

Waseca Reading Program Eco Storage

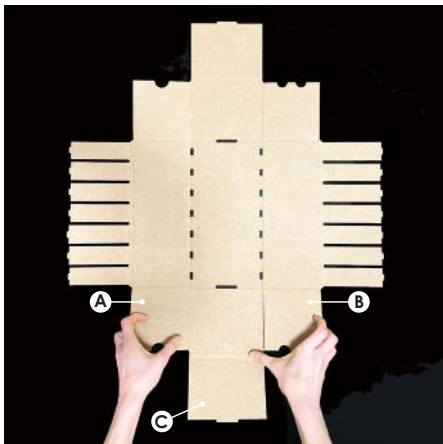

We are so excited that you have purchased the Waseca Reading Program Eco Storage. All of the parts that you need to build these storage cabinets for your Waseca Reading Program materials are included in this kit (with some spare parts, just in case!)

- 9 x cabinet frames
- 54 x cabinet shelves
(6 per cabinet)
- 72 x drawers
(8 of each color - only 7 are needed in a cabinet, but we include an extra of each)
- 72 x drawer inserts
(one for each drawer plus 9 spares)
- 2 sheets of color-coded stickers to number the drawers (one sheet is extra)

How to Assemble: CABINET

Follow the steps below to build the red cabinet! The same steps will apply for all of the other cabinets. You can build them all at once for the full reading rainbow of cabinets or build each color as you advance through the Waseca Reading Program.

Step 1
Lay the cabinet frame on a flat surface.

Step 2
Fold flaps A & B up and inward to form the base.

Step 3
Fold flap C up.

Step 3
Fold flap C over flaps A & B to secure the base. Make sure flap C's notch fits in the cabinet back slot snugly.

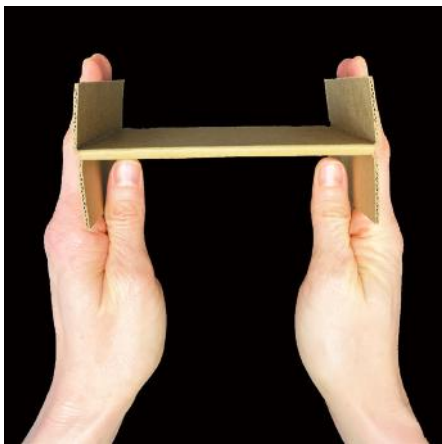

Repeat Steps 1 through 4 for the other end of the cabinet.
Next, build the shelves for the cabinet. Follow the steps below for each of the cabinet's six shelves.

Step 1
Fold the shelf in half down the middle.

Step 2
Bend the top flaps up and the bottom flaps down.

Now, insert each shelf into the cabinet and fold the flaps down from each side to lock the shelf into place. (If you want, you can use some double-sided tape to secure the flaps.)

Insert shelf.

Fold flaps down.

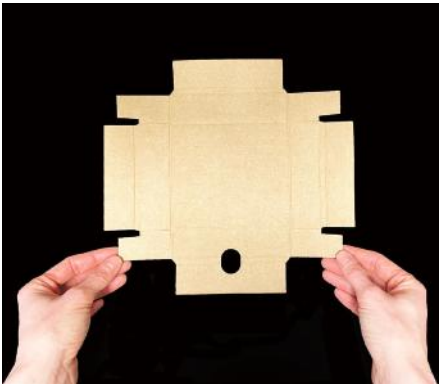

Repeat for all six shelves.

Completed cabinet!!!

DRAWERS

Now, it's time to build the drawers! Follow Steps 1 through 5 to fold each drawer. (Keep in mind that there are only seven drawers in each cabinet, but we've supplied you with an extra drawer for each color as a spare.)

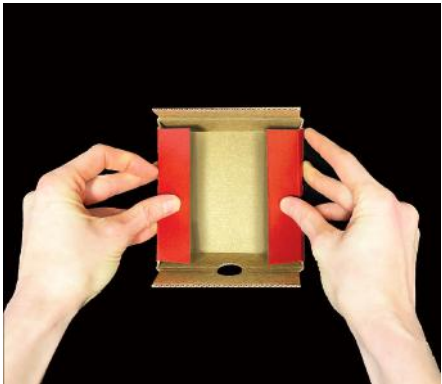

Step 1

Fold the small tabs of the front and back drawer faces up. Bend these faces toward the center of the drawer.

Step 2

Fold the right and left drawer faces up and over the small tabs.

Step 3

Press the left and right faces snugly into place. Then, fold the back face toward the center of the drawer.

Step 4

Now, fold the front face toward the center of the drawer.

Step 5

Press the drawer insert into the bottom of the drawer to hold all of the faces firmly in place and complete a drawer!

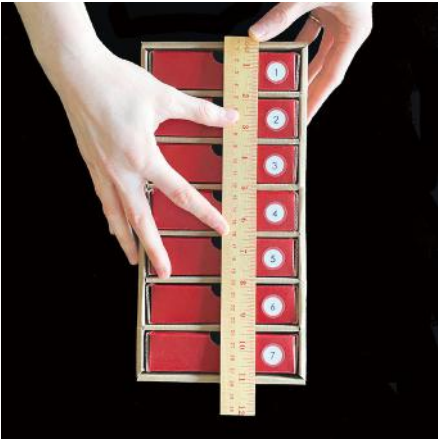

Repeat Steps 1 through 5 to make all seven drawers for the cabinet.

Now, insert the drawers in the cabinet, add your stickers, and fill each drawer with the Waseca Reading Program materials! Hooray!

Ready for stickers!

Use a ruler to place your stickers.

Ready for materials!

Ta-da!

Use these same steps to build all of your cabinets and drawers for each color level.

We hope that the Waseca Reading Program Eco Storage serves your young reader well on their journey to literacy! Feel free to reach out if you have any questions: hello@wasecabiomes.org.
