PRESERVATION AND CONSERVATION

Conservation of our natural resources is a staple aspect of Indiana County. Our vast agricultural landscape, stunning forests, and numerous waterways all contribute to the uniqueness of our region and promote a high quality of life, sustainable economy, and endless opportunities for tourism.

Our precious resources are maintained and improved by the dedicated efforts of grassroots conservation organizations like the Indiana County Conservation District, Evergreen Conservancy, and other local watershed associations. These organizations work to address resource concerns like abandoned mine drainage, coal refuse piles, sediment and nutrient pollution from agricultural operations, and stormwater.

Existing and new conservation programs will inject millions of dollars in funding into our community to install practices that improve our use of the land while reducing our impact on the environment. Rivers like Blacklick Creek will once again abound with wildlife and recreational opportunities. Conservation ensures our future in Indiana County will be healthy and sustainable.

Visit AGRICULTURE & SPECIALTY FARMS

The agricultural industry has had an enormous economic impact on Indiana County, and farming remains one of the most important sectors in our county today. Family traditions have been passed on for generations and you will find a wide range of locally sourced products readily available at our area farmers' markets including meats, dairy, produce, fruits, grains, flowers, honey and even maple syrup. Many local restaurants feature local ingredients and offer farm-to-table dining experiences.

One such tradition dates back to 1918, when Silas Streams and other area farmers began planting various pines and spruces as an agricultural crop for the purpose of being sold as Christmas trees. This practice continued and in 1956, when an estimated 700,000 trees were cut, an Associated Press dispatch touted Indiana County, PA as the "Christmas Tree Capital of the World". Consider starting a new family fun tradition of visiting a local Christmas tree farm and bringing home a live tree!

Agricultural Fairs are another area tradition providing hours of family fun and entertainment. These time-honored events provide the opportunity to showcase the hard work and talents of our local agricultural community. Organizations such as the Indiana County Farm Bureau offer support for our local farmers and the Indiana County Conservation District provides information about ongoing projects and often hosts events to promote conservation efforts within the county.

❑ **Attend a Local Farmers' Market:** Towns such as Indiana, Blairsville, Clymer and Saltsburg have weekly farmers' markets where fresh produce can be purchased at affordable prices, while supporting local farms.
