

HARVARD  
Global Health Institute

# Annual Report

## 2022-2023

# MESSAGE FROM OUR FACULTY DIRECTOR

Looking back on my first year at the Harvard Global Health Institute (HGHI), I see a year both of transition and of growth: we mourned the loss and celebrated the life and legacy of Harvard Professor Paul Farmer's contributions to global health; our team evolved and expanded; and as the world started to safely emerge from the COVID-19 pandemic, we began to convene once again in-person, thriving in the sense of being together again.

This past year, our team has been hard at work laying the groundwork for bigger things to come. While strategizing on how best to work across the university and with our partners across the globe to advance excellence and equity in global health, we have also been organizing a range of programs and

events for students, faculty, staff, and the global health community at Harvard and beyond. One prime example is our inaugural Global Health Symposium. Joined by hundreds of participants in-person and virtually around the world, the Symposium provided a platform for a diverse population to engage in meaningful conversations on various global health issues.

Our Fellowship Programs are expanding. In partnership with the Salata Institute for Climate Change and Sustainability, we launched the new Burke Climate and Health Fellowship Research Award in February 2023. The award provides critical financial support for post-doctoral scholars and early-career faculty in their Climate and Health research projects. The new fellowship joins two existing HGHI Burke fellowships supporting the careers of global health faculty across Harvard University. The LEAD Fellowship, a partnership with the Global Health and Population Department at the Harvard T.H. Chan School of Public Health, continues to provide training and mentorship to women leaders from low- and middle-income countries.

This year was among the most competitive yet for our undergraduate student internship programs. To ensure the opportunities we offer to Harvard students reflect our commitment to global health equity and align with our mission, we conducted an extensive evaluation of our internship program partners based on student feedback and five years of data, adding new partners and retiring some. Our team also engaged with students both individually and with their clubs and societies through programs such as our speaker series and mentoring events.

Looking ahead, our team will broaden our engagement with the Harvard global health community, as well as our partners worldwide through existing and new initiatives. We will focus on strengthening our operational strategy, revitalizing our website and communications, and advancing critical discourse and scholarship on global health topics most relevant to our times. Please reach out if you would like to explore ways to collaborate. I hope you will join us in our mission to advance global health equity.

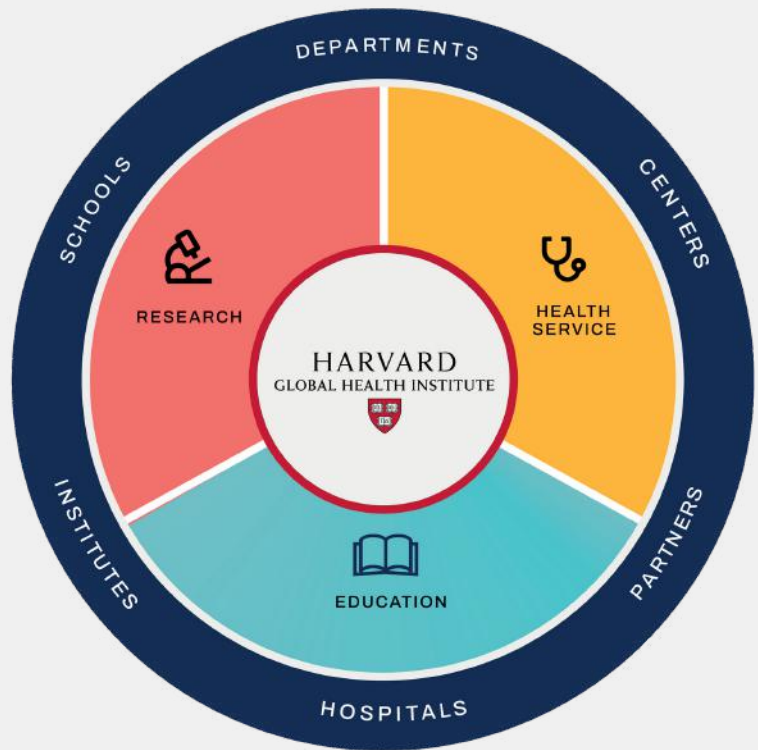

Sincerely,

Louise C Ivers MD, MPH, DTM&H  
Faculty Director, Harvard Global Health Institute  
Professor of Medicine  
Professor of Global Health and Social Medicine  
Harvard Medical School

# Advancing Excellence & Equity in Global Health

The Harvard Global Health Institute (HGHI) is a global, transdisciplinary community of practice, working to achieve health equity around the world.

We are an interfaculty initiative that facilitates collaboration across the Harvard community and partners worldwide to advance global health equity. We tackle the greatest health challenges of our time through innovative transdisciplinary research, education, and partnerships that build knowledge and drive positive change in global health.

## Global Partnership

We engage in partnerships with organizations, communities, and individuals around the world to exchange knowledge, collaborate on issues, and strengthen the global health community.

## Global Health Research

We stimulate research that advances scientific understanding of critical global health issues, generating evidence where none exists and supporting the next generation of researchers.

## Global Health Service

We collaborate with practitioners involved in the delivery and administration of care at every level to identify critical issues, craft practical solutions, and ensure those solutions reach those who need them most.

## Global Health Education

We teach, learn, and exchange knowledge, including through global health events, courses, fellowships and internships that support the advancement of global health leaders.

