

FORCESHIELD

SAY NO TO VINYL.
It's time for FORCESHIELD.

From protection to expression.
We redefine PPF.

SAY NO TO

It's time for FORCESHIELD.

GO VINYL!

FORCESHIELD was created to break the limits of wrapping and challenge the conventions of PPF. It is not just about style like wrapping, nor only about function like traditional PPF. It is for the intelligent rebel in all of us seeking a new standard that unites expression and protection.

FORCESHIELD

True protection, aligned with your standards.

FORCESHIELD is a high-performance PPF crafted with STEK's advanced film technology. Built on globally proven quality, it delivers vibrant color expression, exceptional finishes, and outstanding durability. The film actively self-heals minor daily scratches, keeping your vehicle looking new for longer.

With style and function, discover the choice that meets your standards in the FORCESHIELD lineup.

A person wearing a blue long-sleeved shirt is shown from the chest down, with their arms extended horizontally. The background is dark and out of focus. The word 'FORCESHIELD' is written in a stylized, white, blocky font with a thick black outline, positioned across the center of the person's arms. A thin white horizontal line with a small dot at its right end extends from the right side of the text.

FORCESHIELD

FORCESHIELD PPF Series

01

FORCESHIELD

Suitable for all cars

A film that combines performance and flexibility, a clear PPF series that perfectly complements every car.

02

FORCESHIELD AIR

Innovative technology

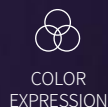

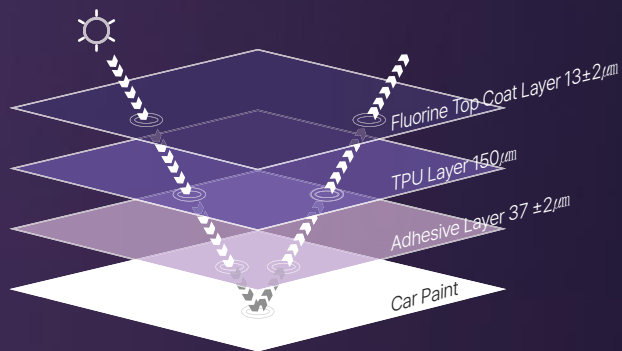

An innovative PPF series with Air-Track™ technology that allows for seamless installations and cleanly wrapped edges.

01. FORCESHIELD

From the elegance of luxury sedans to the spirit of sports cars.

Delivering outstanding flexibility and performance across every vehicle type and style. With rich finishes, robust protection, self-healing, and water repellency, this TPU protection film stands out for its well-rounded performance.

PROTECTION

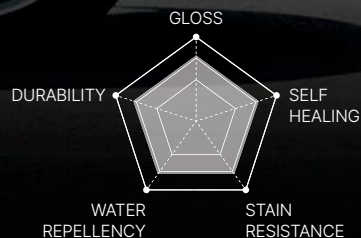

F Series transmits light without distortion,
revealing the car paint's original color with greater clarity.

FORCESHIELD CLEAR

All-round performance.

With exceptional overall performance in gloss, self-healing, and stain resistance, F5 delivers outstanding satisfaction across all vehicle types, from sedans to SUVs.

FORGESHIELD CLEAR+

Ultimate gloss and enhanced color.

Maximizes the shine and vibrancy of high-end vehicles, ensuring your car always stays in peak condition.

FORCESHIELD MATTE

The essence of subtle matte.

Delivers a refined, understated matte texture while superior crack resistance and strong adhesion ensure stable installation and a long-lasting, flawless finish.

A close-up, low-angle shot of a car's front end. The image shows a sharp, curved headlight and a portion of the grille. The entire surface is covered in a dense, woven carbon fiber pattern, giving it a textured, high-tech appearance. The lighting is dramatic, with strong highlights and deep shadows that emphasize the contours of the car's bodywork.

FORCESHIELD CARBON

Carbon, experienced smartly.

By applying a carbon pattern to PPF, it delivers both style and protection. It recreates the premium look of real carbon fiber at a reasonable price, offering customers an attractive alternative.

02. FORCESHIELD AIR

FORCESHIELD AIR, where speed meets precision.

