

PROFBOARD

Cutting Boards With Replaceable Tops

Saving You Money Long Term

Produced in Germany and Denmark since 2006, Profboard cutting boards are used by professional chefs and food enthusiasts world-wide. Made from food safe materials, Profboard provides robust, warp-resistant cutting boards that save you money long term by providing replaceable cutting surface sheets. These sheets are available in various sizes and are colour coded for food safety requirements.

Profboard products are NSF certified, complying with NSF/ANSI 2 and all applicable requirements.

What Makes Profboard Different?

- Cutting boards with replaceable tops.
- Prevents cross contamination.
- Made from food-safe materials.
- Sheets are colour coded for food safety.
- Robust & warp-resistant for all kitchens.
- Buy one board, only replace the sheets.
- Easy to clean (dishwasher safe).
- Saves you money long term.
- Various sizes to fit your kitchen space.
- Food prep is quicker and easier.

Designed For Convenience

PP (polypropylene) cutting sheets are available in seven different colours (dishwasher safe).

Durable, heavy-duty cutting boards. Available in various sizes (dishwasher safe).

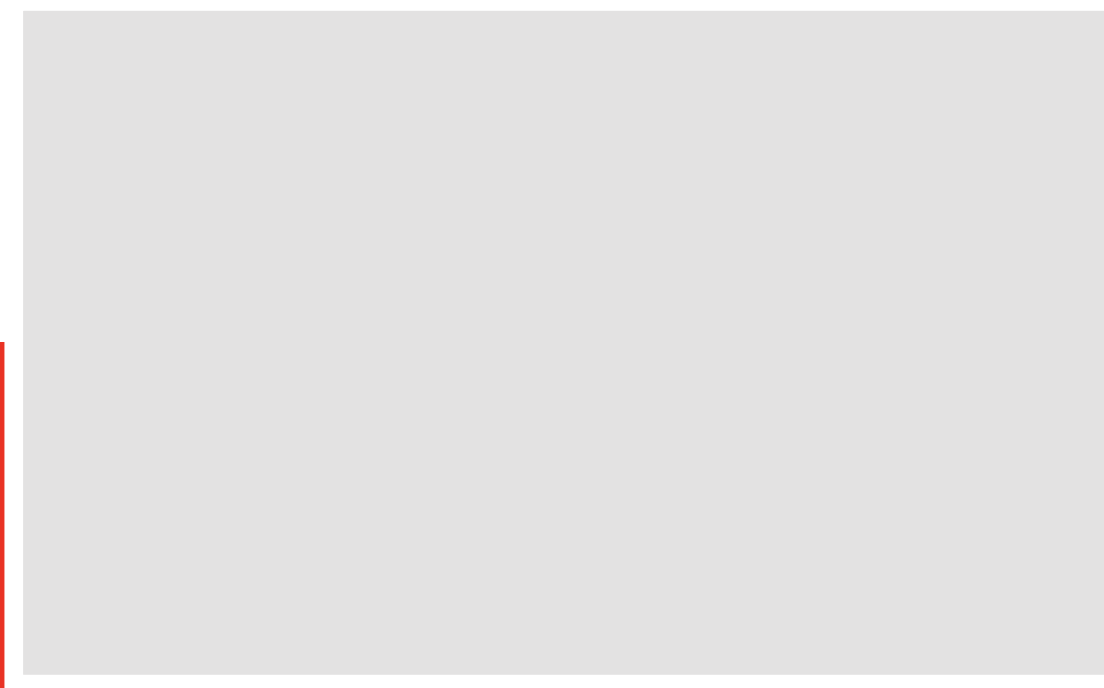

Stainless steel "Easy Click" posts hold the cutting sheets securely in place.

Stainless steel slip-resistant feet to keep the board secure on counter surfaces.

Profboard cutting boards and replaceable sheets are available in various sizes and are colour coded for food safety requirements. When the top sheets become scratched or soiled over time, simply replace those sheets at minimal cost, instead of replacing your entire cutting board. Genius!

Colour Coded For Food Safety

Profboard cutting boards come with replaceable sheets that match the HACCP food safety colours. The replaceable sheets not only help prevent cross contamination and ensure optimal hygiene, but also preserves the life of your cutting board. When the top sheets become scratched or soiled over time, simply replace those sheets at minimal cost, instead of replacing your entire cutting board. The cutting sheets can be used on both sides and are made of high-quality PP (polypropylene). PP is food approved and can be disposed of in an environmentally friendly way.

As Quick As Four Easy Clicks

Investing in a quality cutting board matters. That's why Profboard took the time to focus on the design, durability and functionality of their cutting boards. The creatively integrated "Easy Click" system features (4) small stainless steel posts in each corner of the board. Profboard's replaceable top sheets simply 'click' into place by aligning the holes on the sheets, with the stainless steel posts, ensuring that the cutting sheets always remain securely attached to the board.
