando, a Japanese term that captures the deep emotion and satisfaction experienced in the presence of something exceptionally valuable, is the essence of Bover lamps. Designed with a focus on aesthetics and functionality, these lamps are created to generate a warm and comfortable atmosphere.

GYMKHANA

Inspired by the world, crafted for you

Founded in Dubai, United Arab Emirates, GYMKHANA is the renowned luxury outdoor brand by SANIPEX GROUP. Drawing from the very best of international design, GYMKHANA offers a comprehensive and unique collection of outdoor living products that are stylish, comfortable and highly durable. With GYMKHANA, you can transform an outdoor space into a natural extension of the interior, whether for the home, or for hospitality and commercial spaces such as hotels, restaurants, malls and beyond. Take a step into the world of GYMKHANA, where we turn the art of outdoor living into a luxurious lifestyle.

Cascais

The Cascais range from GYMKHANA features a sleek cylindrical form that blends seamlessly into modern outdoor settings. With its clean lines and soft, inviting glow, it creates ambient illumination that enhances terraces, gardens, and hospitality spaces with both style and comfort.

Oeiras

The Oeiras rechargeable table light range stands out with its distinctive silhouette. This design offers modern sophistication and subtle elegance—ideal for elevating terraces and outdoor spaces with a poised, contemporary aesthetic that blends form and function.

Lisbon

The Lisbon range brings a bold yet refined presence to outdoor spaces. It adds character and warmth—perfect for creating inviting, memorable settings in both residential and hospitality environments.

XKnightsbridge

Established in 1998, Knightsbridge is one of the UK's leading brands of electrical wiring accessories and has emerged as a first-choice supplier to the electrical industry across the UK and Europe. Knightsbridge prides itself on offering exceptional quality products, an ever-expanding line of competitive ranges to the incredible, awardwinning service that has become the envy of the industry. Discover quality switches and sockets in a compelling selection of finishes and styles to compliment brassware and hardware.

Dimmers

Set the mood with light dimmers in a choice of luxury finishes to match your décor. Perfect finishing touch to any modern home, flawless, screwless low profile metal design with matching dimmer caps.

Grid & Modular Wiring

The Grid and Modular Wiring Accessories Range offers a versatile solution, allowing you to combine switches and outlets in any configuration to suit your application.

USE ACCORDING TO IP RATING

(INGRESS PROTECTION)

OUTDOOR/INDOOR LIGHTINGS

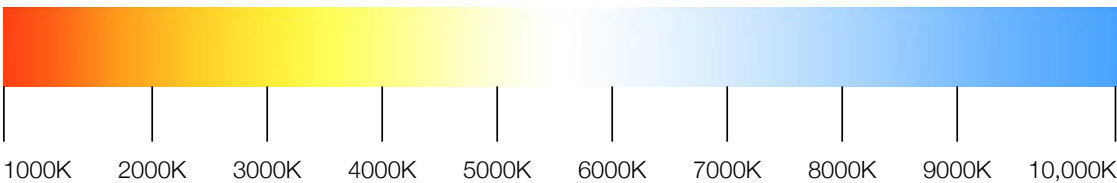

‘IP’ ratings are used to define levels of sealing effectiveness of electrical enclosures against intrusion from foreign bodies, tools, dirt, moisture and water. This international classification system, when considering outdoor/indoor lighting, largely refers to how waterproof a set of lights, or lighting accessory is. Please see the table below, defined and explained the differences of each IP.

INDOOR	IP20	Protected from touch by fingers and objects greater than 12 mm. Not protected from liquids.	 
	IP43	Protected from tools and small wires greater than 1 mm. Protected from vertical water spray less than 60°C.	  
	IP44	Protected from tools and small wires greater than 1 mm. Protected from water spray from any direction.	  
OUTDOOR	IP54	Protected from limited dust ingress. Protected from water spray from any direction.	 
	IP55	Protected from limited dust ingress. Protected from low pressure water jets from any direction.	 
	IP64	Protected from total dust ingress. Protected from water spray from any direction.	 
	IP65	Protected from total dust ingress. Protected from low pressure water jets from any direction.	 
	IP68	Protected from total dust ingress. Protected from long term immersion up to a specified pressure.	   

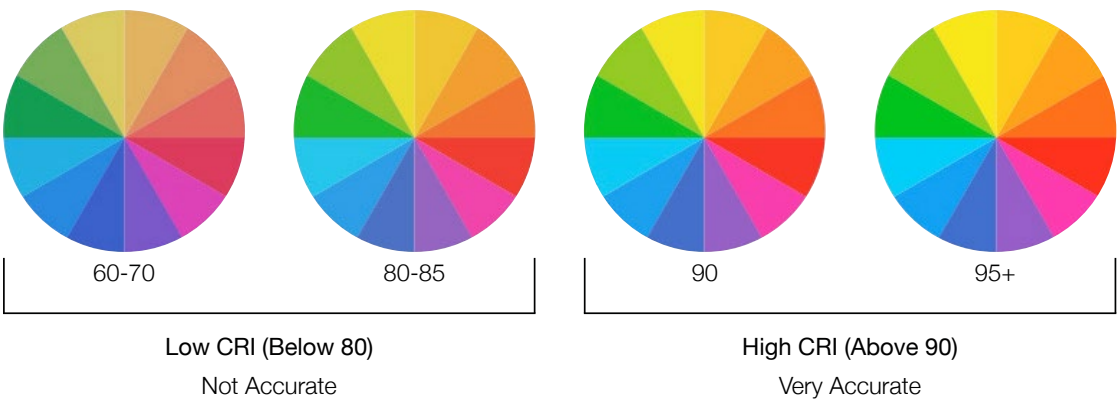

KELVIN RATING (K)

Indicates the shade of white that is given off by the light source.

COLOUR RENDERING INDEX (CRI)

Measures the ability of a light source to accurately reproduce the colours of the object it illuminates.

LUMENS (lm)

Unit of measurement for the luminous flux. This is the total quantity of visible light emitted by the light source.

POWER (W)

The method of measuring the rate of energy transfer. The more Wattage, the brighter a light is.

VOLTAGE (V)

Voltage is the pressure from an electrical circuit's power source that pushes the current to the light.

Voltage in the UAE is 230V. When the lighting fixture operates at a different voltage, a driver (transformer) is required.

POWER EQUIVALENCY

LED equivalent wattages to traditional light sources can only be approximate, as they will vary depending on the colour temperature and quality of the bulbs being compared. Incandescent light bulbs are the least energy-efficient light source, with LED Light Bulbs using just 10% of the energy to produce the same amount of light as their incandescent equivalents.

INCANDESCENT LIGHT BULB WATTAGE	LED EQUIVALENT WATTAGE
100W	10W
75W	7.5W
60W	6W
50W	5W
30W	3W