## Global Health Policy

We convene experts across disciplines and around the world to make evidence-based recommendations that inform global health policy.

A photograph of a group of people in a meeting. A man in a yellow and white patterned shirt is gesturing with his hands while speaking to a group of people. The group includes a woman in a blue patterned shirt, a woman in a light blue blazer, and a man in a dark suit. In the foreground, the back of a person wearing a black hijab and a yellow and white striped shirt is visible. The background shows a wooden podium and a wooden wall.

# Inaugural Global Health Symposium

## Global Health Equity Through Community Engagement

**April 12th, 2023**

# Symposium Highlights

The Harvard Global Health Institute's inaugural Global Health Symposium took place at the Harvard Faculty Club in Cambridge, MA on April 12th, 2023, with the theme of Global Health Equity through Community Engagement. The event featured nearly 30 global health experts, who joined in-person and virtually from around the world to speak on a wide range of global health issues across plenary sessions and fireside chats.

Throughout the day, around 100 in-person attendees, accompanied by more than 700 virtual attendees, joined the various sessions.

Dr. Ahmed Ogwell Ouma, Acting Director, Africa CDC, served as the event's keynote speaker, highlighting Africa's New Public Health Order.

**29**  
speakers from  
around the world

**79**  
countries  
represented

Over  
**800**  
joined in-person  
and virtually

## 2024 Global Health Symposium April 18th, 2024 Partnerships in Action

Scan the QR code  
to learn more

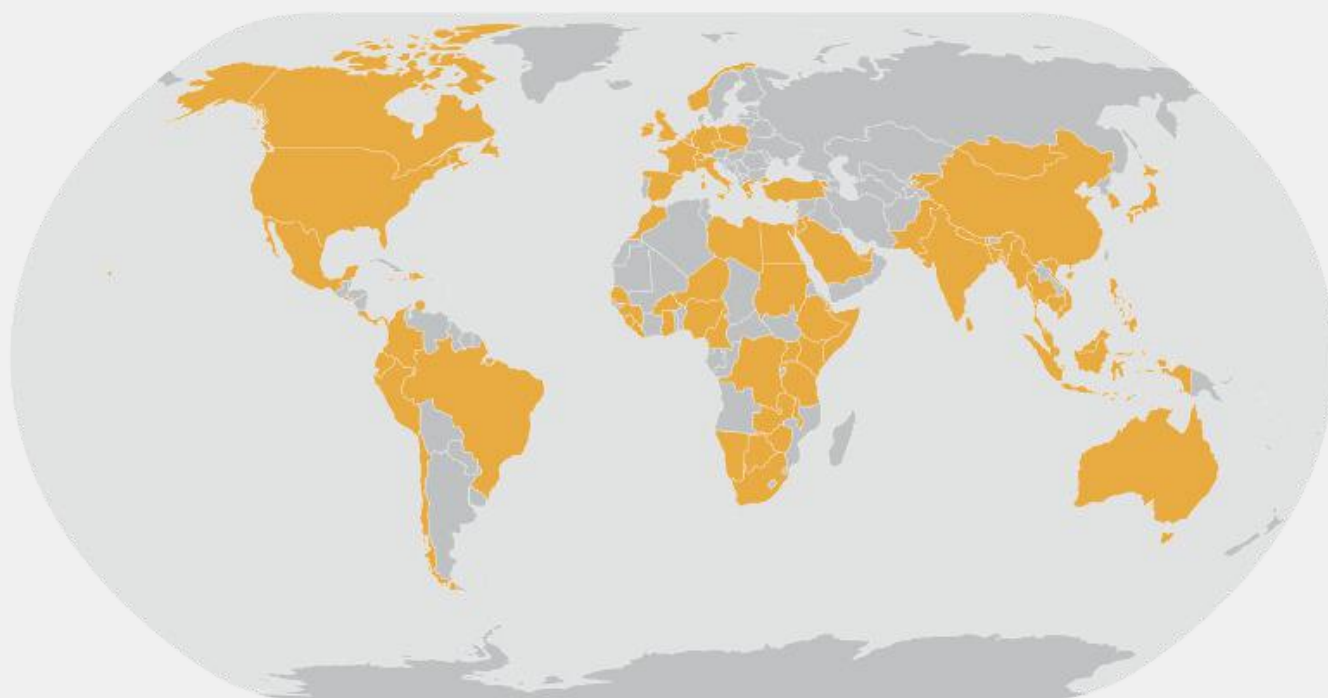

The Symposium provided the opportunity for faculty, staff, and students across Harvard's schools, institutes, centers, departments, and affiliated hospitals, as well as an international community of health professionals, academics, and civil society, to connect and engage in meaningful conversations around some of the most pressing global health issues in an inclusive hybrid experience.

