Message to Members

Dear Valued Members,

In today's ever-changing business landscape, we understand that staying up to date with the latest trends, innovations, and challenges is vital to the success of your business. TAPA APAC has organized new trainings, events, and planned activities to support our members' supply chains to remain the most resilient in the industry amid diverse challenges.

In May, TAPA APAC held a "Technology and Innovation Empowerment for Post-Pandemic Supply Chain Resilience and Security" Seminar and the Opening Ceremony of TAPA APAC China Representative Office at Shanghai, World Expo Qiantan Centre. The conference aims to explore how digital transformation influences supply chain security, share the latest technologies and solutions within the industry, enhance security standards, and foster supply chain resilience and innovation. This encompasses various areas, including transportation safety, intelligent logistics, and supply chain risk management.

Following in June, the association held its first TAPA Risk Assessment Standard (RAS) 2023 and New 2023 Guarding Security Requirements (GSR) Standard Training in Malaysia, Kuala Lumpur. TAPA APAC has proactively enhanced its training program to ensure that professionals in the industry are equipped with the most up-to-date knowledge and tools to address emerging threats effectively.

TAPA APAC has recently announced the highly anticipated launch of the New 2023 TAPA Standards. These standards have been carefully crafted to address the unique security challenges present in the APAC region, providing organizations with a comprehensive framework to safeguard their supply chains against threats and vulnerabilities.

Please check our new training schedule for more information.

<https://tapa-apac.org/schedule/>

With best regards,

Alvin Lau

Executive Director, Greater China
TAPA APAC

New 2023 TAPA Standards Launch

Training, Audit & Certification for 2023 Standards

In view of the ever-changing landscape of security requirements in the supply chain industry, we ensure that the TAPA Standards incorporates the latest knowledge, best practices, and cater to evolving stakeholder expectations through regular review of Standards.

TAPA APAC will launch the new version of “FSR and TSR 2023 Standards” in mid-September 2023. Kindly note the following critical points with the upcoming launch of FSR 2023 & TSR 2023 Standards:

A. FSR 2023 & TSR 2023 Standards Launch

- The FSR 2023 and TSR 2023 Standards will be launched on Sep-15-2023 globally.
- In APAC, this will be a soft launch allowing members to go through and prepare themselves where necessary.
- A copy of the Standards will be shared to the Primary Admin Member contact person name and email as recorded in TAPA APAC Members database.

B. Training

- The existing FSR 2020 & TSR 2020 Standards training will continue till Sep-2023.
- The training for the FSR 2023 and TSR 2023 Standards will commence from Oct-2023.
- Details and schedule of the trainings are published in the TAPA APAC website. Click [here](#) to view [schedule](#).
- Existing 2020 Authorised Auditors (AAs) can attend the refresher training for 2020 Standards till Sep-2023 and revalidate their 2020 AA status for another 3 years. This will help to conduct audits for re-certification or new certification in the remaining 2023.
- Effective Oct-2023, when the New 2023 Standards trainings are rolled out, existing AAs of 2020 standards and new participants can attend and qualify for AA 2023 Standards.
- The AAs trained to a higher version of the Standard allows them to audit all the preceding versions. For example, a qualified FSR 2023 AA is allowed to audit the previous versions of FSR 2020 / FSR 2017 Standards as well.

C. Audits and Certifications

- To ensure continuity of the certification cycle, support member operations and business requirements, TAPA APAC will implement the following-
- The New 2023 Standards Audit and Certification will be effective from Jan-01-2024.
- Existing FSR 2020 and TSR 2020 Certifications that are expiring in the remainder of 2023 can apply for re-certification to 2020 Standards, with another 3 years validity from the date of approval of audit.
- Unless a member company has contractual requirements to the 2020 or earlier Standards, the tracking numbers for FSR 2020 and TSR 2020 Standards audit and certification will be issued only till Dec-15-2023 and are valid for audits that are carried out not later than Dec-31-2023.
- Unless a member company has contractual requirements to the 2020 or earlier Standards, effective Jan-01-2024, tracking numbers issued are applicable for audits and certification under the New 2023 Standards.

D. Interim Audit / Annual Self-Audit / Surveillance Audit

As per Certification requirements, the interim / annual self-audits will need to be completed and sent to TAPA APAC for Level C and Level 3; for other higher levels the report will need to be submitted to the respective IAB's who have issued the certificate. The tracking number originally assigned for the audit will remain applicable for interim / annual / surveillance audits until the expiry of the certification.

