HEV MODE

The vehicle primarily relies on electricity to seamlessly switch between driving modes, delivering a smooth experience comparable to that of a fully electric vehicle.

0 - 40km/h

Pure Electric Drive

The engine remains off while the electric motor provides the power needed to drive the vehicle.

40-70km/h

Power Generation Mode

The engine runs to produce electric power as a generator for the battery pack.

70-80km/h

Combined Performance

Both the engine and the motor work to deliver optimal performance and efficiency.

80+km/h

Engine-Only Drive

The engine alone drives the vehicle directly, while the electric motor remains idle.