# Words from the Attendees

“ I learned so much from this incredible meeting. It provided me time to think and reflect and it has fostered some new collaborations for me already. ”

“ A wide variety of very relevant topics, presented by a very diverse group of speakers from a variety of countries, all of whom had direct expertise. It was clear that a lot of thought went into the speaker lineup, and I really appreciated hearing about the topics from true experts in the subject matter. ”

“ I loved the variety of topics and the excellent speakers. It was engaging and I like the format of the presentations as well. ”

“ Incorporating domestic equity issues with international, having the Boston and NYC departments of Health represented was helpful. ”

“ Speakers were provocative... conversation across panelists was most helpful. ”

# Webinar Series

Throughout the year, the Harvard Global Health Institute hosted a series of webinars focused on topics that are most relevant to the times. By presenting these webinars to a global audience, we are hosting important dialogues, contributing to policy debate, gathering thought-leaders, and raising awareness.

## **Protecting Health Care in Conflict Areas: Lessons from Ukraine to Tigray July 6th, 2022**

In partnership with the Harvard Humanitarian Initiative, the Massachusetts General Hospital Center for Global Health, and the Security and Global Health Project at the Belfer Center for Science and International Affairs at Harvard University, the Harvard Global Health Institute hosted this webinar around the provision of health care in conflict areas.

## **Monkeypox in the Global Context: Combatting Racism and Intersectional Stigma August 18th, 2022**

The Harvard Global Health Institute hosted a panel of global experts who considered how intersectional stigma and racism shaped priorities and undermined strategy in the global response to the monkeypox outbreak.

## **Health Implications of Anti-LGBTQI+ Stigma & Discrimination: Spotlight on Uganda June 12th, 2023**

The Harvard Global Health Institute and the Massachusetts General Hospital Center for Global Health co-hosted this webinar with Harvard-based and Uganda-based experts on health, social and behavioral science, and human rights. The group described how the physical and mental health of Ugandans is directly impacted by new discriminatory legislation against the LGBTQI+ community.

# Visiting Professor

**Michele Barry, M.D.,  
FACP, FASTMH**

We were thrilled to host Professor Michele Barry at the Harvard Global Health Institute in the fall of 2022. Professor Barry lectured on climate and megacities and mentored Harvard undergraduate students and HGHI fellows during her time at HGHI. Professor Barry is the Drs. Ben and A. Jess Shenson Professor of Medicine and Tropical Diseases at Stanford University. She is the Director of the Center for Innovation in Global Health and Senior Associate Dean for Global Health. Dr. Barry is the founder of the Gates-funded

nonprofit WomenLift Health, an elected member of the National Academy of Medicine, Council on Foreign Relations, and The American Academy of Arts and Sciences, Chair Emerita of the Board of Directors for the Consortium of Universities for Global Health, and past President of the American Society of Tropical Medicine and Hygiene. She has written on the impact of COVID-19 on female academics amongst other areas of scholarship in tropical diseases, human and planetary health as well as global and refugee health.

## Program Showcase

### 2022 *Lancet* Countdown

The Harvard Global Health Institute is a proud sponsor of the *Lancet* Countdown: Tracking Progress on Health and Climate Change, an international research collaboration that monitors and reports annually on the relationship between health and climate, and its implications for national governments.

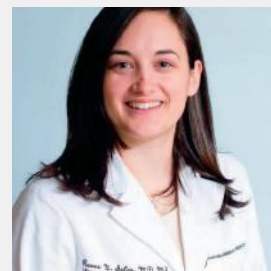

Each year, a special companion U.S. brief is released alongside the global report that aims to draw out the most nationally relevant findings to highlight the key threats and opportunities climate change poses for health in the United States.

The Harvard Global Health Institute proudly served as the host institution for the 2022 *Lancet* Countdown U.S. Brief.

As part of the virtual launch event on October 26th, 2022, Burke Fellow alumna and Senior Author of the 2022 *Lancet* Countdown U.S. Brief, Renee N. Salas, MD, MPH, MS, spoke with Gina McCarthy, MS, Former National Climate Advisor, to discuss her accomplishments as the first White House National Climate Advisor and how medical and public health professionals can help advance climate action.

Renee N. Salas, MD, MPH, MS,  
Burke Fellow alumna and  
Senior Author of the 2022  
*Lancet* Countdown U.S. Brief

# Fellowships

The Harvard Global Health Institute offers three fellowship programs that nurture talent, drive innovation and advance emerging leaders in global health. Through the Burke Climate and Health Fellowship program, the Burke Global Health Fellowship program, and LEAD Fellowship program, we offer opportunities for global collaboration, continued learning, and critical funding that bolster up-and-coming voices in the Harvard global health community.

Since 2009, the Harvard  
Global Health Institute  
has supported

62

emerging leaders through  
the Burke and LEAD  
Fellowship programs

# HGHI Burke Fellowships

The Harvard Global Health Institute Burke Fellowships provide funding for eligible research fellows, post-doctoral scholars, and faculty pursuing scholarly research in the field of global health and at the intersection of climate and health. The program is a critical resource for early-career faculty across the university, providing essential support for groundbreaking public health research and curriculum development. The HGHI Burke Fellowships continue to be a critical source of global health funding at the university level.

## Burke Climate and Health Fellowship Research Award

Launched in February 2023, in partnership between the Harvard Global Health Institute and the Salata Institute for Climate and Sustainability, the Burke Climate and Health Fellowship is a two-year program supporting junior researchers from across the university conducting research at the intersection of climate change and health. The program attracts a diverse and deeply committed range of applicants from across Harvard's schools and hospitals.