For any additional clarifications please write to training@tapa-apac.org or certification@tapa-apac.org or membership@tapa-apac.org

TAPA APAC China Office Opening

& "Technology and Innovation Empowerment for Post-Pandemic Supply Chain Resilience and Security" Seminar

TAPA APAC, the Transportation Assets Protection Association Asia Pacific, held a "Technology and Innovation Empowerment for Post-Pandemic Supply Chain Resilience and Security" Seminar and the Opening Ceremony of TAPA APAC China Representative Office at the World Expo Qiantan Centre this afternoon. It aims to explore the impact of digital transformation on supply chain security, share the latest technologies and solutions in the industry, improve the overall security level of the industry, and promote supply chain resilience and innovation. It covers transportation safety, intelligent logistics, supply chain risk management and many other aspects.

The seminar and the opening ceremony invited the leaders of the Shanghai Municipal Transportation Commission, the Pudong New Area Commerce Commission, the World Expo Administration Bureau and the Shanghai Public Security Bureau, as well as important guests such as the Chairman of TAPA APAC, the Executive Director of the Greater China region, and the Chief Representative of the TAPA APAC China to attend the speeches.

Numerous industry leaders delivered keynote speeches, sharing their insights and experiences.

At the opening ceremony, TAPA APAC officially announced the establishment of the China Representative Office in China and set sail, and a ribbon-cutting ceremony was held, marking an important step in the development of TAPA in China. More than 100 industry experts from the government, representatives of various industries, international organizations, representatives of TAPA members and third-party organizations attended the event, and many of them delivered wonderful speeches covering the frontiers of the industry and looking forward to the future. At the same time, thousands of people participated in the live broadcast on the Internet to discuss the challenges and opportunities of supply chain transportation asset protection under the new normal.

First of all, the host of the event, Ms. Lu Nan, introduced the deputy party secretary and deputy director of the World Expo Administration Bureau, Shi Yinhua, deputy director of the management committee and other distinguished guests who attended the meeting. Tony Lugg, chairman of TAPA Asia-Pacific region, first delivered a speech, expressing a warm welcome to the arrival of the attendees, and Shared TAPA's vision, views on digital transformation, and emphasized the importance of digital transformation to supply chain security.

In the speeches of the government leaders, Shen Lan, Deputy Director of the Shipping Department of the Shanghai Municipal Transportation Commission, and Dong Xiaoling, Deputy Director of the Shipping Office of the Pudong New Area Commercial Committee, delivered speeches respectively, sharing the government's policies and measures in terms of digital transformation and supply chain security.

Alan Liu, Chief Representative of TAPA Shanghai Representative Office, delivered a speech, introducing TAPA's achievements and plans in promoting supply chain security. Subsequently, Erik Zhou from Dyson shared their experience and practices in digital transformation and supply chain security as a member of TAPA.

After the ribbon-cutting ceremony and a group photo, the meeting entered the discussion session, and a total of six guests delivered speeches.

Wang Peng, general manager of Sensormatic Solutions China, shared how RFID can help the digital supply chain. Liu Huaize, vice president of Convergent, introduced the digital application of smart logistics-logistics park business scenarios. Shi Runchao, an expert in Microsoft cloud security and compliance technology solutions, focused on supply chain security construction in digital transformation. Xu Kaijun, director of Hikvision's business & logistics industry, introduced AIoT to help the digital operation of supply chain logistics. Finally, Wang Huipeng, Bekaert Asia Pacific Enterprise Security Director, and Bai Yulong, Chairman of the International Emergency Management Association IAEM Asia, respectively shared TAPA's practical experience in helping to solve security challenges in the supply chain and supply chain Emergency Management (EM) and Business Continuity Management (BCM).

This digital supply chain seminar brought together the strengths of government and industry leaders, discussed the challenges and opportunities of digital transformation for supply chain security, shared the latest technologies and solutions, and provided valuable ideas and experience for the construction of supply chain security. TAPA APAC China Representative Office stated that it will continue to work on promoting the importance of supply chain resilience, promoting digital transformation and the healthy development of the industry.

TAPA APAC China Representative Office is the latest branch of TAPA in the Asia Pacific region, and will be committed to providing professional services and support for China's transportation industry.

