TOWBARS

Combined hitch/motorcycle carrier

Depending on your vehicle, we can also offer you a combined hitch/motorcycle carrier. However, it is impossible to tow and carry at the same time.

Please contact us to find out whether this can be fitted to your vehicle.

Helpful hints

Fuel tank change / spare wheel relocation / luggage compartment extensions

Some vehicles require complete modification of the fuel tank to allow passage of the longitudinal members supporting the trailer hitch or motorcycle carrier. Others also require relocation of the spare wheel carrier.

For each of your requests, we can work with your vehicle's technical specifications to define the modifications required to ensure optimum installation of your equipment.

Cargo bay extensions

 Under no circumstances should existing luggage compartment extensions be removed or used, unless Mecatek advises otherwise in writing.

AL-KO

A towbar for each chassis

Mecatek offers a wide range of trailer hitches that can be fitted to virtually all makes of vehicle, from motorhomes to vans, where configurations allow.

- Standard chassis without optional equipment.
- Standard chassis with approved original extensions.
- AL-KO - AMC chassis or with AL-KO extensions.

As each vehicle has its own technical specificities, Mecatek studies and processes your requests on a case-by-case basis to provide you with the trailer hitch you need. To provide you with the best possible service and advice, we need to know the following information about your vehicle:

Make - Chassis type - Model - Year of 1st registration.

Based on all these elements, we can then define the right product for you.

TOWBAR FOR RENAULT MASTER 4

TOWBAR FOR RENAULT MASTER 4 XDD FLAT-FLOOR CHASSIS VERSION

MECATEK EXCLUSIVITY

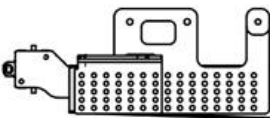

*Towbar for Renault Master 4 XDD /
Nissan Interstar III
Flat-floor chassis version*

NEW

Advantages of a modular system:

- Modular design: the towbar is designed to be adjusted or configured in different lengths to meet the specific requirements of each vehicle conversion
- Approved towbar
- Can be fitted with a Pommier or Traxion combination towball or a removable Rockinger ball interface
- Step fitting provided for within the type approval, with a 10 mm thick plate behind the towball

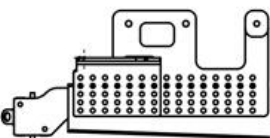

Minimum length, high position

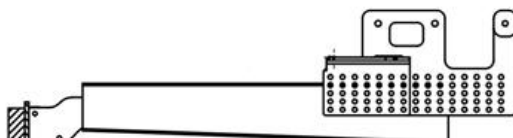

Maximum length, high position

Minimum length, low position

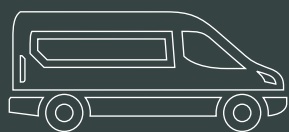

Maximum length, low position

BIKE CARRIER ON TOWBALL

BIKE CARRIER FOR VANS RENAULT TRAFIC 3

NEW

Efficient and functional, Mecatek's range of bike carriers feature a modern, elegant design. The detachable bike carrier is quickly installed on an assembly consisting of a ball with extension and a hitch securely fixed to the underside of the vehicle chassis.

Thanks to a lever, the bike carrier can be tilted, even when loaded, to give free access to your boot. It features suitable straps and bars, an anti-theft system with key and an electrical socket.

Ball hitch extension

Always attentive to customer needs, Mecatek offers a towball extension.

This device makes it possible to offset the towball and bike carrier assembly to allow full opening of your van's tailgate.

BIKE CARRIER

Technical data:

For 2 standard or electric bikes

Payload:	60 kg
Empty weight of complete set:	55 kg
Unladen weight of bike carrier alone:	15 kg
Bike carrier dimensions:	58 x 110 x 63 cm
Wheel sizes:	from 14" to 29"
Max. distance between wheels:	120 cm

COMPATIBLE VEHICLES

Renault Trafic
Nissan NV 300
Opel Vivaro

BIKE CARRIER ON TOWBALL

SWIVELLING BIKE CARRIER SWING FLEX

NEW

The SWING FLEX system consists of a hitch, a pivoting arm, a ball and a removable bike carrier.