## Burke Global Health Fellowship Research Award

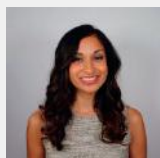

Since 2009, the Harvard Global Health Institute has supported more than 40 Burke Fellows to conduct impactful research. For these exceptionally talented early-career faculty across the university, the Burke Fellowship has acted as a career catalyst. The program has been truly global in reach, with projects in India, Nicaragua, China, South Africa, Rwanda, Peru, Mexico, and many other countries.

## Burke Global Health Fellowship Curriculum Development Award

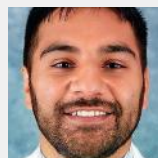

The Burke Global Health Fellowship Curriculum Development Award provides opportunities for junior faculty to apply innovative pedagogy to course development and teaching, particularly at the undergraduate level.

# 2022 Burke Fellows

**Pooja Chitneni, MD**

Instructor in Medicine at Harvard Medical School; Infectious Disease and Internal Medicine Physician at Brigham and Women's Hospital

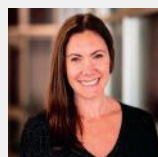

**Zahir Kanjee MD, MPH**

Assistant Professor of Medicine at Harvard Medical School; Hospitalist and Chief at Beth Israel Deaconess Medical Center

**Jocelyn Kelly, PhD**

Instructor in Emergency Medicine at Harvard Medical School; Director of the Harvard Humanitarian Initiative's (HHI) Gender, Rights and Resilience (GR2) program

**Crystal North, MD MPH**

Assistant Professor of Medicine at Harvard Medical School; Attending Physician in Pulmonary and Critical Care Medicine at Massachusetts General Hospital

## Project Spotlight

Over the past year, Dr. Kanjee designed a year-long professional development and reflective medicine course for the University of Global Health Equity in Rwanda. The objective of his project titled “Professional Development Course for Medical Students for the University of Global Health Equity in Kigali, Rwanda” is to address the mental and emotional challenges of medical school for learners in resource-limited settings.

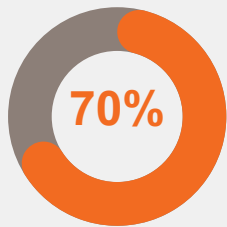

In her project titled “Developing an STI partner notification services delivery intervention in southwestern, rural Uganda”, Dr. Chitneni developed a task-shifting notification system for partners of sexually-transmitted-infection-positive patients that is specifically tailored to the resource-limited setting of rural Uganda.

To address the dangerous levels of ambient air pollution that threaten women and people living with HIV in Southwestern Uganda, Dr. North will use her Burke fellowship resources to establish environmental sampling infrastructure and better model the effect of biomass-predominant air pollution on lung health.

Dr. Kelly's research project, entitled “Stronger communities and stronger environments: An evidence-based intervention to improve human and climate resilience in fragile settings”, aims to mitigate the gender-based violence that is exacerbated by climate change and violent conflict in the Democratic Republic of the Congo.

# LEAD Fellowship

The Harvard LEAD Fellowship Program for Promoting Women in Global Health is jointly offered by the Harvard Global Health Institute and the Global Health and Population Department at the Harvard T.H. Chan School of Public Health. LEAD is a transformational one-year fellowship specifically designed to promote leadership skills in individuals from low- and middle-income countries who will, in turn, mentor future women leaders in global health.

70% of global health delivery is performed by women,

but only 25% of leadership positions are held by women

Source: *Closing the leadership gap: gender equity and leadership in the global health and care workforce*, World Health Organization

# 2022 LEAD Fellows

Throughout their fellowship year, LEAD fellows engage in a tailored experience, based on their specific leadership goals and fields of study. The 2022 cohort's curriculum consisted of a full semester on campus which included individualized leadership training, executive education courses, and skill-building workshops. Through these programs, the fellowship connects women leaders from the Global South with educational and mentorship opportunities that strengthen their leaderships skills and expand their network.

**Ifrah Abdi, BSN, MMSc-GHD**  
**Somaliland**

Nurse midwife at the Edna Adan University Hospital in Somaliland

**Ana Cristina González-Vélez, MA, MD, PhD**  
**Colombia**

Professor of Health Law at la Universidad de los Andes, Women's Health and Reproductive Rights advocate

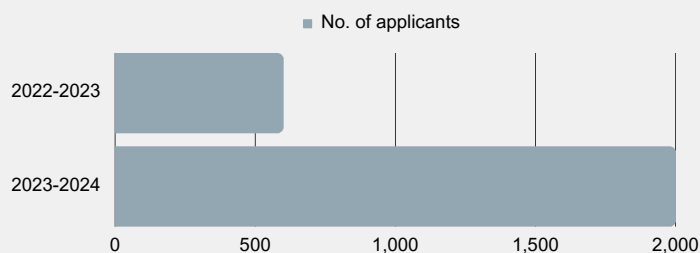

**Choolwe Jacobs, PhD, MPH**  
**Zambia**

Head of Department for Epidemiology and Biostatistics at the University of Zambia School of Public Health and Country Director for Women in Global Health, Zambia Chapter

**Flora Nwagagbo, MBBS, MPH, PMP**  
**Nigeria**

Senior Program Specialist for TB/HIV Care and Support and TB/HIV Implementation Leader for the U.S. President's Emergency Plan for AIDS Relief (PEPFAR)

## How it works

LEAD Fellows have access to world-class faculty through their coursework and are connected with experienced Harvard faculty mentors who share their area of expertise. Fellows have the opportunity to build a custom curriculum aligned with their own unique personal growth and leadership plan, including the executive education courses Women and Power, Negotiation Strategies: Building Agreements Across Boundaries, and Strategic Leadership: Enhancing Your Personal Effectiveness from the Kennedy School.

