

Cold Rooms - Air Conditioning - CCTV

About us

We are market leaders and specialists committed to providing a complete range of efficient modular cold rooms and portable cold stores to suit any application. Our team collectively have over 45 years of experience in the cold storage market and provide a professional, high standard of service.

Driven by innovation, quality and a dedication to exceed customer expectations. We are committed to minimising our environmental impact through sustainable practices and responsible business operations, utilising the most efficient refrigerant gases.

We provide modular build cold rooms and portable cold store solutions to the food, pharmaceutical, raw pet food, catering, airline and various industries where maintaining specific temperature conditions is crucial for preserving product quality and safety.

All of our rooms are capable of a variable temperature from +20°C to -25°C with a temperature control and alarm system as required.

Both modular build rooms and portable cold stores are capable of internal or external application. We provide rental, sale and lease on all equipment, and all our rooms are PU and PIR UK-approved fire rated.

We specialise in providing a free, full site survey to offer our help and advice, enabling us to provide you with a comprehensive, accurate quote and drawing the first time around.

With our in-house and external approved and dedicated contractors, your cold room will be installed quickly and efficiently, to an extremely high standard, on time and on budget. Portable Cold Stores can provide a complete turn-key solution to any project.

Sustainability

In the dynamic landscape of ever evolving refrigeration technology, PCS stands out as an industry leader committed to green credentials. With a focus on the latest and most efficient gases, we deliver sophisticated, energy-efficient solutions, that not only meet the highest performance standards, but also contribute to a sustainable future.

We understand the importance of minimising environmental impact. Our refrigeration units are not only energy-efficient but also designed with low noise emissions. This dual focus not only reduces operational costs for businesses, but also contributes to a quieter and more sustainable working environment.

All our pharmaceutical rooms are MHRA compliant and can be temperature mapped if required.

Proactive regular maintenance by our in-house PCS engineers, ensures the longevity of your refrigeration units. This approach not only provides optimal functionality but also contributes to sustainability by reducing the need for premature replacements. Regular maintenance is a crucial aspect of PCS's commitment to providing sustainable solutions for the long term.

Portable cold storage solutions are integral to modern supply chains, ensuring the safe and reliable transport of temperature-sensitive goods across various industries. Advances in technology continue to improve the efficiency and sustainability of these systems.

PCS pride themselves in sourcing equipment from the United Kingdom and European suppliers, reducing impact on transportation costs and the environment.

Modular Build Cold Rooms

Our modular build cold rooms are flat packed cam-lock panels, available in bespoke sizes and assembled on site by our experienced team. These modular build cold rooms can be designed and made to fit in any space. Choose from sliding, hinged, single, double or pallet-wide doors, positioned to the side or end of the room. Plastic strip curtains come as standard and vision windows are available on request.

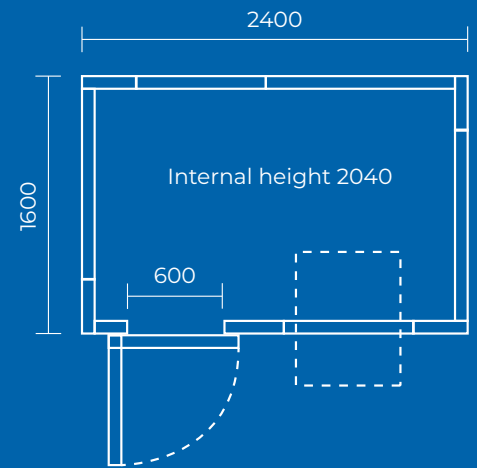

We have teamed up with recognised market leaders including Kingspan, Scandia and Rivacold, to offer the very latest in design and technology. Choose from our three ranges, all available in various sizes to fit your requirements. Contact us for further details.

Economy Range

Our Economy Range offers flexibility and better space optimisation, particularly for smaller spaces, and benefits from short lead times, which are always in stock in our UK warehouse.

Features and benefits

- Chiller, freezer and ambient options
- Available to fit any size
- Polyurethane food-safe panels, 80 or 100mm thick
- Antibacterial finish
- Various doors available (hinged, sliding, left-or-right opening) including locks, kick plate, auto-close, and emergency release as standard
- Chillers are available with or without flooring, subject to application
- Bespoke shelving available
- Low noise and latest R290 low GWP refrigerant gas
- Indoor and outdoor weatherproofed options
- Floor panels have a resistant non-slip phenolic resin with a Class 3 anti-slip classification certificate (the same required in outdoor swimming pool areas), with stainless steel finish or super-reinforced concrete flooring recommended for high-traffic areas, available thickness 80 or 100mm
- Our economy range rooms are available in the following heights: 2000mm, 2200mm, 2400mm and 2600mm (external height - higher rooms are available)
- LED lighting as standard
- Glass doors available for point-of-sale for both chilled and frozen applications

Standard Range

Our Standard Range, like all our rooms, are adaptable to suit your requirements.

