

JTB EXIM
— Beyond Export, Beyond Expectations —

2025

JTB EXIM

JTB Exim is an Indian proprietorship firm established in 2025, specializing in the export of premium food and agricultural products.

www.jbtexim.co.in

JTB Exim is an Indian proprietorship firm established in 2025, specializing in the export of premium food and agricultural products. We are committed to delivering quality, consistency, and trust across global markets. Our product portfolio includes frozen peas, bananas, tamarind seeds, organic strawberry jam, organic jaggery, organic turmeric powder, ginger, raisins (Manuka), organic honey, organic moringa soup powder, organic shatawari, and natural organic strawberry.

With a strong focus on export and import operations, we bridge the gap between Indian agricultural excellence and international buyers. Our founder, Aishwarya Prasad Kadam, brings over 2 years of experience and a background in computer science, ensuring a tech-enabled, efficient supply chain. We believe in transparency, quality assurance, and customer-centric service, making us a reliable partner for global buyers.

Our carefully sourced range includes frozen vegetables, organic superfoods, and natural ingredients, all meeting international quality standards. With a commitment to purity, sustainability, and customer satisfaction, we strive to be a reliable partner for global buyers.

Every product is procured from trusted farmers and certified suppliers who follow ethical farming and quality cultivation practices. We ensure that each batch undergoes strict quality checks before packaging and dispatch, maintaining freshness, hygiene, and nutritional value throughout the supply chain. Our export process is designed to meet international regulations and customer specifications, ensuring timely delivery and complete satisfaction.

Every product is procured from trusted farmers and certified suppliers who follow ethical farming and quality cultivation practices.

OUR PRODUCTS

FROZEN PEAS

Premium frozen peas, harvested at peak ripeness and flash-frozen to lock in sweetness and nutrients. These vibrant green peas are a versatile kitchen staple, perfect for soups, stir-fries, or as a quick side dish. Naturally rich in plant-based protein, fiber, and vitamins A, C, and K. Our peas are carefully sorted and cleaned, with no additives or preservatives. The freezing process preserves the garden-fresh taste, making them a convenient and nutritious choice year-round. Ideal for healthy meals, they cook in minutes and add a pop of color and sweetness to any recipe. Sustainably sourced from trusted farms, these frozen peas are a pantry must-have for busy home cooks.

BANANA

Naturally sweet and creamy bananas, packed with essential potassium, vitamin B6, and dietary fiber. Our bananas are carefully handpicked at the ideal ripeness to ensure perfect flavor and texture. They are a delicious on-the-go snack, smoothie base, or healthy baking ingredient. Grown using sustainable farming practices, these bananas

are free from artificial ripening agents and pesticides. Their natural sweetness and soft texture make them a favorite among all ages. Enjoy them fresh, sliced over cereal, or mashed into pancakes. With a rich source of antioxidants and prebiotic properties, they support digestive health and provide a natural energy boost any time of day.

Premium tamarind seeds, sourced from mature tamarind pods. These seeds are traditionally used in natural remedies, pickling, and spice blends. They have a mild, earthy flavor and a firm texture. Our tamarind seeds are carefully cleaned, sun-dried, and sorted to ensure the highest quality. Rich in antioxidants and minerals, they are often ground into powder for use in digestive tonics or as a natural thickener in chutneys. Also used in some traditional cuisines for their unique sour undertone. Store in a cool, dry place. These seeds are a versatile pantry ingredient for those who appreciate authentic, wholesome foods and natural cooking traditions.

TAMARIND

Tangy, rich tamarind pulp with a distinct sweet-sour flavor profile. Our tamarind is carefully processed from the mature fruit, retaining its natural fiber and nutritional benefits. A key ingredient in many global cuisines, it adds depth to curries, sauces, marinades, and refreshing drinks. Rich in tartaric acid, potassium, and magnesium,

tamarind supports digestion and is a natural source of antioxidants. This versatile fruit paste is perfect for those who love authentic Asian and Latin American cooking. It comes in a convenient block form, ready to be soaked and strained for fresh tamarind juice or paste.

Luscious organic strawberry jam made with sun-ripened strawberries and fair-trade cane sugar. This jam captures the pure essence of summer berries with a perfect balance of sweetness and tang. Our recipe uses no artificial pectin, preservatives, or high-fructose corn syrup. The strawberries are grown on certified organic farms, ensuring they are free from synthetic pesticides and fertilizers. Spread it on fresh bread, swirl into yogurt, or use as a filling for pastries. Each jar is filled with 70% fruit content, delivering an intense, authentic strawberry flavor that brings joy to every breakfast table.