Delivering outstanding flexibility and performance across every vehicle type and style. With excellent gloss, protection, self-healing, and water repellency, this TPU protection film is defined by its exceptional quality.

Air-Track™

TECHNOLOGY PROTECTION

**Seamless
color and finish**

With advanced Air-Track™ technology and optimized tack settings, the film wraps complex curves and edges with precision and delivers both a seamless color change and a flawless finish.

**Lasting
color integrity**

FORCESHIELD AIR keeps its vivid color during installation and blocks UV to prevent fading, preserving a vibrant finish over time.

**Durability &
self-healing**

Durable to reduce scratches during installation, with everyday marks restored through self-healing.

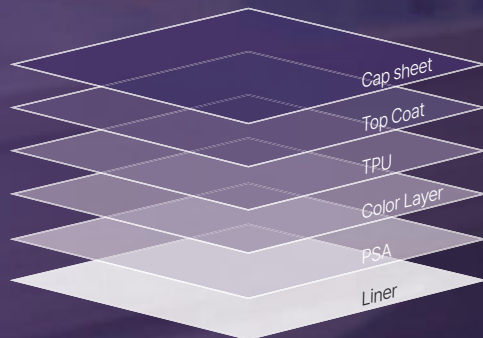

**Outstanding
water repellency**

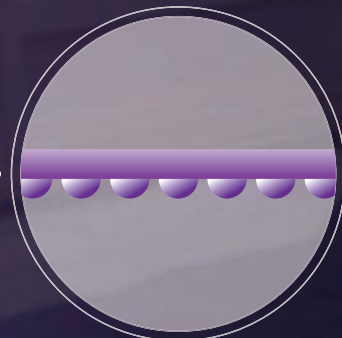

Resists water and contaminants on the surface, making washing and maintenance far easier.

Why FORCESHIELD AIR

With a grid-pattern air-release structure, FORCESHIELD AIR boosts installation efficiency and preserves a flawlessly smooth surface that remains free of grid marks over time.

More than 120 Colors

FORCESHIELD AIR is available in colors, patterns, and vibrant finishes to suit all preferences, offering high clarity with no orange peel.

STEK SHINE SOLUTION

Experience professional care services at STEK shops. Enhance the gloss and hydrophobic performance of your PPF and keep it in peak condition for years.

FAQ

Is PPF really necessary?

Yes. PPF protects your car's paint from everyday scratches and damage. It's especially recommended for new or luxury vehicles to keep their finish looking new for longer. FORCESHIELD is also eco-conscious, minimizing harmful chemicals for a more sustainable choice.

How long does the shine and water repellency last?

FORCESHIELD provides long-lasting gloss and hydrophobic performance. In normal conditions, water repellency lasts over 6 months, and the shine endures for the film's lifetime. With STEK SHINE SOLUTION, you can extend water repellency and shine continually.

Is maintenance after installation difficult?

Not at all. Regular car washes are enough to keep your car looking great. However, for the best results, the STEK shine solution service will help maintain your film in top condition.

Can it protect against scratches and stone chips?

Yes. PPF effectively defends against daily scratches, door dings, and stone chips. It also features a self-healing function that restores minor scratches with heat from sunshine or hot water.

Will removing PPF damage my car's paint?

No. When removed properly by a professional, your paint remains safe. However, extra care may be needed for repainted or already weakened surfaces.

How long does PPF last?

On average, PPF lasts more than 5 years, and with proper care it can even protect your car for up to 10 years or longer. Durability may vary depending on product choice, driving, and maintenance conditions.

How can I check the warranty?

FORCESHIELD includes warranty support. Your installer will register your warranty at the time of installation, and you can easily check it anytime through the STEK ONE website.

How can I refresh my PPF after years of driving?

Visit an authorized STEK shop for STEK SHINE SOLUTION. Our exclusive compounds safely restore gloss and clarity without damaging the film, keeping your PPF in top condition.

FORCESHIELD CREATES AN ERA WHERE EXPRESSION IS THE ULTIMATE SHIELD.

Exceptional durability delivered by premium TPU.

Air-Track™ technology enabling dry installation.

A wide range of colors that vividly express individuality.
