

# COMPANY PROFILE

---

**Company Name:**

Repaautomate (Pty) Ltd

**Website:**

[www.repaautomate.co.za](http://www.repaautomate.co.za)

# ABOUT US

Repautomate was founded on the belief that people should spend less time on repetitive administration and inefficient processes and more time on work that creates value and brings innovation and fulfillment. We combine practical operational thinking with automation, artificial intelligence and software implementation to help businesses improve how information, tasks and decisions move through the organisation.

Our work is particularly focused on the space between the software and the people using it: where processes break down, information gets duplicated, responsibility becomes unclear and employees create manual workarounds just to keep the operation moving.

Based in South Africa and working with businesses locally and internationally, Repautomate helps organisations reduce repetitive admin, improve visibility and streamline operations through automation, AI and custom business systems.

# WHAT WE DO

## AUTOMATION

Make repetitive processes move without someone having to push every step manually.

**Workflow Automation**

**Digital Data Capture**

**Automated Reporting**

**Live Dashboards**

Page 3

## AI INTEGRATION

Put AI to work inside business processes, with the data, controls and people required to make it secure and practical.

**AI Systems Deployment**

**AI Governance & Risk**

**AI Skills Training**

Page 4

## CUSTOM BUSINESS SYSTEMS

Build the operational system your business needs when spreadsheets and off-the-shelf software no longer fit the process.

**Custom Business Systems**

**Client Portals & Web Apps**

**Operational Systems**

**CRM & Internal Tools**

# AUTOMATION

We design workflow automation around the way your business already operates. From routine admin and approvals to system updates, follow-ups and document generation, the aim is to remove repetitive manual work while keeping people involved where judgement and control are required.

## Workflow Automation

Make repetitive processes move automatically

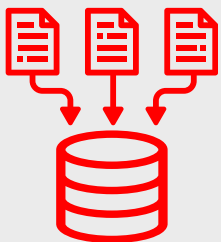

- Automate recurring tasks, reminders and follow-ups
- Route approvals, handovers and escalations
- Create and assign tasks based on defined triggers
- Keep records and workflow statuses updated automatically

## System & Data Integration

Connect the tools your business already uses

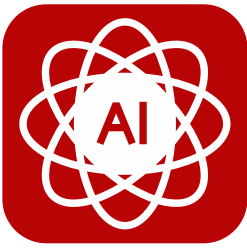

- Move data between forms, spreadsheets, databases and business systems
- Connect CRM platforms, web applications and API-enabled software
- Reduce duplicate data entry across disconnected systems
- Trigger actions automatically when information changes

## Documents, Reporting & Process Outputs

Turn captured information into useful outputs

- Automatically generate documents, reports and confirmations
- Send notifications and alerts when defined conditions occur
- Feed workflow data into dashboards and KPI tracking
- Build scheduled processes that run daily, weekly or monthly

# AI INTEGRATION

We connect AI to the systems, data and workflows your business already uses. From internal assistants and document processing to reporting, customer support and workflow automation, the aim is to make AI useful inside your existing operation rather than add another disconnected tool.

## AI Governance & Risk Readiness

For safe, structured AI adoption

- Implement AI usage policies and governance frameworks
- Staff training on ethical and responsible AI use
- Risk assessment and mitigation planning
- Custom policy documentation for internal rollout

## AI System Design & Deployment

Custom AI tools that work how you work

- Build and integrate AI assistants, bots, and automation tools
- Examples include lead generators, internal helpdesks, and onboarding assistants
- Connect to your existing systems and data
- Ongoing support and refinement available