TAPA APAC Hosts Official Visit of Shanghai Pudong New District Government

Strengthening Partnership and Collaboration

Following the successful opening ceremony of its China office in Shanghai in May 2023, Transported Asset Protection Association Asia Pacific (TAPA APAC) is honoured to host the Shanghai Pudong New District Government officials on July 3rd, 2023 at its Singapore APAC HQ office.

**Shanghai Pudong New District
Supports TAPA APAC Member
Companies**

During this significant milestone visit, both parties had insightful discussions around the shipping industry in Singapore and TAPA APAC's strategic plans in China, with a specific focus on the shipping sector. The Shanghai Pudong New District Government expressed strong support to TAPA APAC, recognizing the association's vital role in bridging global companies with the Pudong government, fostering expansion and enhancing Pudong companies' supply chain efficiencies through TAPA programmes which helps businesses to be resilient and sustainable.

"We are honoured to host the Shanghai Pudong New District Government at our TAPA APAC office in Singapore. This visit represents a significant step forward in strengthening our partnership with China and underscores our shared commitment to building resilient and sustainable supply chains", said Mr. Tony Lugg, Chairman of TAPA APAC.

"We extend our sincere gratitude to the Shanghai Pudong New District Government for their invaluable support and look forward to working together closely under this new joint initiative", added Mr. Matt Lee, Vice-Chairman of TAPA APAC.

(Left to right) Jeffrey Tan (Maersk), Alvin Lau (TAPA APAC), Madu Lokan (TAPA APAC), Sangar Kandasamy (TAPA APAC), Shen Min (Pudong New Area Chuansha New Town), Matt Lee (TAPA APAC), Yuan Xuewu (CPPCC Pudong New Area Committee), Tony Lugg (TAPA APAC), Ji Zhaoliang (CPPCC Pudong New Area Committee), Wu Ganfeng (CPPCC Pudong New Area Committee), Alan Liu Qing (TAPA APAC China), Paul Rachmadi (TAPA APAC), Xu Yuehua (Pudong New Area Commerce Committee), Liu Mingfa (IMC) and Li Tao (Pudong New Area Commerce Committee).

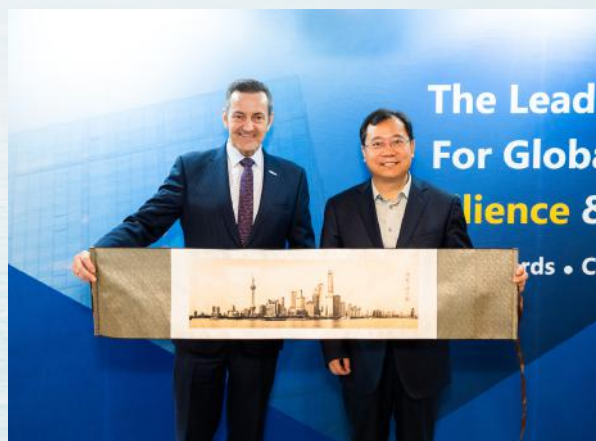

The Next Mega Shipping Hub in Asia Pacific

"Shanghai is a leading international shipping centre city in the world, and geographically-advantageous Pudong will be the next mega shipping hub. We are thrilled to receive the invitation from the Shanghai Pudong New District Government to participate in the esteemed Pudong Shipping Week in December 2023. This event provides an invaluable opportunity to engage and interact with industry leaders, exhibit and demonstrate TAPA's library of standards and best practices benefitting the supply chain community. We look forward to adding value and contributing to this influential platform further strengthening our collaboration with the Shanghai Pudong New District Government," said Mr. Alvin Lau, Executive Director, Greater China, TAPA APAC.

In line with the partnership, TAPA APAC aims to connect its members with the Pudong government, facilitating the establishment of operations in the Pudong area. Leveraging Pudong's geographical advantages and its direction towards becoming a high-tech shipping hub, TAPA APAC strives to support its members in operating resiliently and efficiently, unlocking the potential for growth and success.

The visit from the Shanghai Pudong New District Government highlights the importance of collaboration and mutual understanding in achieving supply chain resilience goals. TAPA APAC remains committed to its mission of enhancing supply chain resilience, and sustainability throughout the Asia Pacific region. Through strategic partnerships and collaborations with government and industry bodies, the association continues to lead the way in setting industry standards, promoting best practices, and driving continuous improvement across the supply chain landscape.

TAPA APAC Member companies who are interested to expand their operations into Shanghai Pudong New District may contact TAPA APAC at info@tapa-apac.org.

First TAPA Risk Assessment Standard (RAS) 2023 Face-to-Face Training

Conducted in Kuala Lumpur, Malaysia

TAPA APAC held the highly anticipated TAPA Risk Assessment Standard (RAS) 2023 face-to-face training workshop in the vibrant city of Kuala Lumpur, Malaysia. This comprehensive training programme aims to equip over 30 attendees with the knowledge and skills necessary to assess and mitigate risks along their supply chain. Attendees include Toll Group, Maersk, AIG, ShieldCoach Security, PMI, World Gate Express Services and others.

The primary objective of the TAPA RAS 2023 Training is to enable participants to understand and implement the risk assessment methodologies for their end-to-end supply chain. By the end of the training, delegates will possess the necessary expertise to conduct thorough risk assessments, identify vulnerabilities, and develop robust security measures to safeguard their supply chains against potential threats.

Through a combination of theoretical insights, real-world case studies, and interactive exercises, delegates will gain a deep understanding of the TAPA RAS framework and its practical 2023 implementation. The delegates exchanged great insights as they analyze different risk forms and propose practical strategies within their supply chain to reduce the risk exposure.

Delegates are awarded with their TAPA RAS certification upon completion for expanding their supply chain risk assessment and management knowledge. The extensive two-day TAPA RAS 2023 Training concluded successfully with positive feedback from the delegates and enquiry from TAPA APAC members to conduct subsequent RAS 2023 training workshops in the coming months.

New 2023 Guarding Security Requirements (GSR) Standard Training Concluded with Great Participation

A significant TAPA APAC milestone in launching security measures for manufacturers and logistics service providers.

TAPA APAC is pleased to announce another successful completion of its training workshop in Kuala Lumpur, Malaysia on June 21, 2023. Since the launch of the new 2023 Guarding Security Requirements (GSR) Standard in June, this GSR training is the first ever workshop to be conducted for TAPA APAC members in aligning their supply chain risk management strategies to the new 2023 Standards. The training was well attended by 30 member companies including Johnson Matthey, DSV, Madina Security, DB Schenker, Regent Security, SECOM and more.

The TAPA GSR 2023 Standard is a globally recognized framework designed to significantly enhance the security and resilience of supply chain operations.

With the ever-evolving challenges of theft, cargo crime, and security breaches posing a significant threat to the supply chain whilst at the same time, Government Supply Chain Security Programmes requiring a greater diligence, TAPA has developed the globally recognized **TAPA GSR 2023 Standard** which foster collaboration among the stakeholders. This framework is designed to mitigate risks and improve resilience throughout the supply chain, providing your business and assets with adequate security solutions. The intention of the GSR, is to provide a back to back requirement of your current security programme.

During the training program, participants received comprehensive insights into the latest security trends, emerging risks, and technological advancements in supply chain security. The training program emphasized the importance of proactive risk management, security awareness, and robust security protocols, equipping participants with practical strategies and techniques to protect valuable assets effectively. The sessions were led by renowned experts in the field, offering practical strategies and techniques to enhance security measures and protect valuable assets.

TAPA GSR Standard helps the man guarding companies to upskill and align with the supply chain industry security requirements. By working with guard service providers who are well-versed in TAPA's best practices, the manufacturers and LSPs can build a more resilient supply chain, elevate security practices and reduce the risk of cargo losses.

TAPA Chairman of APAC, Mr. Tony Lugg, TAPA Certified Expert expressed the importance of using the GSR Standard to mitigate associated risks when outsourcing services. Through this initiative, TAPA aims to create a global network of security-conscious organizations that can collaboratively address security challenges and protect valuable assets from losses.

Over 1,000 TAPA APAC Blockchain Digital Certifications Issued & More to Come

Strengthening Partnership and Collaboration

Since the launch of TAPA APAC's blockchain powered digital credential system at the start of the year 2023, TAPA APAC has successfully issued over 1,000 blockchain powered digital certifications and credentials. This achievement of credential issuance reflects the TAPA APAC's accelerating growth and the growing recognition of the benefits of TAPA Standard in enhancing resiliency, transparency, security, and efficiency in supply chain management and operations within a short span of 5 months.

