CATALOGUE 2027

ILLEX®
For true anglers.

EDITO

Each cast tells a story. Let's write the next ones together...

At **ILLEX**, each product is born from a simple conviction: to develop equipment capable of meeting the demands of the most passionate anglers while providing an incomparable pleasure of use.

The year 2027 marks a new step in our constant quest for performance. This collection enriches our historical universes with numerous innovations developed for modern predator fishing in both freshwater and the sea.

Our series of rods **PEPPER X5, THE ARTIST X5, ELEMENT RIDER X5, NIGHT SHADOWS, NIGHT FALL**, and **STREAM MASTER** benefit from the latest advances in blank design, premium components, and ergonomics to offer even more lightness, sensitivity, control, and power.

On the lure side, the joint expertise with the Japanese company **JACKALL** continues to open new perspectives

with the arrival of exclusive models, new technical concepts, colors developed for European conditions, and references designed to meet the expectations of the most demanding anglers.

The 2027 collection also welcomes new ranges of luggage, accessories, terminal tackle, and technical clothing designed with the same spirit: functionality, durability, and performance.

More than just a collection, this 2027 book reflects our vision of modern fishing: innovative, technical, exciting, and resolutely oriented towards excellence.

We thank you for your trust and wish you a 2027 season rich in emotions and memorable moments.

All the **ILLEX** team, Thomas Vogels, and the entire **SENSAS** sales team.

INSIDER 150 FLOAT TUBE

The INSIDER 150 ILLEX is a new float tube designed for short sessions with plenty of input from the ILLEX team who are all big fans of float tube fishing. Quality float tube made from technical materials used for inflatable boat manufacture. Stable, tough and discrete with a V-profile that makes this float tube easy to manoeuvre. This tube features plenty of details thought out by our team such as two independent air chambers each with a security valve. Each air chamber features a clever set of rings under the side pocket for attaching accessories or rod rests. The seat and backrest are also inflatable from a single valve. Two removable side pockets featuring internal separators, pockets with rubber mesh and fully waterproof with a double zipper (58*22*11cm). Two scratch bands at the front of each air chamber will let you store 3 rods, 1 security rail with a fish net and centimetre ruler built in. 6 welded stainless D rings are there to tie up the tube. 3 well placed carry handles and 2 rucksack straps make transporting the tube very easy.

Colour: Float tube: khaki seat: white

Specifications:

- High resistance material: PVC COATED
- Thickness: 0.7mm
- Polyester deniers: 1000D
- Security valves: 3 valves for secure inflation/deflation
- Max charge: 180 kg
- Dimensions: (L) 150cm x (W) 110cm
- Weight of inflated tube with accessories: 8.50kg

Sold with:

- Foot pump
- Repair kit
- Transport bag (L 64cm, w 51cm, h 20cm)

INSIDER LATERAL BAGS

We make these ultra-functional lateral bags, so they fit the majority of float tubes on the market. The innovative design helps protect your gear from rain and keep your tackle perfectly organised once on the water. These removable tackle bags mean you can sort your tackle out at home and simply attach them to your float tube by the two plastic carabiners and Velcro strips and you are off!

Specifications:

- Waterproof bags, two removable internal compartments, two rubber mesh pockets on the top of each bag, two D rings to attach different pliers, carry handle.
- Colour: black and black zips
- Material waterproof high resistance heavy-duty PVC
- Size: 58*22*11 CM

FIXVE

X5 construction is consisted with 5 layers of graphite sheet, producing incredible strength and durability. The carbon material used for X5 contains special Nano resin technology patented, achieving lighter weight and better sensitivity.

N PEPPER X5 B 210 L+ XS FINESSE WHISP

The ultimate expression of high-end finesse casting. The PEPPER X5 B 210 L XS FINESSE WHISP – Limited Edition sets a new standard for finesse casting rods dedicated to the most demanding anglers. Ultra-light, fast, and with exceptional resonance, it has been developed to maximize the perception of the most subtle bites during technical fishing for black bass and perch with soft lures: weightless, micro jig, drop-shot, neko rig, split-shot, or light Texas. Its nervous XS action and perfectly controlled design offer remarkable precision to effectively explore cluttered areas while maintaining an astonishing power reserve to extract the most beautiful fish from the densest covers. Versatile, it also excels with small and medium-sized hard baits: topwater, minnows, crankbaits, or light spinnerbaits. Built around the new high-end X5 blank with multi-oriented carbon fibers, the FINESSE WHISP gains in lightness, sensitivity, and power for exceptional comfort of use. Its FUJI TORZITE TITANIUM K-ring equipment optimizes information transmission, casting distances, and line fluidity in all conditions.

N PEPPER X5 S 210 ML XS FINESSE WHISP

The PEPPER X5 S 210 ML XS FINESSE WHISP – Limited Edition sets a new benchmark for all modern finesse techniques in spinning. Featuring an XS 'Extra Sensitivity' blank, it offers exceptional perception of the bottom, movements, and the most subtle bites during weightless, ned rig, drop shot, darting, wacky rig, or light linear fishing. Its perfectly balanced power reserve allows it to excel in light traction with the NITRO SHAD 65 and 90 as well as with a wide selection of lures: topwater, jerkbait minnow, longbill minnow, crankbait, vibration, or blade. Its reactivity and precision provide optimal control of movements and battles, even with the most cautious fish. Built around the new high-end X5 blank with multi-oriented carbon fibers, this PEPPER X5 combines lightness, resonance, and power with an exceptional level of comfort. Its FUJI TORZITE TITANIUM K-R ring equipment optimizes casting distances and line fluidity, while the newly vented TVST reel seat significantly improves handling and information transmission thanks to direct contact with the blank. Delivered with a screen-printed cover and a rigid Cordura tube.

PEPPER X5 B 215 ML MAGIC WAND

The PEPPER B 215 ML Magic Wand certainly lives up to its name! This updated version is 5cm longer and a shade over 5% more powerful. Great for finesse tactics for percidae species (perch, zander, etc.). Being ultra-light, fast and responsive, this is the perfect rod for all situations demanding precision and sensitivity. Developed for small to medium-sized lures and plugs. Topwater : WATER MOCCASSIN 75, BONNIE 85, CHATTERBEAST 70, etc.; Minnow : SQUAD MINNOW 65 SP, SQUIRREL 61, DD67 & 79, BATTLE MINNOW 80 F & SP; Crankbaits : CHUBBY series, CHERRY 10 CC, DIVING CHERRY 48, etc.; Light Spinnerbait : CRUSHER JR. 10g, etc.; Blade Jig : CRAZY CRUSHER JR. 7G & 10G, etc.; Light Buzzing, etc. The action is perfect for power finesse tactics with soft baits (Light Drop Shot, Light Texas, Split Rig, Neko Rig, Ned Rig and light linear fishing). Built using new X5 high quality blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness for fantastic feel and ultimate fishing pleasure. Features FUJI TORZITE TITANIUM K rings to eliminate frap-ups, reduce weight, increase responsiveness and prolong line life. Supplied with a rigid Cordura protective tube and signature rod bag.

PEPPER X5 B 215 M FINESSE PUPPETEER

The PEPPER B 215 M FINESSE PUPPETEER is a baitcasting version of our FINESSE PUPPETEER spinning rod that features the same sublime, subtle action loved by finesse anglers everywhere. Ultra-light, fast and responsive the rod excels when working small plugs like the STREAM RIPPER, WATER MONITOR, SQUAD MINNOW 65 SP, SQUIRREL 61 SP, TRICOROLL, CHUBBY, TWITCH FLESH 61 DR and 67 D2R or the MAGIC CRANK 40. Equally at home targeting perch, bass and zander using finesse softbait tactics such as micro jigging, drop shot, Neko rigs or light Texas. Built on top quality new X5 blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light and thin FUJI TORZITE TITANIUM K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. Supplied in a signature rod bag and a rigid Cordura protective tube.

PEPPER X5 B 220 M-MH SILVER OPS

Building on the success of the PEPPER S 2252 M-MH SILVER OPS the baitcasting version is now available for more aggressive finesse tactics. The blank is 220cm long and offers great casting performance and good control and contact with your lure. This PEPPER X5 B 220 M-MH SILVER OPS is very versatile and will cover a full spectrum of techniques from plugs to spinnerbaits, blade jigs, Texas rigs and soft baits from the bank or a boat. Developed specifically for fishing surface baits like the BONNIE 95 and 107, CHATTERBEAST 90 and 115 and Jerkbait minnows such as MAGSQUAD 115 F and 128 SP, RERANGE 110 and 130 SP, RV MINNOW 110 SP, BATTLE MINNOW 135 SP, SQUIRREL 79 SP and DD SQUIRREL 79 SP. Try fishing with a CRUSHER Jr. 14g or a CRUSHER 35g and CRAZY CRUSHER when you need to cover a lot of water quickly. For straight lining try our MAGIC SLIM SHAD 4, 5 and 6; MAGIC FAT SHAD 5 on our MAGIC ROUND HEAD from 5 to 14g, MAGIC Z SHAD 105, 130 and 160 with the same range of heads. Or the NITRO SHAD 90 on heads from 10 to 21g and the NITRO SHAD 120 on a 14g head. This punchy finesse rod is perfect for all anglers looking to cover plenty of water looking for fish! Built on top quality new X5 blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light and thin FUJI TORZITE TITANIUM K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. Supplied in a signature rod bag and a rigid Cordura protective tube.

PEPPER X5 S 205 UL MICRO JIG SPECIAL

The PEPPER S 205 UL MICRO JIG SPECIAL has been designed specifically for fishing with mini jigs and light jig heads. Faster and lighter than the previous model, it is ideal for power finesse tactics with soft baits such as drop shotting, Neko rig, Split rigs, Wacky rigs and light Carolina tactics. The extra steel in the blank lends itself particularly to working small minnow-style plugs. The solid carbon tip and progressive action reads the bottom perfectly and picks up the tiniest taps from fish. Built on top quality new X5 blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light and thin FUJI TORZITE TITANIUM K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. Supplied in a signature rod bag and a rigid Cordura protective tube.

PEPPER X5 S 215 L-ML AKOYA PEARL

Built for technical light fishing situations the PEPPER S 215 L-ML AKOYA PEARL has more reserve power in the blank than your standard Light to Medium rod. Perfect for targeting big fish with finesse tactics! The blank is supersensitive and detects the slightest knock from chasing fish and the action versatile enough to cover light sea fishing, lakes and rivers. The extra power in the blank also helps distance casting. This rod can punch baits out a long way! Built on a top quality X5 blank incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light and thin FUJI TORZITE TITANIUM K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. The cut-away TVST reel seat is light and gives you direct contact with the blank. The V shape gives great grip and helps with casting accuracy. Supplied in a signature rod bag and a rigid Cordura protective tube.

PEPPER X5 S 215 ML-M FINESSE PUPPETEER

This rod will delight finesse fishing fans! The PEPPER S 215 ML-M FINESSE PUPPETEER is amazingly sensitive, ultra-light and responsive. Perfect for working small plugs such as the STREAM RIPPER, WATER MONITOR, SQUAD MINNOW 65 SP, SQUIRREL 61 SP, TRICOROLL, CHUBBY, etc. Equally at home targeting perch and zander with soft bait tactics like drop shotting, Neko rigs, light jig heading and weightless. The ideal rod for targeting perch, zander, chub, bass and sea bass. Built on a top quality X5 blank incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light and thin FUJI TORZITE TITANIUM K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. The cut-away TVST reel seat is light and gives you direct contact with the blank. The V shape gives great grip and helps with casting accuracy. Supplied in a signature rod bag and a rigid Cordura protective tube.

PEPPER X5 S 2252 M-MH SILVER OPS

This PEPPER S 2252 M-MH SILVER OPS is the most powerful model in our PEPPER range. Gael Even deigned this two-piece rod specifically for “beefed up” Finesse tactics. At 225cm long, the rod has plenty of casting power whilst offering great lure control and bite detection at all distances. The design brief stipulated a fast action along the lower ¾ of the blank with a softer action in the final ¼. This makes for a versatile rod that can handle surface lures like the BONNIE 95 and 107, RISER BAIT 008, CHATTERBEAST 90 and 115 and a range of plugs such as WATER MONITOR 95, STREAM RIPPER 75, 90 and 110, RERANGE 110 and 130 SP, RV MINNOW 110 SP, BATTLE MINNOW 135 SP, SQUIRREL 79 SP and DD SQUIRREL 79 SP. Equally at home straight lining soft baits like the MAGIC SLIM SHAD 4, 5 and 6 or the MAGIC FAT SHAD 5 or the MAGIC Z SHAD 105, 130 et 160 on MAGIC ROUND HEADS from 5 to 14g. Will also handle traction-style soft baits from the NITRO SHAD 65 mounted on 7 to 10g NITRO SHAD HEADS to our NITRO SLIM SHAD 150 fished on 10 to 14g heads. Gael wanted this to be his go-to rod for freshwater zander, big perch fishing and light piking and finesse sea fishing from shore or boat. This punchy PEPPER S 2252 M-MH SILVER OPS fits the bill perfectly. It is also ideal for roving with the 14 to 28.5g DERACOUPE and fishing the RUNNER BLADE, sizes 70 and 90, or SILVER SHADE casting jigs. This rod will quickly become a reference point for the serious big fish lure anglers. This PEPPER is built on our new X5 high quality blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Features FUJI TORZITE TITANIUM K guides to eliminate frap-ups, reduce weight and prolong line life. The VSS reel seat is comfortable to fish with and play fish on. Supplied with a Cordura protective tube and signature rod bag.

N PEPPER X5 S 2302 UL FINESSE SUPERIOR

The ultra-light excellence dedicated to modern finesse fishing. The PEPPER X5 S 2302 UL FINESSE SUPERIOR pushes the standards of high-end ultra-light spinning rods. Faster, more resonant, and even more precise, it has been developed to maximize the performance of modern finesse techniques: micro jig, drop shot, split shot, wacky rig, light Carolina rig, kickback rig, or manipulating small minnows and spoons. Its ultra-sensitive solid tip perfectly transmits the most subtle bites, while its 230 cm length optimizes casting distances, line control, and coverage of fishing spots. The new X5 high-modulus blank with multi-oriented carbon fibers provides an exceptional level of lightness, resonance, and controlled power. Equipped with FUJI TORZITE TITANIUM K-R guides, the FINESSE SUPERIOR ensures optimal transmission of vibrations and perfect line fluidity in all conditions. A true premium reference for enthusiasts of ultra-light and technical finesse fishing. Supplied with a silk-screened cover and a rigid Cordura tube.

PEPPER X5 S 2302 L-ML FINESSE RENEGADE

The PEPPER S 2302 L-ML FINESSE RENEGADE is a spinning rod that embodies all the DNA of the PEPPER series. A lightweight two-piece 2.30m rod dedicated to fine long-distance fishing, either from a boat or the bank. Its fast action, combined with a solid tip, optimizes the detection of the most subtle bites, changes in substrates, and vibrations. Although dedicated to finesse fishing for perch, trout, zander, chub, and black bass, the RENEGADE has a significant power reserve in its last two-thirds. We recommend it for trout fishing in medium and large rivers (at low water) as well as in mountain lakes using lures like: TRICOROLL RYUSHIN KNOCKER 53 and 63 SHW, FLAT TRICOROLL 45 and 55 S, TRICOROLL 47 and 55 HW, TINY FRY 65 SP, SQUAD MINNOW 65 SP, SQUIRREL 61 SP, TWITCH FLESH 61 and 67, NATIVE SPOON 3.5 to 7g, or with soft baits: MAGIC SLIM SHAD 3 and 4, NITRO SHAD 65, or simply with a crayfish imitation like CHUNK CRAW 2.8, WAVER SHRIMP 2.8, MAGIC CRAW 50 and 60 mounted on a micro jig. These features make it a MUST HAVE for targeting perch specifically in canals, all types of rivers, and lakes. For soft baits (light drop-shot, split shot, light Carolina, micro jig, linear or traction fishing) and hard baits like those previously mentioned for trout, or the essential CHUBBY series like CHUBBY PENCIL 55 and CHUBBY POPPER 42, not forgetting the fail-safe DERACOUPE in 7 and 10g. It is made from the high-end X5 blank, which uses a pre-preg process incorporating carbon fibres set at three angles. This PEPPER gains in lightness, resonance, and power for enhanced pleasure and efficiency. This rod is fitted with FUJI TORZITE TITANIUM 'K-R' series guides. Besides gaining in lightness, they enhance line flow and limit any risk of line tangling in the guides during casting. It is combined with the TVST reel seat that combines the following advantages: lightness, a 'V' shape favouring your grip, key for more precise casting, and allows better perception due to this open reel seat, permitting direct contact with the blank at the front or on the sides. It comes with a signature rod bag and a rigid protective Cordura tube.

N PEPPER X5 S 2402 ML-M STRIPES LOVER

The new spinning reference for perch enthusiasts. The PEPPER X5 S 2402 ML-M STRIPES LOVER enhances an iconic model by increasing reactivity, precision, and sensitivity. Primarily dedicated to targeting large perch, it excels in all modern finesse approaches: linear, drop shot, light Carolina rig, or handling small technical crankbaits like CHUBBY and DERACOU. Its 240 cm length optimizes casting distance and line control, both from shore and from a boat. Its ultra-sensitive solid tip perfectly translates even the slightest bites, while the new high-modulus X5 blank provides an exceptional level of resonance, lightness, and controlled power. Equipped with FUJI TORZITE TITANIUM K guides and an ergonomic VSS reel seat, the STRIPES LOVER stands out as an essential high-end spinning rod for finesse fishing for perch and zander. Delivered with a screen-printed cover and a rigid Cordura tube.

PEPPER X5 S 2402 ML-M STRIPES OPS

The PEPPER X5 S 2402 ML-M STRIPES OPS is a two-piece rod designed for targeting big perch and zander using lighter tactics. The fast action blank lets you accurately feel how your lure is fishing and picks up every tap and rattle from chasing fish. 2.40m is the ideal length for distance casting from the bank or a boat and gives great line control and clean, accurate striking. Designed mainly for intensive straight-retrieve fishing, the action is equally suited to drop shotting, Carolina rigs and fishing on the drop. For linear soft bait fishing try the MAGIC SLIM SHAD 3, 4 and 5 or the MAGIC Z SHAD 80 and 105 on jig heads from 3.5g to 14g, NITRO 65 or 90 on a NITRO SHAD HEAD from 3.5g to 14g. For drop shotting with leads from 5 to 14g try the SCISSOR COMB 3 and 3.8, JUGGPOD 3 and 3.6 or the MAGIC MAY FLY 2.6. For Carolina rigs using leads from 3.5 to 14g try the MAGIC CRAW 50 and 60, SCISSOR COMB 3 and 3.8, JUGGPOD 3 and 3.6. For fishing on the drop or weightless we recommend the SWING TAIL 4 and 5. Anglers who like targeting fry feeding summer and autumn fish with plugs should try our CHUBBY series or the MAGIC CRANK 40 SR. We also recommend the SQUIRREL lures from 61 to 76, TWITCH FLESH lures from 61 to 75, BATTLE MINNOW 80 and the STREAM RIPPER 60 and 75. The PEPPER X5 S 2402 ML-M STRIPES OPS is a great rod for targeting end of season perch on a DERACOU from 7 to 21g. Equally good as a rod to target trout in high altitude lakes using a NATIVE SPOON from 5 to 14g. Built on top quality new X5 blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light and thin FUJI TORZITE TITANIUM K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. VSS reel seat for optimal grip and comfort. Supplied in a signature rod bag and a rigid Cordura protective tube.

N PEPPER X5 S 2452 MH-H HOT PEPPER

Absolute versatility for modern lure fishing. Developed by Gael Even, the PEPPER X5 S 2452 MH-H HOT PEPPER represents a new generation of high-end spinning rods designed for intensive fishing with hard and soft lures, both from the shore and from a boat. Truly versatile, it excels with topwaters, jerkbait minnows, longbill minnows, or sub-surface baits, as well as for the technical fishing of sea bass, pike, and zander with NITRO SHAD 120 and 150. Its length of 2.45 m optimizes casting distances and line control while maintaining a smooth, lightweight, and perfectly balanced action. The new X5 high modulus blank with multi-oriented fibers offers an exceptional level of resonance, lightness, and power reserve for total mastery of animations and fights. Equipped with FUJI SiC K-R guides and an ergonomic VSS reel seat, the HOT PEPPER ensures comfort, precision, and fluidity in all conditions, in both freshwater and saltwater. Delivered with a screen-printed cover and a rigid Cordura tube.

PEPPER X5 S 2602 M SILVER BULLET

The inspiration for the PEPPER S 2602 M SILVER BULLET comes directly from Japanese shore bass anglers. The lightweight ultra-sensitive blank is perfect for tactile asp fishing tactics, for example. The right length for punching out soft baits on light jig heads or Texas and weightless set-ups. Great for working plugs like the CHATTERBEAST 90, STREAM RIPPER 75 & 90, BONNIE 85 & 95, RISER BAIT 008, ARNAUD, RERANGE 110, WATER MONITOR, etc. This PEPPER is built on a top quality X5 blank incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light and thin FUJI K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. The VSS reel seat is comfortable and secure when working a lure or playing big fish. Supplied in a signature rod bag and a rigid Cordura protective tube.

N PEPPER X5 S 2602 MH SILVER OPS

The long-distance fishing reference from the shore. Now available in 260 cm, the PEPPER X5 S 2602 MH SILVER OPS was developed to maximize shore fishing performance, both in the sea and in freshwater. Its exclusive action combines ultra-fast reactivity over most of the blank with a more progressive tip to optimize sensitivity, control of movements, and safety during fights. A true high-performance prospecting rod, it excels with a wide selection of topwaters, jerkbaits, minnows, vibrating blades, casting jigs, and technical soft lures like the MAGIC SLIM SHAD, NITRO SHAD, or NITRO SLIM SHAD. Its length and high modulus X5 blank offer remarkable casting distances as well as perfect reading of the lure and bites, even at great distances. Designed for demanding anglers, the SILVER OPS stands out as a premium reference for bass fishing, asp, freshwater predators, and sea trout. Equipped with FUJI SiC K-R guides, it ensures fluidity, precision, and absolute control in all conditions.

N PEPPER X5 S 2304 L-ML FINESSE ROAD T

The PEPPER spirit in a high-end travel version. The PEPPER X5 S 2304 L-ML FINESSE ROAD TRIP brings all the expertise of the PEPPER series into a 4-piece travel version designed for itinerant anglers, fishing trips, and outdoor adventures. Compact when folded, it easily accompanies all your explorations: hiking, road trips, impromptu sessions in rivers, lakes, or canals. Its fast action combined with an ultra-sensitive solid tip excels in all modern finesse approaches: drop shot, micro jig, light linear, technical soft lures, small minnows, crankbaits, or spinners. Designed for targeting perch, trout, chub, zander, and black bass, it maintains a remarkable reserve of power to handle the most beautiful fish. Built around the new high-modulus X5 blank with multi-oriented fibers, the FINESSE RENEGADE offers an exceptional level of lightness, resonance, and comfort in use. Its FUJI TORZITE TITANIUM K-R rings and openwork TVST reel seat optimize sensitivity, precision, and line fluidity in all conditions. Delivered with a screen-printed cover and a rigid Cordura tube.

N PEPPER X5 B 2204 M-MH SILVER OPS

The baitcasting travel rod designed for adventurous anglers. The PEPPER X5 B 2204 M-MH SILVER OPS retains all the versatility and performance of the famous SILVER OPS in a 4-piece travel version designed for fishing trips and itinerant adventures. Compact and easy to transport, it perfectly accompanies adventurous anglers in search of a truly high-end baitcasting rod always ready to explore new territories. Its 220 cm length and specific action offer a perfect balance of power, sensitivity, and control for modern fishing with jerkbaits, topwaters, spinnerbaits, blade jigs, and technical soft lures. A true prospecting rod, it excels both from the shore and on a boat with the BONNIE, RERANGE, MAGSQUAD, CRUSHER, or NITRO SHAD. Built around the new high-modulus X5 blank with multi-oriented fibers, the SILVER OPS delivers remarkable lightness, excellent resonance, and optimized casting performance. Its FUJI TORZITE TITANIUM K guide setup ensures smoothness, precision, and perfect line control in all conditions. Comes with a screen-printed cover and a rigid Cordura tube.

