Dear Valued Customers,

The heartbeat of our brand has always been powered by those who show up ready to build, protect, and create. Their commitment continues to inspire everything we make.

For Spring 2027, we bring together heritage and innovation across the range. The STEEL Series stands as a defining statement, front and center. Built for movement, engineered for relentless durability, and designed to perform through the toughest days. Re-engineered iconic styles return with refined construction and improved comfort, while the new Carhartt Force™ series delivers lightweight performance built for long days and warmer conditions. Fresh TENCEL™ styles add natural softness and breathability without sacrificing durability, redefining Carhartt classics through a modern lens built for today's work and everyday wear.

This season also introduces newly certified PPE designed to meet today's demands for protection and reliability, alongside fresh graphics and functional accessories that add versatility to everyday workwear. And by popular demand, we're proud to welcome back the Pets collection, built with the same toughness as the gear we make for the people behind the work.

Spring 2027 is about honoring where we come from while continuing to move forward.
Every piece is made to support those who give their all, no matter the task.

Thank you for being part of the Carhartt story.

Stay warm, keep building,

Albert Foppen
Vice President EMEA/PAC

SHELL FABRIC

ALL OUR DUCKS, IN A ROW

Brown duck was the genius creation of Hamilton Carhartt. His brown duck bib overalls for railroad workers revolutionized clothing for the working class. These overalls were first recorded in a 1915 newspaper article that described the new "wonderful brown Carhartt's." This brown duck bib is still in the Carhartt stable and remains as popular as it was when originally introduced. Hamilton Carhartt's brown duck serves as a reminder that great quality never goes out of fashion. Today, we've increased our duck line across the board for men's, women's and accessories and color, to the advanced technologies and finishes used to fortify the garment, there's a hardworking duck fabric for every task.

WHAT IS DUCK FABRIC?

Since the introduction of our original brown duck in 1915, Carhartt has developed 8 different variations of our famously durable workwear fabric — currently in use in over 200 rugged Carhartt products. With distinctive properties ranging from fabric strength, weight, rigidity, and color, to the advanced technologies and finishes used to fortify the garment, there's a hardworking duck fabric for every task. Learn more about our different duck types below.

LEARN MORE ABOUT OUR DIFFERENT DUCK TYPES BELOW.

FIRM DUCK Our strongest cotton duck is the most long-lasting canvas out there. Built with added toughness, firm duck is water-repellent, wind resistant, and rugged. If you like to break in your jackets and pants, firm duck is for you.	
DUCK Good 'ol duck is stiff, ring-spun cotton. If you like your Carhartt solid, classic and durable as the day is long, this is the duck for you.	
WASHED DUCK If you like sandstone duck, you'll like our washed duck. This fabric feels exactly like it sounds — we took our durable, classic duck, and washed it for a broken-in look and feel. It breaks in faster than duck, and looks newer, longer. Find it in gear like our Full Swing™.	
RUGGED FLEX™ DUCK Rugged Flex™ Duck gives you the classic Carhartt look, with just the perfect amount of stretch. Made by combining our famous cotton Duck with Rugged Flex™ durable stretch technology, the result is increased ease of movement everywhere it's needed, and our most comfortable heavyweight gear yet.

CARHARTT WOMEN'S BODY MEASUREMENTS

HOW TO MEASURE	HEIGHT CHART

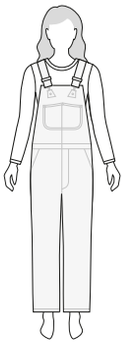

Chest:
Measure the fullest part of your bust, keeping the measuring tape parallel to the floor.

Natural Waist:
Bend side to side and find the natural bend in your body;
this is your natural waist. Note: It may not be the smallest point.

Hip/Seat:
Measure the fullest part of your hips, approximately 8" below the natural waist.

Inseam:
Measure from your crotch down to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. To get the inseam length, measure on the front from the crotch point, along the seam, to the hem.

For best results, measure over your undergarments.

CARHARTT MEN'S BODY MEASUREMENTS

HOW TO MEASURE	HEIGHT CHART

Chest:
Measure just under arms and across shoulder blades holding the tape firm and level. If your chest falls between sizes, order the next size up.

Natural Waist:
Bend side to side and find the natural bend in your body; this is your natural waist. Note: It may not be the smallest point.

Hip/Seat:
Measure the fullest point between your natural waist and crotch.

Inseam:
Measure from your crotch to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. Measure on the front from the crotch point along the seam to the hem for the inseam length.

For best results, measure over your undergarments.

REGULAR
5'7 - 5'11 inch / 170 - 180 cm

APPAREL:

Our Men's Alpha-sized, Regular Length products are built for a body that measures:
