PEL TOUCH

TerraTrace

Feltouch specializes in PET felt with advanced fibre & non-woven textile technology.

Feltouch designs high performance acoustic absorbers using unique & smart designs for all interior spaces to improve speech intelligibility, well being, concentration and performance.

Driven by circularity principles, Feltouch, transforms waste into value through innovative design and sustainable practices. The Zero Burn initiative exemplifies this approach by reintegrating production scraps from our 50% recycled PET felt back into the industry as acoustic materials.

## **Specify the solution, not the problem.**

TerraTrace® is Gardi's first collection of biodegradable and closed-loop interior products.

TerraTrace qualified products are biodegradable in a municipal landfill or in ocean water, or they have a closed upcycle guarantee.

Interiors Accounts, supported with quality products from Felisach, empowers you to rethink sustainability.

Interiors Accounts, in partnership with Felisach offers eight accounts: wall panel, ceiling grid and integrated lighting solutions under the Flatline collection.

## ABOUT PET FELT

- PET felt is 100% recycled content, 100% recycled from PET bottles.
- The material is produced with zero carbon technology without any chemical treatment from production to end use.
- There are no toxic gases from 100% of the content, because it has a non-toxic and perfectly eco-friendly structure and is naturally hydrophobic.
- PET felt is easy to clean and maintain.

## MAINTENANCE & CLEANING INSTRUCTIONS

- Follow care only
- Cleaning methods

- If a new spill occurs, follow the below steps:
  - Dry the liquid with a dry cloth as soon as possible to prevent absorption.
  - To remove stains, remove amounts of water not to applied to the surface with a cloth without rubbing. Excessively water is sufficient to remove light stains.
  - If the stain does not come off with water, a mild detergent may be used. Avoid harsh detergents.
  - If the product is portable and small enough, it is best to take the surface off to professional dry cleaning company.
  - Lastly, dry it with a dry towel with soft wet.
- During/after cleaning process, avoid excessive friction and rubbing as it will continue the felting process and change the appearance of the felt surface.
- It is recommended that the cleaning method be recorded on storage area markers.