THE ARTIST X5 S 215 ML-M DARK PUPPETEER

Designed to push the limits of precision fishing, the THE ARTIST X5 S 215 ML-M DARK PUPPETEER is aimed at enthusiasts who appreciate finesse and technicality. It stands out in the THE ARTIST range for its extreme sensitivity, perfectly balanced responsiveness and surgical precision with a delicate touch. The 2.15 m length and short butt combines agility, responsiveness and handling comfort, while maintaining a surprising power reserve for a Medium Light-Medium (ML-M) class rod. This rod is comfortable with most techniques used for targeting bass and perch. Fine fishing fans will be won over by its subtle and progressive action whether with hard baits (WATER MOCCASSIN 75, BONNIE 85, WATER MONITOR 85, RERANGE 85 & 95, STREAM RIPPER 75) or soft plastics in linear, jigging, or fly methods (NITRO SHAD 90, NITRO SLIM SHAD 90 & 110, MAGIC SWING TAIL 4 & 5, MAGIC SLIM SHAD 3, 4 & 5). The perfect resonance of the blank makes it a formidable weapon for perch, zander, bass, and bar hunters. Its high-end X5 blank, designed from pre-impregnated sheets with carbon fibre set at three angles, ensures maximum resonance, lightness, and confidence during fights. It is equipped with FUJI TORZITE TITANIUM KL-H series rings mounted according to the K-R Concept. The choice of these premium rings, along with a rigorously studied layout along the blank, guarantees long and precise casts and greatly reduced risk of tangling. The FUJI TVS-TK reel seat in a 'V' shape, optimizes handling while allowing direct contact with the blank for increased sensitivity. Delivered with a signature rod bag and a rigid Cordura tube.

THE ARTIST X5 S 215 MH DARK LIGHTNING

The THE ARTIST X5 S 215 MH DARK LIGHTNING embodies ILLEX's excellence in the world of high-end spinning rods. Measuring 2.15 m in length, this versatile, lightweight and responsive rod offers a perfect balance between tip sensitivity and butt power reserve thanks to a blank with a marked taper and extra-fast action. Designed for the demanding angler wishing to practice a wide range of techniques with a single rod, this true 'Swiss army knife' of modern fishing excels at handling both hard lures (surface lures: BONNIE 95, 107, 128 / BOWSTICK 130, crankbaits: WATER MONITOR 95, STREAM RIPPER 75, 90, 110 / RERANGE 110 & 130 SP / RV MINNOW 110 SP) and soft lures for bottom fishing and casting (MAGIC SWING TAIL 5 on MAGIC ROUND HEAD jigs from 5 to 14g), in linear retrieves (MAGIC SLIM SHAD 5 & 6 mounted from 7 to 14g), and light dragging (NITRO SHAD 90 & 120 on NITRO SHAD HEAD jigs from 10 to 21g / NITRO SLIM SHAD 110 & 150 on NITRO SLIM SHAD HEAD jigs from 10 to 21g). This elegant Medium Heavy (MH) will be your best ally both at sea and in freshwater, on days when you want to carry only one rod capable of combining sensitivity and power. Whether precisely animating a stickbait, methodically probing the bottom, or firmly controlling a fine specimen in tight swims, nothing stops it. Its high-end X5 blank, designed from pre-impregnated sheets with carbon fibres set at three angles, ensures maximum resonance, lightness, and confidence during fights. It is equipped with FUJI TORZITE TITANIUM KL-H series guides mounted according to the K-R Concept. The choice of these premium guides, combined with a rigorously studied arrangement along the blank, guarantees both long and accurate casts, good compatibility with leader knots, and a greatly reduced risk of tangling. The FUJI TVS-TK reel seat optimizes grip while allowing direct contact with the blank for increased resonance. Delivered with a silk-screened rod bag and a rigid Cordura tube.

B THE ARTIST X5 S 220 H INSIDERS

Mastered power for strong fishing at sea and in freshwater. The THE ARTIST S 220 H INSIDERS perfectly combines lightness, sensitivity, and power reserve to meet the demands of modern anglers chasing the finest bass and pike. Now offered in 220 cm, this new version optimizes casting distances, long-distance setting, and line control for traction fishing. Versatile and particularly comfortable on boat, kayak, float tube, or from the shore, it excels with both technical soft lures and hard lures that require precision and animation control. Its renowned high modulus X5 blank with multi-oriented fibers delivers remarkable resonance while maintaining perfectly controlled power during battles. Equipped with FUJI TORZITE TITANIUM K rings and an ergonomic VSS reel seat, the THE ARTIST INSIDERS ensures smoothness, comfort, and high-end performance in all conditions. Delivered with a silk-screened cover and a rigid Cordura tube.

THE ARTIST X5 S 225 M BLACK OPS

The THE ARTIST S 225 M BLACK OPS has a light but powerful blank and excels in any situation needing precision casting, sensitivity and a reserve of power. A great looking elegant rod designed for light to medium lure fishing for perch, asp, zander and sea bass in particular. Think Weightless, Linear, Light Texas Rig, Light Jig Head, Heavy Drop Shot, etc. Sea bass and asp anglers will appreciate the perfect balance between length, power and responsiveness to cast and work plugs (surface, minnow), soft lures with a NITRO SHAD 90, small casting jigs, RUNNER BLADE 90, etc. This THE ARTIST is built on a top quality X5 blank incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with light FUJI TORZITE TITANIUM K guides. These guides cut out any risk of frap-ups, add distance to every cast and help your lines last longer. The VSS reel seat helps work baits and jigs and give you a stronger grip when playing big fish. Supplied in a signature rod bag and a rigid Cordura protective tube.

THE ARTIST X5 S 235 M-MH BLACK ANGEL

The THE ARTIST X5 S 235 M-MH BLACK ANGEL is a new gem created in collaboration between our ILLEX Pro-Staff fisherman Gael Even and our product manager Thomas Vogels. Gael wanted a rod that beautifully combines power, sensitivity, and lightness. At 2.35m, it is equally suited for both boat and shore fishing. With an extra-fast action, we chose a 1+1 configuration for its blank to maintain all its power and responsiveness, whether casting or when tackling big fish. The THE ARTIST X5 S 235 M-MH BLACK ANGEL is incredible for soft lure fishing for pike-perch and inshore bass. For light pitching and linear fishing with 4 and 6-inch soft lures, banner control and the feel of lure vibrations and the most subtle bites are simply amazing. We are delighted to take you into a world of entirely new sensations and pleasure. Its high-end X5 blank, designed from pre-impregnated sheets with carbon fiber orientation at three angles, ensures maximum resonance, lightness, and confidence during battles. It is equipped with FUJI TORZITE TITANIUM series KL-H rings mounted according to the K-R Concept. The choice of these premium rings, combined with rigorously studied positioning along the blank, guarantees both long and precise casts, good compatibility with join knots, and increased reduction in tangle risks. The FUJI TVS-TK reel seat, openwork and in a 'V' shape, optimizes grip while allowing direct contact with the blank for increased sensitivity. Delivered with a silkscreened cover and a rigid Cordura tube.

THE ARTIST X5 S 2402 M DARK PUPPETEER

THE ARTIST X5 S 2402 M DARK PUPPETEER is a two-piece spinning rod combining length and responsiveness. At 2.40 m, it excels both from the bank and on a boat. Its versatility is based on a blank with exceptional resonance, equipped with a long set of guides mounted close to the blank, ensuring absolute control over movements. The Extra Fast action provides great reactivity, perfectly suited for use with surface lures like the BONNIE 95, 107, and 128 or the BOWSTICK 130, twitch baits, and crankbaits (WATER MONITOR 95, STREAM RIPPER 75 to 110, RERANGE 110 and 130 SP, RV MINNOW 110 SP). When using soft lures, whether linear or with light traction, it offers excellent tail feedback with MAGIC SLIM SHAD, NITRO SHAD 90 & 120 (10 to 21g), NITRO SLIM SHAD 110 & 150 on NITRO SLIM SHAD HEADs of 10 to 21g and perfect bottom reading with a MAGIC SWING TAIL 5 on MAGIC ROUND HEADs of 5 to 14g. This exceptional tactile rod, powerful at the butt and with a nice roundness during a fight, will quickly become your new reference for bass, zander, and pike fishing. Its high-end X5 blank, designed from pre-impregnated sheets with carbon fibre set at three angles, ensures maximum resonance, lightness, and confidence during fights. It is equipped with FUJI TORZITE TITANIUM series KL-H guides mounted according to the K-R Concept. The choice of these premium guides, combined with a rigorously studied layout along the blank, guarantees both long and precise casts, good compatibility with leader knots and a reduced risk of tangling. The FUJI TVS-TK reel seat optimizes grip while allowing direct contact with the blank for increased sensitivity. Delivered with a silk-screened rod bag and a rigid Cordura tube.

THE ARTIST

THE ARTIST X5 B 210 M SORCERESS

The baitcasting rod THE ARTIST X5 B 210 M SORCERESS is a concentrate of our expertise. This new THE ARTIST has been specifically developed for boat casting fishing (by boat or float tube). Its length of 2.10 m, fast and powerful action, and exceptional responsiveness make it the indispensable tool for anglers targeting perch, zander, and black bass. We designed it primarily for 'Power Fishing' using lures like surface lures (BONNIE 85 and 95); Jerkbait Minnows (ARNAUD 100 F, BATTLE MINNOW 80 F & SP, SQUAD MINNOW 95 SP, RERANGE 85, 95 and 110 SP, RV MINNOW 110, SQUIRREL 76 and 79, TWITCH FLESH 75 SP...); Shallow Crankbaits (CHERRY 10 CC, MAGNUM CHUBBY 50...) or with 'wirebaits' (spinnerbaits or blade jigs: CRUSHER Jr. 10 and 14g, BLADE BLASTER 10 and 14g...). During testing, it proved ideal for linear softbait fishing whether in 'light Texas' or typically on jig heads: MAGIC SLIM SHAD 4 and 5, MAGIC CRAW 60 and 80, SCISSOR COMB 3.8". We recommend using weights ranging from 3.5 to 10g. Its length, the speed of its blank, and its sensitivity have amazed us with zander and perch in vertical fishing (MAGIC SLIM SHAD and MAGIC SWING TAIL mounted on jig heads from 10 to 21g). Its specific X5 blank gives it an unparalleled lightness and balance. In addition to detecting the slightest touch, the parabolic action its blank takes on with big fish prevents hook pulls while ensuring maximum sensation. It consists of a very high-end X5 blank, employing a process of pre-impregnated sheets with a three-angle carbon fibre orientation. This THE ARTIST rod is light, resonant, and powerful for enhanced pleasure and effectiveness. It is built with the FUJI TORZITE TITANIUM 'K' series of micro guides. Thinner and lighter, they perfect the transmission of information to the blank, optimize casting distances and the longevity of your line, and eliminate any risk of your line tangling in the guides during casts. It comes with a screen-printed sleeve and a rigid protective cordura tube.

THE ARTIST X5 B 215 MH BLACK SWORD

The baitcasting rod 1+1 THE ARTIST X5 B 215 MH BLACK SWORD has been specifically developed for its versatility. From light Texas rigs to all types of metallic lures or crankbaits, it handles everything! We have combined lightness, sensitivity, power, and balance. Its length of 2.15m, fast action, short handle, and resonance allow it to excel in the art of precise and quick fishing from a boat, float tube, or bank. The BLACK SWORD is ideal for intensive use of crankbaits: stickbaits like the BONNIE 95 and 107; minnow jerkbaits such as the MAGSQUAD 128 SP, SQUAD MINNOW 95 SP, RV MINNOW 110 SP, and ARNAUD 100 and 110 F; wirebaits like the CRUSHER JG, BLADE BLASTER..., and rubber jigs like our JUNGLE BLASTER in 10 and 14g. The X5 carbon enables optimal feel of the lure's movement and perfect detection of bites within snags to uncover big perch, black bass, zander, and pike. It consists of the famous high-end X5 blank, which uses a pre-impregnated wrap process featuring carbon fibre set at three angles. This THE ARTIST gains in lightness, resonance, and power for enhanced pleasure and efficiency. Mounted with the FUJI TORZITE TITANIUM 'K' series rings. Thinner and lighter, to perfect the information transmission to the blank, to optimize casting distances and the lifespan of your line and eradicate any risk of line tangling in the rings during casts. It comes with a silkscreen-printed bag and a rigid protective Cordura tube.

THE ARTIST X5 B 220 H+ ANGEL OF D

The THE ARTIST B 220 H+ ANGLE OF DARKNESS is a dedicated swimbait rod developed for pike and big black bass anglers. The 2m 20 long fast action blank has the power and resonance needed to excel when accuracy and strength are key to success from a boat, float tube or the bank. Soft swimbaits including DUNKLE 5 and 7, hard baits like the BLAST BONE CLICKER 190 SF, DOWZSWIMMER 180 SF, GANTIA 180, FREDDY 170 CW and soft baits: DEXTER SHAD (175 and 200), DEXTER EEL 210, MAGIC SLIM SHAD 7, MAGIC FAT SHAD 7, NITRO SHAD (120 et 150). We highly recommend this rod for covering a lot of water quickly with the CRUSHER 35g or the CRAZY CRUSHER in 14 and 21g sizes, teamed up with a DEXTER SHAD or EEL 150 or even for a DEXTER JERK 120. This THE ARTIST is built on our famous X5 high quality blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Features FUJI TORZITE TITANIUM K guides to eliminate frap-ups, reduce weight and prolong line life. Supplied with a Cordura protective tube and signature rod bag.

THE ARTIST X5 B 250 XH NOTORIOUS PIKE

The THE ARTIST B 250 XH NOTORIOUS PIKE is a baitcasting rod specifically designed for pike fishing on larger waters. It was developed at the request of our team members with very demanding specifications: a total length of 250cm to help you cast long distances- a big advantage in clear and overfished waters- plus providing you with extra leverage to help animate lures in deep water. The THE ARTIST B 250 XH NOTORIOUS PIKE is perfect for the intensive use of 'Big Bait, Swimbait, Glide Bait' or XL soft lures 'Soft Swimbait' like the DEXTER SHAD, the DEXTER EEL, the SUCKER PUNCH. It can easily handle casting lures up to 150g. This rod is the perfect tool weapon for tracking specimen pike in domestic waters and all dream big pike destinations (Spain, Ireland, Sweden, Quebec, Netherlands, etc.). The selection of the X5 blank was not made by chance. Its resonance and power will enhance efficiency and pleasure. Built on a high-end X5 blank using a process of pre-impregnated sheets with carbon fibre set at three angles. Mounted with the FUJI TORZITE TITANIUM KW series of guides. The FUJI TORZITE TITANIUM guides are thinner and lighter, optimising casting distances and the lifespan of your line and eliminating any risk of line tangling in the guides during casts. An EVA handle positioned above the ACS reel seat facilitates animations and ensures a good grip during fights! It comes with a screen-printed bag and a rigid Cordura protective tube.

N ELEMENT RIDER X5 S 215 M-MH KAYAK

As its name suggests, the ELEMENT RIDER X5 S 215 M-MH KAYAK is a rod designed by the TEAM ILLEX sea team to meet the specific needs and expectations of kayak coastal fishing enthusiasts. This rod is undeniably versatile and represents the ideal tool for practicing all techniques: finesse, casting, power fishing, light traction, vertical, and more. Lightweight, responsive, and tactile, its length of 2.15m allows you to approach distant spots with discretion and precision while controlling your lures. Its fast action permits the use of surface stickbaits (BONNIE SERIES, CHATTERBEAST 90 and 110), subsurface pencil minnows (WATER MONITOR SERIES, STREAM RIPPER 75 and 90), Jerkbait Minnow (ARNAUD SERIES, RERANGE SERIES, SQUAD MINNOW 95 SP, MAGSQUAD 128 SP, RV MINNOW 110 SP), Longbill Minnow (DD SQUIRREL 79 SP, SUPER DD SQUIRREL 79 SP, and DD ARNAUD 100 SP) as well as Blade Baits (RUNNER BLADE 70 and 90), making the ELEMENT RIDER X5 S 215 M-MH KAYAK also an ideal rod for light metal jig fishing techniques. It is made of the new high-end X5 blank, which incorporates a pre-impregnated sheet process featuring carbon fiber orientation at three angles. This ELEMENT RIDER gains in lightness, resonance, and power for enhanced pleasure and efficiency. This version is equipped with FUJI 'K' series rings to eliminate any risk of line tangling in the guides during casting, regardless of the conditions encountered. The VSS reel seat ensures comfort during movements and a good grip during fights! It comes with a screen-printed cover and a rigid protective tube in cordura.

N ELEMENT RIDER X5 S 225 M STALKING SPEC

Discrete precision for modern fishing. The new ELEMENT RIDER X5 S 225 M STALKING SPECIAL has been developed for anglers seeking a versatile, responsive spinning rod perfectly suited for discreet and technical approaches. It excels with surface lures, minnows, jerkbaits, and finesse soft baits such as BONNIE, RERANGE, DD SQUIRREL, NITRO SHAD 90, or MAGIC SLIM SHAD. Its length of 225 cm and perfectly balanced action offer precision, control, and comfort both from the shore and on a boat. The new X5 high modulus blank with multi-oriented fibers provides a remarkable gain in lightness, resonance, and power reserve to maximize sensations and efficiency. Equipped with FUJI K rings and the open ergonomic TVST reel seat, the STALKING SPECIAL optimizes the transmission of information, line fluidity, and casting accuracy in all conditions. Delivered with a screen-printed cover and a rigid Cordura tube.

ELEMENT RIDER X5 S 230 H KORRIGAN

The ELEMENT RIDER S 230 H KORRIGAN is a light and responsive rod developed specifically by our team of testers to target big sea bass and pollock. Developed for fishing shad type baits either trolled, on straight retrieves or vertically but equally capable of fishing jigs up to 200g. It has the power to handle hard fighting fish in tough conditions – strong currents, big swells and deep water (up to 90 m) over wrecks and rocks. This ELEMENT RIDER is built on a top quality X5 blank incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness without sacrificing power. Fitted with three legged SIC FUJI K guides. These guides cut out any risk of frap-ups. All guides are double whipped. EVA handle above a VSS reel seat to help work soft baits and jigs plus give you a better grip when playing big fish. Supplied in a signature rod bag and a rigid Cordura protective tube.

ELEMENT RIDER X5 S2402MH-H YELLOWSHOT

The ELEMENT RIDER S 2402 MH-H YELLOW SHOT is a remarkably versatile two-piece rod. Designed for intensive hard lure fishing from the bank or a boat with topwater plugs (BONNIE 95, 107 and 128; CHATTERBEAST 110), subsurface lures (WATER MONITOR 85 and 95, STREAM RIPPER 90 and 110), jerkbait minnows (RERANGE 110 and 130, BATTLE MINNOW 135 SP) and long bill minnows (SUPER DD SQUIRREL 115). At 2m40 long the semi-parabolic action and handle length enhance casting performance. Anglers who appreciate light rods with a smooth, progressive action will love this model for bass fishing with blade baits or soft baits like the 120 and 150 NITRO SHAD on 18 to 28g NITRO heads. Perfect for targeting pike and zander when distance casting with soft baits is required. This ELEMENT RIDER is built using new X5 high quality blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness for fantastic feel and ultimate fishing pleasure. Fitted with light FUJI SIC K guides. These guides cut out any risk of frap-ups. New VSS reel seat for improved grip. Supplied in a signature rod bag and a rigid Cordura protective tube.

ELEMENT RIDER X5 S 240 MH-H+ POWER V

Our ELEMENT RIDER S 240 MH-H+ POWER VERSATILE is the ideal rod for intensive boat fishing. At 2m40 long it has the perfect power and action to cast long distances with unnerving accuracy. Perfect for working surface lures like the BONNIE 107 and 128, CHATTERBEAST 110 & 145 or Jerkbait minnows such as ARNAUD, RERANGE, RV MINNOW, BATTLE MINNOW 135. Ideal for using with NITRO SHSAD and NITRO SLIM SHAD jig heads up to 35 grams. This ELEMENT RIDER is built using new X5 high quality blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness for fantastic feel and ultimate fishing pleasure. Fitted with light FUJI SIC K guides. These guides cut out any risk of frap-ups. VSS reel seat for improved grip. Supplied in a signature rod bag and a rigid Cordura protective tube.

B ELEMENT RIDER X5 S 250 MH-H YELLOW S

This is a super-fast actioned rod with plenty of power to cast long distances. The ELEMENT RIDER S 250 MH-H YELLOW SURFER is designed to fish big surface and subsurface lures. Great too on big shads like the NITRO SHAD 120 or 150 or the NITRO SLIM SHAD 150 and 180. More powerful than the ELEMENT RIDER S 235 MH Power, versatile this rod can be used from shore or boat and will handle light tropical sessions. This ELEMENT RIDER is built on high quality Japanese blanks using the latest FUJI components. Features double whipped FUJI K SIC guides to eliminate frap-ups, reduce weight and prolong line life. The VSS reel seat is comfortable to fish with and play fish on. Supplied with a Cordura protective tube and signature rod bag.

N ELEMENT RIDER X5 S 2602 M-MH SHOREPRED

The specialist in long-distance shore fishing. Designed for demanding marine predator anglers, the ELEMENT RIDER X5 S 2602 M-MH SHORE PREDATOR combines range, sensitivity, and power reserve to efficiently cover vast areas from the shore. Its 2.60 m length optimizes casting distances while ensuring precise control of soft baits, minnows, jerkbaits, and topwater lures. Its high-modulus X5 blank, made from pre-impregnated carbon sheets oriented in three axes, offers remarkable levels of resonance, lightness, and reactivity. More powerful, it still maintains excellent detection of bites and lure movements, even at long distances. Equipped with Fuji K guides to limit tangling and an ergonomic Fuji VSS reel seat to ensure comfort and perfect transmission of information, the SHORE PREDATOR becomes a valuable ally in the pursuit of bass, asp, zander, and pike. Supplied with a printed cover and a rigid Cordura tube.

ELEMENT RIDER X5 S2702MH SHORELAUNCHER

The ELEMENT RIDER S 2702 MH SHORE LAUNCHER is, as its name suggest, a two-piece rod designed for shore fishing. Powerful, fast, very light and well balanced, this rod can punch out plugs on the 10 to 40gr range a long way with a noticeable tip action that works lures with precision. A great rod for launching surface lures (BONNIE 95, 107 and 128, RISER BAIT 006 and 008, CHATTERBEAST 90 and 115), plugs (WATER MONITOR 95, STREAM RIPPER 90 and 110, ARNAUD 110 F, RERANGE 110 and 130 SP, BATTLE MINNOW 135 SP) and casting jigs (MICRO SLOW LAZY JIG or SILVER SHADE). The versatile blank is ideal for subtle soft bait fishing on jig heads between 10 and 28g (NITRO SHAD 90, 120 and 150, NITRO SLIM SHAD 110 and 150, MAGIC SLIM SHAD 4, 5 and 6, MAGIC FINESSE SHAD 5, MAGIC Z SHAD 105, 135 and 160). There is plenty of reserve power in the blank to cope with hard fighting big bass. This ELEMENT RIDER is built using new X5 high quality blanks incorporating prepreg carbon set at three different angles to reduce weight and increase responsiveness for fantastic feel and ultimate fishing pleasure. Features FUJI K guides to eliminate frap-ups, reduce weight, increase responsiveness and prolong line life. Features the new VSS reel seat for a more comfortable grip. Supplied with a rigid Cordura protective tube and signature rod bag.