ORGANIC JAGGERY

Traditional organic jaggery made from concentrated sugarcane juice, following age-old methods. Our jaggery is unrefined, retaining natural minerals like iron, potassium, and magnesium. It has a distinct caramel-like sweetness with earthy undertones, perfect for sweetening teas, desserts, and savoury dishes. Unlike white sugar, it offers a complex flavor profile and is a healthier alternative. Handcrafted in small batches, it is free from chemicals and additives. Jaggery is a staple in many traditional cuisines, used in everything from festive sweets to everyday cooking.

Pure organic turmeric powder, ground from high-curcumin rhizomes grown in pristine soils. Our turmeric is carefully dried and milled to preserve its potent flavor, vibrant color, and health-boosting compounds. It is certified organic, ensuring no chemical fertilizers or pesticides are used. Rich in antioxidants, this golden spice is a cornerstone of Ayurvedic wellness and cooking. Use it in curries, smoothies, teas, or as a natural dye. The powder is fine, aromatic, and has a warm, peppery bite. A must-have for health-conscious kitchens.

GINGER

Fresh, plump ginger roots with a zesty, spicy kick. Our ginger is hand-selected for its freshness, firmness, and intense aromatic oil content. It is grown in rich, volcanic soils without the use of synthetic chemicals. Ginger is a versatile root used in teas, stir-fries, marinades, and baked goods. It is renowned for its digestive and anti-inflammatory

properties. The skin is thin, and the flesh is juicy and fibrous, delivering a robust flavor that elevates both sweet and savoury dishes. Store in the refrigerator for long-lasting freshness.

Premium Manuka raisins, naturally sun-dried from selected grape varieties, known for their chewy texture and rich, fruity sweetness. Unlike regular raisins, these are gently dried to preserve their plumpness and natural sugars. They are a powerhouse of dietary fiber, iron, and antioxidants. Perfect for snacking, baking, or adding to cereals and salads. Our raisins are free from added oils, sulfites, and preservatives. The Manuka grapes are cultivated in cool climates, resulting in a distinct flavor that is both sweet and slightly tangy. A healthy and delicious treat.

ORGANIC HONEY

Raw, unfiltered organic honey sourced from pesticide-free wildflower meadows. This honey is a true reflection of nature's bounty, with a complex floral aroma and a smooth, buttery finish. It is extracted using traditional methods and never heated, ensuring all natural enzymes, pollen, and antioxidants remain intact. Rich in antibacterial properties,

it is a wholesome sweetener for teas, baked goods, or enjoyed by the spoonful. Our honey is certified organic, guaranteeing purity and sustainable beekeeping practices. Each jar offers a unique taste of the season.

Nutrient-dense organic moringa soup powder, made from dried, ground moringa leaves. This superfood powder is packed with vitamins A, C, E, calcium, potassium, and protein. It has a mild, earthy taste that blends perfectly into soups, smoothies, and savory dishes. Our moringa is grown organically and harvested at peak nutritional value, then shade-dried to preserve its potency. It is a quick and convenient way to boost daily nutrition. The powder is finely textured and dissolves easily in hot liquids, making it ideal for instant soups, broths, and green drinks.

ORGANIC SHATAVARI

Organic shatavari root powder, derived from the asparagus racemosus plant, a revered herb in Ayurvedic tradition. It is known for its adaptogenic properties and is commonly used to support female reproductive health and overall vitality. Our shatavari is cultivated in pristine, chemical-free farms and processed carefully to maintain its active compounds.

It has a slightly bitter, earthy taste and is often mixed with warm milk or water. This powder is a natural way to balance hormones, boost immunity, and promote lactation. Made from pure, organic roots.

Juicy, naturally grown organic strawberries, bursting with flavor and fragrance. Our strawberries are cultivated in nutrient-rich soil under the sun, without the use of synthetic pesticides or GMOs. They are hand-picked at peak ripeness to ensure optimal sweetness and texture. Rich in vitamin C, fiber, and antioxidants, they are perfect for fresh eating, desserts, or preserving. Each berry is vibrant red with a glossy sheen, offering a delightful aroma that fills your kitchen. Enjoy them straight from the punnet or use them to create stunning fruit platters and treats.
