THE FUTURE OF ARTIFICIAL INTELLIGENCE: CHAPTER 4

Event Ambassador Announcement

We are delighted to announce Dr. Duong Van Thinh as the official Event Ambassador for *The Future of Artificial Intelligence: Chapter 4*. His appointment reflects the event's commitment to advancing global-level dialogue on artificial intelligence, digital transformation, and next-generation technology leadership. Dr. Thinh's extensive experience and contributions make him an exceptional representative for this year's program.

As the CEO of the AI & Data Center Institute (AIDC), Dr. Thinh is widely recognized as a leading expert in artificial intelligence, data center strategy, robotics, and semiconductor technologies. With more than 20 years of technology leadership experience at multinational corporations—including IBM, Microsoft, Schneider Electric, ABB, and KONE—he has played a pivotal role in shaping enterprise AI programs, driving advanced research initiatives, and leading large-scale AI deployments across industries. His work has significantly contributed to strengthening Vietnam's competitiveness in the global technology landscape.

Beyond his corporate achievements, Dr. Thinh serves as an Advisor to the Ho Chi Minh City Technology Council, where he provides strategic guidance on emerging technologies and digital transformation. He is also a keynote speaker at major international conferences, a lecturer at the University of Economics and Law (UEL), and Chairman of AIDC, supporting pioneering initiatives in AI, robotics, and data center innovation. His leadership continues to influence Vietnam's digital future and inspire the next generation of technology professionals.

As Event Ambassador, Dr. Thinh will help shape the program's direction, highlight breakthrough innovations, and foster collaboration among participants. This event offers a valuable opportunity to connect with him and engage with industry leaders, entrepreneurs, investors, researchers, and decision-makers who are driving the future of artificial intelligence.