N ELEMENT RIDER X5 S 2902 MH SHORELAUNCH

The ELEMENT RIDER X5 S 2902 MH+ SHORE LAUNCHER is a two-piece rod developed by TEAM ILLEX sea to meet the specific needs of shore anglers. Ultra versatile, very powerful, highly responsive, and well-balanced, this exceptional launcher is the ideal tool for anglers who need to easily cast hard lures (poppers, stickbaits, minnows), soft lures, or casting jigs over long distances, regardless of conditions (headwinds, strong currents, rough seas, even the most challenging). Its fast action is perfect for conveying the slightest movement to surface lures or minnow types, but also for feeling the slightest vibration of a soft lure like the NITRO or a RUNNER BLADE. Its power reserve is ideal for easily handling big fish fights from the beach, rocks, or pier. These characteristics make the ELEMENT RIDER X5 S 2902 MH+ SHORE LAUNCHER a rod we highly recommend to accompany you on your fishing trips for pollock and cod off the coasts of Northern Europe. Finally, specialists in the pursuit of large asp will quickly recognize its potential. It is made of the new high-end X5 blank, which uses a pre-impregnated sheet process with carbon fiber orientation at three angles. This version is equipped with the FUJI SIC 'K' series rings to eliminate any risk of your line tangling in the rings during casting. It is combined with the VSS reel seat to enhance your grip. It comes with a silkscreened cover and a rigid protective Cordura tube.

VERTICAL FISHING

This series is composed of three rods specifically dedicated to vertical fishing, ranging from the finest spinning approaches to more powerful scenarios. This series offers a wide range of rods to cover all types of perch and pike fishing, regardless of the venue and conditions you might face.

NIGHT SHADOWS S 190 MH-H VERTICAL GAME

If you are looking for a versatile rod for boat or float tube fishing then the NIGHT SHADOWS S 190 MH-H VERTICAL fits the bill. Tactile and sensitive with the perfect resonance to read the bottom and detect taps from fish. The tip has a soft action to absorb lure vibration and give you a cushion against violent takes. Supremely versatile and will handle weights up to 45g allowing you to fish deep lakes or bigger powerful rivers. The blank has plenty of reserve power for firm casting and to control the biggest, hardest fighting fish. Built using top quality Japanese FUJI components: ALCONITE K anti-frap guides and a VSSMTK reel seat for optimum comfort. Supplied in a signature rod bag.

Ref	Length (cm)	Size (cm)	Section	Handle butt length(cm)	Action	Weight (g)	Lure (g)	Jigging	Line (Lb)	Guides (Qty)	RRP€
46559	191	166	1+1	17	Extra Fast	114	10-40g	Up to 45g	10-20Lbs	8	349,99

NIGHT SHADOWS B 190 M-MH VERTICAL GAME

Designed for vertical fishing fans who swear by baitcasters or simply want the option of a baitcasting model. The NIGHT SHADOWS B 190 MH VERTICAL has all the same great features as the spinning version. This rod exudes class and proves once again our ability to target rods at specific situations. The action and length have been worked on to deliver cleaner strikes on lakes or rivers and cope with hard fighting fish. Great fun to use on fish of any size. Rated for classic vertical situations with jig heads from 12 to 28 g coupled with lures like the MAGIC SLIM SHAD 4 to 7 and MAGIC SWING TAIL 4 to 7. Built using top quality Japanese FUJI components: ALCONITE micro guides tied in a spiral so the line does not touch the blank and a FUJI SKELETON SKTS reel seat for optimum comfort and direct contact with the blank. Supplied in a signature rod bag.

NIGHT SHADOWS B 200 MH-H VERTICAL

Our NIGHT SHADOWS B 200 MH-H VERTICAL is a rod designed for deep water situations and sharpshooting. The light blank combines resonance and power and at 2 m long you have enough leverage to set hooks firmly at depth. This model also lets you cast at a fish a long way from the boat without having to swap rods. Designed to handle heavy jig heads from 30 to 60g with lures from 12 to 23cm like MAGIC SLIM SHAD 6 and 7, MAGIC SWING TAIL 7 and 10, DEXTER SHAD and the DEXTER EEL despite feeling so light the rod has plenty of reserve power leaving little chance for even the biggest pike and zander!

N NIGHT SHADOWS B 200 H-XH VERTICAL RAID

Absolute precision for modern pelagic fishing. The new NIGHT SHADOWS B 200 H-XH VERTICAL RAIDER has been specifically developed for modern techniques of sharp shooting and pelagic fishing for pike and zander. Its fast and perfectly calibrated action offers optimal reading of sonar echoes, precise control of trajectories, and total mastery of animations both vertically and in controlled linear motions. Designed for the most demanding technical anglers, it excels with modern soft lures dedicated to active fishing in open water, while maintaining a remarkable reserve of power to secure fights with the largest specimens. Its new generation high modulus blank guarantees an exceptional balance between lightness, resonance, and reactivity to maximize the perception of the most subtle bites at great depths. A true high-end weapon for enthusiasts of modern pelagic fishing. This rod is equipped with Japanese FUJI components: FUJI ALCONITE 'K' rings to eliminate any risk of line tangling in the guides during casting and an ACS reel seat. This rod comes with a screen-printed cover.

PERCH AND ZANDER SERIES

Series of 4 rods designed to fish with lighter tactics targeting perch, chub, bass and zander. Contains spinning and baitcasting models and covers the spectrum of perch tactics on all waters.

NIGHT SHADOWS S 205 L+ RACING FINESSE

The NIGHT SHADOWS S 205 L+ RACING FINESSE is a spinning rod developed in collaboration with our ILLEX angle Marc Ptacovsky. A rod specifically designed to meet the needs of finesse fishing for perch and black bass. Its length of 205cm and short handle are perfect for precise casting as well as quick and meticulous lure control. Whether animating hard baits like small twitchbaits and small crankbaits, or fishing with finesse tactics with soft lures: drop shot, wacky, neko rig, and mid-strolling. The high-modulus TORAY blank and its carbon handle give the rod a unique feel, making it the ideal companion for finesse perch fishing. Built using top quality Japanese FUJI components: ALCONITE K-R anti-frap guides. Fitted with a carbon reel seat and grip for optimum bottom and bite detection. The stripped-back design of the reel seat is comfortable to fish with and gives great grip when playing fish. This rod comes with a screen-printed case.

N NIGHT SHADOWS S 215 L-ML POWER FIN

The NIGHT SHADOWS S 215 L-ML POWER FINESSE is the new REFERENCE in the series for all finesse fishing techniques (weightless, light linear, split shot, drop shot, light vertical, wacky rig, darting, etc.). Its powerful action and extreme sensitivity make it one of the most recommended rods for fishing with small NITRO SHAD 65 and 90 in traction or for effortlessly and precisely animating a variety of lures (small and medium-sized lures, surface, minnow, long bill minnow, crankbait, vibration, blade, etc.). This rod is also ideal for enticing bass, chub, and perch near foliage or docks. It features the latest generation of FUJI components. FUJI ALCONITE 'K-R' guides eliminate any risk of line tangling in the guides during casting, regardless of conditions. This gem is equipped with a carbon reel seat and butt to enhance its resonance and detection abilities: bottom configuration, lure movement, and short strikes. The streamlined design of the reel seat ensures comfort during animations and a good grip during fights. This rod comes with a screen-printed cover.

53039	215,5	185	26,5	1+1	123,5	Extra Fast	5-18	3-10	9	399,99

PIKE SERIES

Composed of eleven rods ranging from MH to XXXH power, this series focuses on versatile and powerful approaches for pike fishing and specimen fish, with models designed for Swimbait, Jerkbait, Jerkbait Minnow, Wire Baits, Rubber Jig, and Soft Swimbait. Whether seeking versatility or very specific action, every angler is sure to find a rod that provides complete satisfaction.

NIGHT SHADOWS B 220 MHFG CRANKING TIME

The NIGHT SHADOWS B 220 MH FG CRANKING TIME is a versatile baitcasting rod developed for classic sizes of crankbaits (DIGLE series, MASCLE DEEP, etc.), lipless crankbaits (TN, TN Trigon, etc.), spinnerbaits (CRUSHER, etc.) and blade jigs (CRAZY CRUSHER, etc.). Also great fishing small soft baits (DERABALL, DUNKLE 5 & 7, DEXTER SHAD 150 & 175) and medium-sized swimbait (BLAST BONE 150 SF, SLEEK MIKEY 160, FREDDY 130 & 170). Lends itself to careful exploration of bigger venues with soft baits like the NITRO SHAD 120 or 150 either fishing linear or traction styles. Built using a fibreglass and high modulus carbon composite that combines comfort and power. At 2.20 metres long, the action is perfect for distance casting and soaks up lure vibration to reduce angler fatigue yet has enough spine to handle hard fighting fish. Features the latest Fuji components including FUJI ALCONITE K guides to eliminate frap-ups, reduce weight, increase responsiveness and prolong line life and an ACS reel seat. Supplied with a signature rod bag.

NIGHT SHADOWS B 220 H SWIMBAIT DRIVER

This baitcasting rod is designed specifically for using with hard and soft swimbait (BLAST BONE 190 SF, GANTIA 180, DOWZSWIMMER 180 SF, FREDDY 170 CW, DUNKLE 5 et 7, DEXTER SHAD 175 et 200). The NIGHT SHADOWS B 220 H SWIMBAIT DRIVER has plenty of power to handle pike of all sizes. Built using top quality Japanese FUJI components: ALCONITE K series anti-frap guides and an ACS reel seat. Supplied in a signature rod bag.

NIGHT SHADOWS B 220 H-XH FG MASSIVE AT

The NIGHT SHADOWS B 220 H FG (Fiber Glass) MASSIVE ATTACK is a 'Heavy' baitcasting rod that's unique in its class. It inherits the action of the SWIMBAIT DRIVER, to which we've added fiberglass composite, making it specifically suited for intensive use with hard and soft swimbait (FLAT BONE CLICKER, GANTAREL, DOWZSWIMMER 180, MAGNUM and GIANT DERABALL, DUNKLE 7, VIVIDUS, DEXTER SHAD 175 and 200, DEXTER EEL 210, SUCKER PUNCH 145 and 190...) or pike spinnerbaits (CRUSHER 33G, GIANT CRUSHER 62G). There's no doubt that the MASSIVE ATTACK will quickly earn a place in the arsenal of pike and specimen bass anglers. This rod is equipped with Japanese FUJI components: FUJI ALCONITE 'K' guides to eliminate any risk of line tangling in the guides during casting, and an ACS reel seat. This rod comes with a screen-printed cover.

N NIGHT SHADOWS B 250 XH+ FG COMBAT DOG

The NIGHT SHADOWS B 250 XH FG (Fiber Glass) COMBAT DOG is a unique 'Extra Heavy' baitcasting rod. It inherits the DNA of the iconic RESERVOIR DOG, into which we have injected fiberglass composite to create a rod specifically dedicated to meeting the needs of specimen pike or musky hunters in large environments. A rod that excels in the intensive use of hard and soft swimbaits (DOWZSWIMMER 220, GIANT DERABALL, DUNKLE 7 and 9, DEXTER SHAD 200 and 250, DEXTER EEL 210, SUCKER PUNCH 190, NITRO SHAD 180...), pike spinnerbaits (GIANT CRUSHER 62G), or large lipless crankbaits (DEXTER VIB 120). With its blank size, elongated handle, and action, it allows you to cover great distances with each cast from the shore or from a boat, while methodically controlling your lure and providing you with a powerful leverage arm in case of a distant strike. It gives you a real advantage when distance is crucial for targeting overfished fish in clear waters. This rod is equipped with Japanese FUJI components: FUJI ALCONITE 'K' rings to eradicate any risk of line tangling in the rings during casts and the ACS reel seat. This rod is delivered with a silkscreened sleeve.

NIGHT SHADOWS B 250 XXH THE WILD DOG

The NIGHT SHADOWS B 250 XXH THE WILD DOG is a baitcasting model developed for specimen pike anglers. Designed for fishing big swimbaits and oversized shads like the DEXTER SHAD 175 and 200. Adding some fiberglass to the blank helps reduce fatigue from excess lure vibration and helps compress the blank more fully on each cast – important when distance is a factor to reach wary, educated fish in clear water. Softening the action with fibreglass also helps when playing hard fighting pike and keeps hook pulls to a minimum. The THE WILD DOG is the ideal rod for targeting huge pike. Built using top quality Japanese FUJI components: ALCONITE K series anti-frap guides and an ACS reel seat. Supplied in a signature rod bag.

NIGHT SHADOWS B 265 XXXH WAR DOG

The NIGHT SHADOWS B 265 XXXH WAR DOG baitcasting rod has been three years in development with an impressive design brief. At 2m 65 long, the rod can launch the biggest lures on the biggest waters and has the leverage needed to pump big baits in very deep water. Capable of handling XXXL soft baits like our DEXTER SHAD 250 or a Dunkle 9. This is a rod for the biggest pike on the largest waters! We have added some fiberglass to the blank for extra comfort when casting and working lures. The rod will comfortably cast XXXL lures up to 250g and is the perfect rod for specimen pike hunting on big waters across Europe and North America. Built using top quality Japanese FUJI components: ALCONITE K anti-frap guides and an ACS reel seat for optimum comfort. An EVA grip above the reel seat gives more support when playing big fish. Supplied in a signature rod bag.

PIKE SERIES

N NIGHT SHADOWS MS 157 ML ROVER

The freedom to fish anywhere, without compromise. With a folded length of only 25.5 cm, the size of a small water bottle, the NIGHT SHADOWS MS 157 ROVER pushes the boundaries of mobility to offer a truly technical spinning rod in an ultra-compact format. Its ingenious 3-piece construction, with one telescopic section, allows it to reach approximately 157 cm when deployed, with an action perfectly suited to delicate fishing for small predators. Designed for modern traveling anglers, it fits easily into a backpack, glove compartment, waist pack, or carry-on luggage to always be ready for unexpected opportunities. Perch, trout, chub, or black bass... the MS 152 ROVER becomes the ideal ally for urban explorations, micro-adventures, and impromptu sessions by the water. More than just a travel rod, this NIGHT SHADOWS is also aimed at hiking, camping, vanlife enthusiasts, and outdoor activities seeking a high-end, discreet, and efficient fishing solution. Compact, elegant, and surprisingly responsive, the MS 152 ROVER offers a new vision of modern nomadic fishing.

53511	152	25,5	15,5	3	72	Fast	2-10	2-8	7	299,99

The NIGHT FALL series includes ten two-piece rods — six spinning and four casting — designed for modern predator fishing. Sensitive, versatile, and perfectly balanced, they cater to both delicate perch fishing techniques and the more powerful methods for pike, whether from the shore or by boat. With NIGHT FALL, Fishing Lights Up takes on its full meaning: fishing comes alive, sensations intensify, and every strike becomes more intense, even as the light fades.

N NIGHT FALL S 2102 L - M

The finesse dedicated to demanding perch anglers. The NIGHT FALL S 2102 L-M has been specifically developed for light and technical predator fishing, with a particular affinity for targeting large perch. Its fast action combined with an ultra-sensitive solid tip offers perfect detection of subtle bites, structures, and modern finesse techniques. Versatile, lightweight, and perfectly balanced, it excels with small soft lures, micro jigs, vibrating blades, or small minnows, both from the shore and on a boat. Its high-modulus TORAYCA® carbon blank delivers remarkable resonance while maintaining responsiveness and comfort of use. Equipped with a Full EVA handle, FUJI SiC Polished Silver White guides, and delivered in a neoprene protective cover, the NIGHT FALL S 2102 L-M stands out as a high-end finesse spinning rod designed for modern technical anglers.

N NIGHT FALL S 2202 ML

Extra-fast precision at the service of modern technical fishing. The NIGHT FALL S 2202 ML was developed for anglers seeking a lightweight, responsive, and ultra-precise spinning rod for modern fishing of perch, light zander, and predators with finesse lures. Its Extra Fast action provides excellent reactivity, optimal strike detection, and remarkable control over movements. Particularly adept with soft baits, vibrating blades, small jerkbaits, or technical rigs, it features a high-modulus TORAYCA® carbon blank, offering a perfect balance between lightness, resonance, and power reserve. Equipped with a Full EVA handle, FUJI SiC Polished Silver White guides, and delivered in a neoprene protective cover, the NIGHT FALL S 2202 ML stands out as a true high-end spinning reference for enthusiasts of modern finesse fishing.

N NIGHT FALL S 2222 M+

The powerful versatility of modern lure fishing. The NIGHT FALL S 2222 M+ was developed for anglers seeking a responsive, versatile spinning rod capable of effectively covering a wide range of modern techniques dedicated to predators. Its Fast action offers an excellent balance between sensitivity, precise animations, and control during fights. Particularly effective on large perch, zander, black bass, and light pike, it excels with soft lures, jerkbaits, vibrating blades, spinnerbaits, and medium-sized crankbaits. Its high-modulus TORAYCA® carbon blank delivers remarkable resonance while maintaining power and comfort of use. Equipped with a Full EVA handle, FUJI SiC Polished Silver White rings, and supplied with a neoprene protective cover, the NIGHT FALL S 2222 M+ stands out as a high-end spinning rod ideal for technical and versatile anglers.

STREAM MASTER S 1992 L SHADE CREEK

The STREAM MASTER S 1992 L SHADE CREEK combines simplicity and elegance perfectly. It is the most versatile lure rod for trout in our range for small rivers. This two-piece spinning rod measuring 1.99m has been developed and designed for light trout fishing with lures: minnow and crankbait type lures (TRICOROLL 47 and 55, TINY FRY 38 and 50, CHUBBY MINNOW 35 SP and CHUBBY), small soft lures (MAGIC SLIM SHAD 2, MAGIC MAY FLY, MAGIC WOODLOUSE) or for prospecting using spinners and spoons (NATIVE SPOON 2.5 to 3.5g). The action of the blank amplifies any subtle jerks or twitches you give and is very accurate to cast. The STREAM MASTER testing team recommends this rod for use in streams, small and medium rivers. Equipped with Japanese FUJI components. FUJI ALCONITE 'K-R' rings to eliminate any risk of tangling in the rings during casting. Features a modified the reel seat and the ferrules are high-quality. An internal coating prevents marking on your reel foot. Supplied with a signature rod bag.

50269	200	103	17,5	Moderate Fast	2	99	1,5-5	2-6	10	269,99

STREAM MASTER S 1992 ML MOUNTAIN STREAM

The STREAM MASTER S 1992 ML MOUNTAIN STREAM combines simplicity and elegance. The length of 1.99m, suits fishing overgrown areas. The fast action lends itself to working dense plugs with jerks and twitches (TRICOROLL RYUSHIN KNOCKER and FLAT TRICOROLL). Can cope with powerful flows looking for trout stationed under obstacles or undercut banks. The blank keeps your lure stable and supports your line during three-quarter downstream drifts, even in strong currents, without saturating the rod. Jerking is a more irregular motion than twitching and allows for pauses of varying lengths. This technique involves making random movements with the rod held high or to the side - and then retrieving the line between each movement with the reel. This rod is paired with Japanese FUJI components. FUJI ALCONITE 'K-R' rings to eliminate any risk of tangles during casting. We have modified the reel seat and the ferrules are of even higher quality. An internal coating prevent marking of your reel foot. Supplied in a signature rod bag.

STREAM MASTER S2152ML TROUT OPPORTUNIST

Developed to be the most versatile rod in the range, it combines a fast action with a strong power reserve. Ideal for using crankbaits from 50 to 80 mm: TRICOROLL GT, FLAT TRICOROLL, TRICOROLL RYUSHIN KNOCKER. Will comfortably hold a dense minnow in the deepest and strongest water currents. The solid tip offers sensitivity and progressive action, allowing it to cast a small minnow, a soft lure like the MAGIC SLIM SHAD 3 on a small jig head or spoons like the NATIVE SPOON between 3.5 and 9g. the tip also helps the detection of the most subtle bites, substrate changes and vibrations. The power of the high module, light TORAY blank optimises feedback while having the backbone for tackling most combative fish (big trout, sea trout, salmon,...). Coupled with Japanese FUJI components. FUJI ALCONITE 'K-R' rings to eliminate any risk of tangling during casting. We have modified the reel seat, improved the ferrules are even more qualitative and an internal coating prevents any marking on your reel foot. For extra comfort and line control, this new version is 5cm longer and its cork butt has been tapered to facilitate handling. Supplied with a signature rod bag.

N MAMA KAERA

The compact frog that sees bigger. The MAMA KAERA is a bulky and efficient FROG designed to target active black bass and fish positioned in the heart of the densest cover. Compact, dense, and perfectly balanced, it maintains excellent obstacle-crossing capability while generating enhanced sound and vibration presence. Its specific silhouette and optimized balance allow for extremely easy and precise animations: tight walking the dog, nervous twitching, or insistent pauses in the gaps of weed beds. The MAMA KAERA instantly flips on strikes to maximize the hook-up rate, even in the most cluttered conditions. Designed for modern technical surface fishing, it excels over weed beds, lily pads, submerged wood, and plant structures where its compact profile triggers explosive strikes. A new high-end reference for all enthusiasts of frog fishing, black bass fishing in cover, and extreme topwater approaches.

DERABALL

The DERABALL is a hybrid sot bait crossed between a crank and a shad that is best described as a swimbait. Designed to imitate a range of prey, this small compact ball casts brilliantly and is designed for skipping round obstacles. When worked back on straight retrieves the seductive swimming action is sure to stimulate interest from any predators holed up in weed beds, lily pads, bankside snags or sunken trees. Originally designed for shallow water fishing there is nothing to stop you adding a tungsten ball to get it down deeper. The "Line Thru" attachment system runs your leader through a plastic tube, so the lure is free to slide up the line when a fish is on. The DERABALL features an ingenious rigging system. It is supplied with a top-quality treble hook with two prongs whipped onto the shank for attaching the hook to the lure and a rolling swivel so the hook can turn a full 360° eliminating the chance of hook pulls when a fish is on.

MAGNUM DERABALL

The MAGNUM DERABALL was developed exclusively for us when Gael Even and Thomas Vogels convinced the Japanese company JACKALL of the potential of this new size. Hence, ILLEX is proud to announce the launch of this large-sized DERABALL. With a +20% increase in size and volume, the MAGNUM DERABALL retains all the attributes that made this lure famous. A hybrid soft lure halfway between a crank and a shad, it falls into the category of soft swimbaits and resembles a range of prey (amphibians, small fish, rodents). This small, compact, and very dense ball is easy to cast long distances and skips effortlessly under overhanging branches. Worked back on a simple retrieve, its tight swimming action will trigger the attack of predators lurking in shallow waters, under vegetative cover, in undercut banks, submerged deadwood, weed beds, lily pads, or rocky areas... Initially designed for shallow fishing, nothing prevents you from fishing deeper by adding a tungsten bullet. The 'Line thru' rig system allows you to pass your leader through the lure to pull it up the line during the fight. The MAGNUM DERABALL features a top-quality reinforced treble hook double whipped and mounted on a rolling swivel to allow 360° rotation, thus minimizing the risk of hook pulls. This XL version of the DERABALL does everything the original size does... just bigger! Bigger silhouette, more intense vibrations, larger volume of displaced water, all aimed at attracting bigger predators (pike, black bass, large perch, catfish). A lure that is both fun to use and uncompromisingly effective!

N GIANT DERABALL

The power to trigger the largest predators. The GIANT DERABALL 120 transposes the unique DNA of the famous DERABALL into an oversized version specifically developed for lure fishing for pike. With its massive 120 mm profile and atypical swimming with strong vibratory signature, it moves a considerable volume of water and instantly attracts the attention of the most aggressive predators. Designed for prospecting fishing as well as slow animations above the weeds, the GIANT DERABALL combines stability, powerful rolling, and low-frequency vibrations to trigger reflex attacks, even on educated fish. Its compact silhouette facilitates long-distance casting while maintaining excellent performance at different recovery speeds. Formidable on both active and wary pike, it stands out as a must-have for anglers seeking a high-end, innovative, and ultra-effective pike lure.