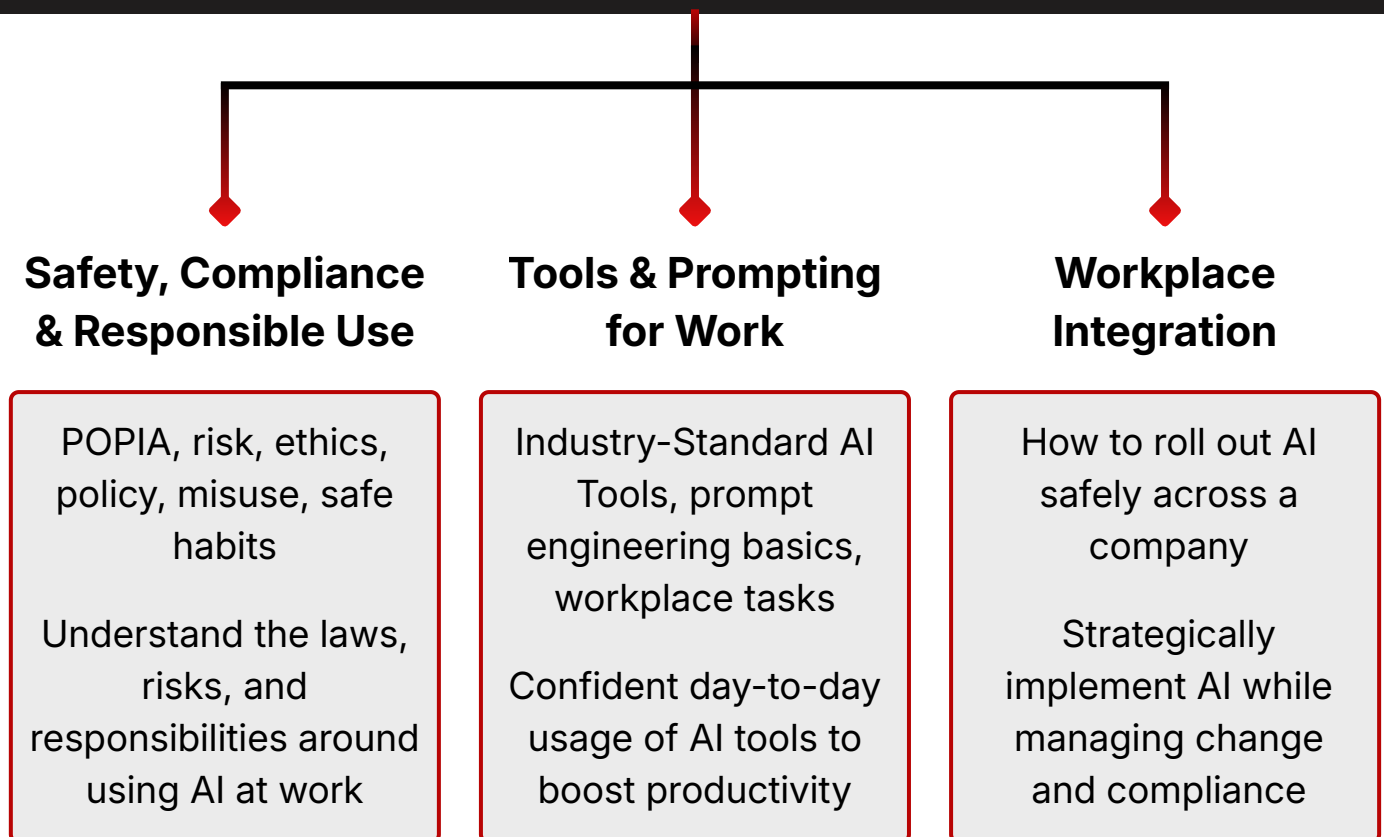

# AI SKILLS TRAINING

In addition to our automation and software development services, we offer specialized Workplace skills training.

Choose from our suite of AI training services to drive efficiency, accuracy, and long-term success in your business.