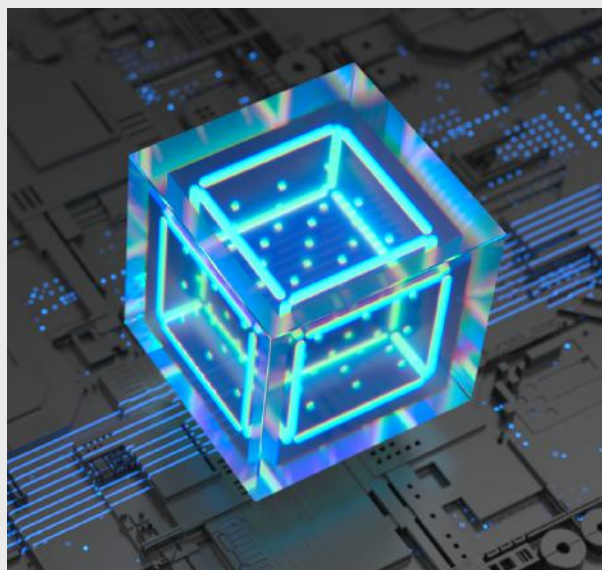

More members are obtaining a TAPA Standards certification, organizations demonstrate their commitment to implementing robust security measures and mitigating risks in their supply chain operations. We strongly encourage member companies and individual members to share their TAPA Standards certification to advocate supply chain resilience with quality benchmarking standards and quality audit in the industry.

TAPA APAC's blockchain digital credential system revolutionizes the way industry certifications and credentials are issued, verified, and managed. By leveraging the immutable and decentralized nature of blockchain technology, TAPA APAC ensures the integrity and authenticity of each certification, making it tamper-proof and resistant to fraudulent activities. Its ability to provide real-time verification of credentials is the key advantage of the TAPA APAC blockchain digital certification system.

The range of certifications offered by TAPA APAC through their blockchain-powered system is diverse. Firstly, they provide certifications for TAPA Standards achievements. TAPA Standards are internationally recognized guidelines for the security of supply chain assets, including warehouses, transport vehicles, and freight forwarding operations.

In addition to TAPA Standards certifications, TAPA APAC also issues certifications for its members. These certifications acknowledge the membership status of organizations in the TAPA APAC network and serve as a testament to their dedication to promoting supply chain security and collaborating with industry stakeholders.

Furthermore, TAPA APAC's blockchain digital credential system recognizes the achievements of individuals who have completed TAPA APAC's training programs and become Authorized Auditors (AA). These certifications validate the auditors' expertise in assessing and evaluating supply chain security measures based on TAPA Standards. By certifying these professionals, TAPA APAC enhances the credibility of its auditing processes and ensures a high standard of quality in security assessments.