VIVIDUS

Maximizing realism makes the VIVIDUS a top-choice 'Soft Swim Bait,' designed for hunting pike and large black bass near structures and above weed beds. Featuring a very flexible and buoyant body, the tail fin gives the lure a distinctive wobbling even at very low speeds. This natural action, imitating a trout or a cyprinid moving through the water layer, is sure to trigger attacks from lurking predators that have learnt to be wary of the vibrations emitted by soft lures like shads. Armed with an ultra-sharp size #2 treble hook mounted on a rolling swivel and a split ring to minimize hook pulls and protect the lure from fish damage. Tungsten inserts, included with the lure, should be placed from tail to head along the belly before use (see assembly details provided in the packaging). Two rings near the head allow the hook to be moved to the sides to make fishing through weeds and snags easier. Available in five exclusive colours, the VIVIDUS will quickly become a must-have in your lure box.

DUNKLE 7"

The DUNKLE 7" is a soft shad swimbait packed with innovative features. Designed for bass and pike anglers, the dense body helps with long-distance casting but is also great at skipping around sunken structures and snags. The lure is armed with an ultra-sharp double hook on a rolling swivel with a split ring and kept in place with a clip that comes free when a fish takes. This reduces hook pulls and missed takes by holding the hook in the optimal position. A second clip is fitted to the back of the DUNKLE to let you fish closer to snags. The body shape tapers fast from the thick shoulders to the large tail generates a seductive swaying action when fished at slow speed. Available in a range of 11 colours. The DUNKLE 7" is a must-have lure for the modern angler!

JOINT - BIG BAIT

KAWASHI MIKEY 115

Specially designed for exploring around snags and weedbeds, the KAWASHI MIKEY 115 is a three-piece Jointed Swim Bait. The curved lip will dive up to 1 meter deep. The pronounced S-shaped swimming motion enhances the shimmering effect from the flanks and generates a distinctive noise attraction. The rolling combined with an enticing wiggle triggers intense reflex attacks from pike, bass and large perch lurking near obstacles. The head and tail hooks are equipped with teasers, making the lure effective during pauses, when predators are hesitant to strike the lure. Perfectly mimics an injured fish or rodent struggling on the surface. A compact lure that can easily fished with and medium heavy or heavy rod.

N DEKA-HAMAKURU R-SP

The suspending version of the famous rolling minnow. The DEKA HAMAKURU 95 R SP retains all the effectiveness of the legendary HAMAKURU R in a formidable Suspending version for fine fishing and educated fish. Its ultra-natural rolling swim, combined with its ability to remain perfectly still during pauses, triggers reflex attacks even in the most challenging conditions. Ideal for prospecting shallow areas, structures, weed beds, or cluttered edges, the DEKA HAMAKURU 95 R SP excels in linear retrieval punctuated by pauses, twitches, or slow and controlled animations. A weapon of choice for perch, black bass, pike, and other freshwater predators. A technical, refined, and tremendously effective jerkbait minnow for demanding anglers.

DEKA-HAMAKURU 95 RS

The DEKA HAMA-KU-RU R is a three-part articulated lure with a distinctive S-shape swim during retrieval. The clicking and vibrations emitted by its segmented body are capable of grabbing the attention of predators, even from a distance. Thanks to its fastening system (2 points per joint) and perfect weight distribution , it casts far and accurately unlike many other articulated lures. Whether retrieved linearly or with a 'Stop and Go' retrieve, it will attract all your favourite predatory fish with its very appealing 'Wobbling' and 'Rolling' actions.

GANTAREL

The GANTAREL is a super realistic lure that has several strings to its bow! The 3 sectioned body has a balanced action that looks for all the world like a pumpkin seed fish. This attractive action is boosted by the addition of teasers and feathers fixed onto the hook rings. The two pectoral fins act like diving bibs and let the lure dive down to a depth of 1 metre. A rolling swivel has been added to the line attaching ring to eliminate any chance of line spin. A second ring situated on the upper lip lets you modify the action of the lure or add an extra weight to convert the GANTAREL into a slow sinking swimbait. There is a third eye on the lures tail which will take an extra hook or a teaser lure. The GANTAREL is also able to turn round 180 degrees after a single twitch. This amazing lure has so many fish pulling features!

B GIGANTAREL

At 200mm long and weighing a whopping 153g the Gigantarel is the biggest lure in our range! A jointed swimbait with two reinforced articulated sections, the lure has an incredibly realistic sharp S-shaped swimming action that perfectly mimics bigger prey fish. Two feather teaser hooks add to the attraction and help disguise the hooks and make the lure more attractive during stop/start retrieves. Pectoral fins are slightly angled to keep the lure stable and dive to about 1 metre. As with the smaller versions, this Gigantarel comes with rolling swivels fitted to each attachment point reducing line spin and hook pulls when playing hard fighting fish – a second eyelet is situated under the chin. Try adding a sinker to create a slow sinking swimbait that will hug the bottom or tied direct as a wakebait for fishing over weed beds. There is a third eyelet on the tail for fixing an extra hook or feather. And if this was not enough the Gigantarel can turn a full 180 degrees when twitched! Designed for specimen hunters and trophy fish, the Gigantarel is available in 5 great colour options!

The DOWZSWIMMER SF is a large articulated three part Swim bait, ideal for targeting specimen pike, black bass, and catfish. The very realistic design (gill and fin details, etc.) and the natural colour finish 'RT=Real Type' perfectly mimic the prey of these predators. Generates as S shape swim on straight retrieves which can be broken up with jerks and twitches. Its density helps make long-distance casts with perfect precision despite being articulated! This lure is ideal for exploring shallow areas, above vegetation, and near structures. To adjust its swimming depth while maintaining the lure's centre of gravity, we recommend adding a 'John Weight' to the stomach ring. Its elastomer tail enhances the natural swimming motion. The DOWZSWIMMER is sure to attract predators lurking in the depths!

DOWZ SWIMMER 180 SF

The DOWZSWIMMER 180 SF is a big three section swim bait destined for catching specimen fish (pike, black bass, catfish...). The design is realistic with great detail in the fins and gills and our RT=Real type colour schemes complete the look of prey fish. Straight retrieves generate an S-type action whilst more positive jerks produce a more erratic effect. Dense enough to be cast long distances and land discretely despite the jointed body. Perfect for exploring shallow bays, running over weedbeds or working round structures. You can regulate the swim depth simply by adding a John weight on the stomach swivel. The elastomer tail helps the whole lure swim more naturally. The DOWZSWIMMER has what it takes to tempt big predators up from the deeps.

DOWZ SWIMMER 220 SF

The DOWZSWIMMER 220 SF is a three-section lure featuring a large tail designed for attracting specimen sized black bass, pike and catfish. The design is very realistic and pays great attention to detail around the gills and fins and our RT (Real Type) colours perfectly imitate prey fish. The lure has a natural S type action on straight retrieves but will shoot off erratically if jerked. The lure is dense enough for accurate distance casting and is great for exploring shallow areas in and around weed beds or sunken structures. There is a second eye on the mouth so you can add a JOHN WEIGHT to fish the lure deeper. The elastomer tail further emphasises the natural swimming motion. This is a lure guaranteed to grab the attention of big predators!

FLAT BONE CLICKER

The FLAT BONE CLICKER is a top choice 'Jointed Big Bait.' Thanks to its articulated body, lip, and elastomer tail the FLAT BONE CLICKER can be fished 'Walking the Dog' style without straying too far off line. This action is very effective when fish are hunkered near snags due to adverse weather or heavy angling pressure. On a straight retrieve, the FLAT BONE CLICKER generates a strong 'Rolling' action that grabs the attention of predators even when sitting deep.

The MAEKON is a two-piece jointed swim bait featuring the unique Mono Flex Articulation System. This innovative design improves the swimming action by giving the body more freedom to move and gives the tail a slightly delayed rolling action that often proves decisive for takes. The MAEKON can be fished on stop-go retrieves around obstacles or on slow straight retrieves to cover marginal weedbeds quickly. When fished straight, the lure generates a noticeable wobbling action similar to a large crankbait. The fish shaped tail adds realism and gives some dynamism to the lure when paused. This medium sized lure is very versatile and perfect for using with a Medium-Heavy rod in either spinning or baitcasting versions. The rolling action and ability to displace a lot of water make this the ideal prospecting lure for European anglers targeting pike and specimen black bass. Adding a John Weight lets you modify the fishing depth from a suspender to a slow sinker and even a fast sinker, giving you extra versatility in the bank!

SWING MIKEY 115

The SWING MIKEY 115 is a medium-sized hard swimbait with a three-piece articulated body and small lip for fishing just sub-surface. The body profile resembles prey fish like roach, rudd, small bream or carp but could equally be a small perch, black bass or sun perch. The fluttering swimming action is a mix of wobbling and rolling generating a frenetic and irresistible attraction that works when fished slowly as a wake bait or faster on stop and go straight retrieves. The flat tail section exaggerates the rolling action and looks very natural. The rear section also has an eye to attach a feather or small blade teaser for extra attraction. Gives off a deep noise attraction that is augmented by the clicks from the articulated body sections. The SWING MIKEY 115 is a lure designed for medium heavy situations targeting pike, perch and black bass.

SLICK BAIT

The SLICK BAIT is a surface lure with a realistic finish that perfectly mimics a small baitfish in distress in weedbeds or near a jetty. This stimulates the instinct of lurking predators and prompts them to attack this lure as if it were fleeing or dying prey. Easy to use, you can alter the swimming direction by attaching the line to one of the swivel rings running through the lure's body. On the right side, the lure moves left, and on the left side, the lure moves right. The fine silicone strips extending from the gills generate some water resistance. This shimmering action triggers aggressive takes. The two ABS pectoral fins add even more realism and notably reduce the risk of the hook tangling in the line when casting. Three glass beads act like a rattle even when moved slowly. Its tail is made from a highly flexible elastomer. It is jointed to encourage natural movement and produce a jerky motion, mimicking a fleeing action. Designed primarily for bass fishing, it is also suitable for targeting other species like perch and pike.

BONNIE 95 SILENT

Our iconic BONNIE 95 is now available in a silent version, the BONNIE 95 SILENT. Fans of the BONNIE now have a great alternative when a more discreet lure is required. For example when pressurised fish have grown wary of rattles and noise or flat calm conditions and/or clear water. The BONNIE 95 SILENT is designed to cover large areas of water quickly and locate fish easily. Designed to target a range of species from sea bass, black bass, perch, pike to asp. Despite the absence of beads, the lure is capable of accurate distance casting. This lure comes with the triple eye attachment system (Three Angle Tying Eye) that lets you change swimming action simply by tying your line in a different position. The interior has four separate chambers that balance the bait perfectly resembling a traditional wooden lure. This balance helps your BONNIE 95 SILENT lure sit perfectly on the surface and stay stable even in rough conditions whether on lakes or at sea.

BONNIE 107

This intermediate 107 size BONNIE lure was developed originally for Brazilian anglers after peacock bass and aymara. Now available in Europe. This bait has all the classic BONNIE features. A great stickbait for prospecting open water targeting sea bass, black bass, perch, pike, asp, etc. Designed to be tough enough to cope with light tropical fishing for tarpon and trevally, this is a great lure for the travelling angler. Fitted with tungsten beads for excellent casting performance and vibration attraction. The inside of the bait has four separate chambers that help to get the balance of the bait perfect and as close as possible to traditional wooden lures. This balance helps your BONNIE lure sit perfectly on the surface and stay stable even in rough conditions.

BONNIE 128 SILENT

The iconic BONNIE 128 is now available in a new silent version- the BONNIE 128 SILENT. Now all fans of this great surface lure have a silent alternative for when conditions are a little trickier. For example, clear water, flat calm conditions or pressurised fish. Designed for working big waters quickly to locate species like sea bass, black bass, big perch and pike. Despite not having bearings, the lure casts accurately at range. The three- point fixing (Three Angle Tying Eye) on the head gives you different options to change the swimming action. The body comprises 4 chambers for optimum density and to spread the weight better, creating the feel of a traditional wood lure. The BONNIE 128 SILENT sits well in the surface film making it a versatile lure both at sea and on freshwater venues.

BOWSTICK KNOCKER 130

This new BOWSTICK KNOCKER 130 has a different noise attraction to its predecessor. The BOWSTICK KNOCKER 130 has two glass and one brass bead at the head keeping one large brass bead and a tungsten bead at the tail which give it the distinct deep noise and helps with distance and accuracy on the cast. This stickbait is designed to trigger predator aggression and provokes a surprising number of attacks from sea bass, black bass, big perch and pike. The round, chunky body gives a distinctive swimming action and displaces plenty of water. The BOWSTICK KNOCKER 130 will also generate a wide Walking the Dog action. The body has been drilled out behind the gills and this triangular cavity generates attractive small air bubbles. This lure is also very effective for tropical freshwater species like Peacock Bass and Aimara. Explosive surface action guaranteed!

CLYDE MUD SUCKER 110

The CLYDE MUD SUCKER has been specially designed with a fast surface action that remains stable even in a big wind. With the weight transfer system (2 tungsten beads) and a slender body, this bait can cover vast areas of water. The main difference between the BONNIE and the CLYDE MUD SUCKER is the CLYDE's concave mouth that produces more popping and splashing on the retrieve. An extraordinary surface lure that will cover a lot of water quickly and equally attractive to sea or freshwater predators (bass, black bass, perch, pike, asp...)

B RISER BAIT 007R

The RISER BAIT 007 R is the slim line ultra-realistic member of our RISER BAIT range. It retains the same great swimming action that characterises these new pencil baits. This compact lure casts well and is unusually dense for its size. One great innovation is the angle of the lip that generates erratic darting movements typical of a fleeing prey fish. The best way to work the lure is a straight retrieve. The lure will break the surface on faster retrieves or can be fished sub-surface on slower more controlled retrieves. Key to the development of the RISERBAIT was recreating the action of a startled fish darting upwards towards the surface. During testing, we noticed that the majority of takes happen when the bait is rising. This lure has all the elements you need for long-range fishing for freshwater predators like perch, asp, chub and black bass. A must-have lure for accurate long-range angling from boat or shore. The aerodynamic body design lets you punch through strong winds to keep you fishing at long range in tricky conditions!

RISER BAIT 006

This new RISER BAIT 006 retains all the great features of the 8cm version. This new generation pencil bait has an innovative lip angle that generates erratic darting movements typical of a fleeing prey fish. The best way to work this lure is a straight retrieve. The lure will break the surface on faster retrieves or can be fished sub-surface on slower and more controlled retrieves. Designed primarily as a bass lure for Japanese waters, the key to the development of the RISER BAIT concept was recreating the action of a startled fish darting upwards towards the surface. A great lure for all your favourite predators like asp, perch, pike, black bass, sea bass, bonito & baby tarpon. The aerodynamic body design is a real advantage in strong winds or when you need to fish at extra-long range. This is an essential lure for accurate distance angling from shore or boat targeting sea or freshwater species.

SMALL TOPWATER

N CHUBBY BUG 35

The CHUBBY BUG 35 is a hybrid lure classified as a small 'Super Shallow Crankbait' whose design is inspired by insects that stray onto the water's surface. The CHUBBY BUG 35 combines an insect appearance with a highly realistic finish and features small lateral appendages and silicone lamellae arranged in two levels. Upper level: during regular retrieves, the silicone lamellae create a natural wake on the surface. When static, they float and move spontaneously, like the wing beats of a trapped flying insect. They also provide some resistance, enhancing the feeling and control of retrieves. Lower level: the silicone lamellae perfectly mimic the legs or wings of a small insect struggling underwater. Even when paused, the silicone lamellae react to currents or the slightest water movements producing subtle and realistic motions to entice any chub, educated black bass or wary trout or perch. A mass transfer system improves casting distances and overall swimming performance while maintaining a very realistic profile. To complete its realism, we developed a range of natural colours with patterns inspired by beetles and ant species.

BONNIE 65

The BONNIE 65 is quickly becoming the benchmark for small surface stickbait lures. The BONNIE 65 is the smallest size in the legendary 'BONNIE' series. This finesse version of the 'BONNIE' comes into its own when targeting wary fish or those solely focused on small prey. A small glass bead in the head gives off a distinctive noise that triggers takes from predators. A great lure for light bank fishing! Despite being small it can be cast a long way very accurately thanks to its aerodynamic shape combined with a tungsten bead at the rear. An indispensable addition to your lure box when targeting perch, chub, and black bass!

N BONNIE 65 SILENT

Absolute discretion for the most cautious predators. The BONNIE 65 SILENT retains all the effectiveness of the legendary BONNIE in a silent version specially developed for the most delicate fishing situations. Its compact profile perfectly mimics the small prey that perch, chub, and black bass feed on, while offering a more discreet approach for heavily pressured fish. Easy to animate in walking the dog, it produces a lively and precise swim capable of triggering the subtlest attacks. Its aerodynamic shape combined with a mass transfer system ensures long and precise casts despite its small size, allowing for discreet access to the most coveted spots. The BONNIE 65 SILENT has established itself as an essential reference for finesse surface fishing when naturalness and discretion make the difference.

WATER MOCCASIN 75

The WATER MOCCASSIN is the smallest of all ILLEX's "pencil baits". To make it more versatile than ever, it now weighs 9.4 gr. You can easily work this tiny lure for ultra-cautious fish even under windy conditions. This lure comes with the triple groove eye attachment system (Three Angle Tying Eye) that lets you change swimming action simply by tying your line in a different groove. The inside of its body has an internal multi-wall structure (Multi Rib Frame) created to achieve greater density and a better distribution of mass. The tungsten beads inside the WATER MOCCASSIN do two things: perfect cast control in the air and that unique sound when worked through the water.

CHUBBY POPPER 42

This small popper is an updated version of the CHUBBY. Simply fantastic when predators are chasing prey of the same size as the lure (insects, amphibians or fry). Compact and well proportioned, the lure casts like a dream thanks to its internal weight. The CHUBBY POPPER has a walking the dog type action and will splash and pop with ease imitating frightened prey. Any popper worth its salt needs to sit well when stopped. To recreate the look of the tail of a prey fish or an insect's wings, the lure is fitted with a feather hook - sure to fool the wariest of chub or black bass.

BLEEKER TOPPY 50

The BLEEKER TOPPY 50 is a small surface popper lure. The slightly bulbous rear contains two large balls fixed for long and precise casting. The shape also helps displace a lot of water despite its small size. The fin located under the throat generates additional water movements during 'Walking The Dog' phases. This small Popper is capable of everything from slow or fast Walking the Dog, Popping, and Splashing. The BLEEKER TOPPY 50 is silent but still generates plenty of noise with its concave mouth. This new size will see the surface erupt with repeated attacks from perch, asp, black bass, pike, sea bass, bonito, little tunny, baby tarpons, small jacks, and more.

BLEEKER TROPHY 67

The BLEEKER TROPHY 67 is a surface popper lure. The body bulges at the back and contains two large beads for long and accurate casting, displacing plenty of water for such a small lure. The fin located below the throat adds extra movement particularly during walking the dog style retrieves or when popping and splashing. The BLEEKER TROPHY 67 is silent but still generates plenty of disturbance from the tail and concave mouth. This lure will see the surface erupt with repeated attacks from perch, asp, black bass, pike, sea bass, bonito, little tunny, baby tarpons, small trevally and more.

MINNOW

The long-distance specialist. The HAGRE MINNOW were developed for anglers seeking range, precision, and efficiency in large areas. Its aerodynamic profile and lively swimming action allow it to quickly cover vast zones in search of the most active sea bass, asps, and pikes. Stable at high speed, formidable in straight retrieval as well as twitching, it perfectly mimics the escape of a baitfish. A premium minnow designed for modern shore fishing, where distance and triggering power make the difference.

HAGRE MINNOW 96 F

The HAGRE MINNOW 96 F is a 'Super Shallow' lure developed in Japan for seabass fishing from the shore. It features a chubby body very similar to that of a stickbait, along with a unique concave lip that allows it to move just below the surface. These attributes make it ideal for targeting predators in shallow waters and near snags and weed (estuaries, beaches, rocky areas, oyster farms, above seagrass beds, and other structures). Very easy to use, a straight retrieve at any speed will generate a wide and very stable swimming action. Fitted with the same patented mass transfer system (tungsten cylinder) as the RERANGE for optimum casting performance. Although initially developed for seabass fishing, perch and asp will quickly be equally eager to intercept this new prey. An essential prospecting lure for your tackle box!

N HAGRE MINNOW 120 F

The minnow designed to dominate shoreline fishing at sea. The HAGRE MINNOW 120 F has been specifically developed to meet the demands of anglers practicing shoreline fishing at sea. Thanks to its sleek profile, long-distance balance, and powerful swimming action, this floating minnow allows for quickly covering vast areas in search of active seabass, even in challenging wind or current conditions. Its lip, designed for quick retrieves, provides excellent stability and a pronounced rolling action combined with particularly attractive darting movements. The HAGRE MINNOW 120 F excels both in linear retrieval and twitching, where it perfectly mimics the erratic escape of a baitfish. Its aerodynamic shape significantly optimizes casting distances, a major asset for reaching distant feeding frenzies from beaches, piers, or rocky areas. Beyond its effectiveness at sea, the HAGRE MINNOW 120 F also proves formidable for asp fishing in rivers, especially in large current areas where its casting performance and aggressive swimming trigger spectacular surface strikes. Its floating behavior and shallow running depth also make it an excellent choice for pike fishing above weed beds or in shallow areas, where it can be retrieved slowly without snagging while maintaining a very attractive swim. Versatile, precise, and extremely effective, the HAGRE MINNOW 120 F stands out as an essential premium minnow for modern shoreline fishing.

Motor Oil Tiger

The ARNAUD is likely the first fishing lure conceived and developed by the Japanese company 'JACKALL' for European waters. After various studies and trials, this lure was given a very distinctive swimming action. With a very pronounced 'Rolling' and unpredictable swimming movement, this lure offers a very attractive swaying action particularly attractive to large specimens. Perfectly suited for 'Twitching' and 'Jerking', it will turn and flash its flanks in all directions like a panicked baitfish.

The RERANGE is a small, dense, and streamlined jerkbait minnow that will appeal to both freshwater and saltwater anglers looking to cast long distances particularly into the wind. It retains all the features that made the larger 110 and 130 sizes successful. The streamlined silhouette and flat sides, the pronounced rolling action that makes the sides shimmer, its 'Sustaining' density, the patented mass transfer system (a tungsten cylinder coated with a plastic tube) that optimises your casting distances and its deep sound. The smaller the lure, the more nervous and erratic its behaviour becomes. These attributes give the entire RERANGE series an energetic swim when twitched or jerked or during 'Stop and Go' animations. We asked for these smaller sizes to perfectly mimic a medium-sized baitfish when predators such as asp, sea bass, perch, black bass, pike, zander and lake trout are focused on small prey. Available in two new small sizes: 85 and 95mm.

N RERANGE 95 MR SP

Mastered depth, absolute versatility. The RERANGE 95 MR (Medium Runner) enhances the renowned RERANGE family with a version capable of efficiently exploring deeper water layers while maintaining the sharpness and ultra-aggressive movements that built its reputation. A true reference in modern jerkbaits, it stands out with exceptional versatility in both freshwater and saltwater. Thanks to its specifically developed Medium Runner lip, the RERANGE 95 MR quickly reaches its swimming depth while maintaining perfect stability during fast retrieves, twitching, and sharp jerks. Its long-distance mass transfer system ensures precise and powerful casts, even against the wind, allowing for effective coverage of vast fishing areas. Deadly on perch, zander, black bass, pike, and sea bass, it excels in both linear retrieval and more technical animations with long pauses. Its perfectly balanced suspension and powerful flashes trigger strikes from active predators as well as the most cautious fish. Compact, sharp, and extremely versatile, the RERANGE 95 MR establishes itself as an essential premium jerkbait for anglers seeking performance, depth, and maximum efficiency in all conditions.