Harvard faculty design and run tailor-made leadership workshops for the LEAD Fellows, including a Negotiation masterclass with Professor Daniel Shapiro, the founder and director of the Harvard International Negotiation Program at the Harvard Kennedy School. In addition to their personalized leadership curricula, fellows connect with Harvard College undergrads through an interactive seminar series and with the Harvard T.H. Chan School of Public Health community through the Brown Bag Seminar series.

The 2022-2023 LEAD program had over six hundred applicants for four fellowship positions. The global interest in LEAD continues to grow; for our 2023-2024 cohort, the program attracted over two thousand applicants, representing an increase in demand of over 230%.

# From Our Current Fellows

"The LEAD Fellowship program is timely. It is coming at a time when my agency is launching its enterprise-wide Diversity, Equity, Inclusion and Accessibility (DEIA) plan to address pervasive and longstanding health disparities and inequities...It is an honor to be a part of such a rich community of experienced leaders and to learn from their journey. I look forward to the coaching, mentoring, communication, negotiation, and conflict management sessions which will enhance my leadership capacity. I am confident that the fellowship will help me become the exemplary, inspirational, and transformational woman leader that my country and global health so desperately need, and I will be better able to mentor future women leaders who will positively impact global health."

- Flora Nwagagbo.

"I am honored to be a 2022 LEAD fellow. This is a perfect opportunity to share information and advocate for change by empowering girls at a young age, to help create a new generation of powerful women leaders in Somaliland who are unafraid to pursue their dreams and reach their potential. My goal is to utilize the executive leadership training and courses to help me implement continental frameworks that promote gender parity and inclusion so that, over time, women will be in more positions of leadership and able to contribute to the development of the continent."

- Ifrah Abdi.

"I have a vision of taking critical leadership roles to ensure gender equity in global health leadership and in health care access or outcomes for populations at national, regional and global levels. I look forward to a life-changing transformative experience through the Harvard LEAD Fellowship and to be able to obtain skills, capacity and experience in leadership. I will maximize this opportunity not only for my career goals in global health leadership but more so for the benefit of many emerging leaders in the country, region and globally through mentorship."

- Choolwe Jacobs.

A group of five diverse students are smiling for a selfie outdoors. In the center is a young woman with long dark hair and a wide smile, wearing a dark green jacket. To her right is a young woman with dark hair tied back, wearing a red bandana and a purple shirt. To the left of the central woman is a young woman with dark hair wearing a blue baseball cap and a light blue shirt. In the top left corner is a young man with glasses and a mustache, smiling. In the top right corner is a young woman with long brown hair, smiling. The background shows a rocky, reddish-brown hillside under bright daylight.

# **Student Engagement Initiatives**

# Experiential Learning

The Harvard Global Health Institute launched the Summer Research & Internship Program in 2009 to provide meaningful and substantive summer experiential learning opportunities for undergraduate students. Each year, we partner with organizations, both in the US and internationally, who host and mentor undergraduate students for 10-week internships over the summer from June-August.

HGHI student, Aqil Merchant, at GAVI, the Vaccine Alliance, in Geneva, Switzerland

## Summer Internship

Our Summer Internships offer students the opportunity to work with global health organizations, nonprofits, and NGOs. Sites can be domestic or international.

International Summer Undergraduate Research in Global Health (I-SURGH) interns conduct research internationally, most often with Harvard-affiliated researchers.

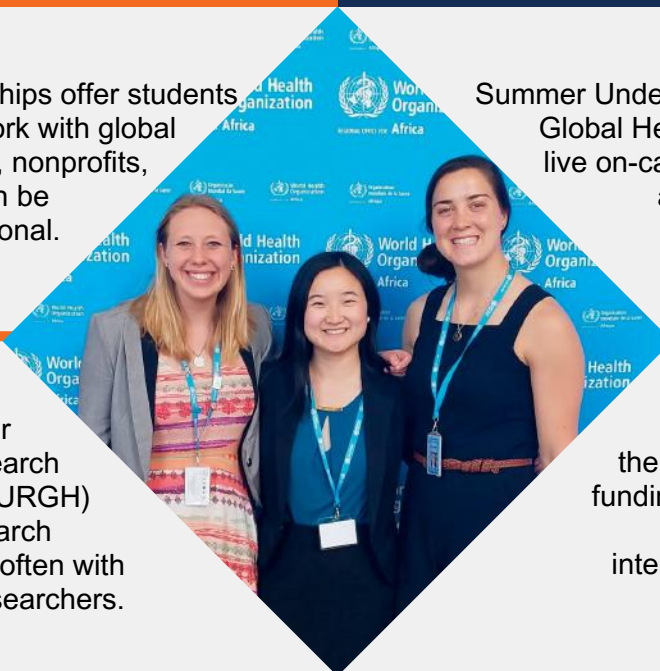

## International Summer Undergraduate Research in Global Health (I-SURGH)

## Summer Undergraduate Research in Global Health (SURGH)

Summer Undergraduate Research in Global Health (SURGH) interns live on-campus for the summer as part of a residential research program.

Students can propose their own projects and get funding to conduct research or intern with local or international organizations during the summer.

## Independent Funding

# Student Spotlight

During the summer of 2022, the Harvard Global Health Institute received internship applications from 248 unique applicants and supported 72 students to work with 57 organizations in 19 locations across 12 countries.

"This internship reaffirmed my certainty that medicine is the right path for my future. In the hospital, listening to doctors and residents brainstorm possible diagnoses and treatments for patients with complex conditions in addition to emotionally supporting and empowering each individual was inspiring... Overall, this was an incredible ten-week journey, and I hope to carry the lessons I have learned with me in my day-to-day life and my career."

*Anais Colin  
Socios En Salud, Peru*

"This internship reassured me that there are so many ways to be involved with health and have an impact outside of being a doctor. After completing the internship, I am even more passionate about addressing issues in health and inequalities in healthcare access...I am proud of the work I completed for Lumiere and incredibly grateful that HGHI made this opportunity possible."

*Mia Colman  
Lumiere Health  
International*

"Entering this internship, one of my key goals was to determine whether I had a greater interest in medical practice or biomedical device design. My time in the Reconstruction and Mechanics of the Middle Ear Lab allowed me to explore and further my interest in each area....My time with HGHI has been nothing less than transformative and will shape my ambitions and engagements!"

*Alexander Dyer,  
Reconstruction and  
Mechanics of the  
Middle Ear Lab at  
Mass Eye & Ear*

"My internship with Health Leads provided a rare opportunity for me to gain immersive project-based health equity experience, hands-on training, and direct interactions with members of the Health Leads community, which offered excellent experience and allow me to take my interest in policy research and health equity to new heights."

*Sophia Scott  
Health Leads, USA*

# Partners Spotlight

The Harvard Global Health Institute values feedback and continuously strives to improve our experiential learning programs. We gather student and partner input through surveys and one-on-one conversations before, during, and after the internship program to guide decision-making and refine student engagement initiatives. During the fall of 2023, the Institute conducted a comprehensive evaluation of our partners with five years of data (2018-2022). Each internship was evaluated according to the student evaluation scores, student interest as indicated by the number of applications received, the global health focus of the organization, and emphasis on health equity. The remaining partners reflect our commitment to global health equity and strongly align with the Institute's mission. Dr. Louise Ivers, Faculty Director at the Harvard Global Health Institute, conducted visits to partners in Uganda and Rwanda this year.

New York, USA

The United Nations Population Fund (UNFPA) is a UN agency aimed at improving reproductive and maternal health worldwide. Its work includes developing national healthcare strategies and protocols, and increasing access to birth control. UNFPA has been a partner since 2018 and has welcomed 12 students to their team in the past five years.

**World Health  
Organization**

Switzerland

Headquartered in Geneva, Switzerland, the World Health Organization (WHO) is a specialized agency of the United Nations responsible for international public health. While unable to host interns during the pandemic, we reaffirmed the collaboration this year, and they are preparing to welcome interns again next summer.

The Botswana Harvard AIDS Institute Partnership (BHP) is a leading HIV/AIDS research, training and capacity-building institution, headquartered in Gaborone, Botswana. They have been an HGHI internship partner since 2010. While unable to host interns during the pandemic, we reaffirmed the collaboration this year, and they are preparing to welcome interns again next summer.

University of Global Health Equity (UGHE) is a health sciences university in Rwanda. An initiative of Partners In Health, UGHE is a private, not-for-profit, accredited institution. UGHE has been a partner since 2016, and seven students have interned with them in the past. Two students are working with them this summer on new project teams.

The Ragon Institute of Mass General, MIT, and Harvard brings together scientists and engineers from diverse fields to better understand the immune system and support human health. They have been hosting HGHI students since 2013 in both Boston and in South Africa. In 2019, we expanded the collaboration to support a cohort of five interns who join Ragon-affiliated projects in South Africa with the Africa Health Research Institute and the FRESH Clinic.

Socios En Salud (SES) is a non-profit organization in Peru which provides quality community mental health care for vulnerable populations using psychological interventions and digital technology. The partnership with SES was developed through a relationship with a LEAD Fellow, Carmen Contreras, who came to Harvard in 2021 and now serves as a summer program mentor for students who join her team in Peru. Two students joined SES during the summer of 2022, and three students are currently working there.

# Community Engagement, Advising, and Events

At the Harvard Global Health Institute, engaging with students is an integral part of our work. Throughout the year, we organize a wide range of extracurricular activities that not only promote a sense of community but also encourage students' personal and professional development.

From September to May, we hosted a monthly series called “Pathways to Global Health,” which provided students with an opportunity to learn about career pathways in global health from diverse professionals.

We offer one-on-one advising for Harvard undergraduates seeking extracurricular and professional opportunities in global health. Advising appointments were available through weekly office hours, by appointment, or by email. Group advising sessions were held during the application process for the Summer Research and Internship Program.

Last year, the Harvard Global Health Institute organized approximately 35 student-facing events, either independently or in collaboration with other departments.