Features and benefits

- Chiller, freezer and ambient options
- Available to fit any size
- Fire rated cam-lock green foam PIR panels in 80mm, 100mm and 150mm
- Antibacterial, wipe clean finish
- Various doors available (pallet-wide, auto-rapid rise doors, personnel hinged, sliding, left-or-right opening) including locks, kick plate, auto-close, and emergency release as standard
- Chillers and ambient rooms are available with or without flooring, subject to application
- Bespoke shelving and pallet racking available
- Low noise and latest R290 low GWP refrigerant gas
- Indoor and outdoor weatherproofed options
- Floor panels have a resistant non-slip phenolic resin with a Class 3 anti-slip classification certificate (the same required in outdoor swimming pool areas), with stainless steel finish or super-reinforced concrete flooring recommended for high-traffic areas, available thickness 80 or 100mm
- Standard range rooms available in heights from 2000mm up to 6300mm (external height)
- LED lighting as standard
- Glass doors available for point-of-sale for both chilled and frozen applications

Premium Range / Large Projects

Suitable for large bespoke projects, chillers, freezers and production areas are built to any shape and size. Using the global industry's superior PIR panels for superior fire protection and unrivalled thermal performance (reaction to fire classification B-s1,d0).

Features and benefits

- Chiller, freezer, ambient, and production options
- Glass doors available for point-of-sale for both chilled and frozen applications
- Indoor and outdoor weatherproofed options
- Rooms available to fit any height required, up to 13 metres
- Chilled and frozen, auto rapid rise or sliding doors (manual or auto)
- UK insured certified PIR fire-rated panels
- Antibacterial, wipe clean finish
- Available to fit any size
- Various floor finished available
- Bespoke shelving/racking available
- Low noise
- LED lighting as standard

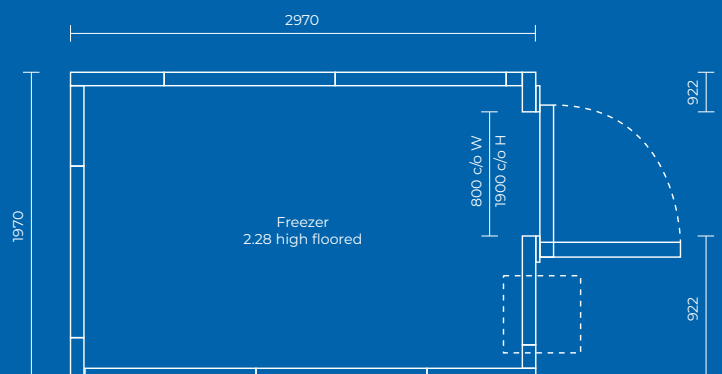

Optional Extras

- Ramps for easy access.
- Reinforced flooring for heavy duty use, suitable for pump trucks
- Internal ceiling support beams
- Advanced systems can include temperature monitoring and control mechanisms, allowing users to track and adjust the temperature remotely
- Weatherproofing options for external application
- Vision windows

Maintenance and Servicing

24 hours, 7 days a week, our customers have peace of mind with our proactive and reactive service, offering one year parts and labour guarantee as standard.

Additional service plans are available for years 2, 3 and 4, which can incorporate our monitoring system for both portable cold store and modular build rooms.

PCS Air Conditioning

At Portable Cold Stores we don't just supply modular cold rooms we also provide both Domestic and Commercial air conditioning. All our installation engineers are electrical and F-GAS qualified to ensure a smooth professional installation. Available for Sale or Rent-to-Buy.

Features and benefits

- All PCS selected systems are smart, quiet and have stylish climate control for any room. They are the perfect wall mounted or ceiling mounted cassette systems for people that want simple Cooling and Heating, operated by a remote control and wi-fi app.
- Designed to suit a variety of room sizes, from compact bedrooms to larger living areas, it combines performance, efficiency and a modern aesthetic to fit seamlessly into your lifestyle.
- PCS also supply commercial facilities from food preparation, pharmaceutical and office temperature controlled areas.
- All PCS systems are installed with either black or white external and internal plastic trunking so that no pipes show. On commercial applications lagged pipe work is fixed to cable tray ensuring a neat and tidy installation.
- All systems provide the latest technology, filtered low noise units offering rapid heating and cooling specifically sized for the type of room combined with latest Wi-fi App technology for ease of control as well as each unit having its own remote controller.
- PCS offer free site surveys to ensure correct sizing for the room, which can be multiplexed to have multiple indoor units from one external condenser unit.

Daikin, Midea & LG models

- Dependent upon suitability and availability.
- Our models are specifically selected for their:
 - Draught-free technology
 - Energy efficiency
 - Quiet operation
 - Smart controls (WI-FI compatible with Smartphone app)

Maintenance and Servicing

Full service packages are available on all our Cold Rooms and Air Conditioning. PCS can offer yearly servicing, as well as call outs and repairs. This gives our customers full peace of mind with proactive and reactive solutions.

CCTV

PCS can supply and install CCTV to your required location.

Features and benefits

- Superior imaging sensors
- Wide angle lens
- Smart IR night vision
- Super low light sensors
- 2 way audio
- Vandal resistant
- Weather resistant for indoor and outdoor use