This dense and slender jerkbait-minnow will appeal to freshwater and saltwater predator anglers eager to cast it over long distances and into the wind. Its patented mass transfer system (a tungsten cylinder coated with a plastic tube) and flattened sides indeed optimize your casting distances. Its pronounced rolling, which makes its sides shimmer, and its deep sound make it very attractive.

RERANGE 110 SP

This is a smaller version of the RERANGE 130 SP. Sure to find favour with all freshwater and sea lure anglers who regularly fish at long distance and have to cast into headwinds. The patented weight transfer system (a resin coated tungsten cylinder) and profiled sides help maximise casting distances. Perfectly imitates small prey fish and is ideal for more energetic twitching or jerking styles. The lure has a pronounced roll to it and shimmers enticingly even in the worst weather conditions!

RERANGE 110 DR SP

The RERANGE 110 DR SP – DR for ‘Deep Runner’ and SP for ‘Suspending’- is the long-lipped version of the RERANGE 110 SP. The RERANGE 110 DR SP has been specially developed for us to dive quickly up to 2.5 meters. Displaces plenty of water thanks to its pronounced rolling action, accentuated by the sides shimmering enticingly as it moves. Features the patented mass transfer system (a tungsten cylinder coated with a plastic tube) to help you cast long distances easily, allowing you to reach fish without getting too close with your boat, a real advantage when targeting wary fish. Initially created for seabass fishing, it has proved to be extremely effective in freshwater on large perch, zander, black bass, and of course, pike that simply cannot resist its charms!

RV MINNOW 110 SP

The RV MINNOW 110 SP is a jerkbait minnow in the REVOLTAGE series of lures designed for the top-level competitive black bass angling scene in Japan. The silhouette and energetic wobbl'n'roll swimming action bring something new to our range of jerkbait minnows. A Medium or Medium heavy spinning or baitcasting rod is perfect for getting the most out of this lure. Fished on straight retrieves mixed up with twitches, jerks and pauses the lure darts and dives aggressively provoking reaction takes from nearby predators. Pike, perch, zander, asp or black bass are all likely targets. The lure will hang suspended during pauses and we recommend that you lengthen these pauses as the water cools down. Equally good for sea bass fishing from the shore or a boat and can be cast a long way helped by a weight transfer system. Also good for targeting big trout and sea trout on larger rivers.

SQUAD MINNOW 65 SP

The SQUAD MINNOW is a jerkbait that combines all the ingredients needed to trigger a strike. To improve balance, the weights are fixed, allowing the lure to come to a complete stop between animations. The result is unequalled suspension and perfect immobility, which can be decisive when fish follow. The lure can also be made to repeatedly dart on the retrieve allowing you to vary the action from a walking the dog action to a sudden twitching and darting movement. The fixed weights are also a great help with accurate distance casting.

B MAG SQUAD 115 F

This season we welcome back the MAGSQUAD 115 but in a new floating version. It has the same great swimming action and sound attraction that makes our famous MAGSQUAD 128 such a star amongst pike anglers. So why a smaller version? There are certain conditions like fishing in shallows such as polders or round snaggy areas where a smaller, more compact bait can be an advantage. It can also make all the difference if fishing conditions get harder on both freshwater venues after pike, zander, big perch and black bass or sea fishing for bass and pollock. We have come up with a wide range of colours including two specifically designed for sea bass fishing at night.

MAG SQUAD 128 SP

The SQUAD MINNOW promptly became a 'must-have' jerkbait for demanding tournament pros, especially among the US bass fishing elite. The great demand for the larger model encouraged us to develop two new sizes (115 and 128 mm) which we have called the 'MAGSQUAD'. Despite the longer length, the lure still retains a slender profile. Very stable in action and responds well to many different rod movements. The sound and vibration attraction has been carefully balanced with a combination of metal and glass beads to draw predators' curiosity.

MAG SQUAD 160 SP

At the request of our TEAM ILLEX testers Seiji Kato and his Japanese lure development team have designed this 16cm version of the legendary MAGSQUAD Jerkbait Minnow, now widely used by pike anglers across Europe. This large model is designed to provoke takes from the largest freshwater and sea specimens. It has all the fish-catching power of the MAGSQUAD 128 but in a supersize package!

SQUIRREL 61 SP

The SQUIRREL is the most versatile jerkbait in our range. When you twitch the SQUIRREL back with short knocks on the rod tip, the lure takes on a squirming motion which is particularly noticeable when worked over a snag. This unpredictable and occasionally frenetic swimming action is remarkably close to that of a distressed prey fish.

DD SQUIRREL 67 SP

The DEEP DIVER SQUIRREL is the long-billed version of the SQUIRREL. When this Longbill Minnow reaches its optimum depth, it will start staggering on every rod movement flashing just like a dying fry. Not only you can work it classically like a regular crankbait on a steady retrieve, but you can also easily try a “kick back jerking” keeping your rod tip high while jerking on a slack line.

FLAT DD SQUIRREL 79 SP

The FLAT DD SQUIRREL 79 SP is a 'Longbill Minnow' specifically developed at the request of Australians for barramundi fishing. It is halfway between a 'Longbill Minnow' and a 'Flat Side Crankbait', able to displace more water and can be fished very slowly when needed, making it a formidable tool for enticing fish suspended in mid-water or positioned deeper. The FLAT DD SQUIRREL 79 SP stands out with its large silhouette, flat sides that shimmer enticingly and exceptional responsiveness when cranked on linear retrieves, interspersed with 'Stop & Go' pauses to entice all types of predators to attack. An ideal lure for attracting perch, black bass, zander, pike, and sea bass on a range of venues and is very easy to fish with.

B DD ARNAUD 100 SP

When it comes to tackling fish which are not actively feeding or wary from angling pressure, The DD Arnaud is THE solution. This long bill minnow will dive to 3m and react positively when you jerk - turning over and flashing in all directions imitating wounded or panic action of a bait fish. Easy to cast, it has a trajectory that can best be described as a «tight wobble».

CRANK BAITS

The next-generation precision square bill. The MASTER CRANK 47 was developed for demanding anglers seeking a compact crankbait capable of efficiently covering all water layers. Available in SR (Shallow Runner) and MR (Medium Runner) versions, it excels with perch, black bass, chub, and other freshwater predators. Its square bill made from circuit board material provides immediate reactivity and increased sensitivity upon contact with structures. Thinner and more rigid than a traditional lip, it generates precise deviations, improves obstacle clearance, and perfectly transmits the lure's vibrations during both slow and fast retrieves. The SR version is ideal for exploring shallow depths, while the MR quickly reaches deeper areas while maintaining perfect stability. Equipped with the O.M.S. (Out Metal System) weight transfer system, the MASTER CRANK 47 offers remarkable casting performance, high precision, and strong rolling combined with powerful vibrational emissions. A true high-end prospecting tool designed for modern crankbait enthusiasts.

N BLING 55

The flat crankbait that combines flash, distance, and aggressiveness. The BLING 55 is a compact flat crankbait designed to trigger predator reactions through a unique combination of intense flashes, high-frequency vibrations, and a particularly lively swimming action. Its flattened profile maximizes light reflections from all angles and enhances its attractiveness even in stained waters. Equipped with a magnetic mass transfer system, it offers excellent casting performance while instantly regaining its balance from the first turn of the reel. Its tight, fast swimming action combined with pronounced rolling makes it a formidable weapon for perch, bass, chub, and zander. A technical crankbait designed for anglers seeking maximum visibility, reactivity, and effectiveness on active fish.

TN 38

The TN 38 is the tiny version of our famous lipless crankbait. Featuring all the great fish catching features that have made the TN series so popular over the last 20 years. Great casting performance with a stable swimming action at any speed thanks to the clever 'Out Metal System' tungsten weight fitted at the mouth. Being so dense, tungsten helps to read the bottom cleanly. You will notice the difference as soon as the lure touches bottom! The weight system allows the lure to pivot over obstacles protecting the trebles from snagging up. The TN 38 has a distinctive deep resonance in the water, characteristic of all our TN lures. This new smaller size is ideal for targeting perch, zander, asp, chub, black bass and trout on lakes and rivers.

TN 38 TRIGON

The TN 38 TRIGON is the tiny version of our famous lipless crankbait. Featuring all the great fish catching features that have made the TN TRIGON series so popular, notably the oversized teardrop lead coupled with the clever 'Out Metal System' tungsten weight fitted at the mouth. Being so dense, tungsten helps to read the bottom cleanly. Perfect for distance casting and getting the lure down quickly in the water column. The TN TRIGON is a great prospecting lure capable of reaching depths other plug baits can't manage. The weight system and size of lure let you fish very slowly across the bottom with less risk of snagging. Can also be fished classically on straight retrieves at different speeds, mixing it up with twitches and jerks. The TN 38 TRIGON has the distinctive deep resonance in the water that is characteristic of all TN lures. This new smaller size is ideal for targeting perch, zander, asp, chub, black bass and trout on lakes and rivers.

TSUKUMO 66

The TSUKUMO 66 is a 'Lipless Crankbait' specifically developed in Japan for fishing bass in shallow estuaries or rocky coasts. Its rear-mounted lip is inverted to catch water, forcing it to rise towards the surface whilst helping reach long distances during powerful casts. A revolutionary concept that allows the TSUKUMO 66 to be used in very shallow areas at depths of around 1 meter, where all vibration-type lures will snag bottom. Very simple to use with slow or fast retrieves. The higher the speed, the shallower it will go. When animated in a 'lift-and-fall' zigzag motion, the TSUKUMO 66 rises quickly and descends slowly due to the resistance of its inverted lip. We think this lure has great potential on European waters. It has all the attributes needed for exploring large expanses of weed beds, where perch, black bass, zander and pike are waiting to intercept their prey. A reaction lure that will undoubtedly appeal to asp in large rivers.

TN/60

This range of lipless crankbaits stand out for their excellent casting ability. But what makes the TN series even more remarkable is their exceptional stability at various retrieve speeds. The lure gives you a very clear picture of what is on the bottom thanks to the special 'Out Metal System'. Here the mouth of the lure has been specially weighted to bounce lip first over the bottom. This system helps the lure to swivel around snags and then get back in line quickly preventing the hook snagging up.

TN 60 TRIGON

The TN TRIGON features an oversized raindrop shaped weight that can be attached to its lip. This adds weight for distance casting and allows the lure to be fished deep and sink fast. Particularly useful when the fish are hugging the bottom or are posted too deep for normal plugs to reach. Perfectly dimensioned for ultra-slow bottom fishing but has all the same great characteristics as other TN lures so can equally be fished fast and straight or with jerkier saw-tooth type retrieves. The rattle system gives off attractive deep vibrations typical of all TN lures.

HARDBAITS

The tiny fry was designed to give of strong vibrations similar to a crankbait. What makes Tiny Fry so attractive is its amazing wriggling action. Easy to use twitching or jerking, it imitates perfectly a panic-stricken fry. The sides of the lure will flash on the slightest rod movement without the lure jerking off course. Its unique body shape makes the Tiny Fry an excellent bait for holding steady in a flow.

FLAT FLY 50 SP

The FLAT FLY 50 SP is a must-have for early season fishing and targeting the most educated fish. This silent, suspended lure with its streamlined body is perfect for fishing in shallows between 30 and 80 cm deep in medium cold-water rivers. A linear retrieve as slow as possible while going upstream simply mesmerizes the trout, causing them to strike repeatedly. Once the water warms up and you are fishing downstream it is unbeatable with a continuous retrieval enhanced by a few twitches. It excels at catching trout, perch, and chub in challenging conditions.

TINY FRY 65 SP

The TINY FRY 65 SP is the new size of the iconic small 'minnow' known by all European anglers for over 20 years for its ability to lure any predator in our rivers and lakes. A lure designed for strong vibrations and sinuous action. Easy to animate with titches and jerks, it perfectly mimics a panicked or injured small fish. At the slightest prompt the sides will shimmer without becoming unbalanced. The unique body and slender lip give it great stability in the current. This is one lure that trout, perch, chub, black bass, and asp have a hard time resisting!

LIVE DARTER

The LIVE DARTER is a small swimbait with an ultra-realistic silhouette. Best fished with darting motions – sharp rod tip jerks that tighten and loosen the line, allowing the LIVE DARTER to move from left to right as well as up and down! This formidable and unusual swimming style drives perch, black bass, chub, and trout crazy! Excessive hook movement can increase resistance when retrieving a lure, compromising its movement. The LIVE DARTER brilliantly solves this issue with its system that keeps the double hook snug against the body to prevent any undesirable resistance. The tail is made of tinsel, a supple material that reacts flexibly to the lure's action, giving it a natural undulating effect. Notably, when the lure reaches the peak of its 'dart' and its movement begins to wane, the tinsel tail continues to subtly wave. This persistent tail movement keeps the fish's attention until the end, causing more strikes. In challenging conditions such as cold water, when perch are less active and struggle to chase fast-moving lures, they may have difficulty tracking the lure. That's when 'Hover-strolling' (stationary mode fished mid depth) proves very useful in fooling educated and notoriously difficult fish.

TRICOROLL 47 HW

The TRICOROLL is our new favourite. Designed specifically for trout in fast water, this little minnow has all the attributes needed to become an ultra-light classic!

- Perfectly realistic finish.
- Body shape holds well in a flow and is critically balanced.
- Two different weights offered. S for a slow sinking model and HW for the «heavy weight» version which sinks rapidly and casts further.
- Fantastic rolling action that works equally well on slow or fast retrieves.
- Can be easily worked back by jerking or twitching to imitate injured prey fish in lakes or rivers.
- Triple Owner hooks.

HARDBAITS

The ultimate finesse for trout fishing in running waters. The THIN TRICOROLL opens a new dimension in the world of technical minnows for trout fishing. Developed by the Japanese company JACKALL, this model features an extremely refined profile generating powerful flashes and exceptional reactivity in the current. Designed for demanding anglers, it excels in both mountain streams and more open rivers, targeting wary trout, grayling, and salmonids. Thanks to its ultra-thin body and flat sides, the THIN TRICOROLL produces intense rolling and ultra-responsive darting with the slightest movement. Its specific balancing greatly enhances response to twitching and jerking animations while maintaining controlled descent to efficiently explore shallow water layers. Its remarkable stability in strong currents and casting performance make it a true precision tool for technical river fishing. Available in three sizes to cover all configurations, the THIN TRICOROLL stands out as a premium minnow for trout fishing, combining finesse, control, and maximum efficiency in lively waters.

FLAT TRICOROLL 45 S

The FLAT TRICOROLL range has a new smaller model. Small in size, but every bit as efficient. Its ability to hang in strong currents and hold position is simply incredible! This is where being small has a big advantage, particularly when working undercut banks where the strongest flow is pushing right into the bank. The lure has all the same features as the larger models. Whilst giving of a high level of vibration this lure can hold its line in even the strongest flow and can work down through a water column with a distinct rolling style that trout find particularly irresistible. The lure has proved equally effective on slower rivers fishing it just under the surface with rod held high fishing in open water or over weed beds and obstructions.

FLAT TRICOROLL 55 S

Our ILLEX FLAT TRICOROLL 55 S is the fruit of close collaboration between the ILLEX STREAM MASTER team and Koichi Fujimatsu, famous lure designer with Japanese company JACKALL. This project combines Japanese know-how with the requirements of our rivers and is the culmination of three years of field tests. The result is a quick sinking minnow featuring a more compressed body shape than the original. Flattening the body helps cut through the water column so the lure reaches the riverbed faster. The FLAT TRICOROLL starts working immediately with a distinctive rolling action as it drops through the water that continues as you fish downstream or ¾ downstream drifts – following the lure with the rod held high and the line quite slack. Because of the pressure exerted by the current minimal movements are all you need to keep the lure working. The triangular lip shape keeps the lure stable even in fast broken water. Try classic twitching and jerking to provoke takes from wary trout. Perfect on any trout water, the stable body design is particularly suited to more turbulent river sections or deeper slow reaches where simple water pressure and tiny rod movements are enough to set the lure fluttering attractively. It is not surprising that the Japanese have christened the FLAT TRICOROLL as, meaning “dancer!”.

HARDBAITS

The TRICOROLL KNOCKER SHW is simply the heavier and noisier version of the TRICOROLL RYUSHIN SHW. The addition of a tungsten ball has increased the weight of the lure (by an average of 6% depending on the model) and thus further enhanced its capabilities: this ball, through its mass transfer, improves casting accuracy and distance while increasing its descent speed. This ball gives it a deep sound enhancing the lure's presence to more quickly trigger predators in the area. The TRICOROLL KNOCKER SHW, a minnow-type lure, is 'Super Fast Sinking' or 'Super Heavy Weight' and retains its preferred capabilities for targeting trout, perch, and asp. Its mechanical characteristics make it operative during descent (strong 'Rolling' effect), but also during downstream or 'three-quarter downstream' drifts, during which the angler accompanies the lure with a high rod position and a semi-tensioned line. In these conditions, the slightest movement sets it in motion through the simple pressure exerted by the current on the triangular-shaped lip, ensuring great stability in the most turbulent areas. Traditional 'Jerking' and 'Twitching' animations remain, of course, effective in deceiving the vigilance of trout. Particularly comfortable in all environments (small, medium, and large rivers as well as mountain lakes). Its streamlined body ensures exceptional hold in fast current areas, but also in slower sectors where the slightest water pressure or movement is enough to make it oscillate. To reduce the risk of unhooking, the ventral hook is attached by a rolling swivel that rotates 360 degrees. These elements also make it a prime choice for other species such as asp and perch. The TRICOROLL RYUSHIN KNOCKER series is available in four sizes. 'RYUSHIN' translates from Japanese to Center of the River.

SMALL CRANK BAIT

MICRO CHUBBY 30

The MICRO CHUBBY 30 is the smallest size in the legendary 'CHUBBY' series. This small version was designed to mimic a small prey (amphibian, insect, fry) and outsmart the wariness of the most educated fish. It retains the chunky shape of the 'CHUBBY' but in a diminutive size, making the MICRO CHUBBY 30 a valuable ally for all ultra-light fishing. Its swimming action is lively which makes it very attractive when retrieved with subtle movements. This lure is irresistible to perch, chub, and trout in rivers or lakes. An essential addition to have in your lure box!

CHUBBY 41

The CHUBBY 41 SR (Shallow Runner) is a small crankbait ideal for fishing shallows. Worked back on a straight retrieve or broken up with a stop-and-go style will provoke takes from perch asp, chub, trout, black bass and pike. Try a faster steady retrieve to provoke instinct takes from active or unpressurised fish! CHUBBY crankbaits are renowned across Europe for their versatility and appeal to all our freshwater predators throughout the year!

N CHUBBY 41 MR

The ideal depth for triggering the most wary predators. The CHUBBY 41 MR (Medium Runner) completes the legendary CHUBBY family with a version capable of exploring a deeper layer of water while maintaining the tight and ultra-attractive swimming action that made this iconic crankbait successful. Developed for fishing perch, chub, and trout, it proves deadly when fish are slightly off the bottom or along the current edge. Thanks to its specially designed Medium Runner lip, the CHUBBY 41 MR quickly reaches its swimming depth while maintaining perfect stability at both low and high retrieval speeds. Its pronounced rolling action, fine vibrations, and great ability to navigate obstacles make it an indispensable ally for efficiently exploring rivers, lakes, and cluttered areas. Compact, precise in casting, and extremely versatile, it will appeal to anglers seeking a premium crankbait for freshwater predators.

CHUBBY 41 DR

This new 'Deep Runner' version of the CHUBBY 41 is sure to be as popular as the standard version. The CHUBBY 41 DR is a small, robust 'Crankbait,' perfect for exploring deeper waters, riverbank edges, covering water in 'Power Fishing' mode, bottom tapping and fishing round structures. A simple linear retrieval with pauses – classic 'Stop & Go' – is enough to provoke strikes from a perch, asp, chub, trout, black bass, or pike. This is the all-purpose 4x4 lure! You can even try very fast straight retrieves to trigger reflex takes from active or uneducated fish. No wonder European anglers have made the CHUBBY their reference crankbait- versatile and formidable against all freshwater predators throughout the seasons.

MAGNUM CHUBBY 50

The MAGNUM size of the iconic CHUBBY has finally arrived on our waters. The MAGNUM CHUBBY 50 is a shallow-running version developed for shallows and snaggy/weedy waters. Ideal for cover cranking, with a simple linear retrieval interspersed with pauses to entice ambushing predators to attack. There is no doubt that its reputation, ease of use, and effectiveness will appeal to perch, asp, chub, trout, bass, or pike in any situation. No wonder European anglers have made the CHUBBY their reference crankbait- versatile and formidable against all freshwater predators throughout the seasons.

The effectiveness of DERACOU in finesse version. The DERACOU FINE takes the DNA of the famous ILLEX tail spinner into a more subtle version, designed for light and technical fishing. Its resin body combined with a titanium blade generates finer vibrations and a more discreet presentation, ideal for clear waters, strong lighting, and pressured fish. Available in 3.5 g and 5 g, it allows easy exploration of the upper water layer and precise targeting from the shore or boat. Its translucent natural colors enhance its realism and make it a formidable weapon for perch, trout, chub, and black bass. A DERACOU finesse designed for lighter, higher, and more discreet fishing.

SPIN TAIL

The SPEED VIB is a hybrid between a metal blade (KNOCKIN' JAW) and a 'Lipless Crankbait' (TN 38). It features an ABS body tapered along the dorsal (back) to easily slice through the water column producing intense vibrations and wider along the belly to glide during descent phases. Small and compact, the SPEED VIB is unmatched in triggering reflex attacks from all predatory fish in rivers or lakes such as perch, chub, trout, asp, and black bass. A perfect lure for finesse fishing.

N SPEED VIB HIGH LIFT 22G

The blade designed to provoke reflex attacks. The SPEED VIB HIGH LIFT reinvents the modern vibrating blade with a unique action combining strong vibrations, quick ascent, and controlled descent. Its compact profile and HIGH LIFT technology allow for effective exploration of weeds, obstacles, and intermediate water layers while maintaining maximum attractiveness. Formidable in linear, traction, or lift & fall, it generates sharp and nervous vibrations followed by a slower and more natural descent, a particularly effective contrast on perch, zander, black bass, asp, and pike. Its optimized balance also ensures excellent casting performance and perfect stability upon retrieval. A premium blade developed for anglers seeking speed in exploration, control, and efficiency on the most sought-after predators.

Anglers who know how good blade baits are will see immediately that the top-quality blade KNOCKIN'JAW is going to work. The distinctive jaw acts like a lip and will help you read the bottom perfectly. The 3-point attachment system is very versatile and gives you different presentation options. The front eye is best for fast retrieves and vertical tactics. The middle position is the most versatile and covers a range of retrieves whereas the rear eye works best on slow retrieves or when fishing very deep.

The TRICOROLL SPOON is the spoon version of our famous plug range designed for game species. It has same great TRICOLROLL rolling action that holds brilliantly in a flow. This is achieved through a long slim body with a distinct curved shape that stops the lure rising in the water or turning on itself even in powerful currents. In addition, the lure casts well. Can be fished on a fairly loose line and left to drift or on a tighter line ¾ downstream if the flow is stronger. Perfect for big river fish, large lakes or even Baltic sea trout. Works equally well for asp. Available in two sizes.