## Student Advisory Committee

The Harvard Global Health Institute believes in nurturing the leadership potential of our students. The Student Advisory Committee (SAC) was created in 2015 as a collaboration between our staff and students, with a mission to promote student leadership and build community among undergraduates at Harvard interested in global health. The SAC supports cross-disciplinary collaboration and communication among students through community-building events, resource generation, and peer mentoring.

The SAC is led by the Institute's staff along with two undergraduate student co-presidents. Members consist of nine student ambassadors and two co-presidents who serve in 1-year terms. Students represented a diversity of class years, concentration, interests, and backgrounds. Initiatives are student-driven and staff-supported. 2022 initiatives included a Faculty Dinner/Coffee Series, Mentoring Events, VISITAS Global Health Open House, Peer advising, and a site visit to Harvard T.H. Chan School of Public Health.

# Courses

The Harvard Global Health Institute supports a number of undergraduate courses with a strong focus on global health. These include courses that fulfill some of the requirements for the Harvard College Program on General Education (Gen Ed), foundational courses for the Secondary Field in Global Health and Health Policy, and courses led by faculty at the Harvard Global Health Institute.

## General Education and Global Health

- **Who Lives, Who Dies, Who Cares? Reimagining Global Health** (Gen Ed 1093)
- **World Health: Challenges and Opportunities** (Gen Ed 1063)

## Secondary Field in Global Health and Health Policy

- **Global Oral Health: Healthy Teeth, Healthy Societies** (GHHP 30)
- **The Quality of Health Care in America** (GHHP 50)
- **Global Response to Disasters and Refugee Crises** (GHHP 70)

## Courses led by HGHI Faculty

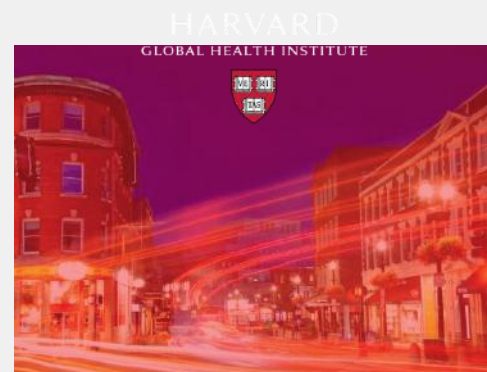

- **Vaccines: History, Science, Policy** (Gen Ed 1175)
- **Confronting COVID-19: Science, History, Policy** (Gen Ed 1170)