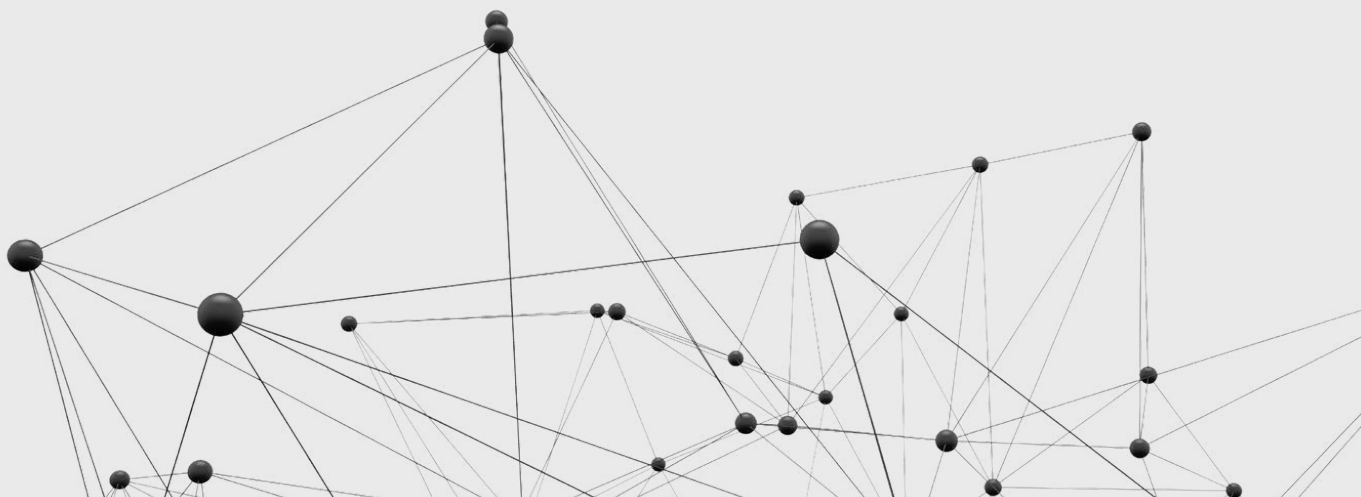

"As the industry continues to advance and evolve, TAPA APAC remains committed to the adoption of digitalization and usage of innovative technologies to drive greater efficiency, trust, and resilience for members and within the association. We are extremely proud of this milestone achievement within a short span of five months. In the upcoming months, we expect more digital credentials to be issued with the launch of the new 2023 TAPA Standards, supporting advanced training and membership programmes", said Tony Lugg, Chairman of TAPA APAC.

Tony Lugg

Chairman
TAPA APAC

Looking ahead, TAPA APAC anticipates an increasing demand for its blockchain digital certifications as more organizations recognize the importance of supply chain resilience and seek ways to demonstrate their commitment to best practices through TAPA Standards.

Sustainability Gaps Revealed As One-Third of Global Organizations Neglect ESG KPIs

Less than half of G2000 businesses will operationalize integrated sustainability in supply chains by 2026

In the 2023 Gartner Future of Supply Chain survey, one-third of the respondents said that their organization had not define any environmental and social sustainability KPIs for supply chain leaders despite visibility and transparency becoming “non-optional” for organizations. Gartner analysts said that organizations must “establish auditing procedures and extend them to suppliers and other external partners to capture the full impact of their efforts.”

As the environmental regulations increase and customers favour sustainable organizations, companies are increasingly being called upon to demonstrate their commitment to Environmental, social, and governance (ESG) reporting. It is becoming increasingly important and urgent as investors and regulators seek to understand the long-term resilience of companies in regards to their environment, social, and ethical performance, particularly in supply chain activities.

Organizations need to incorporate environmental considerations into their supply chain management. This means that each supply chain step, from materials management and transportation to the end customer, needs to be structured with environmental awareness in mind. Not only will it help to protect the natural ecosystem, but it will also provide a competitive edge to companies in terms of corporate reputation and operational performance.

IDC researchers predicted that by 2026, only 45% of G2000 organizations will operationalize integrated sustainability in the supply chain and effectively report impact data. This shocking statistic reveals a significant gap for more than half of global businesses to address in meeting the increasingly need for supply chain sustainability.

While many governments and economies have started mandating ESG reporting such as the UK's Taskforce on Climate-related Financial Disclosures (TCFD), nations in the region have only begun to utilize these frameworks in recent years. Furthermore, businesses are not placing enough emphasis and are lacking guidance in their supply chain sustainability programmes.

Creating a Sustainable Future for Global Supply Chains

TAPA APAC is continuously monitoring developments in ESG reporting regulations and their implications for our members. TAPA's overarching mission is to improve resilience and sustainability of members' supply chains. To further this goal, TAPA APAC continues to create new Standards to address these gaps and knowledge sharing opportunities amongst member companies through working groups, publications, events and conferences.

TAPA APAC Annual General Meeting 2023

TAPA APAC Annual General Meeting 2023 was held at Kuala Lumpur, Malaysia.

The Association is pleased to report that TAPA APAC 31st December 2022, financial statements and records, presented during the TAPA APAC Annual General Meeting 2023, have been audited and prepared without any identified exceptions. We have diligently followed generally accepted accounting principles (GAAP) to ensure accuracy, transparency, and compliance in our financial reporting.

By adhering to GAAP, TAPA APAC BODs' maintain consistency and comparability in our financial statements, enabling stakeholders (TAPA APAC valued Members) to make informed decisions. It ensures that our financial records are prepared in a standardized manner, reflecting the true financial position and performance of our association.

The association prioritize the proper application of GAAP to provide a clear and accurate representation of our financial activities. This commitment to compliance fosters trust and confidence among our members and their stakeholders.
