SLIDING GATE LOCK CODE RAPIDRESET SINGLE-SIDED

CODE: C

5-Year Warranty **RapidReset**

Suitable for metal gate frames.

INCLUDED IN THE BOX

- 2.5mm hex key + 3mm hex key
- 2 x M8 fixing bolts
- Face plate
- Adjustable keep (2 x self-drilling fasteners)

MADE IN BRITAIN

Fast code changes and battery-free access control, purpose-built for sliding gates. With a robust latch system and smooth lever handles, it's the ideal solution for securing sliding gates in high-traffic or restricted-access environments.

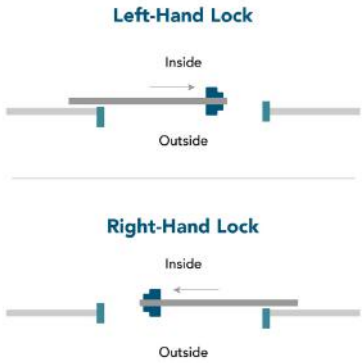

FEATURES

- **RapidReset Keypad** – Securely change your access code in seconds without removing the lock from the gate. No batteries or power are required.
- **Lever Handle Operation** – Smooth and ergonomic, making sliding the gate open and closed easier
- **Secure** - Latchbolt projects into the keep (provided) which increases security and improves gate appearance.
- **Auto-Latching** - Close the gate and the latch bolt latches into the gate frame.
- **Hold-back function** - activated by the switch on the back of the lock.
- **Durable** – Built with corrosion-resistant materials for long-lasting performance

Product code	Description
SGLDSRR40L	To fit 40mm (1 9/16") gate frames, left hand
SGLDSRR40R	To fit 40mm (1 9/16") gate frames, right hand
SGLDSRR50L	To fit 50mm (2") gate frames, left hand
SGLDSRR50R	To fit 50mm (2") gate frames, right hand
SGLDSRR60L	To fit 60mm (2 3/8") gate frames, left hand
SGLDSRR60R	To fit 60mm (2 3/8") gate frames, right hand

TECHNICAL SPECIFICATIONS

Lock type	Mechanical keypad gate lock
Keypad type	RapidReset single-sided
Handing	Left-handed or Right-handed
Latchbolt throw	20mm (3/4")
Lock case width	70mm (2 3/4")

INSTALLATION INSTRUCTIONS

Fitting the lock:

1. Drill 2 x 9mm (3/8") holes at 140mm (5 ½") centres through the front stile of the gate for the fixing bolts (provided).
2. Drill a 25mm (1") hole for the latch arms, centrally between the 2 holes.
3. Slide the lock through the holes from the back of the box section, fit the formed stainless steel support plate and fix into position using the 2 M8 countersunk screws provided.

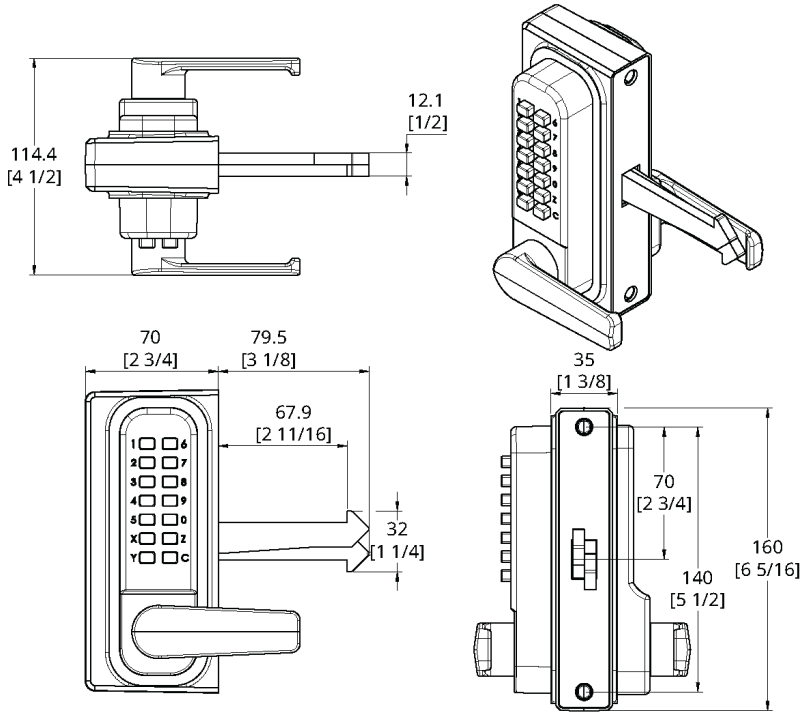

Fitting the keep:

1. Mark where the latch arms will strike the gate post and drill a 25mm (1") receiving hole.
2. Drill 2x 15mm holes at 70mm centres above and below receiving hole.
3. Fit the L shaped keep plate provided by tightening up the expanding fasteners. The keep should prevent access from the front (secure side) of the gate.

MAINTENANCE

6 Monthly:

1. Remove keypads from the lock.
2. Spray the inside of the lock thoroughly with WD40 or equivalent, through the tumbler holes at the back of the lock.
3. Spray all the fixing accessories and the latch with WD40 or equivalent.
4. Push each of the buttons and rotate the knob several times to make sure the lock is working smoothly.

HOW TO CHANGE THE CODE

© Copyright Gatemaster 2026

1. Enter existing code.
2. Fully press and hold the * key (until step 5).
3. Press 'C' button to clear the existing code.
4. Enter the new code. Once the new code has been entered, press all the digits in the code once again to ensure that all the digits in the code are set.
5. Release the code change * key.
6. Press 'C' button to set the new code.
7. The new code is now set and ready for use.
8. Check that the code is working and that it is withdrawing the latch/deadbolt before closing the door/gate.

9. If you change the code and can't remember what you changed it to, you will need to be able to take the lock off the gate, which means you would have to be inside the property. Once you have unscrewed the keypad you will be able to see what the code is by looking at the red panels by the numbers or letters. See diagram. The code can be entered in any order.
