Course overview

The Certificate in Dental Radiography post-qualification course is certificated by the College of Radiographers who are the professional body for the diagnostic imaging and radiotherapy workforce in the UK.

Discover more about them [here](#)

Upon the successful completion of this 9 month course you will gain the knowledge and skills to undertake dental radiographs under prescription from the referrer.

Course structure

Throughout this course you will build a Record Of Competence (ROC) which consists of signed and verified Practical Competence Observation Reports, completed by the candidate, under supervision of a radiography qualified practitioner to undertake the following images;

7 dental panoramics

7 pairs of bitewings

6 posterior
and 6 anterior

In addition, you will also have to complete:

3 supplementary projects

8 knowledge checks

Continuous knowledge assessments throughout
the course including mock exams

50 multiple choice questions

Learning Outcomes

On completion of the course you will:

Gain the knowledge of patient considerations that need to be taken into account

Know what equipment is used and how to maintain it

Understand the properties of radiation and its effects

Have knowledge of risks and maintain operator and patient safety

Be able to participate in clinical audits

Understand the role and responsibility of all the team in regard to dental radiography

Understand the importance of relevant legislation

Understand how to take a variety of radiographic images using a variety of techniques

What's included

- ✓ Latest course syllabus materials
- ✓ Regular live online classes
- ✓ Full support from our industry expert tutors
- ✓ 24-hour access to our online e-learning material
- ✓ Assignment marking with comprehensive feedback

Course delivery

The course will run over 9 months and the delivery will be online via webinars led by one of our expert qualified radiography teachers. You will be required to attend 2-hour live webinars once a month, as well as accessing further learning through our online radiography content platform.

The 50 multiple choice questions will be completed.

Entry requirements

You must be a General Dental Council registered professional.

Your dental practice must be willing to allow you to take a variety of radiographs for patients and to supervise you throughout your course. They can refer the supervision to a suitably qualified registrant, such as an Associate Dentist, Dental Therapist, Dental Hygienist, Dental Nurse or any medical person who holds a dental radiography qualification. You must have regular access to a computer/laptop and the internet to undertake this online course.

Intake points

The course starts every January, April, July and October.

Delivery model: 2-hour live webinars every month supported by our online radiography content platform and the completion of an online Record Of Competence (ROC).

Enrolment process

You can enrol either online or over the telephone. You will be required to complete an application form online and provide a copy of your GDC registration certificate. Your supervising employer will need to sign a consent form to agree to you completing the course under their supervision.

Course fee £650 plus VAT including exam fee

If you require any support please contact our Onboarding Team at academysupport@tempdent.co.uk or 020 8371 6700.