TRICOROLL SPOON

N STEM SPOON 8G

The technical spoon inspired by the action of a minnow. The STEM from the TRICOROLL series reinvents the approach of the spoon for trout fishing in rivers and mountain lakes. This ultra-technical spoon combines the casting performance of a spoon with the dynamic behavior of a minnow, for remarkable efficiency on trout, arctic char, and educated salmonids. Its elongated profile combined with a deep curve generates a powerful and stable rolling, producing strong flashes noticeable from a great distance. Its specific shape limits excessive rising in the current and significantly reduces the swimming dislocations often encountered with traditional thin spoons. In water veins and countercurrents, the STEM subtly shifts its trajectory to mimic a weakened baitfish, triggering particularly violent reflex attacks. Equipped with an exclusive system of articulated swimming hooks, it significantly improves hooking rates while reducing dislocations during the fight. Available in several weights to adapt to both fast rivers and deeper areas, the STEM establishes itself as a premium reference for trout enthusiasts using technical lures.

INSECT - CREATURE - WORM

RV BUG 1.5"

The RV BUG 1.5 is a sinking soft bait shaped like a small insect, specifically designed for finesse sight fishing for black bass, chub, or trout. This soft lure, representing a small spider, is equipped with lateral appendages that emit omnidirectional micro-vibrations when descending or being animated. When used in a weightless rig with a SQUEEZE FINESSE or BESTIE No. 4 hook, the RV BUG 1.5 sinks horizontally while the five pairs of legs produce subtle and natural vibrations. Two paddle legs create lively waves when moved horizontally with quick, sharp pulls. This lure also proves to be formidable on finesse rigs (Light Dropshot, Light Texas, or Light Carolina) to imitate not only aquatic insects but also small creatures, and it is unrivaled in enticing perch. Finesse sight fishing enthusiasts (and others too) will quickly be won over by this little creature!

B WOBBRING 3"

The WOBBRING 3" is one of the most popular lures amongst Japanese shore anglers and guides thanks to its incredible versatility when finesse fishing for bass. Can be drop shotted, fished on a jig head, as a trailer on a micro jig, split shot or Carolina rig, etc. The WOBBRING features a ribbed body covered in small appendages and a bill-hook tail that is extra thick at the end and moves at the slightest twitch. Less mobile perhaps than a full-scythe tail but displaces more water that attracts all smaller predators - perch, trout and black bass. The rubber is impregnated to the core with a Prawn attractant. Fitted on a MAGIC TUNGSTEN MICRO ROUND head you have a great perch bait that also works well for rock fishing. Great lure to try when predators are focused on smaller invertebrates and hard to tempt on traditional lures.

WAVER SHRIMP 2.8

The WAVER SHRIMP perfectly mimics a small crayfish or a large shrimp. It is top-notch in terms of realism, whether in shape or swimming motion. Designed for ultra-light fishing, this creature mimics the silhouette of a small crustacean and offers a treat to the most discerning predators that is hard for them to resist. The legs and claws are so supple that they vibrate even when the lure seems motionless. The attractant included in the body of the WAVER SHRIMP enhances the realism of this small creature, which is suitable for a wide range of rigs (neko rig, drop shot, Carolina rig, ned rig), mounted on a jig head or as a trailer on a micro jig. Its return to the range has been widely acclaimed by team members and many European anglers. We recommend the following hook sizes: SCYTHE FINESSE, SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE # 2.

BLEEKER SLIT CLAW 2.2

The BLEEKER SLIT CLAW 2.2 is a small lure designed for targeting perch, black bass, trout, chub, and rockfish. This small crayfish imitation is equipped with shad-type paddles at the end of its ringed appendages, making the BLEEKER SLIT CLAW 2.2 very easy to use for all types of animations. It is effective during descent, with small jerks to animate it in mid-water, by twitching over marked spots, or simply lying on the bottom ready to be picked up. This new small creature is recommended for all types of rigs: Light Texas, Light Carolina, Split Shot, Jika Rig, Ned Rig, Cheburashka, Drop-Shot using SCYTHE FINESSE, SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE #4 hooks, and more traditionally on a light jig head (MAGIC TUNGSTEN MICRO ROUND HEAD, MAGIC TUNGSTEN ROUND HEAD, MAGIC TUNGSTEN NED JIG HEAD, Micro Rubber Jig) either linearly or by scraping close to the bottom. The range of 6 available colors makes it adaptable to different environments and conditions. Its rubber is impregnated and flavored throughout with the Super Formula Shrimp attractant.

The SCISSOR COMB is a concentrate of everything that is likely to arouse the curiosity and appetite of predators. Ultra-mobile appendages, a ringed body that adds even more mobility, a worm profile, flavored rubber, and realistic colors are all qualities to attract even the most apathetic of predators. Equally at home in Carolina, drop shot, jig head, split shot, and Texan light, the SCISSOR COMB is a treat that cannot be refused. Its ability to remain fishable even when stationary makes this lure a perfect delicacy for enticing the most stubborn fish and standing out in the most challenging situations.

SCISSOR COMB 3.0: SCYTHER FINESS, SCYTHER, SCYTHER TYPE NARROW, SWIVEL SCYTHER #1/0 - 2/0

SCISSOR COMB 3.8: SCYTHER FINESS, SCYTHER, SCYTHER TYPE NARROW, SWIVEL SCYTHER #2/0 - 3/0

SOFT BAITS

The JUGGPOD is a soft lure initially developed to respond to the high fishing pressure in certain areas. We paid special attention to the design of this new type of ringed worm (size, action, details, colors). No detail was left to chance; this worm features a curled tail (sickle-shaped), whose thickness and shape have been meticulously studied, giving the JUGGPOD optimal swimming action regardless of retrieval speed. Its body combines annelures and forward-oriented lateral vibrating appendages that generate unique and subtle micro-vibrations, a real plus for outsmarting fish wariness (perch, black bass, rockfish, etc.). For all these reasons, the JUGGPOD is suitable for many rigs, from the simple classic jig head to Drop-Shot and various types of Texas rigs (Texas rig, Carolina Rig, Jika Rig, Tokyo Rig, Cheburashka, Split Shot, etc.). The shape and density of the head have been designed to offer a perfect hold on a Texas hook, combined with a slit in the back to conceal the hook tip. One final trick: the head of the JUGGPOD can be cut to adjust the size to current conditions. By cutting the head, the size can be reduced from 3'0" to approximately 2'7" and from 3'6" to approximately 3'3". An explosive cocktail that could arouse the curiosity and appetite of predators. There is no doubt that this lure will satisfy the most demanding anglers. Available in two sizes, we recommend the following hook sizes:

JUGGPOD 3.0: SCYTHE FINESSE, SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE # 2/0

JUGGPOD 3.6: SCYTHE FINESSE, SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE # 3/0

The CHUNK CRAW is a soft bait crawfish lure that will delight anglers who love all fishing techniques with Texas rigs (Texas rig, Carolina rig, Jika Rig, Ned rig) and of course as a jig trailer, to target bass, perch, pike, and zander. Its shape and size are very close to those of a real crawfish. For perfect mimicry, there are two vibrating appendages at the end of the claws, which emit strong vibrations during the animation and help to slow down the descent of the CHUNK CRAW. The material used strikes a perfect balance between flexibility and durability. The CHUNK CRAW is definitely a top-choice crawfish lure. Available in two sizes, we recommend the following hook sizes:
CHUNK CRAW 2.8: SCYTHE FINESSE, SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE # 2/0
CHUNK CRAW 3.5: SCYTHE FINESSE, SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE # 3/0

SOFT BAITS

JIMMY SHRIMP 3.8

The JIMMY SHRIMP 3.8 is a soft creature bait primarily designed for perch and black bass fishing. Highly versatile, it can be adapted to many rigs (Neko Rig, Drop-Shot, Texas Rig, Carolina Rig, Jika Rig, Cheburashka, Ned Rig) or simply mounted on a jig head. Its shape has been meticulously designed to ensure perfect stability during descent, even when not weighted. The two fins positioned at the rear prevent any rotation of the lure during its fall to the bottom, allowing it to maintain a natural posture to avoid arousing the suspicion of predators. The six micro-legs produce subtle vibrations with the slightest movement. The two legs add density to the lures for more precise 'pitching' type casts; each leg ends with a very thin shad tail that generates slightly more vigorous vibrations, helping fish locate the lure more easily, even in murky waters. Two antennas enhance the vibrational stimuli and are particularly decisive in minimalist movements. Very lively as soon as it comes into contact with water, the JIMMY SHRIMP offers a cocktail of vibrations that will not leave any predator indifferent. We recommend the following hook size: JIMMY SHRIMP 3.8: SCYTHE FINESSE, SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE # 3/0.

COVER CRAW GRANDE 4,5"

The XXL = LARGE version of the COVER CRAW has arrived here and will quickly become a must-have for all enthusiasts of Texas rig fishing for bass, perch, or pike. The COVER CRAW LARGE 4.5 is a creature specifically designed to be skipped and to sneak into the densest of vegetation covers. Its compact and dense body allows it to withstand the assaults of branches and thorns while ensuring a perfect hold for the offset hook. The small clubs that make up its legs produce just the right amount of stimulus and vibrations to entice predators surprised in the heart of their lair. Sufficiently heavy (salted throughout) to be used in a weightless setup, the COVER CRAW LARGE can also be rigged in a backslide rig. By reversing the hook's mounting direction and placing the eyelet between the legs and inserting a tungsten weight in the lure's tail, the COVER CRAW LARGE moves away from the angler as it enters the water and during release phases. No structure (boat hulls, pontoons, deadwood, submerged canopies) will be safe from this unbeatable lure's remarkable entrance. We recommend the following hook sizes: SCYTHE, SCYTHE TYPE NARROW, SWIVEL SCYTHE #6/0.

FLICK SHAKE 4'8"

The FLICK SHAKE is one soft lure that fish cannot resist for long because it imitates that most natural of baits - the lobworm! Hooked straight through the middle and fished on a downshot rig or with a jig head the naturally curved body of this lure will wriggle gently when stopped and respond to the slightest twitch on the line. Fantastic fished on wacky rigs, the FLICK SHAKE is a real fishing machine when it comes to perch, zander and black bass but will also catch trout, chub and even barbel...in fact any fish that will have a go at a worm!

FLICK SHAKE 4.8 500

This is the hyper-dense version of the FLICK SHAKE and a great bait for Wacky rigs. The FLICK SHAKE 500 has 5 x the amount of salt integrated to the body so it casts further, skips easier and sinks quicker whilst still preserving the original features of the FLICK SHAKE 4.8 as a perfect lobworm imitation loved by trout, perch and black bass. Whilst the FLICK SHAKE is ideal on Wacky or Neko rigs it can be fished on any finesse rig such as drop shot or split shot rigs or on a simple jig head! The FLICK SHAKE 500 is a simple but deadly bait!

SOFT JERKBAIT MINNOW

The ultimate reference for modern finesse fishing. The DRIFT FRY ELASTOMER embodies all of JACKALL's technological expertise in an ultra-realistic softbait designed for the most demanding finesse techniques. Developed for modern fishing in hover strolling, mid strolling, drop shot, or ultra-slow linear retrieves, it entices the most cautious predators with its natural swimming action and exceptional stability. Available in three complementary sizes, it perfectly meets the expectations of European anglers targeting perch, zander, black bass, chub, and trout. Made from high-buoyancy elastomer, the DRIFT FRY maintains a perfectly horizontal position in the water column and delivers an extremely natural presentation. This innovative material gives it remarkable buoyancy, particularly suited to Ned Rig setups, where the lure naturally stands up when paused to mimic a feeding prey on the bottom. Its integrated mini fin generates subtle rolling and precisely controls the swimming depth, even at very low speeds. Its thin tail produces permanent micro-vibrations while its ultra-soft texture amplifies every movement. Designed for clear waters and pressured fish, the DRIFT FRY ELASTOMER also features a range of exclusive ILLEX colors, specifically developed for the technical conditions encountered in Europe. Natural, translucent shades optimized to maximize realism and trigger even the subtlest strikes. To preserve all the properties of the elastomer, it is recommended to store the lures in their original packaging, away from high heat and without contact with other PVC soft lure materials that could alter or deform the material. Versatile, technical, and extremely effective, the DRIFT FRY ELASTOMER establishes itself as an essential reference for finesse fishing enthusiasts.

The new finesse weapon for pressured predators. The BITAL MINNOW represents the new generation of soft jerkbaits developed for modern techniques such as mid strolling, hover strolling, and finesse fishing. Designed by JACKALL to meet the most technical situations, it impresses with its ultra-realistic profile and ability to trigger the most wary fish, particularly black bass, perch, and zander subject to high fishing pressure. Its exclusively designed, intentionally off-centered center of gravity generates lively rolling and extremely natural movements with the slightest stimuli. Made from S.I.O Elastomer, a new generation material that is particularly flexible and durable, the BITAL MINNOW maintains a horizontal position with a slightly head-down tilt to maximize stability and responsiveness during slow animations. Its ribbed sides produce fine continuous vibrations, while its V-tail perfectly stabilizes swimming, even when retrieved quickly. Designed for technical anglers, it excels on light jighead, drop-shot, weightless, or simply as a trailer for spinnerbait or bladed jig. Its high precision in animation and ultra-natural behavior make it a must-have for modern finesse fishing. Available in two sizes.

SOFT BAITS

The YAMMYFISH redefines the classic standards of a 'Worm' type soft lure from the 'Soft Jerkbait Minnow' family. Compact and dense, it is salted and flavored throughout and features a design with flawless finishing (details of the eyes, gills, scales, and lateral line). Intended for bass fishing techniques (linear, weightless, drop-shot, jig head, Texas & heavy Texas rig, wacky rig, Ned rig, and more). Its density and solidity allow for long-distance casting and enable it to 'skip' deep into foliage, overgrown banks, or under pontoons. Equipped with our MAGIC TUNGSTEN NED JIG HEAD, its effectiveness is well-proven on perch and zander fishing. Its qualities make it a 'Must Have' for shore or boat fishermen. Available in two sizes, we recommend using the 3 for perch, zander, and sparidae fishing with Ned Rig setup, and the 3.8 for weightless fishing for black bass, perch, and bar.

We recommend the following hook sizes:

YAMMYFISH 3: SCYTHER FINESS, SCYTHER, SCYTHER TYPE NARROW, SWIVEL SCYTHER # 1 - 1/0

YAMMYFISH 3.8: SCYTHER FINESS, SCYTHER, SCYTHER TYPE NARROW, SWIVEL SCYTHER # 2/0 - 3/0

SOFT BAITS

Product of Japanese craftsmanship, JACKALL, this range of hooks was developed to offer perfect lure presentation, optimal hooking quality, and absolute reliability. Premium components designed to meet the demands of modern anglers seeking precision, performance, and confidence by the water.

N SQUEEZE FINESSE

Next-generation finesse hook. The SQUEEZE FINESSE has been developed for demanding anglers seeking the perfect presentation of their soft lures during modern finesse fishing. Its exclusive holding system ensures an optimal fixation of the lure while preserving its flexibility, mobility, and natural swimming action. Particularly suitable for Wacky Rig, Neko Rig, Drop Shot, and other technical approaches, it guarantees a discreet presentation, maximum freedom of movement, and an excellent strike success rate. Its ultra-sharp premium hook combines instant penetration, strength, and reliability during battles. An essential for enthusiasts of black bass, perch, and educated predators, when every detail counts.

N SQUEEZE METAL GUARD

Discretion finesse without compromise. The JACKALL SQUEEZE METAL GUARD incorporates all the advantages of the famous SQUEEZE FINESSE while adding a discreet metallic guard system that allows for tackling cluttered spots with more confidence. Its specific design preserves the natural mobility of the lure while effectively reducing snags in weeds, sunken wood, and submerged structures. Particularly suited for Wacky Rig, Neko Rig, and other finesse technique approaches, it ensures a natural presentation, excellent hooking quality, and high reliability against the most cautious fish. Its premium ultra-sharp hook ensures quick penetration and impeccable hold during the fight. An essential choice for enthusiasts of black bass, perch, and wary predators in the most cluttered areas.

N BESTIE

Japanese finesse in its most accomplished form. The BESTIE is a Japanese-designed hook developed for the most technical finesse fishing. Its construction combines lightness and a thick wire diameter to preserve the natural presentation of the lure while offering excellent resistance during fights. Its wide shank and ultra-sharp point ensure quick penetration and effectively secure hook sets, even on the most subtle bites. Highly recommended for targeting perch, black bass, trout, and chub, it excels with small soft lures and insect imitations. It reveals its full potential on light rigs dedicated to surface fishing, especially with floating lures like the WOODLOUSE, when fish are focused on insects and other drifting prey. A must-have for anglers seeking a premium hook that combines discretion, performance, and reliability.

N SCYTHER FINESSE

The ultimate precision for finesse fishing. The SCYTHER FINESSE was developed to meet the demands of anglers practicing the most delicate soft lure approaches. Lightweight, discreet, and exceptionally sharp, it ensures a natural presentation of the lure while maximizing hooking efficiency. Its specific geometry promotes quick penetration and excellent fish retention, even on the most delicate bites. Particularly recommended for Drop Shot, Neko Rig, Wacky Rig, and other finesse techniques, it excels with perch, zander, and black bass when conditions require a discreet and natural presentation. A premium Japanese-designed hook for anglers seeking sensitivity, discretion, and maximum efficiency when predators are most wary.

N SCYTHER

Power at the service of large lures. The SCYTHER was developed to fully harness the potential of the largest soft lures. Its generous opening ensures optimal lure release during the strike and maximizes the success rate, even with the thickest creatures, craws, shads, and worms. Its ultra-sharp point combined with premium Japanese construction guarantees quick penetration and excellent fish holding. Particularly recommended for black bass, pike, zander, and large perch fishing, it excels in Texas Rig, Free Rig set-ups, and all power finesse or cover fishing approaches. A premium hook designed for anglers seeking power, reliability, and efficiency in the most demanding environments.

N SCYTHER TYPE NARROW

The finesse and discretion perfectly mastered. The SCYTHER NARROW was designed to enhance the presentation of slender profile soft lures. Its narrow geometry perfectly complements worms and finesse baits while preserving their natural mobility and swimming action. Its ultra-sharp point ensures quick and precise hook-sets, while its high-end Japanese design guarantees strength and reliability. Ideal for technical fishing of perch, black bass, and zander, it excels in light Texas Rig, Free Rig, Carolina Rig, and other modern finesse approaches. A high-precision hook designed for demanding anglers when discretion and natural presentation make the difference.

N SWIVEL SCYTHER

Freedom of movement serving modern fishing. The JACKALL SCYTHER SWIVEL combines the penetrating power of the SCYTHER hook with a high-quality integrated swivel, allowing the lure to move freely. This innovative design reduces leverage effects during combat, limits losses, and ensures perfectly natural swimming. Particularly suited for Free Rig and Carolina Rig setups, as well as modern soft lure fishing, it optimizes the lure's mobility while enhancing its presentation. Its ultra-sharp point and premium Japanese design guarantee quick hook sets and maximum reliability against the finest bass, perch, zander, and pike. A new generation technical hook designed for anglers seeking more natural, effective, and secure combats.

**N JACKALL TREBLE
TYPE R**

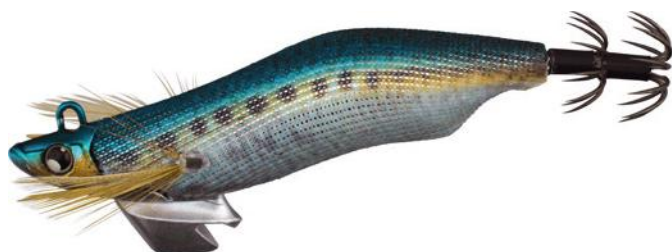

The high-performance treble for demanding anglers. The TREBLE TYPE R treble hooks have been developed to maximize the efficiency of lures. Its specific geometry and ultra-sharp point ensure instant penetration and excellent fish holding, even during the most intense battles. Designed to equip jerkbaits, crankbaits, topwaters, and other premium hard baits, the TREBLE TYPE R combines lightness, robustness, and reliability to preserve the balance and swimming performance of the lure. Its high-end finish ensures optimal resistance and consistent performance throughout sessions. A Japanese quality treble hook designed for anglers targeting perch, black bass, zander, pike, and bass, seeking an uncompromising level of excellence.

SOFT BAITS

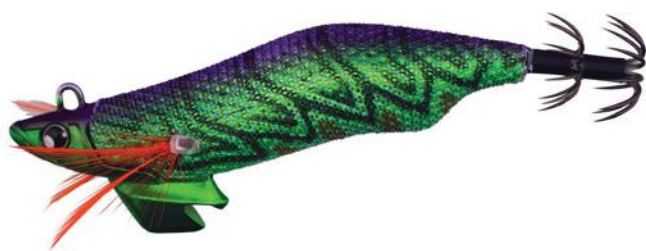

The new generation of technical jigs for cephalopods. The GEKIDAKI TR series was developed by JACKALL to meet the demands of modern squid and cuttlefish fishing, particularly with Tip Run and vertical techniques from a boat. True concentrations of technology, these high-end jigs combine stability, reactivity, and attractiveness to maximize strikes in the most technical conditions. Their specific hydrodynamic profile generates quick and precise movements during animations while maintaining a perfectly controlled descent. When stationary, the GEKIDAKI TR maintains a stable position that is particularly effective in triggering attacks from the most cautious cephalopods. Their optimized balance greatly enhances strike detection and maintenance in the desired water layer, even in the presence of strong currents or drifts. Designed for technical anglers, the series is compatible with different additional Tip Run weights, allowing quick adaptation of the descent speed according to depth and conditions encountered. Premium fabrics, UV and Glow colors, as well as ultra-realistic finishes, further enhance their attractiveness to both active and challenging squids and cuttlefish. Versatile, precise, and extremely effective, the GEKIDAKI TR series stands as an essential reference for high-end cephalopod fishing enthusiasts.

N GEKIDAKI TR SINKER

Instant adaptation to different depths. The GEKIDAKI TR SINKER has been designed to allow cephalopod anglers to quickly adjust the weight of their jigs to variations in depth, current, or drift speed. Specifically developed for the GEKIDAKI TR series, these additional weights optimize the stability and maintenance of the jig in the active water layer without altering its natural action. Their hydrodynamic design perfectly preserves animations and improves control during technical Tip Run fishing sessions. Thanks to their quick attachment, weight changes are easily made according to the encountered conditions. Available from 10 to 50 g, the GEKIDAKI TR SINKER allows for precise presentation even in strong drifts or at great depths. Available in several highly attractive technical colors, these weights also play a visual role in triggering attacks. The UV, orange, pink, or phosphorescent shades enhance the jig's visibility and create an additional reference point capable of stimulating the aggressiveness of squids and cuttlefish in turbid waters or low-light conditions. An essential accessory to maximize the performance of GEKIDAKI TR jigs on the most difficult cephalopods.

The STREAM ROLLER is the latest must-have micro spinner for perch, all trout and salmon anglers. The latest lure technology has been used to create the ultimate river spinner. Bismuth-Tin weights make the lure easy to cast and ultra-stable in the water. The blade turns with the slightest flow without ever causing line spin and gives off strong vibrations that allow you to work the lure very slowly through fish holding pools. Fished free-falling style will provoke reaction bites from perch, chub and zander along quaysides and other urban structures.

A new sound signature to trigger the biggest predators. The FREDDY LOW enriches the famous FREDDY family with a deeper, muted, and more powerful sound, specially developed to attract the attention of carnivorous fish in the most demanding conditions. This new acoustic signature enhances its detection ability in murky waters, under low light, or when fish are particularly aggressive. Its articulated body generates a smooth and natural S-shaped swim on linear retrieval, while producing wide lateral movements during twitching or stop & go animations. Compact, dense, and particularly easy to use, it excels in shallow areas, weed beds, submerged structures, and cluttered edges. Designed to entice pike, big perch, and black bass, the FREDDY LOW is equipped with reinforced 360° rolling swivels to limit the risk of losing fish during battles with the finest specimens. Its density ensures long and accurate casts, while its swimming depth can be easily adjusted with the addition of a John Weight. A new reference for glidebait enthusiasts seeking visual discretion and maximum sound impact.