# Strengthening the Global Health Community at Harvard

## *The Insider* Newsletter

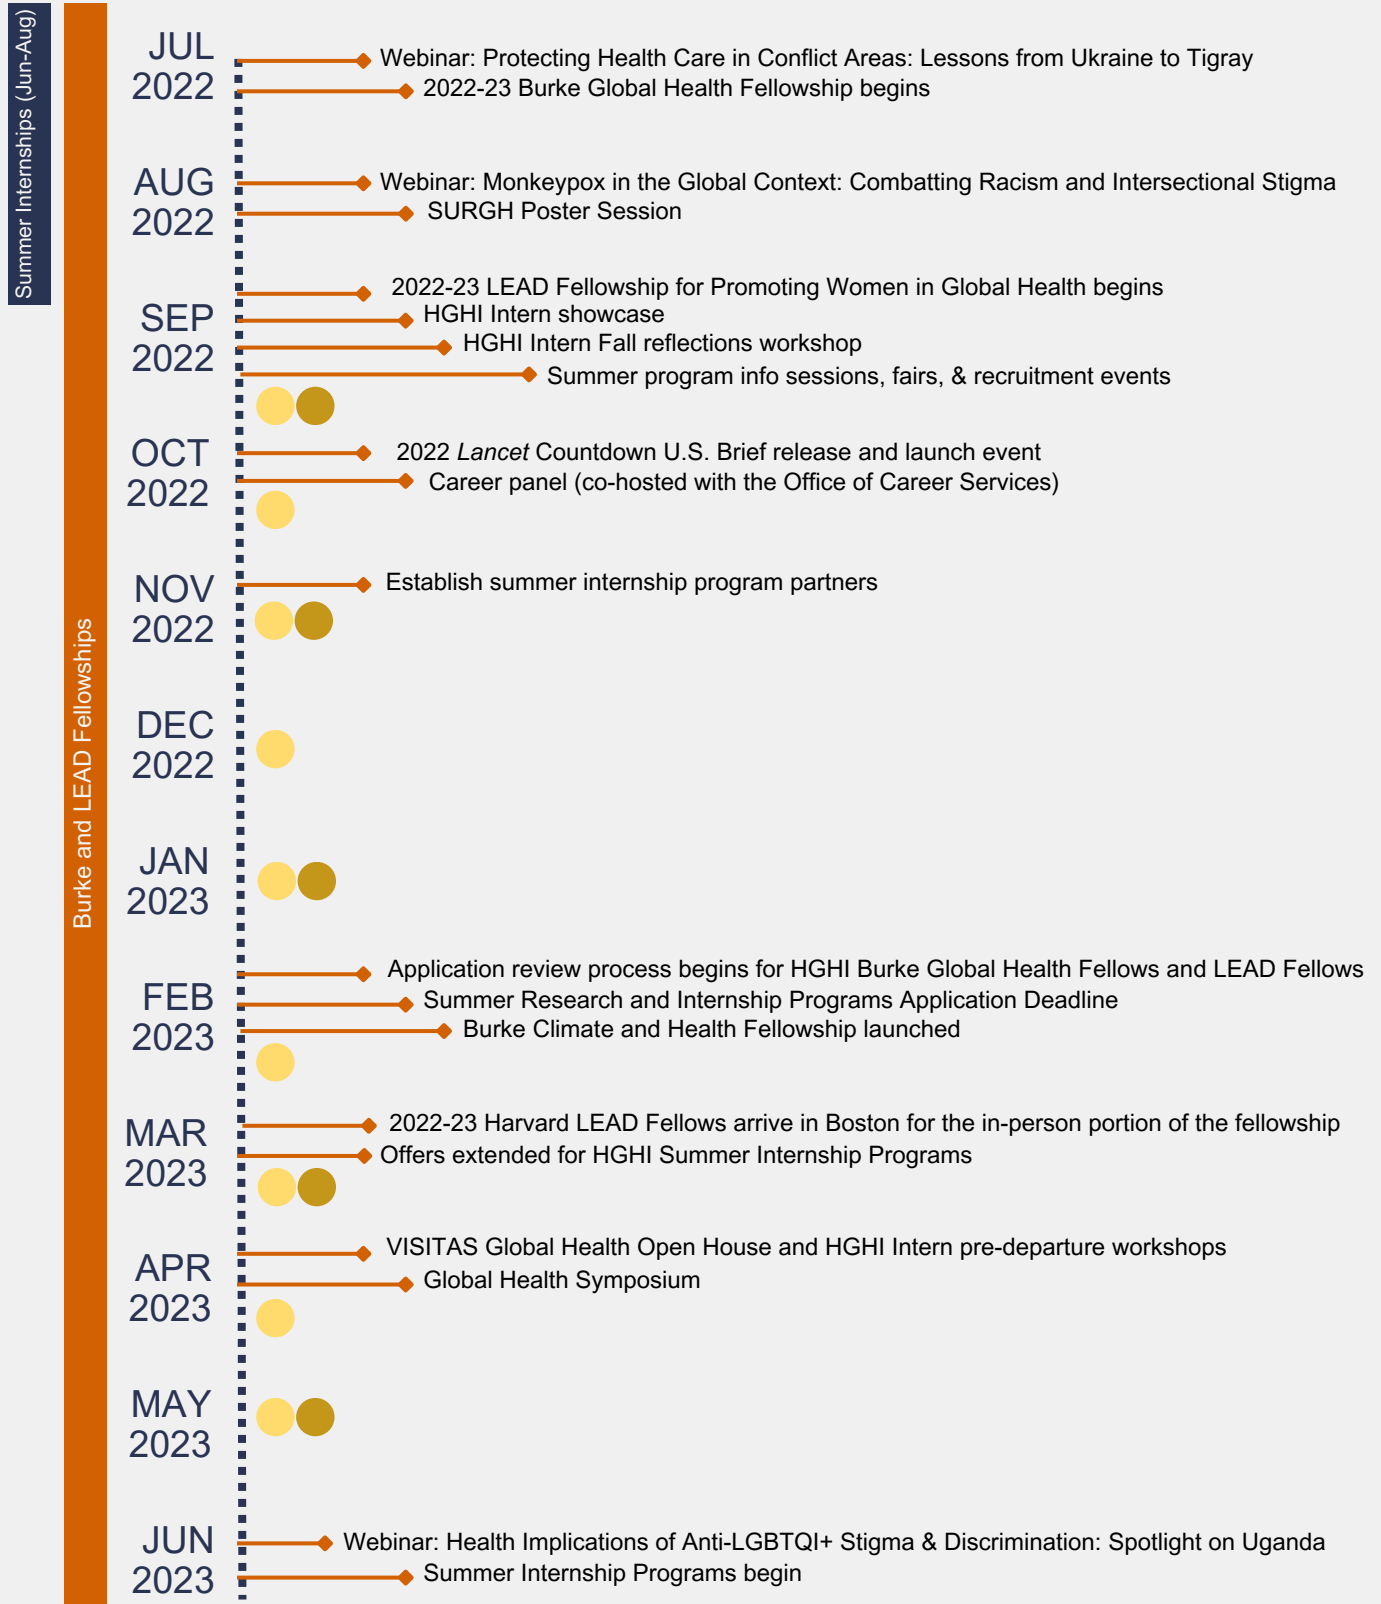

*The Insider* is a monthly newsletter that delivers a digest of the latest from Harvard's global health community straight to your inbox. By facilitating the exchange of ideas across disciplines, as well as new projects and collaborations, *The Insider* allows subscribers to engage more deeply with the latest global health research, student-led initiatives, and conversations across Harvard.

## Student Bulletin

To promote information sharing and community building, the Harvard Global Health Institute produces a biweekly student bulletin which includes events, opportunities, student initiatives, and jobs for students during the academic year. The bulletin has over 1,000 subscribers.

# Programs & Events Timeline

Recurring Events

● "Pathways to Global Health" speaker series (monthly)
