The high-quality maglock system is the simplest way to install maglock, delivering seamless compatibility for your access control needs. Designed for effortless installation, it includes fixing plates and pull handles, making it easy to operate while seamlessly integrating with any access control system. The maglock can be activated via a keypad, switch, or proximity fob.

TECHNICAL SPECIFICATIONS

Maglock Size	203 x 63mm
Voltage/ current	12V/500mA, 24V/250mA
Lock status switch rating	250mA
Material	Stainless steel
Holding force	545kg

WIRING INSTRUCTIONS

For 12V, connect the red/black wired, green/orange wires and connect the 12V source.

For 24V, connect the black/green wires, red/orange wires and connect to a 24V source.

INSTALLATION

- Maglock armature:** Drill 3 holes through the gate and bolt the maglock armature and the pull handles in place using the 2 coach bolts and the break off nuts provided. The third hole is to provide clearance for the nut on the back of the armature plate.
- Maglock:** Close the gate and position the maglock assembly to the gate post, and fix with the M8 screws provided. Alternative fixing methods may be required depending on the type of gate post.
- How to operate:** The maglock can be operated using a separate keypad, switch or proximity fob and is easily incorporated into any access control system. The gate is easily opened and closed using the pull handles included.
