THE DIFFERENCE O'DAY'S MAKES

O'Days, Inc. provides a total client support program for the industrial uniform and linen supply industries' transportation, garment storage, and garment dispensing needs. We have lockers, carts, and racks to suit your every garment storage and dispensing need.

As our client, you receive *The Difference O'Day's Makes*, our total support program for the uniform industry. An O'Day's representative will work with you and give you the personal attention you need to ensure you receive the best value solution to your needs.

O'Day's offers a complete line of new products. We provide a 100% satisfaction guarantee on every product we sell and every service we perform. We encourage you to compare our products and services with our competitors. You will find that O'Day's is the best!

ERGONOMICS & SAFETY

O'Day's Inc. is dedicated to helping reduce employee strain and injuries by facilitating a safe and ergonomically correct workplace.

Locker Design:

The hanging bars in our lockers have more clearance between the top of the bar and the shelves which allows users to keep their wrists in a more natural position. No unnecessary bending is required to load uniforms in the lockers.

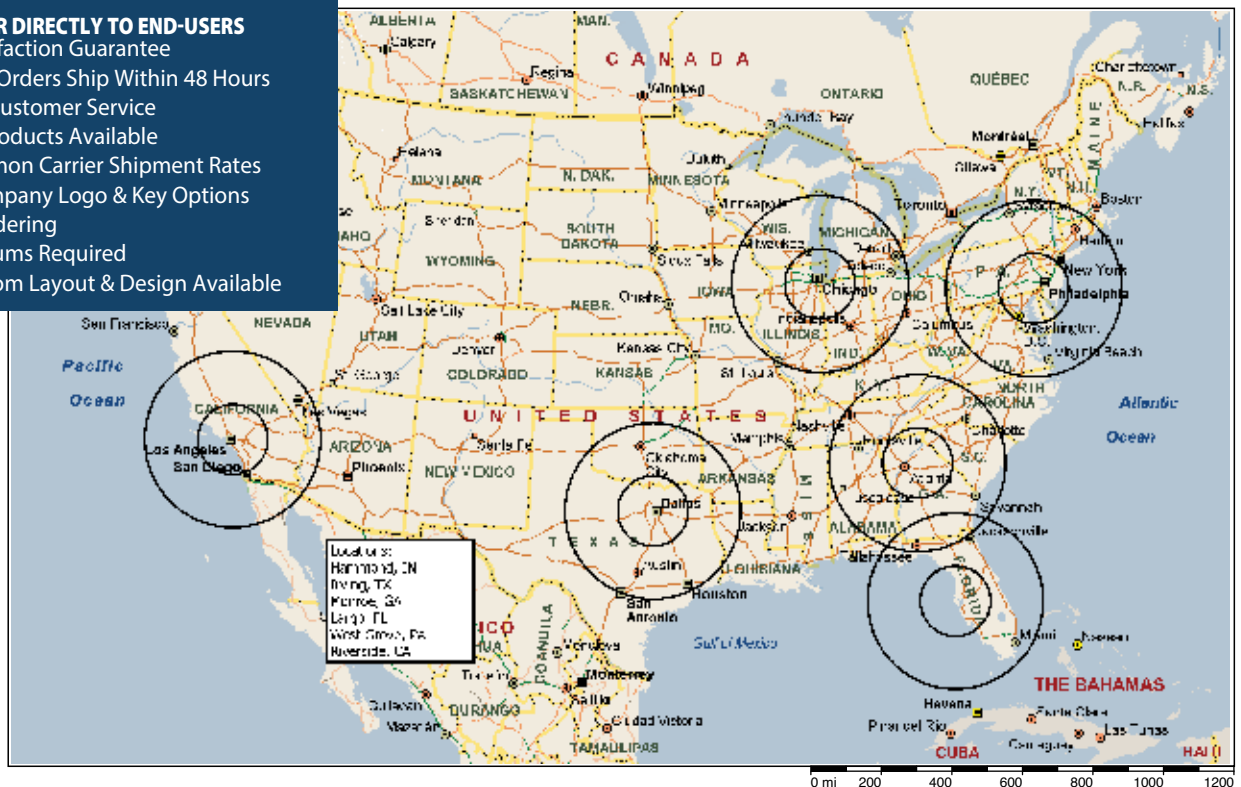

Maxi Soil Drops have an optional rising shelf to keep clothes at a comfortable working height to avoid unnecessary bending. In order to prevent twisting, which can needlessly tire Route Reps, the route cart work top allows garment sorting and scanning from a standing position.

Cart Design:

CAD software reviews the design and dimensions of a cart prior to manufacture to see if it is prone to tipping hazards. Handles on carts are placed at correct ergonomic heights and angles. Casters are selected to minimize push and pull forces which help keep employees working efficiently all day long.

DARCOR CASTERS

Wheel technology that exceeds ergonomic mobility standards

- High performance, lower rolling resistance, longer lasting, quiet, and shock dampening casters
- Reduce overexertion, repetitive strain injuries, and downtime

BENEFITS OF DARCOR CASTERS

- Designed for the lowest push/pull forces
- Heavy-duty construction
- High tolerance for shock and impact loading
- Engineered with workplace ergonomics in mind

KINGPINLESS (KP)

- Capacity: 400–1000 lbs. (180–450 kg) per caster
- 1/2" (12.7 mm) axle
- Noise/chatter reducing design
- Virtually noise free
- Double row ball bearing swivel
- Grease fitting in swivel
- All swivel parts case hardened to Rockwell 62C
- Low maintenance and resistant to dirt and other contaminants
- The brake can be configured to be a toe locking, central locking or 4 position locking brake
- Ideal where shock and heavy loads are present
- Commonly used for heavy-duty carts and dollies, and tool and die carts

SOLID ELASTOMER WHEEL (SE)

The Solid Elastomer (SE™) wheel is the industry leader in applications demanding the lowest rolling resistance for heavier loads. It requires only 20 lbs. of force to move a one-ton (1000 kg) load and only 10 lbs. to keep it moving. The SE™ wheel provides excellent shock-absorption properties, wears like iron and is able to withstand harsh chemicals and extreme temperatures.

NEOPRENE WHEEL (D)

The Neoprene wheel (D) is superior for all floor surfaces and ergonomically designed for excellent mobility and resistance to wear. These quiet and easy rolling wheels are very shock absorbing, non-marking and will reject floor debris, roll over screws, metal or glass fragments, and resin pellets. They are virtually cut proof and resist a wide range of chemicals and cleaning compounds. The Neoprene wheels' smooth ride have redefined the function of the caster in material-handling applications.

DUAL WHEEL KINGPINLESS (KP2)

- Capacity 1000-1600 lbs. (455-727 kg)
- 1/2" (12.7 mm) Grade 8 axle bolt
- Provides superior swivelling capability
- Able to carry an increased load capacity
- Precision sealed bearings in wheels
- Hardened dual raceways
- Extremely low maintenance required
- Ideal for heavy loads requiring extremely low swivelling forces
- Ideal for efficient movement of heavy materials and assemblies

PRECISION SEALED BALL BEARING (P)

- Offers extremely low rolling resistance and requires no lubrication or maintenance
- Ideal for applications that have medium loads, side thrusts, and high speeds