FREDDY 130 CW NOISY

A "noisy" version of our great 2-section FREDDY 130 CATWALK glidebait. The perfect lure for targeting large European pike, perch and black bass. Designed especially for smaller waters or conditions such as low light levels or coloured water. This small lure is ideally suited to any medium-heavy spinning or bait casting rod. Sinuous "S" shaped swimming action on straight retrieves can be amplified by twitching to the left or right or made more seductive by the occasional stop and go movement. Two integrated rolling 30lb swivels rotate a full 360 degrees helping reduce snagging up and keep your hooks in place during acrobatic fights. Has the density to cast a long way accurately and is ideal to fishing round weed beds, structures and tree-lined banks. To make the lure even more versatile try adding a JOHN WEIGHT on the stomach swivel to explore deeper water layers. This swimbait is as technically advanced as it is easy to fish with! Available in 5 new realistic colours.

You can rest assured that this new 100mm size of DEXTER JERK will be snapped up by top European anglers. This bait is so easy to use whether you're a pro or a complete beginner! Great for prospecting weed beds or overhanging trees worked back slowly with plenty of pauses. The lure has a sharp rolling action on the drop that can be punctuated by sharp jerks pulling the bait back to the surface. Once you find the right action, get ready for some pretty violent takes! We have fitted a 1.2mm stainless "wire thru" wire to reinforce the hooks that will handle light tropical fishing for species like tarpon, barracuda, and small trevally. A special prism shaped chamber coated with grooves contains two metal beads that bounce off the prism creating unique sound signal as well as adding a visual trigger through light refraction. Two densities to choose from – SS: Slow Sinking and S: Regular Sinking.

The new sound reference for surface fishing. The CHATTER BEAST LOW takes the concept of the modern stickbait even further by integrating a deeper, more profound, and more powerful sound, capable of triggering attacks from the most cautious predators. Its exclusive acoustic system produces a unique rumble associated with strong visual stimuli for maximum attractiveness, even in difficult conditions. Its redesigned profile generates wide lateral movements and a particularly expressive surface swimming action. Equipped with a reinforced internal Wire Through frame made of 1 mm stainless steel, it is designed to tackle not only bass, pike, asp, black bass, and large perch but also the most combative tropical and marine species. Dense, robust, and extremely easy to animate, the CHATTER BEAST LOW stands out as a must-have premium stickbait for all surface fishing enthusiasts seeking sound power, efficiency, and versatility.

BATTLE MINNOW 80 F

The BATTLE MINNOW 80 F is a small jerkbait minnow designed specifically for predators focused on chasing fry. The slender, sleek body and small lip generate a nonchalant swimming action at slow speeds, moving sub-surface like an unaware prey fish. Fished faster the lure is more nervous in the water and darts unpredictably when twitched and jerked, sure to trigger a reaction from any following predator. The BATTLE MINNOW 80 F has a weight transfer system to help gain extra metres on the cast. Great for light fishing for perch, asp, trout, chub, black bass and pike.

LONGBILL MINNOW

Our TWITCH FLESH is a small longbill minnow designed by Team ILLEX as a versatile lure attracting a range of predators like perch, pike, zander, asp, chub, trout and black bass on all waters ranging from canals and lakes to big rivers. The lip angle allows the lure to dive quickly to 1.2 metres deep. Effective even in tricky conditions like clear or cold water and great for working round sunken trees or weed beds and along quaysides or across beaches. The weight transfer system enables accurate casting, and the lure is easy to fish with having all the classic characteristics of a longbill minnow. Great for stop and go retrieves, twitching, jerking and even bottom tapping. The TWITCH FLESH is a perfect imitation of a small prey fish. When paused on the retrieve the bait will sit suspended in the water column ready to be engulfed by a following predator seduces by its natural movement.

TWITCH FLESH 75 DR

The TWITCH FLESH 75 DR is a medium longbill minnow designed by Team ILLEX as a versatile lure attracting a range of predators like perch, pike, zander, black bass and asp on a range of waters ranging from canals and lakes to big rivers and reservoirs. The lip angle allows the lure to dive quickly to 1.0 metres deep. Effective in all conditions- even floods or clear, cold water - and great for working round sunken trees or weed beds and along quaysides. The weight transfer system enables accurate casting, and the lure is easy to fish with having all the classic characteristics of a longbill minnow and particularly effective for stop and go retrieves, twitching, jerking and even bottom tapping. The TWITCH FLESH is a perfect imitation of a small prey fish. When paused on the retrieve the bait will sit suspended in the water column ready to be engulfed by a following predator seduced by its natural movement. We recommend you prolong these pauses as the water temperature drops. Equally good fishing for sea bass from a boat or the shore where the weight transfer system helps add distance to each cast or targeting big river trout and sea trout.

N TWITCH FLESH 80 DR

The versatile longbill minnow for freshwater and sea. The TWITCH FLESH 80 DR completes the range with a size perfectly suited to modern predator fishing, both in freshwater and sea. Thanks to its long lip and precise balance, this suspending longbill minnow quickly reaches its swimming depth while maintaining excellent stability in currents and during fast retrievals. Deadly on perch, zander, pike, black bass, asp, or trout, it also proves particularly effective on sea bass and other coastal predators. Its mass transfer optimizes casting distances while its animations in linear retrieval, stop-and-go, twitching, or jerking perfectly imitate a distressed baitfish. Versatile, easy to use, and effective in all seasons, the TWITCH FLESH 80 DR establishes itself as an essential technical minnow for efficiently prospecting edges, weed beds, rocks, or deep areas.

MOMOUSE

The MOMOUSE results from a collaboration with our Pro Staff member Morgan Calu, hence the name MO-MOUSE. This mini wakebait is designed to be taken for a small rodent. The ABS body imitates a small mouse and features a supple, mobile tail and a stainless-steel bead to help with distance casting. The chunky body and small lip generate a distinctive wobbling action giving of strong vibrations. Designed first and foremost to be fished slowly as a mini wakebait on or just below the surface, creating a distinctive wake like a small rodent who has accidentally fallen in and is struggling to swim back to the bank. It can also be fished back fast with the rod held low to provoke a reaction take from following fish. The wave created on the surface coupled with the vibrations through the water trigger the feeding instinct in predators like perch, pike, trout, black bass and chub. A great lure for fishing in restricted spots, like small rivers, round obstacles or stone groynes or tight to the bank. A lure that is both fun and effective to fish with and ideal from the bank or a boat on a light to medium-light set up.

MAGIC CRANK 40 SR

The MAGIC CRANK 40 SR is a small Shallow Runner crankbait, perfect for covering shallow water on rivers and lakes. Two small metal beads move freely in a specially designed chamber to give the lure distinctive deep resonance. The prism-shaped chamber has multiple grooves that the beads roll over and add an extra visual stimulus as the light catches the chamber. Great on straight retrieves using simple stop and go tactics or try varying the retrieve speeds. A faster steady retrieve over weed beds or around structures and snags will often trigger reflex takes from perch, zander, pike, black bass, trout and chub.

MAGIC CRANK 40 DR

The compact deep crank capable of triggering anything. The MAGIC CRANK 40 DR is back in a new, even more efficient version for fine predator fishing in freshwater. Compact, lively, and ultra versatile, this deep crankbait quickly reaches its swimming depth while maintaining excellent stability, even in strong currents. Thanks to its tight vibrations and pronounced rolling action, the MAGIC CRANK 40 DR proves to be formidable on perch, trout, chub, zander, black bass, and small pike. Its precise balance allows it to effectively navigate obstacles, rocks, and weed beds while minimizing snags. Easy to use with linear retrieval or interspersed with pauses, it perfectly mimics a small prey in distress and triggers reflex strikes in all seasons. A must-have for all enthusiasts of high-end finesse crankbait fishing.

RUNNER BLADE 70

Code name: RB70. The RUNNER BLADE family is expanding with a junior version! The result of a bespoke design, this 70mm version opens up new horizons for light sea and freshwater fishing. Perfect for linear retrieves in open water when fish are focused on small prey and for yo-yoing above the bottom over known fish holding spots. Fitted with 3 attachment points and a distinctive noise attraction, the BLADE RUNNER 70 will find a place in any lure box! The first eye position will fish down to the depths of 1.50 metres. The second covers depths between 2 and 3 metres whilst the third position suits vertical yo-yo style tactics. This new bite-sized model will trigger takes from sea predators like sea bass, bonito, mackerel and Spanish mackerel. In freshwater perch, black bass, pike, zander and asp are the likely targets. This vibrating blade lure will trigger takes when others fail and will work all season long!

RUNNER BLADE 90

After the success of our RUNNER BLADE 115, we developed a new lighter version that suits both freshwater and shallow sea fishing from the shore or a kayak. The body shape is close to that of a sardine or small anchovy so perfect for all open water species. The RUNNER BLADE 90 retains the same great attributes of the original but in a more compact format!

RUNNER BLADE 115

The RUNNER BLADE is a new type of metal vibration lure that has a complex yet subtle swimming attitude that rivals with the best minnow plugs. This long blade bait has a casting distance exceeding 60m, which is a major asset when you want to keep some distance from the fish and for quickly exploring new areas. The slender profile is radically different from classic blade baits and emits strong vibrations without pulling excessively on the rod (Low-Stress Concept). The RUNNER BLADE is outstanding with a simple fast and straight retrieve using the forward eye (swimming depth from 3 to 5m), or with a slower stop-and-go retrieve using the rear eye (swimming depth from 5 to 10m). Great for all kinds of vertical fishing as well. This is a must-have lure for power fishing that can be used in any weather conditions. Great alternative to a soft bait, the RUNNER BLADE will trigger adrenaline-pumping savage reaction strikes!

The power of CRUSHER in a finesse version. The COMPACT CRUSHER incorporates all the DNA of the famous ILLEX spinnerbait in a downsized version specially developed for finesse tactics targeting black bass and perch. Available in 7 g, 10 g, and 14 g, it combines compactness, vibrations, and exceptional obstacle-clearing ability to effectively scout cluttered areas. Every detail has been meticulously studied to meet the premium standards of an ILLEX spinnerbait: 0.8 mm stainless steel frame perfectly balanced, high-end skirt, inverted trailer guard aiding passage through obstacles, and a tandem of Willow blades (#2.5 and #3) generating powerful flashes and vibrations from the first cranks. Compact, technical, and ultra versatile, the COMPACT CRUSHER triggers reflex attacks even on heavily pressured fish and establishes itself as a new reference among high-end finesse spinnerbaits.

N CRUSHER 33G

The reference spinnerbait for large predators. The CRUSHER 33G incorporates everything that has made the CRUSHER range famous among European pike anglers. Its iconic design, perfect balance, and proven durability make it an essential spinnerbait for targeting pike, as well as large perch and trophy black bass. Equipped with a highly attractive tandem of Willow blades, it instantly generates flashes and vibrations as soon as it enters the water. Its streamlined head ensures stable and consistent swimming both in linear retrieval and when exploring weed beds, drop-offs, and cluttered areas. Built on a sturdy 1 mm stainless steel frame, the CRUSHER 33G is designed to withstand the most violent attacks and demanding fights. Versatile and effective in all seasons, it now comes with a stinger hook to maximize your success rate on short strikes.

CRUSHER TG 34G

The CRUSHER TG 34G incorporates all the features that made our original 'CRUSHER' model famous. The one key difference is the 'Tungsten Composite' lead-free head. This uses an eco-friendly alloy, a material more respectful of the environment. The realistic design remains unchanged and the low centre of gravity keeps the lure balanced on the drop. It is truly a first-choice spinnerbait. Designed mainly for pike fishing, it is also well-suited for other species like large black bass and big perch. A highly attractive tandem of 'Willow' blades is mounted on a 1mm diameter wire to withstand violent attacks. This tandem of 'Willow' blades enhances the vibrations and responds immediately when the lure makes contact with the water. The specific shape of its head gives it very stable action when fishing drop-offs in 'free-falling' or when probing weed bed areas. The CRUSHER TG 34G spinnerbait has all the technical features to be attractive throughout the year.

N GIANT CRUSHER 62G

The XXL spinnerbait designed for extraordinary predators. Back in the ILLEX catalog, the GIANT CRUSHER DW 62G has become a reference for European anglers of trophy pike and extreme fishing enthusiasts. This ultra-robust XXL spinnerbait was designed without compromise to target the largest predators: pike, catfish, muskies, aimaras, or peacock bass. Its exclusive CRUSHER design head, perfectly supplied premium silicone skirt, and oversized stainless steel frame ensure maximum durability. Equipped with a tandem of engraved willow blades with high vibratory power, the GIANT CRUSHER DW 62G immediately springs into action upon immersion, triggering violent strikes even in murky waters or cluttered areas. Delivered with a trailer hook, it stands out as a must-have for all big spinnerbait lovers and record predator fishing.

BLADE JIG

The BLADE BLASTER will be your new go-to lure for fishing shallow areas, weed beds and round trees and bushes. This bladed jig was created in collaboration with ILLEX Pro-Staff angler Marc Ptacovsky and our product manager Thomas Vogels. Marc wanted to combine two types of lures into one. Firstly he wished to retain the shape of the Swim-Jig head 'JUNGLE BLASTER' with its ability to glide over obstacles and penetrate through weeds. Then he combined this head with a bespoke metallic blade that emits very attractive signals and a sizeable silicone skirt that works as soon as the lure hits the water. The skirt is secured with a stainless steel tie to withstand the ravages of pike teeth. An eyelet has been placed under the head to attach a blade or add an ILLEX 'JOHN WEIGHT' for fishing deeper. Depending on fishing conditions, the BLADE BLASTER can be equipped with a soft lure as a trailer to add more volume; a 'pin-tail' type like our MAGIC SWING TAIL 4 or 5, a 'shad' type like the MAGIC SLIM SHAD 4 or 5, or simply a crayfish like the CHUNK CRAW. Of course, the BLADE BLASTER is 'lead-free'! Designed primarily for pike fishing, it is also suitable for targeting other species like perch, black bass, zander, and catfish.

Secret Grass Gill

The JUNGLE BLASTER is our eagerly awaited first ILLEX rubber jig! During the two years in development, every detail has been perfected. This go-anywhere rubber jig is destined to be a favourite for snag pits like weed beds, sunken trees and lily pads. The eco-friendly Bismuth-Tin head is shaped like a ball on the upper section with the base shaped like a boat hull with cheeks on the side that keep the lure stable in the water. The perfect shape to be skipped deep round snags and obstacles. Developed mainly for pike and black bass but equally good for big perch and small catfish. The JUNGLE BLASTER is armed with a strong wire 4/0 hook preceded by a brush whose rigidity has been carefully controlled to get the right anti-snag effect. The top-quality silicone skirt brings plenty of life to the bait and the guard trailer will take whatever soft bait you decide to use. We recommend the MAGIC CRAW 80 and 115, the DEXTER EEL 150 and the DEXTER SHAD 110 and 150 all of which will increase vibrations and volume perfectly.

BOOSTER CREAM

An additional signal when every touch counts. The NITRO® BOOSTER CREAM embodies all of ILLEX's expertise in attractiveness. Their formula, enriched with stimulating molecules, quickly impregnates your soft lures with a powerful taste and olfactory signal to enhance their appeal. Offered in several scents specially selected for freshwater and marine predators, this cream adheres firmly to the lure and gradually releases its attractants during fishing. A valuable ally for triggering more strikes and extending the holding time in the mouth of the wariest fish. More attractiveness, more confidence, more results.

An additional signal when every touch counts. NITRO® BOOSTER SPRAY embodies all of ILLEX's expertise in attractiveness. Their formula, enriched with stimulating molecules, instantly diffuses a powerful olfactory signal around the lure to attract the attention of the wariest predators. Available in several scents specially selected for both freshwater and saltwater fishing, this high-diffusion formula creates a truly attractive trail capable of triggering activity in hesitant or inactive fish. Easy to apply to all types of lures and baits, it becomes a valuable ally to maximize your chances of success. More attractiveness. More confidence. More results.

DEXTER SHAD

Designed to target big pike, the DEXTER SHAD is a hyper-realistic soft bait boosted to the core with our NITRO BOOSTER shellfish attractant. The body material is incredibly supple which helps fish take positively yet tough enough to withstand repeated attacks or be skipped under overhanging trees. The body has a pronounced rolling action that works with any size or shape of jig head. The tail vibrates at the slightest movement generating powerful vibrations that predators find impossible to resist. This lure works particularly well on straight retrieves and around sunken trees and vegetation.

DEXTER SHAD 150

Ultra-versatile size of our DEXTER SHAD perfect for freshwater and sea predators particularly suited to cranking and vertical fishing. Team a DEXTER SHAD with a 35g CRUSHER spinnerbait or the CRAZY CRUSHER blade jig for an unbeatable combination lure. Flavoured to the core with our NITRO BOOSTER shellfish attractant. The body material is both supple and dense and can stand up to attacks from even sea predators. The body shape has a strong rolling action, and the tail vibrates at the slightest movement generating powerful vibrations that predators find impossible to resist. A proven fish puller with an excellent track record of regular catches.

DEXTER SHAD 250

The DEXTER SHAD 250 is THE XXL version designed for targeting record pike. This soft lure, with its very realistic shape and appearance and flavoured with our crustacean attractant 'NITRO BOOSTER.' The material used is incredibly flexible to facilitate hooking and dense enough to withstand the teeth of predators and be flicked under overhanging trees. The shape of its body gives it a very pronounced 'Rolling' action, regardless of the shape of the jig head or weight used. Its extra-wide tail shape is exceptionally responsive to the slightest movement, creating strong, powerful and fast vibrations. The swimming action is particularly effective on linear retrieves exploring weedbeds and shoreline drop-offs to uncover holed-up fish.

DEXTER TIP UP HEAD

DEXTER TIP-UP heads feature the ingenious screw in weight system that fits any type of soft bait. The metal screw stem helps you to centre lures perfectly and the spiral attachment gives a solid hold on the lure. The specific shape of these heads exaggerates the rolling action of a lure making their swimming action even more seductive. The back plate fits seamlessly with the flat front of a DEXTER SHAD or EEL. We recommend the following two set-ups:

- 1) The top ring is used to attach your reel line or trace and the bottom ring used for belly rigging with a DEXTER SHAD TIP UP SCREW RIG.
- 2) The top ring can also be used as the solid ring for attaching a Scandinavian style DEXTER SHAD SOLID SHARP SHOOTER RIG with your reel line or trace then fixed onto the shooter rig. The bottom ring can be used for adding a metal blade on a rolling swivel.

Using one of these two options, you can be sure of finding the right way to rig DEXTER SHADs or DEXTER EELs.

Available in 6 sizes from 5 to 25g. Weights marked on each head.

DEXTER EEL

B DEXTER EEL 90

The nimble little eel with immense potential. The DEXTER EEL 90 embodies all the DNA of the range with an ultra-realistic eel-like silhouette, very soft rubber, and particularly attractive low-frequency vibrations. This compact size is formidable for triggering attacks from perch, pikeperch, pike, and black bass, even among the most cautious fish. Versatile, the DEXTER EEL 90 remains effective in slow or fast retrieval, both linearly and vertically. Rigged on a Texas hook, it also excels over weed beds and in cluttered areas. Its slender profile also makes it an excellent trailer on a CRUSHER spinnerbait or a BLADE BLASTER bladed jig. Impregnated with Nitro Booster Crustacean attractant, it emits an additional taste signal to maximize strikes and prolong retention.

DEXTER EEL 150

Our DEXTER EEL 150 is an elver shaped soft bait designed to appeal to all predators. Like the famous DEXTER SHAD, the rubber is soft but tough and flavoured to the core with NITRO BOOSTER shellfish attractant. It can be fished on a range of set-ups from jig heads to offset wide gape hooks, Texas rigs or weightless. It's great as a trailer with swimming jigs, blade jig like the CRAZY CRUSHER or the CRUSHER spinnerbait. The lure offers a useful alternative to traditional big shads. The deep vibrations emitted by the DEXTER EEL can be picked up at range by predators but do not arouse their suspicion. It can be cranked back fast to cover plenty of water or fished more slowly to concentrate on certain key feed zones. This is a fantastic bait for targeting older warier fish who see it as an easy meal. Perfect for targeting specimen pike and catfish and pollock and ling at sea.

DEXTER EEL 210

Our DEXTER EEL 210 is an eel shaped softbait designed to appeal to all predators. Like the famous DEXTER SHAD the rubber is soft but tough and flavoured to the core with NITRO BOOSTER shellfish attractant. Can be fished on a range of set ups from jig heads to offset wide gape hooks, Texas rigs or weightless. Great as a trailer with swimming jigs, blade jigs like the CRAZY CRUSHER or the CRUSHER spinnerbait. The lure offers a useful alternative to traditional big shads. DEXTER EEL 280

The DEXTER EEL 280 has been specifically developed to track specimen pike and record catfish, but it is not limited to these two species. We highly recommend its use on marine species such as large cod, big pollock and halibut. Like its smaller siblings, the DEXTER EEL 150 and 210, the DEXTER EEL 280 is infused at its core with our crustacean attractant 'NITRO BOOSTER' and can be rigged or used in multiple ways (jig heads, offset wide gape hooks for Texas or weightless rigs). Its swimming action is particularly effective for cranking, exploring around vegetation cover, weed beds, or letting it naturally sink along drop-offs. The action of the DEXTER EEL has been designed to provide an alternative to large soft shad-type lures. The low-frequency waves emitted by the DEXTER EEL can be sensed from afar by the lateral line of predatory fish but do not arouse their suspicion. At a very slow retrieval speed, it comes to life. It provokes attacks from educated fish that see it as a slow and easy prey.

SUCKER PUNCH

The SUCKER PUNCH 145 is the latest in the SUCKER PUNCH series. A soft swimbait shad designed and equipped to represent a medium-sized forage fish that fits in the hand. It is primarily intended for pike fishing. Inspired by the iconic NITRO SHAD series, we have developed a soft lure in the shape of a forage fish offering realism and volume. Its silicone is as durable as our famous NITRO SHAD, paired with a large tail fin that gives it a swaying action at very low speeds. armed with an ultra-sharp single hook on the back and a treble hook mounted on a rolling swivel to limit hook pulls during the fight and preserve the lure. The SUCKER PUNCH 145 is very easy to animate. A simple linear retrieval is enough to trigger decisive strikes. Its density allows for very long-distance casts. There is no doubt that this explosive combination will make the SUCKER PUNCH 145 your new go-to choice for hunting large pike, regardless of the destination (Netherlands, Ireland, Sweden, Spain, Quebec, etc.). The SUCKER PUNCH 145 is only available in the MR = 'Medium Runner' version, recommended for effective fishing mid water or in weed gaps, knowing that you can add a 'John Weight' on the rolling swivel to adjust the swimming depth.

SUCKER PUNCH 145 MR

The SUCKER PUNCH 145 is very easy to animate. A simple linear retrieval is enough to trigger decisive strikes. Its density allows for very long-distance casts. There is no doubt that this explosive combination will make the SUCKER PUNCH 145 your new go-to choice for hunting large pike, regardless of the destination (Netherlands, Ireland, Sweden, Spain, Quebec, etc.). The SUCKER PUNCH 145 is only available in the MR = 'Medium Runner' version, recommended for effective fishing mid water or in weed gaps, knowing that you can add a 'John Weight' on the rolling swivel to adjust the swimming depth.

CREATURE

MAGIC WOODLOUSE 1.18"

The WOODLOUSE is a floating soft lure shaped like an insect designed for predator fishing (asp, black bass, chub, perch, and trout). Its body has a hollow cavity and small vibrating appendages with tiny air chambers that enhance its buoyancy and mimicry of a real insect. Equip this lure with a BESTIE or SQUEEZE hook size 3 or 4 at the head between its two antennae to avoid destabilizing it. Its presentation will be perfect when you let your line drift in the current or when you subtly animate your rod with small twitches. Beware of side effects, this little critter provides big adrenaline rushes.