AI upskilling tailored to your industry. Teach staff how to use AI tools effectively. Get role-based templates for admin, sales, support etc. and practical exercises to build AI confidence. With optional refresher training or cheat sheets

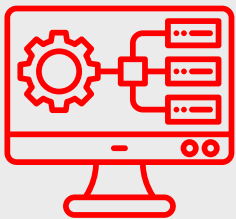

Repautomate (pty) Ltd offers short courses, these short courses are not credit-bearing, and do not lead to formal qualifications on the National Qualifications Framework (NQF). Delegates who successfully complete a short course and comply with the related assessment criteria (where applicable) are awarded certificates of successful completion and/or attendance by Repautomate (pty) Ltd.

# CUSTOM BUSINESS SYSTEMS

We design business systems around the way your organisation actually works. When important processes are spread across spreadsheets, emails, forms and disconnected software, we can bring them together into one structured environment without unnecessarily replacing tools that already work well.

## Internal Operations Systems

Bring day-to-day processes into one controlled system

- Manage records, tasks, approvals and recurring processes
- Create role-based access for different users and departments
- Replace fragmented spreadsheets and manual workarounds
- Keep operational information in one structured environment

## Customer Portals & Web Applications

Give employees or customers a system built around their needs

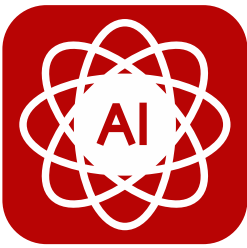

- Secure portals for requests, documents and information
- Custom forms, dashboards and user interfaces
- Track progress, activity and communication
- Connect portals with existing systems where suitable

## CRM, Ticketing & Custom Management Tools

Build the functionality your existing software is missing

- Custom CRM and lead-management workflows
- Ticketing, maintenance and service-management systems
- HR, compliance, asset and project-management tools
- Combine automation, dashboards, reporting and integrations in one system

# WEBSITE DEVELOPMENT

Before you can leverage advanced AI or workflow automation, your business needs a modern, high-performance digital hub. We build secure B2B websites, client portals, and web applications that integrate seamlessly with your internal tools; and we handle the hosting and maintenance so you never have to worry about downtime

## Business Website

A professional 5-page website for businesses that need a clean online presence.

Pages: Home, About Us, Services, Contact Us + 1 extra page (e.g. Blog or Gallery)

- SEO setup
- Performance optimisation
- Security optimisation

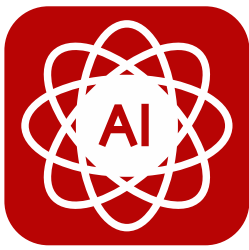

## E-Commerce Website

A 5-page website with an online store for businesses that want to sell products online.

Pages: Home, About Us, Services, Contact Us, Shop

- SEO setup
- Performance optimisation
- Security optimisation
- Full Online Commerce setup
- Product titles, categories, attributes/specs, brand, and tags setup
- Up to 20 products loaded

# WEBSITE MAINTENANCE & HOSTING

Before you can leverage advanced AI or workflow automation, your business needs a modern, high-performance digital hub. We build secure B2B websites, client portals, and web applications that integrate seamlessly with your internal tools; and we handle the hosting and maintenance so you never have to worry about downtime

## Standard Website Maintenance

Includes:

- Core updates as needed
- Plugin & Theme updates
- Diagnosis and fixing of issues caused by standard updates or normal site operation
- Basic text, image, and layout updates & minor edits to existing pages
- Up to 5 page edits per month

## Website Maintenance + Store Support

Everything in Standard Website Maintenance, plus upgraded support limits and added store support:

- Up to 10 page edits per month
- Up to 5 product edits per month
- Tax setting adjustments
- Checkout field adjustments
- Basic store/configuration tweaks
- Similar E-Commerce-related changes

## Managed Web Hosting

Your hosting shouldn't be another system you have to learn or maintain. We take care of the technical side of keeping your website and email running, so you have one point of contact when something needs to be set up, changed or fixed. Includes secure website hosting, SSL, email hosting, website backups, hosting setup and configuration, email account creation, and ongoing technical assistance.