It offers numerous advantages:

- Over 90° swivel to leave the tailgate or rear doors fully open
- Space-saving, for easy storage when not in use
- Easy to assemble and disassemble
- Robust system capable of safely supporting 2 electric bikes
- 60 kg load capacity

BIKE CARRIER SWING FLEX

LOAD CARRIER FOR VANS

LOAD CARRIER WITH BOX CARGO RACK EVO

MECATEK EXCLUSIVITY

The CARGO RACK EVO load carriers offer many advantages:

- Sturdy mounting on all 4 hinges
- Available load in the box: 50 kg
- Full opening of the rear doors
- Available colours: ● Black

The CARGO RACK EVO load carrier is an evolution of the popular VAN-BIKE 2 EVO bike carrier.

Drawing on its experience in the design and manufacture of bike carriers for leisure vehicles, Mecatek is extending its range for vans with the launch of the CARGO RACK EVO load carrier.

This carrier is an evolution of the VAN-BIKE 2 bike carrier and its hinge-mounting concept. The CARGO RACK EVO stands out because it is fixed to the 4 hinges of the vehicle's rear doors.

This development makes it possible to carry up to 4 bikes or a storage box.

LOAD CARRIER

Technical data:

Load capacity: up to 60 kg
Unloaded weight from 40 kg depending on version

Box dimensions (L x W x H):

CARGO BOX EVO 1 : 1500 x 600 x 1000 mm

CARGO BOX EVO 2 : 500 x 300 x 1600 mm

CARGO BOX EVO 3 : 380 x 380 x 1220 mm

CARGO BOX EVO 4 : 500 x 500 x 1220 mm

Compatible vehicles

Fiat Ducato
Peugeot Boxer
Citroën Jumper
Opel Movano (from 2022)

STORAGE BOXES **CARGO BOX EVO**

A new range of boxes for the CARGO RACK EVO:

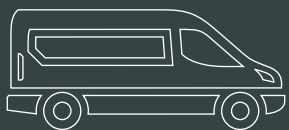

The launch of the CARGO RACK EVO load carrier comes with a new range of CARGO BOX EVO aluminium storage boxes, combining robustness and practicality. The boxes are available in several sizes to meet as many uses as possible:

- A large box to increase the storage volume of your van.
- A compact, vertically mounted box that leaves room on the load carrier for other equipment, such as a spare wheel.

The rugged design of the CARGO BOX EVO boxes makes them an ideal and durable solution for your leisure vehicle, even off-road. With the new CARGO RACK EVO load carriers and the new CARGO BOX EVO boxes, MECATEK offers a complete and secure solution for transporting bikes or fragile equipment on the rear of your van.

MECATEK EXCLUSIVITY

Approval no.:
E13*26R03/03*8583*00

TÜV APPROVAL

A true innovation in the field of van bike carriers, the VAN-BIKE 2 EVO will win you over with its many advantages:

- Its pivoting system allows full opening (90°) of your van's rear doors, giving you easy access to your interior.
- Its low loading height makes it easy to load and unload bikes without any particular effort.
- This mounting system allows the VAN-BIKE 2 EVO to remain in position on the rear of your vehicle, even when unloaded.
- Designed to accommodate 2 electric bikes (option for 3 to 4 standard bikes: please consult us), it opens in a single movement. It can also be folded up when not loaded.

BIKE COVER ADVENTURE COVER BIKE

The cover is quick and easy to install on 1 bike or 2 bikes at the same time, mounted on the bike carrier. No need to remove the bikes!

Whether it's storms, dust, mud or stone chips, with the ADVENTURE COVER BIKE you can enjoy every trip with complete peace of mind.

Highlights:

- Recycled fabric
- Stretch fabric
- Water-repellent fabric
- Effective protection
- For 1 to 2 bikes
- Made in Europe

ADVENTURE COVER BIKE

Technical data:

L (LENGTH): 180 cm - 210 cm

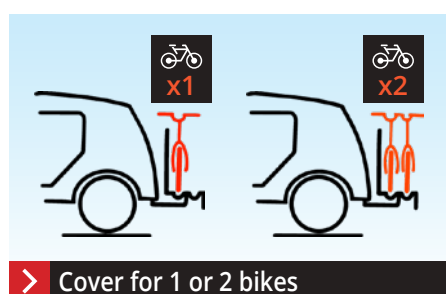

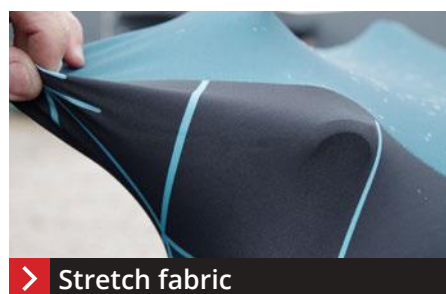

H (HEIGHT): 100 cm - 130 cm

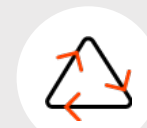

W (handlebar width): 70 cm - 90 cm

Distance between rails approx. 22 cm.

