Seed Mixtures

All-Purpose Lawn Seed Mixture

Our All-Purpose Lawn Seed Mixture is crafted to ensure a vibrant lawn under various conditions. This blend helps your lawn thrive in both sunny and shaded areas, with a great balance of durability and adaptive growth.

- **30%** Kentucky Bluegrass Blend
- **15%** Creeping Red Fescue
- **15%** Turf-Type Tall Fescue
- **30%** Turf-Type Perennial Ryegrass
- **10%** Annual Ryegrass

Sunny Lawn Seed Mixture

Transform your lawn with our Sunny Lawn Seed Mixture. This carefully crafted blend is a great solution for lawns that tend to dry out from excessive exposure to the sun.

- **50%** Kentucky Bluegrass Blend
- **10%** Turf-Type Tall Fescue
- **25%** Turf-Type Perennial Ryegrass
- **15%** Creeping Red Fescue

Shady Lawn Seed Mixture

Our Shady Lawn Seed Mixture is a unique blend designed for shaded areas, perfect for giving life to less sunny spots. With an equal mix of seeds, this mixture ensures an adaptable, resilient, and attractive lawn.

- **25%** Turf-Type Tall Fescue
- **25%** Creeping Red Fescue
- **25%** Kentucky Bluegrass Blend
- **25%** Turf-Type Perennial Ryegrass

Sunny Elite Lawn Seed Mixture

Our Premium Sunny Seed Mixture is crafted for the sun-loving lawn, designed to flourish in sun-drenched locations while maintaining a great appearance. This mixture brings together an assortment of robust and beautiful grass varieties, each chosen for their unique strengths.

- **50%** Premium Kentucky Bluegrass Blend
- **25%** Turf-Type Perennial Ryegrass
- **15%** Creeping Red Fescue
- **10%** Turf-Type Tall Fescue

Shady Elite Lawn Seed Mixture

This mixture is specifically designed for those seeking an attractive lawn in less sunny areas. This unique blend combines a variety of grasses each with specific traits that make them suitable for shade tolerance and resilience.

- **35%** Premium Kentucky Bluegrass Blend
- **20%** Turf-Type Tall Fescue
- **25%** Creeping Red Fescue
- **20%** Turf-Type Perennial Ryegrass

EZ Grow Lawn Seed Mixture

The EZ Grow Lawn Seed Mixture is formulated to address rapid lawn reestablishment while ensuring aesthetic appeal. These seeds create a versatile, lush, and attractive lawn capable of speedy recovery and sustained health.

- **40%** Turf-Type Tall Fescue
- **20%** Turf-Type Perennial Ryegrass
- **20%** Kentucky Bluegrass Blend
- **20%** Creeping Red Fescue

Athletic Elite Lawn Seed Mixture (Sport Fields)

This mixture is specifically formulated to withstand high-traffic and rigorous use, making it ideal for sports fields, playgrounds, and other heavily-used areas. These components form a quick-establishing lawn capable of maintaining a strong appearance despite heavy usage.

- **60%** Premium Kentucky Bluegrass Blend
- **40%** Turf-Type Perennial Ryegrass

Low Grow Lawn Seed Mixture

Our Low Grow Lawn Seed Mixture is the ultimate solution for establishing a low maintenance, shade-tolerant lawn. These fescues create a resilient, dense lawn with minimal upkeep, thriving even in deeply shaded environments.

- **40%** Creeping Red Fescue
- **20%** Chewings Fescue
- **20%** Hard Fescue
- **20%** Sheep Fescue

Down The Middle Turf Seed Mixture (Golf)

Introducing our Fairway Turf Seed Mixture, designed to elevate golf course fairways with consistent performance. This mixture provides high turf quality, lush green aesthetics, and exceptional playability.

- **60%** Premium Kentucky Bluegrass Blend
- **20%** Premium Creeping Red Fescue
- **20%** Premium Turf-Type Perennial Ryegrass

In The Rough Turf Seed Mixture (Golf)

Introducing a specialized blend, crafted to elevate the quality of your golf course's rough areas. This mixture is designed to deliver exceptional durability, drought resistance, and lower maintenance requirements.

- **65%** Hard Fescue
- **15%** Sheep Fescue
- **20%** Chewings Fescue

Individual Seeds

Kentucky Bluegrass

Kentucky Bluegrass is recognized for its rich, dark green look and smooth texture. It creates a thick, carpet-like lawn and can thrive in different soil types. Well suited for cool climates with sufficient moisture, it's perfect for lawns, golf courses, and sports fields. Its self-repairing ability makes it resilient in high-traffic areas.

Perennial Ryegrass

Perennial Ryegrass is quick to establish and has a fine texture. It provides excellent wear resistance and tolerates heavy foot traffic. It is best suited for high-traffic areas and overseeding lawns. It thrives in cool to moderate climates and is disease resistant. It's a quick-growing option for quick results.

Creeping Red Fescue

Creeping Red Fescue is a fine-bladed grass known for its shade tolerance and drought resistance. It forms a dense mat and has a vibrant green color, perfect for shady areas and regions with cooler, wetter climates. This grass also has excellent soil-binding properties, making it ideal for erosion control.

Turf Tall Fescue

Turf Tall Fescue is a sturdy, low-maintenance grass with excellent heat and drought tolerance. It's known for its durability and adaptability. Great for lawns, parks, and sports fields, especially in regions with hot summers and limited water availability. It has a deep root system, making it drought resistant.

Call for availability on additional seeds we offer.

Approved MnDOT Seed Vendor

Sheep Fescue

Sheep Fescue is a fine-leaved grass that does well in poor soils. It has a blue-green hue and endures harsh conditions. It thrives in cooler, drier climates and has good drought tolerance. It is often used in fine-textured mixtures.

Hard Fescue

Hard Fescue is a fine-textured grass known for its low-maintenance requirements. It's drought resistant and has a fine texture. It is ideal for low-input lawns, eco-lawns, and areas with infrequent irrigation. It is well suited for cooler, temperate climates and has a slow growth rate, reducing the need for frequent mowing.

Chewings Fescue

Chewings Fescue is a fine-leaved, cold-tolerant grass that forms a dense turf. It excels in cooler climates and has good shade tolerance. It is well-suited for northern lawns, parks, and areas with partial shade. It thrives in cool, northern regions with regular rainfall. It's often used in fine-textured lawn mixtures.