MAGIC SWING TAIL 4

The MAGIC SWING TAIL 4 is a soft Jerkbait with some quite surprising features! The Flex Connection at the centre of the body coupled with the rubber viscosity creates an erratic action generating flashes from the flat flanks with tight tail vibrations. Predators that have grown wary of typical shad-type vibrations will be seduced by the unpredictability and dynamism of this lure. Great fished slowly vertically with small jerks to work the tail either drop shotted or fished on a MAGIC TUNGSTEN ROUND HEAD from 2,7 to 7g or dropped faster with positive jigs on a NITRO SHAD HEAD or NITRO SLIM SHAD HEAD from 3,5 to 14g. Ideal as a trailer bait on a blade jig like our CRAZY CRUSHER or a CRUSHER spinnerbait. Can be fished on a simple jig head or even weightless. Try different sizes of the MAGIC SWING TAIL to give you more variation and provoke takes from the wariest of fish. Perfect for perch, pike, zander and black bass anglers but equally sea bass and pollock where its similarity to a sand eel can prove deadly. Impregnated to the core with our NITRO BOOSTER squid attractant.

MAGIC SWING TAIL 5

The MAGIC SWING TAIL 5 is a soft Jerkbait with some quite surprising features! The Flex Connection at the centre of the body coupled with the rubber viscosity creates an erratic action generating flashes from the flat flanks with tight tail vibrations. Predators that have grown wary of typical shad-type vibrations will be seduced by the unpredictability and dynamism of this lure. Great for targeting zander and pike but also sea bass and pollock when fished vertically. The absence of a paddle tail offers minimum resistance in the water and lends itself to subtle, slow animations with small twerks to work the tail either drop shotted or fished on a MAGIC TUNGSTEN ROUND HEAD from 5 to 14g or dropped faster with positive jigs on a NITRO SHAD HEAD or NITRO SLIM SHAD HEAD from 7 to 21g. Ideal as a trailer bait on a blade jig like our CRAZY CRUSHER or a CRUSHER spinnerbait. Suitable for freshwaters or at sea on a simple jig head or even weightless. Try different sizes of the MAGIC SWING TAIL to give you more variation and provoke takes from the wariest of fish. Perfect for perch, pike, zander and black bass anglers but equally sea bass and pollock where its similarity to a sand eel can prove deadly. Impregnated to the core with our NITRO BOOSTER squid attractant.

MAGIC SWING TAIL 7

The MAGIC SWING TAIL 7 is a soft Jerkbait with some quite surprising features! The Flex Connection at the centre of the body coupled with the rubber viscosity creates an erratic action generating flashes from the flat flanks with tight tail vibrations. Predators that have grown wary of typical shad-type vibrations will be seduced by the unpredictability and dynamism of this lure. Great for targeting zander and pike but also sea bass and pollock when fished vertically. The absence of a paddle tail offers minimum resistance in the water and lends itself to subtle, slow animations with small jerks to work the tail. The hydrodynamic shape is perfect for vertical fishing with an echosounder or in and around cover. Great for targeting sea bass and pollock feeding on large sand eels fished on the drop or behind a boat with a technical jig head like our NITRO SHAD HEAD from 14 to 70g. Has the density and shape to be fished weightless for bass, pike and black bass around weedbeds, sunken trees, and oyster and mussel parks. This floating lure is impregnated to the core with our NITRO BOOSTER squid attractant.

MAGIC SWING TAIL 10

The MAGIC SWING TAIL 10 is a soft Jerkbait with some quite surprising features! The Flex Connection at the centre of the body coupled with the rubber viscosity creates an erratic action generating flashes from the flat flanks with tight tail vibrations. Predators that have grown wary of typical shad-type vibrations will be seduced by the unpredictability and dynamism of this lure. Great for targeting specimen pike but also sea bass and pollock when fished vertically. The absence of a paddle tail offers minimum resistance in the water and lends itself to subtle, slow animations with small jerks to work the tail. The perfect bait for sharpshooting for pike and big zander. Has the density and shape to be fished weightless for big pike around weedbeds and sunken trees. The MAGIC SWING TAIL 10 is a great choice for the globetrotting angler chasing cod, halibut, pollock or grouper. This floating lure is impregnated to the core with our NITRO BOOSTER squid attractant.

MAGIC SWING TAIL 8.5

The MAGIC SWING TAIL 8.5 is a soft jerkbait with a unique and rather surprising design. The perfectly balanced viscosity and the 'Flex Connection' at the centre of the body produce an erratic action, combining flashes emitted by the flat sides with the whip-like action of a very mobile tail. Predatory fish that usually reject the mechanical pulsing of shads will find it hard to resist this dynamic and unpredictable lure. In vertical fishing for zander, pike, as well as bass and pollock, the MAGIC SWING TAIL 8.5 offers minimal resistance to water due to the absence of a paddle tail while providing subtle vibrations even at very low speeds. This hydrodynamic shape ensures easy vertical presentation when using an echosounder or fishing near snags. The MAGIC SWING TAIL 8.5 is ideal for bass and pollock anglers in areas with large sandeels, fished with jerks or strong pulls on a sharp jig head or on a NITRO SHAD HEAD from 14 to 70g. Its specific shape and density allow for weightless rigging to target bass, pike and black bass in weedbeds submerged trees, oyster beds, or mussel beds. To enhance its attractiveness, the floating MAGIC SWING TAIL is infused to the core with squid flavour NITRO BOOSTER.

MAGIC SLIM SHAD

The MAGIC SLIM SHAD is a highly attractive soft lure that swims at the slightest touch. It swims naturally and has a wide and fluid tail movement. Its great mobility makes it a must-have for fishing for perch, trout, zander and other small predators in fresh or salt water, linear retrieve or drop-shot, even on very slow, controlled action. Nothing about this lure has been left to chance, from the choice of material, its tonicity, the range of colours and paints used to the meticulous details such as the eyes and gills. All these features make the MAGIC SLIM SHAD an amazingly realistic soft lure that's formidable on the water. The range of 18 colours available, including 6 new ones, means it can be adapted to different environments and conditions. Its rubber is impregnated and flavoured with our Squid NITRO BOOSTER.

NITRO SHAD's effectiveness enhanced for European waters. The NITRO SHAD 65 and 90 FWE (Fresh Water Edition) combine the legendary effectiveness of the NITRO SHAD with an exclusive selection of colors specifically developed for European predators. Delivered ready to fish with their perfectly matched NITRO SHAD HEAD, they offer a coherent, realistic, and immediately operational set. Their smooth and natural swimming performs excellently whether in a straight retrieve, twitching, light vertical fishing, or bottom bouncing, targeting perch, zander, pike, and black bass. The RS (Real Skin) finishes and painted or holographic jig heads further enhance their appeal. An essential choice for anglers seeking simplicity, realism, and uncompromising effectiveness.

NITRO SHAD

NITRO SHAD HEAD

The ILLEX NITRO SHAD HEAD has been developed specifically for using with NITRO SHAD lures. Fish-like in appearance, the head's centre of gravity is slightly loaded downwards giving a gliding action on the way down and allowing the lure to rest on the bottom if wished. Perfect for naturally presenting NITRO SHADs or any other strongly vibrating soft lure. Available in 9 different weights.

NITRO SHAD 90

This NITRO SHAD 90 is sure to become every bit as popular as the rest of the range! Developed for sea bass fishing, this realistic looking lure perfectly resembles a small prey fish. The small body size and supple viscosity make the NITRO SHAD 90 perfect for working up in the water. We recommend that you use our leaded NITRO SHAD HEADs between 7 and 21g coupled with an ASHURA ELEMENT RIDER S 215M STALKING SPECIAL rod and fish the NITRO SHAD 90 using either light traction or linear retrieves. This little shad with its pronounced rolling action is also deadly for perch and zander. The lure is flavoured with our famous NITRO BOOSTER. Do not hesitate to add some NITRO BOOSTER Cream to the lure for that extra fish attracting edge!

NITRO SHAD 120

The NITRO SHAD is first and foremost a lure for hunting bass traction-style, with the bait touching the bottom. The lure has already won many Labrax Cup competitions. The NITRO SHAD can also be used very effectively to fish for zander and pike either jigged or worked straight back. Flavoured with NITRO BOOSTER Shellfish attractant. This lure is best fished in conjunction with a NITRO SHAD HEAD. The materials used in this lure give off deep resonance and strong vibrations as it is worked through the water. Do not hesitate to add more NITRO BOOSTER in either cream or liquid form to enhance the lures effectiveness whilst fishing!

NITRO SLIM SHAD

NITRO SLIM SHAD HEAD

Developed specifically for the NITRO SLIM SHAD but will work wonders with any eel-like lure. The shape of the head resembles a fish. This realism is further enhanced by the centre of gravity which gives your NITRO SLIM SHAD lure a natural drop through the water layers and very stable landing on the bottom! Available in 12 sizes.

NITRO SLIM SHAD 110

As its name suggests, this is the slim-line version of the famous NITRO SHAD! This version has been developed specifically for sea bass and pollock fishing. When these two predators are chasing sand eels, they can't resist the deep oscillations given off by the SLIM SHAD and its ultra-realistic look! We recommend you use our NITRO SLIM SHAD heads between 10 and 21 grams. The lure has been flavoured with our legendary shellfish attractant NITRO BOOSTER and can be further boosted whilst fishing simply by adding some NITRO BOOSTER Cream!

NITRO SLIM SHAD 220

The NITRO SLIM SHAD is the eel-like version of our famous NITRO SHAD developed specifically for sea bass and pollock anglers. When these fish are focused on sand eels the realism and unique flank oscillations of this shad bait are totally irresistible. We advise using a NITRO SLIM SHAD HEAD from 28g to 70g coupled with a strong rod like the ELEMENT RIDER S 225 H KORRIGAN or the S 240 MH-H+ POWER VERSATILE capable of giving powerful animations whether vertical or traction fishing. Impregnated to the core with our NITRO BOOSTER shellfish attractant. Do not hesitate to add more NITRO BOOSTER cream to increase the attraction!

Discover the NITRO SLIM SHAD 90, the latest addition to the famous NITRO SLIM SHAD family. This 90 mm size maintains the same sleek 'sandeel' profile that has made its predecessors successful. Its small size and flexibility allow for realistic animations even in shallow water. To save you precious time by the water, we offer our NITRO SLIM SHAD 90 mounted on a NITRO SLIM SHAD HEAD. Ready to fish, the NITRO SLIM SHAD 90 + HEAD combo is irresistible for targeting sea bass and pollock using tactics like traction, linear, vertical, or scratching, both from the shore or boat. Ideal when these predators are focused on small, slender prey such as sandeels, horse mackerel, smelts, and sandworms. Impregnated with our powerful NITRO BOOSTER crustacean-flavoured attractant. To enhance its effectiveness, feel free to apply the NITRO BOOSTER cream. Sold mounted with a replacement body included.

FIGHTER JIG

A classic jig shape that hides a surprisingly versatile lure. The FIGHTER JIG lends itself to a wide variety of techniques. Responds well to wide slides and back sliding on the drop. Fished classic jigging-style, the lure is very mobile and highly reflective which is very attractive to pelagic species. Finally as a casting jig the FIGHTER JIG performs well. Great for fishing at long range with medium to fast retrieves. The realistic body shape is complimented by meticulous details around the eyes and gills.

MAGIC TUNGSTEN MICRO ROUND HEAD

The MAGIC TUNGSTEN MICRO ROUND HEAD is a must-have jig head for all rock and street fishing fans. Designed specifically for L and UL fishing for perch, chub, trout and multiple marine rock species like small sea bass, gobies, blennies and wrasse either bouncing bottom or on straight line retrieves. Great with a range of small soft baits – (Scissor Comb 3, Wobbling 3, Magic Slim Shad 2 & 3, MAGIC CRAW 50 & 60, MAGIC MAY FLY 2.6, etc. The weight is made from an eco-friendly 'Tungsten Composite' alloy that is denser than lead and lets you read the bottom better. The low centre of gravity perfectly balances even the smallest soft baits in the water. We have selected first-class wide gape hooks that are ultra-sharp and strong. We have included a drop of red epoxy resin to help secure your lure in a way that does not damage the rubber. The UV red colour also acts as a trigger for fish.

MAGIC TUNGSTEN ROUND HEAD

Our MAGIC TUNGSTEN ROUND HEAD series are jig heads developed for linear fishing with soft baits. We have designed the trailer guards and hook size of each of the sizes to optimise the feel of the head and the placement of your lure to increase your bite to catch ratio and get more fish on the bank! The weight is made from an eco-friendly 'Pure Tungsten' alloy that is denser than lead and lets you read the bottom better. The low centre of gravity perfectly balances even the smallest soft baits in the water. We have selected first-class wide gape hooks that are ultra-sharp and strong. On the smaller sizes, we have included a drop of red epoxy resin to help secure your lure in a way that does not damage the rubber. The UV red colour also acts as a trigger for following fish. In the sizes from 3.5 g upwards, a small metal lug helps hold the lure in place.

MAGIC TUNGSTEN NED JIG HEAD

The MAGIC TUNGSTEN NED JIG HEAD is, as its name suggest, designed for NED RIGS. The head lets you position the bait at 90° to hold it clear off the bottom. Perfect for lures like the MAGIC CRAW, YAMMYFISH 3.5 & 8, FLICK SHAKE 4 & 8, etc. The weight is made from an eco-friendly 'Tungsten Composite' alloy and designed to help you read the bottom. We have selected a strong and ultra-sharp hook and fitted a metal guard trailer and blood red ligature to help hold your lure in place. The red ligature gives off UV reflections for an added trigger point. Once rigged up and fishing your bait is ready to be scooped up by a hungry perch, zander or bass!

ILLEX BULLET TUNGSTEN WEIGHTS

Bullet shaped tungsten weight for use on Texas and Carolina rigs. Precision-machined; the weight is the perfect shape for bouncing over snags letting you fish your Texas rig in all sorts of obstacles. We use a very resonant tungsten material so you can read the bottom clearly. We have decided not to fit a plastic tube so you can fish bigger diameter hook lengths when targeting pike.

JOHN WEIGHT

The JOHN WEIGHT is a handy accessory that lets you quickly change the swimming depth of a lure (minnow, jerkbait, big bait, swimbait, squid jig). The fragmentation grenade shape and the chequered flanks help hold the steel clip in place, so you don't lose the weight either casting, working the lure or when playing a fish. Simply attach the JOHN WEIGHT as close to the centre of gravity of the lure as you can and you will instantly fish deeper. Top tip- the JOHN WEIGHT is also great for Drop Shot fishing.

ILLEX BAKKAN BOAT DELUXE 40

The BAKKAN BOAT DELUXE 40 is a top-quality piece of luggage made from stiff polyester and rotproof EVA. We have re-designed every detail of this Bakkkan to make it even tougher and more functional than before. Full protection from spray and rain and easily washable. The ideal luggage for protecting your lure boxes, rigid SAFE BAGS and other pieces of kit for boat, float tube, SUP and kayak sessions or for bank fishing. The clever design allows you to pack different combinations of SAFE BAGS depending on your needs. Will take two large SAFE BAGS or one large SAFE BAG and two medium SAFE BAG SLIMS or four large SAFE BAG SLIMS- each of which can take a small SAFE BAG or SAFE BAG SLIM!

Details :

- Rigid bag 100% rotproof EVA 1.5mm thick
- Rigid cover protecting the edges of main bag against spray
- Original ILLEX branded lid designed to fit a ILLEX TACKLE BOX 255 or a small ILLEX SAFE BAG SLIM or a chopping board. Contains a large internal pocket with rubber mesh to store spools of fluorocarbon, forceps and other necessities.
- Lid closes with side clips
- D ring
- Adjustable shoulder strap
- Reinforced carry strap
- Anti-slip pads on base
- Dimensions 40x26x28cm
- Capacity : 29 L
- Colour : Blue or yellow

WATERPROOF LUGGAGE

ILLEX BAKKAN BOAT DELUXE 50

The BAKKAN BOAT DELUXE 50 is a top quality, rigid piece of luggage made from soft and rot-proof polyester (EVA). We designed this new size of BAKKAN to accommodate a larger selection of lures and accessories so that you lack nothing during your fishing sessions. Thought out in every detail to make it even more robust and functional while retaining all its advantages: a bag that is waterproof against repeated water splashes and easy to clean. Robust and functional, it is ideal for transporting your lure boxes, our SAFE BAG rigid pocket models along with other fishing kit. Very practical, the BAKKAN BOAT DELUXE 50 has been designed like a Russian doll to allow multiple storage combinations with other models in the SAFE BAG rigid bakkans range. The BAKKAN BOAT DELUXE 50 model can contain two SAFE BAG ML, one SAFE BAG SLIM ML and two SAFE BAG S.

Finish:

- 100% rot-proof rigid waterproof bag in 1.2mm EVA fabric
- Rigid lid to cover the edges of the main compartment for better protection of its contents from splashes
- Original ILLEX lid with indentation to accommodate and secure one of the ILLEX TACKLE BOX 355 WATERPROOF boxes or a cutting board. It features a large internal zippered pocket with rubber mesh to store fluorocarbon spools, pliers, or any other essential fishing tools.
- Rigid lid closure with side clips
- Equipped with a D-ring and a plier holder
- Adjustable shoulder strap
- Reinforced carrying handles
- Non-slip pads on the bottom
- Dimensions: 50x30x28cm
- Capacity: 42 litres
- Colours: Blue or Yellow

N ILLEX TACTICAL POUCH

Premium tactical organization for your fishing accessories. The ILLEX TACTICAL POUCH series was developed to offer a robust, practical storage solution perfectly suited to the new BAKKAN DELUXE TACTIC luggage. Made from soft, waterproof, and rot-proof EVA, these pouches effectively protect your gear while optimizing the organization of your fishing accessories by the water or on a boat. Designed with a tactical and functional mindset, the TACTICAL POUCH allows for easy storage of lures, spools, rigs, tools, or small technical accessories. Models equipped with a lid also feature an internal zippered mesh pocket, ideal for securing fluorocarbon lines, snaps, hooks, or documents while maintaining perfect visibility of the contents. The TACTICAL DECK model stands out with its open design without a lid, specifically designed to provide immediate access to a selection of lures or accessories directly positioned on top of the BAKKAN 40 thanks to its lateral clip system. A true tactical station dedicated to active fishing and rapid strategy changes. Compatible with different models of the BAKKAN DELUXE TACTIC range, the ILLEX TACTICAL POUCH facilitates modular, quick, and highly efficient storage for all your fishing sessions.

N ILLEX BAKKAN DELUXE TACTIC BOAT 40

The premium technical bakkan designed for demanding anglers. The BAKKAN DELUXE TACTIC BOAT 40 further pushes the standards of high-end fishing luggage with a more robust, functional design, resolutely oriented towards current tactical uses. Made of rigid, rot-proof EVA, this premium bakkan perfectly withstands repeated water splashes and is very easy to clean after each session. Thought out in every detail, it now includes two M.O.L.L.E. strips and a pouch to accommodate a pair of pliers on its front, allowing for easy access to pliers and essential accessories. A rear elastic cord facilitates the quick transport of additional equipment or technical clothing. Its rigid lid effectively protects the contents from spray and perfectly accommodates an ILLEX TACKLE BOX 255, a SAFE BAG SLIM S, or a cutting board. Ideal for boats, kayaks, float tubes, or SUP paddles, the BAKKAN DELUXE TACTIC BOAT 40 retains all the modularity that has made the SAFE BAG range successful thanks to its intelligent 'Russian doll' type storage concept. Premium finishes: 1 mm waterproof and rot-proof EVA, adjustable strap, non-slip pads, D-rings, internal zippered rubber mesh pocket.

Dimensions: 40 x 26 x 28 cm — Capacity: 29 L. Available in three colors: Black, Coyote/Sand, and Camo, the BAKKAN DELUXE TACTIC BOAT 40 adapts to all fishing styles and equipment configurations, from boat to float tube to shore sessions.

N ILLEX BAKKAN DELUXE TACTIC DOCK 40

The premium technical luggage designed for shore fishing. The BAKKAN DELUXE TACTIC DOCK 40 was developed to offer shore anglers a storage solution that is even more robust, functional, and tactical. Made from rigid and rot-proof EVA, this high-end luggage perfectly withstands water splashes and tough conditions, and can be easily cleaned after each session. Thought out in every detail, it includes a M.O.L.L.E. strip, a case for holding a pair of pliers, a zipped EVA front pocket, as well as a rear stretch cord for quickly securing additional clothing or accessories. Its four side rod holders facilitate movement and optimize gear organization during itinerant sessions. Its rigid lid effectively protects the contents and can perfectly accommodate two ILLEX TACKLE BOX 205. Designed as a true tactical storage platform, the BAKKAN DELUXE TACTIC DOCK 40 retains all the modularity of the SAFE BAG range thanks to its smart "nested" organization. Premium finishes: 1 mm waterproof and rot-proof EVA, internal zippered mesh in rubber, lateral clips, D-rings, adjustable strap, and anti-slip pads. Dimensions: 40 x 26 x 28 cm — Capacity: 29 L. Available in two colors: Black and Camo, the BAKKAN DELUXE TACTIC DOCK 40 adapts to all approaches, with a sleek or tactical finish depending on your equipment style.

N ILLEX SWIMBAIT ROLL UP
BLACK

The premium storage dedicated to hard swimbaits. The ILLEX SWIMBAIT ROLL-UP has been specially designed to organize, protect, and efficiently transport your hard swimbaits and rigging accessories. Its smart arrangement with 6 individual compartments allows you to neatly store your jointed lures while minimizing shocks and tangles during transport. Designed for fans of XXL pike and black bass fishing, it perfectly meets the demands of anglers specialized in the use of big baits and premium hard swimbaits. It also features a large zippered mesh pocket ideal for storing spare tails, John Weight, split rings, welded rings, sleeves, or leaders. Made from robust and durable 420D polyester, the ILLEX SWIMBAIT ROLL-UP boasts a reinforced ergonomic handle and two multifunctional D-rings to facilitate its use and transport during all your fishing trips.

ILLEX SWIMBAIT ROLL-UP M: Designed to organize, protect, and efficiently transport your small and medium hard swimbaits up to 15 cm, like the DEXTER JERK.

ILLEX SWIMBAIT ROLL-UP L: Developed to organize, protect, and efficiently transport your larger lures up to 28 cm. A true ally for trophy pike and XXL black bass fishing enthusiasts, this large-format version will particularly appeal to collectors of DOWZSWIMMER and other premium swimbaits.

N SWEAT-SHIRT BLOOD DOGS ILLEX

Premium comfort for fishing enthusiasts. The BLOOD DOGS ILLEX SWEATSHIRT combines warmth, comfort, and style in a garment designed to accompany anglers throughout the season. Made from premium 340 g/m² cotton, it features a warm and soft inner lining providing excellent protection on cool days. Its enveloping hood, meticulous finishes, and large front pocket equipped with secure zip closures ensure optimal comfort and practical storage for your personal belongings. The ILLEX logos screen-printed on the chest and back subtly affirm its identity. A high-end sweatshirt designed for both waterside and everyday use.

ILLEX WIND PROTECT SWEAT

The ILLEX WIND PROTECT SWEAT is a 'softshell' sweatshirt made from synthetic materials like polyester. Its innovative structure and balanced composition make it perfect for variable weather conditions, protecting you from wind or cold. It can be worn on its own in mid-season or under a rain or winter jacket during your fishing sessions or for any kind of outdoor activities. As long as no persistent rain is forecasted, this 'softshell' sweatshirt will perfectly protect you from wind and moisture. Composition: 100% polyester. Finish: Sweatshirt with a zipped collar in a sporty and casual fit, featuring a very comfortable lining with embroidered logo on the left chest and two zipped front pockets for your essentials. The zip on the collar allows for ventilation and easy removal. Colour: black. Sizes: S to XXXL.