Washable up to 40°.

Material: recycled VICTORY fabric made from over 75% nylon waste (old fishing nets, fabric scraps, industrial materials, etc.)

ECO-RESPONSIBLE
MANUFACTURING

NEW

**ADVENTURE
COVER BIKE**

Protection for transporting bikes

The ADVENTURE COVER BIKE protects 1 to 2 bikes from dust, dirt and stone chips during transport. Travel worry-free.

Expandable cover

The ADVENTURE COVER BIKE is expandable. This makes it ideal for bikes of different sizes.

Water-repellent fabric

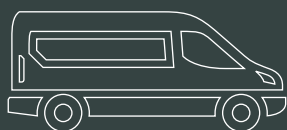

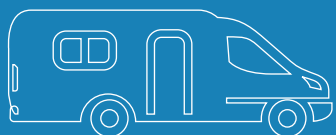

The ADVENTURE COVER BIKE features a water-repellent fabric, making it ideal for use in bad weather.

Eco-friendly design and manufacture

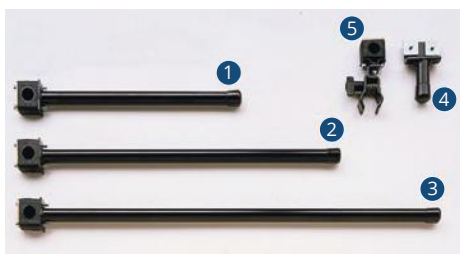

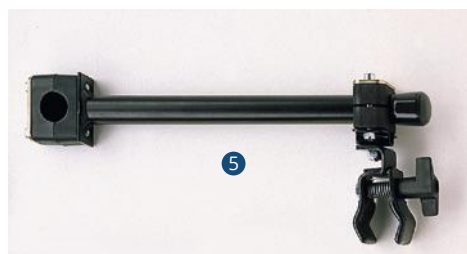

The bike cover is made from over 75% recycled yarn. An innovative regeneration process reuses waste that pollutes the environment, transforming it into a new resource.

CARGO BOX STORAGE BOXES

The CARGO BOX range offers several models of storage boxes to provide you with the solution best suited to your needs.

They provide extra storage space for gas cylinders, fishing and golf equipment, chairs and sports equipment when you're on the move.

CARGO BOX boxes can be fitted to all types of chassis using side members, or to an existing load carrier or even a trailer.

A feasibility request must be sent to us for each vehicle. The installation of MCK Plug&Drive type auxiliary suspensions is sometimes necessary.

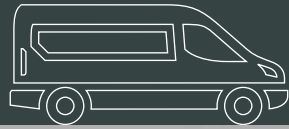

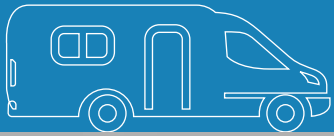

NEW RANGE OF STORAGE BOXES FOR VANS

The boxes of the CARGO RACK range can be fitted to the load carriers of the Van-Bike and Agito ranges.

AIR SUSPENSIONS

AIR SUSPENSIONS MCK PLUG & DRIVE

Improve your driving comfort with our MCK PLUG&DRIVE air suspension systems, which can be adapted to a wide range of chassis:

CONTROL PANEL

12V COMPRESSOR

AIR BAGS

Benefit from the advantages of MCK PLUG&DRIVE suspensions

Vehicle trim correction

- By simply varying the pressure of the air bags, the vehicle is stabilised and returns to its original ride height.
- Stability optimisation
- Correct headlamp repositioning

Improved straight-line stability

- When driving faster
- When encountering crosswind gusts
- When passing or overtaking large vehicles

Roll

- Reduced roll in bends and roundabouts

Reduces leaf spring fatigue

- Compensates for the sagging of the reinforcing leaves. This is particularly effective for motor-homes, especially those with large overhangs

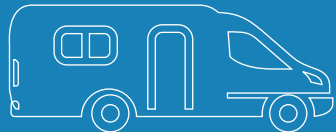

Comfort

- The air bag system helps absorb all the shocks of uneven roads. As a result, overall ride quality is enhanced.

Lifting the vehicle on demand

- Makes it easier to pass speed bumps or kerbs, and to embark/disembark ferries.

Approved products with 2-year warranty

AIR SUSPENSION MCK AIR DRIVE

AUXILIARY AIR SUSPENSION

FOR CHASSIS
AL-KO

MCK AIR DRIVE

MCK AIR DRIVE air suspensions specific to AL-KO chassis

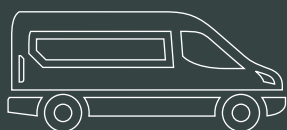

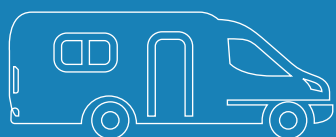

MECATEK offers its range of MCK Plug&Drive suspensions for X250 AL-KO chassis.

The product is based on the MCK Plug&Drive suspension kit, with the addition of the parts required for the AL-KO chassis, i.e. specific shock absorbers and fasteners.

As each motorhome has its own specific features, we invite you to consult us with any enquiry so that we can define your vehicle's requirements.

AIR SUSPENSIONS

MECATEK EXCLUSIVITY

AIR SUSPENSIONS MCK AIR CONNECT

AIR SUSPENSIONS MCK AIR CONNECT

The remote control lets you adjust the suspension precisely

NEW

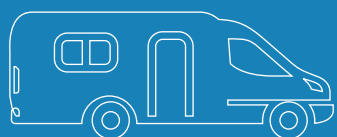

Digitally controlled air suspensions

Equipped with a digital control unit, the MCK AIR CONNECT air suspension offers the vehicle an optimum combination of comfort, safety, adaptability and durability. This system can be adapted to a wide range of chassis.

The integrated MCK AIR CONNECT digital control unit allows precise, fast and intuitive control of the suspension. The user can easily adjust the vehicle height via a modern interface, which simplifies load management and levelling while ensuring optimum stability, whether driving in a straight line, cornering or in crosswinds. This technology also makes it easier to reposition the headlamps and allows the vehicle trim to be corrected on demand, providing instant adaptability to changes in load or road conditions.

AIR SUSPENSIONS MCK AIR CONNECT SMART+

MCK AIR CONNECT SMART+

Kit contents:

- 2 air springs with mounting parts
- 12V compressor
- Air hoses (black and blue)
- Touchscreen control panel and mobile app available for Android and iOS
- Comprehensive installation manual

Specially developed for commercial vehicles, motorhomes and special vehicles, the **MCK AIR CONNECT SMART+** air suspension system includes a powerful 12V compressor and intuitive control via a touchscreen or a smartphone with an Android/iOS-compatible app. Precise control of the suspension on each axle ensures optimum stability and full control of ride height. This system allows independent control of the air springs, compensates for weight variations and provides improved road holding for greater comfort and safety every day.

Available for a wide range of makes such as **MAN, Mercedes, Fiat, Ford, Iveco and AL-KO.**

MANUFACTURING

PERMANENT STOCK

ADVICE & EXPERTISE

Why should you choose Mecatek?

- A team of specialists to advise you
- The technical expertise of a manufacturer
- A permanent stock to respond rapidly to your requests
- Quality products, tested and approved
- A vast network of partner dealers in France and Europe
- A company on a human scale, committed to sustainability

Assembly of part of the MCK product range has been entrusted to an Alsace-based sheltered employment centre ("centre d'aide par le travail"), which has convinced us of the quality of its services.

Specialist workshop

In our specialist workshop in Sundhouse (France), just a few kilometres from Europa-Park, our experts can fit all your equipment to your leisure vehicle: towbars, motorcycle carriers, bike carriers, storage boxes, air suspensions, hydraulic cylinders, front struts and front and rear coil springs.

Our experienced technicians work on motorhomes and converted vans of all makes, in partnership with the leading equipment suppliers:
