Our House of Brands

Beaverswood®

Beaverswood® is a trusted name in workplace organisation, known for creating durable, reusable, and sustainable products that offer long-term value. From barcode labels and racking identification to floor marking solutions, and document display frames – Buy Beaverswood®, Buy Once.

racksack® is the original racking-mounted recycling bag. Unlike floor bins that take up valuable space and create obstructions, racksack hangs neatly from racking, freeing up floor space while keeping waste sorted and tidy.

Rack Armour® redefines racking protection with an innovative polymer design that absorbs and deflects impact, unlike traditional metal guards that simply transfer the impact force. Proven to reduce racking damage by up to 80%, it saves time, money, and ongoing maintenance.

frames4® are a unique range of colour-coded frames designed for easy and prominent display for the floor and walls. The current range includes frames4docs® and frames4floors®. Perfect for use in warehouses, offices, shops, libraries and throughout the workplace.

Modulean® removes the need for bespoke shadow boards by offering a smart, standardised range that covers common workplace applications - delivering the same visual control without the cost, lead time, or complexity of custom boards.

Brandsafe

Protect your warehouse, racking, and workforce with our high-visibility Brandsafe impact protection solutions. Designed to minimise collisions, prevent costly repairs, and enhance workplace safety.

Anco Storage

Anco® provide high-quality storage and shelving products, whether you need rivet racking for storing long or bulky items, or bin shelving for small parts and tools, we've got you covered!

What's the Fuss about Visual Management?

Where It Works Best

Warehouses & Manufacturing – Rack labels so you never grab the wrong pallet. Floor markings that keep traffic flowing. Shadow boards that make “Where’s the first aid box?” a thing of the past.

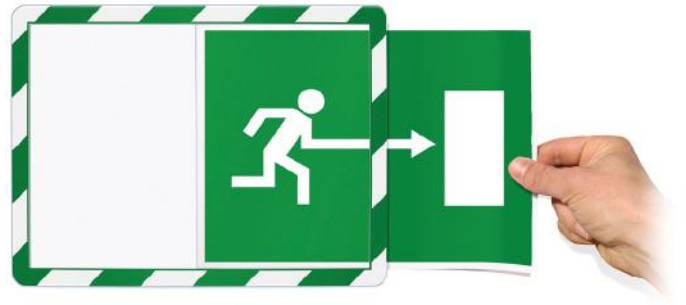

Offices – From labelled filing systems to meeting room signs and noticeboards, visuals help maintain order.

Public & Retail Spaces – Directional arrows, queue management systems, and safety signage make spaces easier - and safer - to navigate.

***Tip:** That way, your visuals become a language everyone understands instantly.*

Getting Started with Visual Management

- 1. Find the pain points** – Where are people slowing down, getting lost, or making mistakes?
- 2. Pick your palette** – A clear colour system everyone understands.
- 3. Don’t overcomplicate it** – The best visuals are simple and easy to read.
- 4. Check in regularly** – Faded labels and worn markings lose their impact.

The Beaverswood® Way

We’ve made visual management our mission - so you don’t have to reinvent the wheel. Whether it’s a bustling warehouse or a sleek office, our products help you build a space that’s safer, organised, and more productive.

Our range covers:

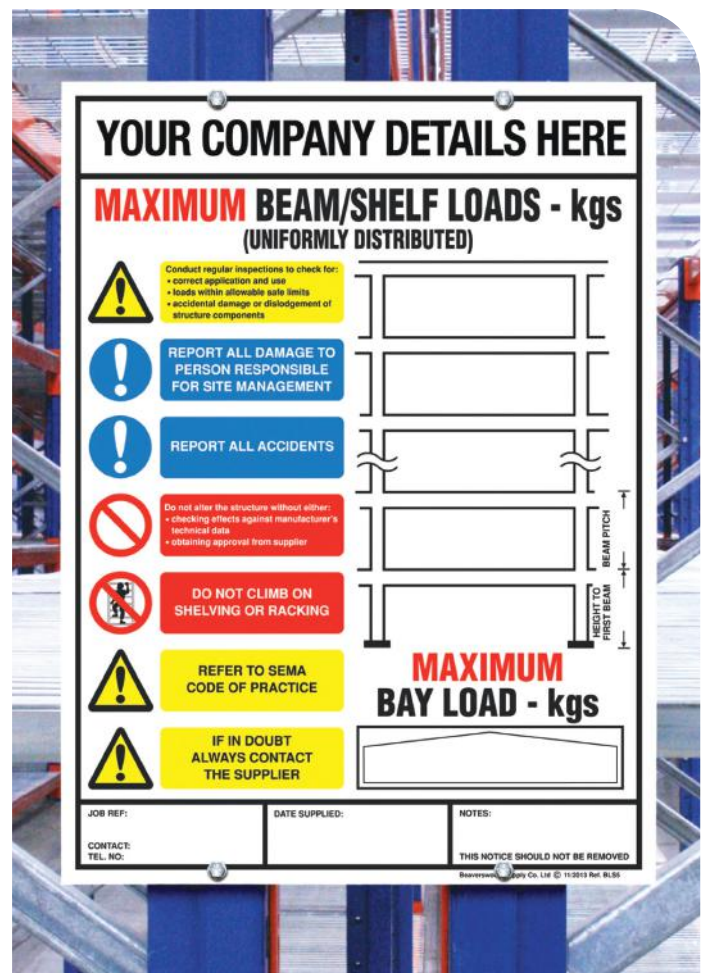

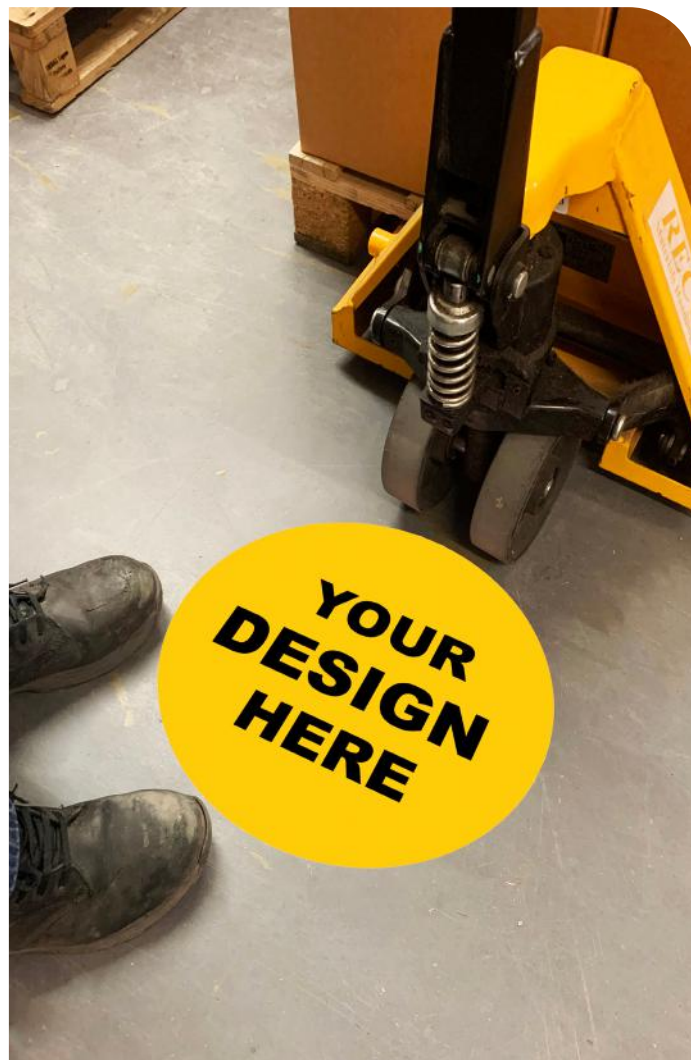

- Warehouse labelling & signage
- Floor marking & safety identification
- Document display & notice systems
- Impact protection solutions

Bespoke Solutions

As a manufacturer, we excel at bespoke solutions.

In fact, 40 – 60% of all products we supply are bespoke requests, tailored to meet the unique needs of customers.

Whether we're designing and producing products from scratch or modifying existing products to suit specific requirements – we're ready to tackle the challenge!

Bespoke products we offer, tailored to your needs

We offer a wide range of products that can be customised to meet your exact specifications. From branding and sizing to completely new designs, we're here to make it happen:

- racksack® - brand with your company logo or we can create completely new designs to suit your requirements
- Label and Ticket Holders - custom-cut to any size, up to 3 metres long
- Bespoke Code Labels - tailored labels to suit your warehouse needs
- Modulean® Shadow Boards - we can create a completely bespoke option to suit products of your choice
- Floor Graphic Markers - fully bespoke designs available, perfect for custom messaging, safety reminders, directions, or branding
- Weight Load Identification Notices - brand with your company logo and details or custom designs can be printed in-house

Simply enquire about any of these products or others - no product is off limits!

For more information on bespoke solutions we can offer just for you, please contact the sales office.

Your Complete Labelling Solution

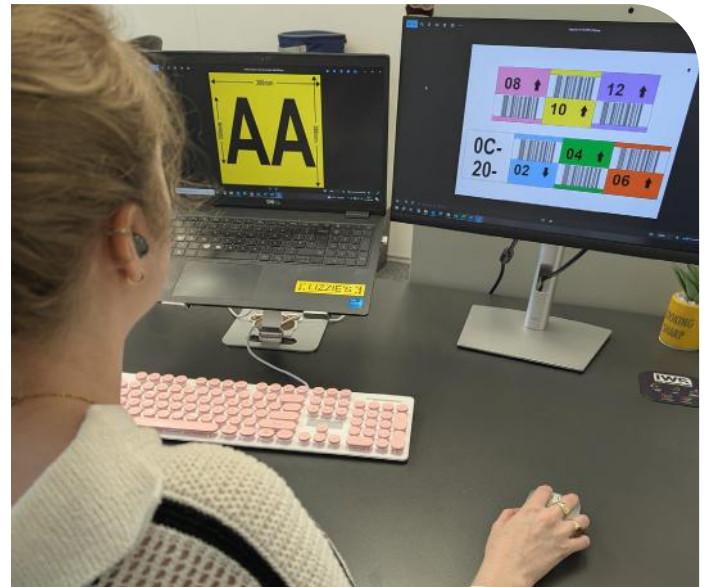

**From consultation to design,
to print and install –
Beaverswood® cover it all!**

Let's be honest, planning and project managing the install of new warehouse racking and location labels can be mind-boggling.

There are so many aspects to factor in, from whether you need self-adhesive or magnetic fixings, to alpha or numeric systems (or a bit of both), to which type of barcoding is required, to the differences between split beam, summary, and upright labels – the list goes on!

We can take a load off your mind by being **your trusted partner** through the entire process from start to finish.

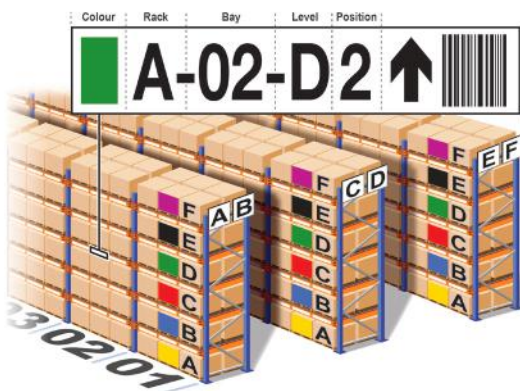

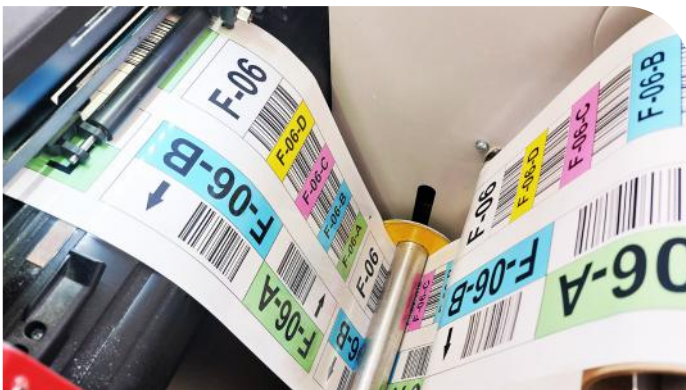

With **40+ years combined experience** in the label industry, you can rely on our specialist knowledge to ensure delivery of an effective labelling system for your warehouse.

Can't I just get my in-house team to label everything?

We might sound biased, but we highly recommend using an experienced labelling manufacturer to install your location labelling system.

At first glance, label installs might seem like an easy job (how hard can it be to slap some stickers around the place, right?). Yet we guarantee a DIY installation project will rarely go smoothly.

Let the experts handle it... including the installation!

Save yourself the time, cost, and headache of a DIY install by contacting us today.

We can design and manufacture labels to suit your needs, including the incorporation of barcodes, directional arrows, and check digits as required. We can also provide full colour lamination on our labels, which not only enhances the look and feel of them but also protects them from spills and abrasions – not to mention dirt, grease, and smudges can be cleaned off more easily.

Additionally, **we can carry out label installations in either new or occupied warehouses**, working around your operations. Our service includes advice and consultation in the planning stage, hire of equipment, and installation fulfilled by trained and qualified personnel.

So, whether you're just after label printing or the full works including installation, we're here to help you every step of the way.

Get in touch with the sales office to discuss your printing or installation requirements.

Tickets & Labelling

Would you like labelling installation with that?
Please see page 9

Organise your racking, shelving, and storage locations with Beaverswood® premium holders and labelling solutions. These products are simple to install and deliver reusability and scannability to keep your operations running smoothly.

Although perfect for warehousing, our labels suit many other workplaces that require clear identification systems, such as offices, shops, schools, retail, packaging, factories, and 5S and lean manufacturing environments.

Angled Ticket Holders

Self-adhesive

- Provides the perfect angle to read information and scan barcodes, even on the lowest shelves
- Strong adhesive tape strip, perfect for fixed locations
- Ideal for warehouses, retail, supermarkets, etc.
- Available in two angled options: 106° and 126°

This ticket holder hangs at an angle from the shelf to ensure optimum visibility, allowing operatives or customers to get a clear view of the information within.

Manufactured from clear PVC, barcodes are easy to scan through this holder without removing the insert. Additionally, the strong adhesive backing is perfect for permanent locations.

Supplied with blank white card inserts (pre-printed inserts can also be supplied – please get in touch!)

ATHS310	126°	39mm x 100	100
ATHS320	126°	39mm x 200	50

For non-standard lengths please contact our sales office.

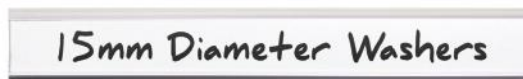

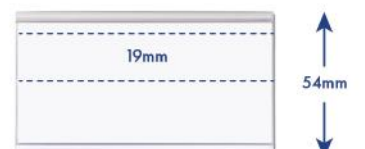

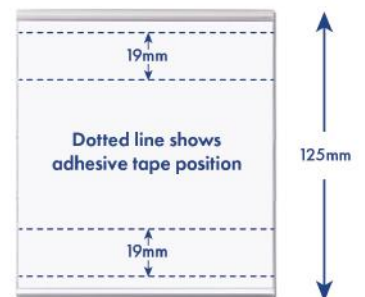

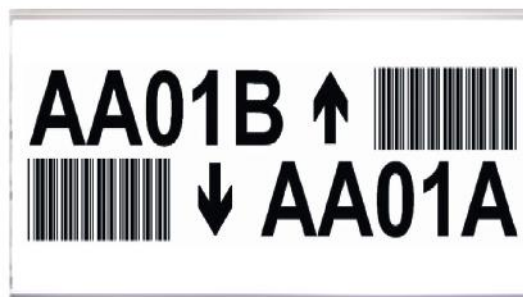

Self-adhesive Ticket Holders

- Ideal for fixed locations but inserts offer the ability to change data
- Pull forward front allows easy loading and updates of information
- Industrial, heavy duty strength
- Barcodes can be scanned without removing the insert
- Pre-cut sizes from stock

With a choice of 5 heights and up to 3m lengths, this clear PVC strip is supplied with an aggressive adhesive backing for permanent locations. Simply remove the yellow strip and stick into position.

Special sizes are available upon request, with lengths up to 3m. If you need any help choosing a size, please contact the sales office for more information.

Self-adhesive Label Holders

Self-adhesive

- Instant and highly visible identification
- Long term fixing
- Standard sizes supplied from stock
- Ideal for pigeon holes and shelving

Our self-adhesive label holders are supplied with a strong adhesive to offer a long-term fixing option, providing extra stability in environments where the inserts need to be changed frequently.

The smaller holders are ideal for the identification of pigeon holes and also suit narrow edge shelving used in schools, libraries, and offices.

Magnetic

Magnetic Easy-wipe Racking Strip

- Cost effective labelling system
- Easily repositionable, allowing you to update labels effortlessly
- Gloss coloured surface
- Ideal for use as colour coding
- Write on – wipe off using a wet wipe marker pen
- Ideal for 5S and Lean environments

Available
in 12 widths -
10mm to
100mm

The magnetic easy-wipe racking strip lets you quickly create labels and identification that's completely reusable and movable. The colour versions have the added benefit of allowing you to create colour-coded areas or highlight a particular message.

This product is extremely versatile and offers many other uses. For example, the narrow versions can be used as gridding tape on steel notice boards, and the wider rolls offer the ability to cut out or punch out different shapes.

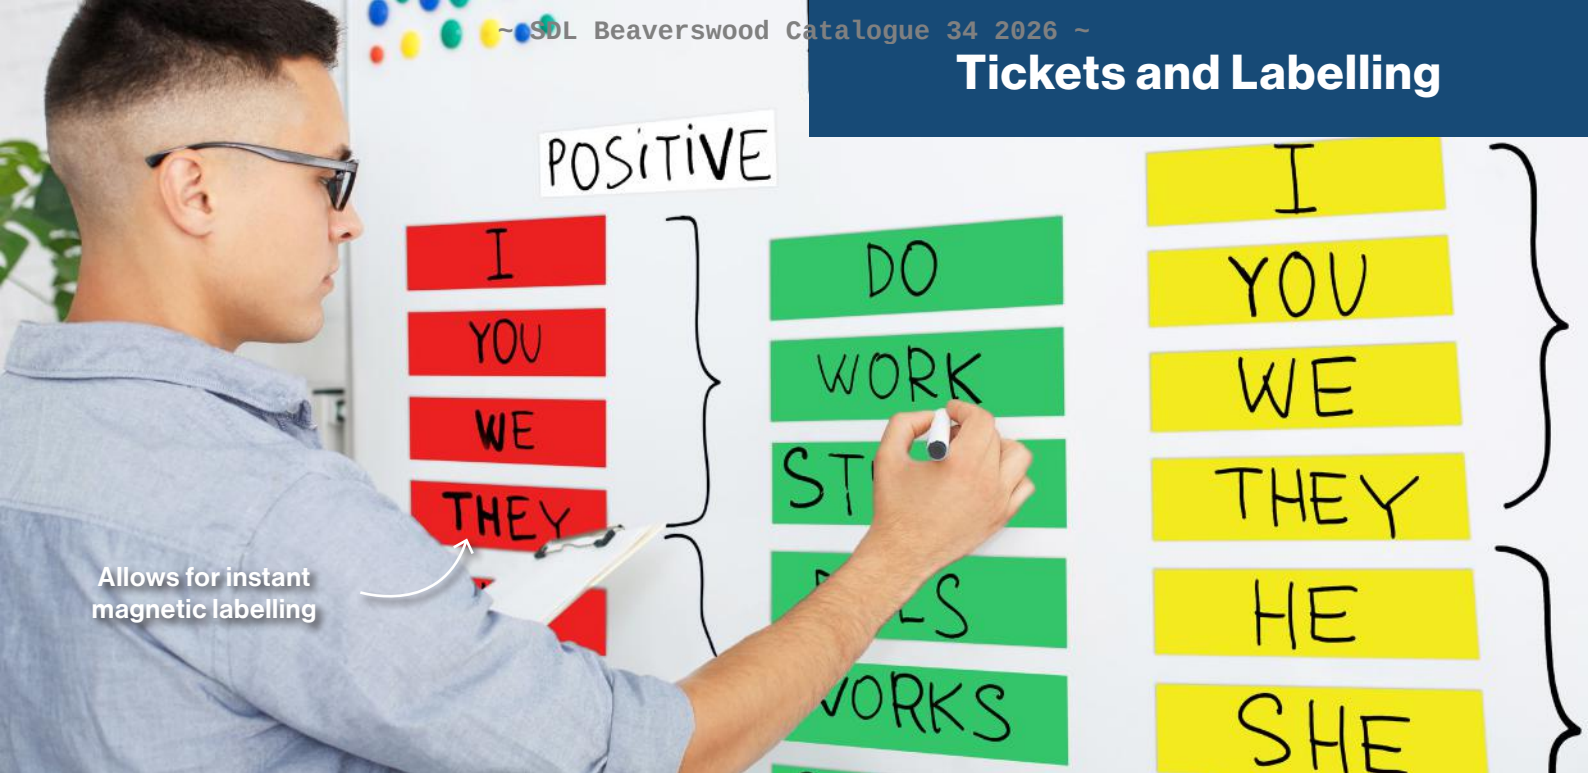

All rolls are supplied in 10m lengths. Simply cut to the desired length, write on with a wet wipe marker pen and, if required, remove text with a damp cloth.

Magnetic Self-adhesive Strip

Self-adhesive

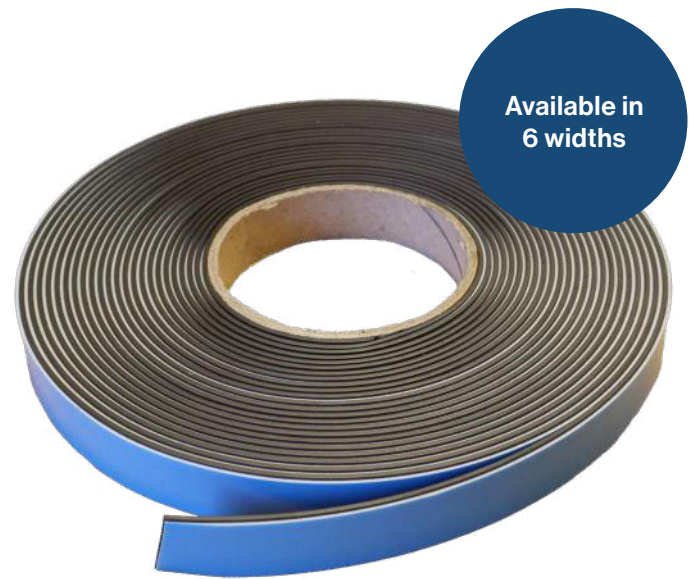

Magnetic

- Makes anything magnetic
- Mounts items onto any steel surface
- 6 widths available
- No drilling required
- Industrial quality - 1.5mm thickness

Our magnetic strip is supplied in 6 widths, each backed with a strong permanent self-adhesive for mounting items onto steel surfaces.

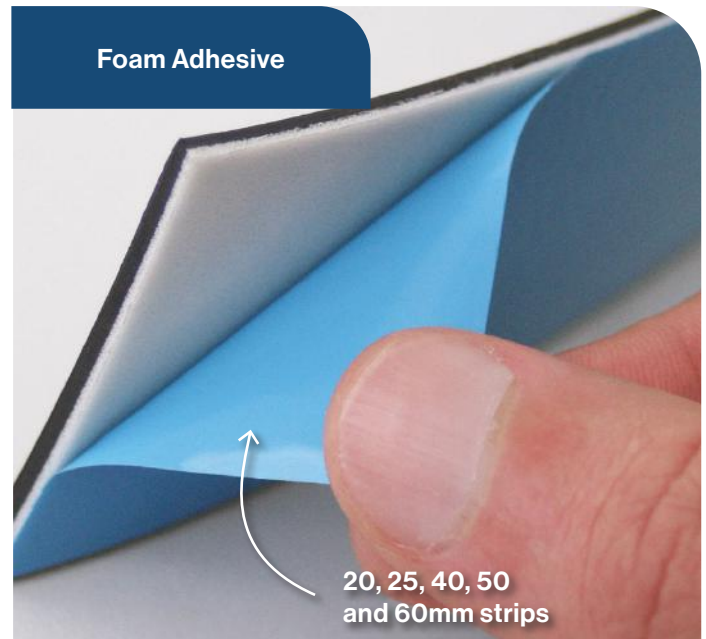

This magnetic strip is ideal for many jobs in the office, factory or warehouse, eliminating the need for drilling, or other methods of fixing.

Wire Shelving Clip Holders

- Easily identify locations on wire shelving
- Pull forward front for loading
- Scan barcodes without removing insert
- Positioned flat or at an angled setting
- Holder can be reversed so higher levels are easier to read

Flip vertically for high level view

High level view

Straight on view

33° angle

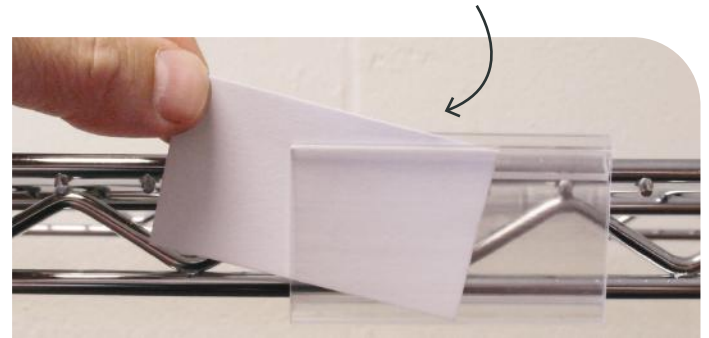

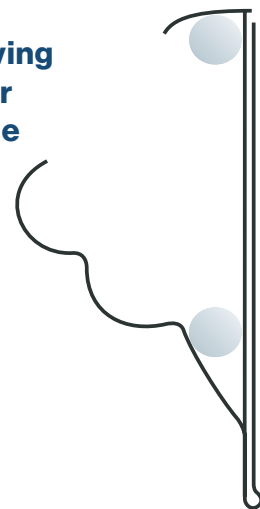

45° angle

Identifying locations on wire mesh shelving is difficult as traditional magnetic or self-adhesive holders don't suit wire mesh shelving. This clever holder solves the problem by using a quick and easy-to-use "clip-on" system.

This versatile holder can be used in three different formats: straight for shelves that are eye level, approx 33° for lower shelves, and approx 45° for the very bottom shelf, enabling easy reading. The holder is reversed for high level viewing.

Ticket Pouches

Self-adhesive and Magnetic

- Cost effective ticket pouches
- Clear front enables barcodes to be scanned
- Available in 4 sizes
- Self-adhesive or magnetic fixing
- Supplied with white card inserts
- Available in vibrant yellow colour

Highlight information using this economical range of coloured PVC ticket pouches. They feature a flexible pull forward clear front and coloured back.

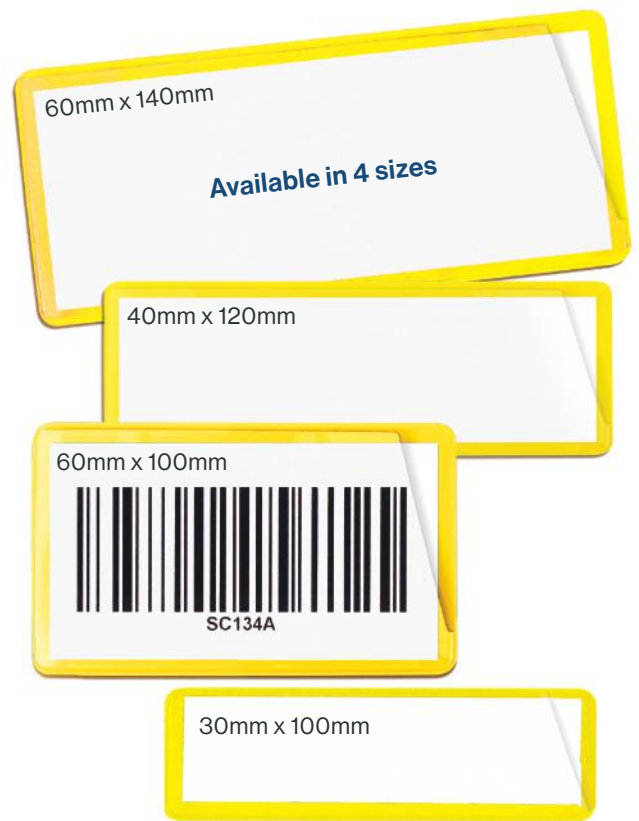

There are 4 size options to choose from, designed for use on all types of shelving and racking. The colourful backing can be used for identifying picking areas, while the clear front allows a barcode insert to be scanned without removing the ticket.

The self-adhesive pouch is permanent, whereas the magnetic version can be easily relocated.

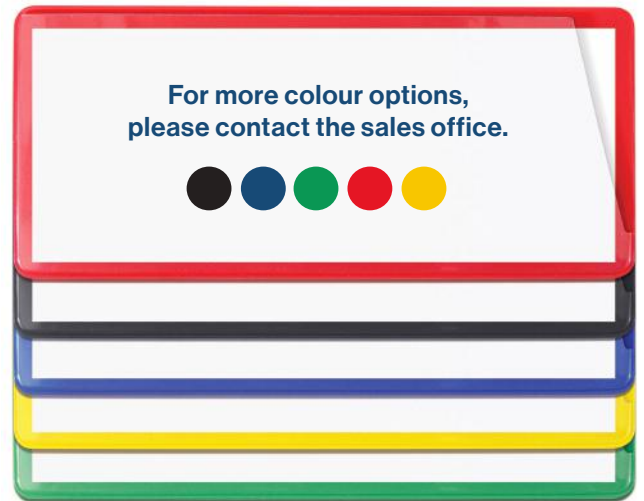

Magnetic versions of our ticket pouches are ideal for locations that change frequently, as well as being perfect for use on most steel surfaces including shelving, racking, and steel office cupboards, etc.

Mag-Grip

Self-adhesive Magnetic Clip

Self-adhesive

- A document clip featuring strong magnets to secure materials within its grip
- Easily display documents within the magnetic clip and attach it to a wide range of surfaces using the self-adhesive backing
- Available in two sizes to fit both A4 and A5 documents
- Suitable for both landscape and portrait orientations
- Comes in packs of 10 or 50

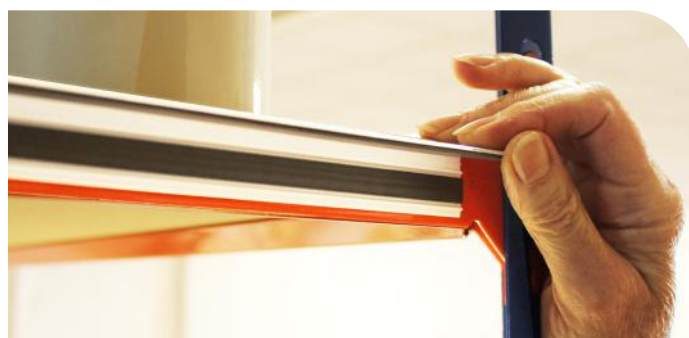

This easy-to-use magnetic clip is the perfect solution to securely grip notes and documents.

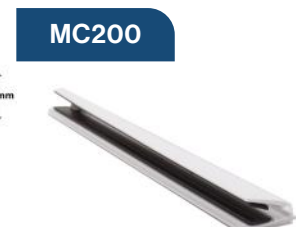

Featuring a self-adhesive backing for attachment to any smooth, flat, sealed surface, such as cabinets, steel shelving, racking, refrigerators, whiteboards, doors, etc.

Simply peel off the back of the adhesive strip, attach to your chosen surface, and it's ready to go. Just open the clip, insert a document, and close again. **Easy!**

Perfect for holding documents, posters, information materials, order tickets, or notices, making it ideal for offices, retail, warehouses, kitchens, education, or homes.

Tickets and Labelling

Code Labels

Tailored to your specific needs

Self-adhesive

Magnetic

**Not sure what type of label you need?
Here's a handy guide...**

Wipe clean

Single Location Labels

A location label for each pallet location. This can incorporate location code, directional arrows, barcode, and check digits.

We recommend including barcodes on all locations for stock-taking purposes, even if you don't have man-up trucks.

Split Beam Labels

Ideal for locations on the floor and first beam level. The double text at eye level reduces the number of labels required for manufacture and installation.

These labels can include location code, directional arrows, barcodes, and check digits.

Summary Labels

Labels positioned on the first beam level detailing the locations and barcodes for all upper levels.

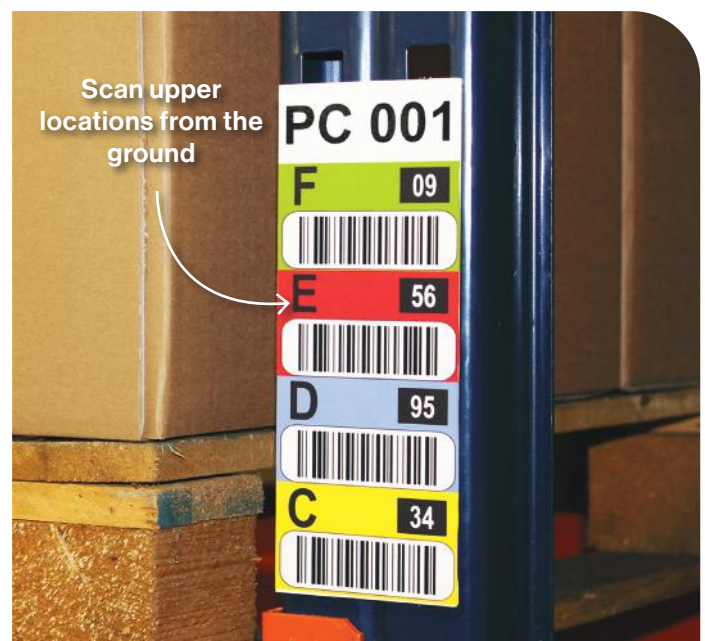

Suitable for use where man-up trucks aren't available, the user can scan the location from the ground without the need to leave the truck.

Upright Labels

Manufactured on a rigid plate, the upright markers are ideal for use in walkways, fire exits, or tunnel bays.

The plates act like the summary label and offer the user the ability to scan upper-level locations from the ground.

We Recommend!

Ticket and Label Holders

Tickets and Labelling

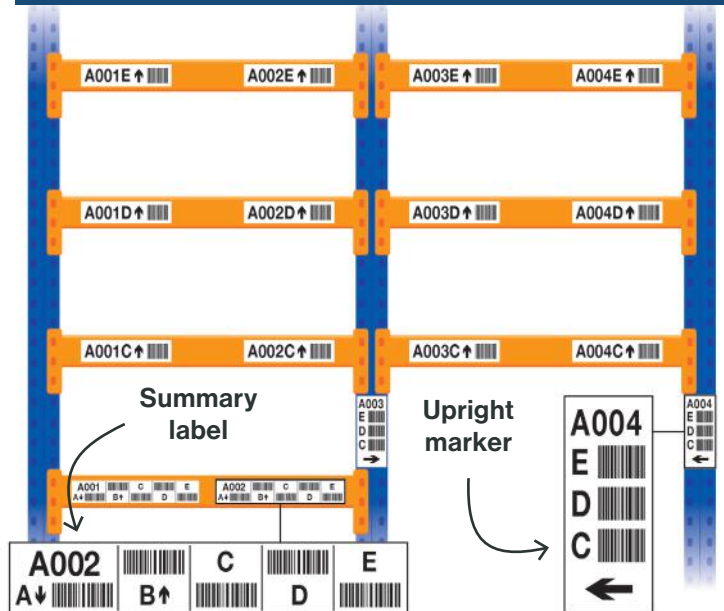

Already know what labels you need?

If this isn't your first warehouse labelling rodeo, simply contact us for a quotation with the following information:

- Quantity of labels and/or number of locations
- Typical code
- Colour requirement (full colour laminated available)
- Approximate label size
- Base material (paper based, vinyl, polyester, magnetic, block out, etc.)
- Height to top beam (for install purposes)
- Whether you require print, install, or both

Clear gloss film for added protection

Types of fixings and materials

Self-adhesive

These come in a variety of materials, be it polyester, paper, or vinyl. They provide a cost-effective, permanent solution for ambient room temperature warehousing.

Block-out

If you already have self-adhesive labels affixed to your racking but need to replace them, we're sorry to say they can prove tricky to remove! If you use thin paper to cover over the old label, barcode scanners may pick up the code on the label behind.

For this reason, block-out labels are a wise choice as the material is thicker to ensure the old code can't be accidentally scanned. They can be supplied plain or with the new code already printed on.

Don't forget, we also install!

With our bespoke code labels, we also offer a full installation service, ensuring a seamless experience from start to finish. Our expert team will work closely with you to understand your labelling requirements, design custom labels that meet your specifications, and then handle the professional installation on-site.

Whether it's a new facility or an update to your existing setup, we've got the entire process covered.

Magnetic

These are perfect for when you need a rack label that can be easily removed and switched to a different location. They're also great for cold store environments.

Don't forget Label Holders!

A labelling system only works for as long as the labels remain readable. As such, we highly recommend investing in label holders to protect them from scratches and general wear and tear (from forklifts, for example).

We offer a range of label holders which come with clear PVC covers to protect the label from dirt and abrasion, while still allowing barcode scanning.

They're also durable and reusable, meaning if you buy from Beaverswood®, you only buy once!

Numbers and Letters

Individual Self-adhesive

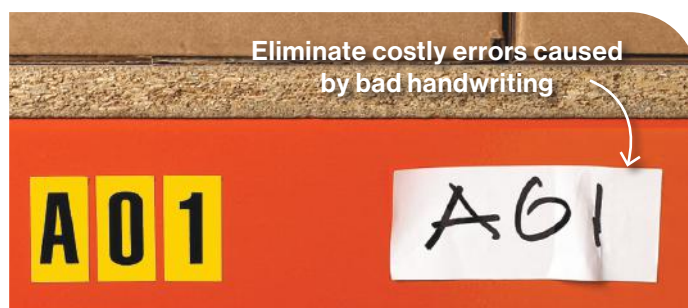

- Available in 6 sizes
- Clean peel labelling - leaves no residue
- Quick and easy to apply
- Supplied on single cards of identical characters
- Available in packs of 10
- Order only the labels you need

These adhesive numbers and letters are printed black on yellow and offer high visibility in the workplace. Combine the individual letter labels with numbers to make a quick yet highly effective labelling system.

Ideal for shelf identification, archive boxes and the larger letters are perfect for making your own bespoke text only signs.

Ideal for bin numbering

SISA/100	30 x 100	Self-adhesive	100

Pallet Marker

- Enables quick and easy pallet identification
- Water, grease and oil resistant
- Adjustable fit

Identifying stock on pallets has always been a problem. Our Pallet Marker is designed to fit securely around the corner of a Euro pallet, yet is adjustable to fit most other pallets. Manufactured in flexible white PVC, this unique Pallet Marker can be written on with a marker pen, or labels can be adhered to its smooth surface.

Pallet Marker

Code	H x W (mm)	Pack
PM/50	75mm x 470mm	50

Signs

We offer an extensive range of warehouse signs and markers to clearly identify racking and pallet locations, highlight hazards or dangers, and provide crucial rack-loading information to keep operations running smoothly and safely.

We can also design and manufacture bespoke signs and markers – simply get in touch with your requirements.

Bay Markers

Self-adhesive

Magnetic

- Clear Identification
- Fixed or relocated in seconds
- Available in single or double digit markers
- No drilling required
- Magnetic or self-adhesive fixing
- Suitable for large installations

BA1 - Front view

BA1 - Rear view

Our high visibility Bay Markers offer clear identification throughout the warehouse.

A formed aluminium section with either a magnetic or self-adhesive edge, enables the marker to be easily mounted onto steel racking without drilling.

When locations need to be changed the magnetic marker can simply be lifted and relocated.

Please note adhesive characters are supplied separately and can be applied to both the front and back.

Bay Markers

Code	Fixing	H x W (mm)	Accommodates
BM1	Magnetic	260 x 167	1 character
BA1	Self-adhesive	260 x 167	1 character
BM2	Magnetic	260 x 310	2 characters
BA2	Self-adhesive	260 x 310	2 characters
Character - Numbers and Letters			
F8	Self-adhesive	230 x 140	

When ordering, please specify characters and quantities required. Character not applied.

High Visibility Characters

High visibility black on yellow vinyl character - A to Z and 0 to 9 characters available.

The characters can be applied to the front and back of the marker allowing the location to be viewed from both sides.

Angled Aisle Markers

- Angled aisle markers for prominent visibility
- Available in a choice of fixings - magnetic or self-adhesive
- Price includes printing of characters

Our range of highly visible angled aisle markers are available with either magnetic or self-adhesive fixings and come in a choice of white or yellow.

Included in the price, the AM1F is supplied with one self-adhesive printed label for the user to apply. The label can be applied to the front or back depending on whether the marker is to be used right or left handed.

The AM1T is supplied with two printed labels.

Angled Aisle Markers

Projection Markers

- Larger angled markers for enhanced visibility
- Manufactured to order in various sizes to suit your requirements
- Available in styrene or foamex

Our larger angled aisle markers are manufactured in various sizes and materials to suit your requirements. Generally manufactured in 1.5mm yellow or white styrene or 3mm foamex. These markers can be printed on two faces for multi angled enhanced visibility with digits or just about any other information of your choice.

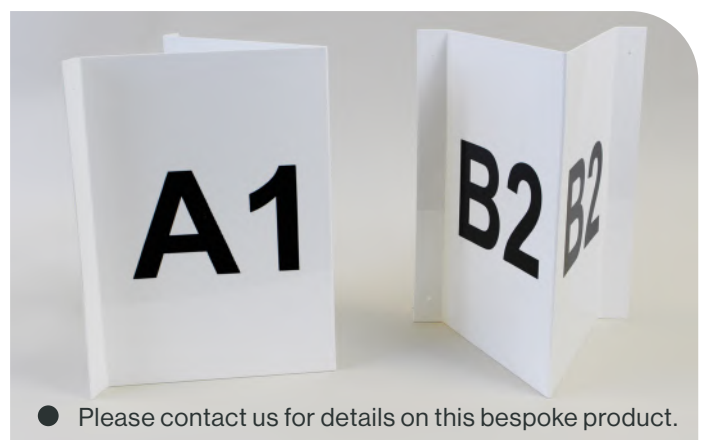

They can be supplied either pre-drilled or with self-adhesive fixing tape for ease of application.

Aisle Markers

- **Markers to identify aisles or bays**
- **Prominent identification**
- **Prices include printing of required characters up to the maximum allowed**

Our range of robust end of aisle identification markers are available in various sizes, colours and designs for instant aisle locating.

These aisle markers are suitable for use in factory, warehouse or office environments.

Each aisle marker is supplied pre-drilled unless stated.

Bespoke markers can be manufactured incorporating directional arrows, logos, and entry/no entry symbols etc. Contact our sales office for further details.

Quickly and easily locate the right aisle

Weight Load Identification PVC Notices

- Signs to identify weight loadings and procedures
- Choice of 6 different designs
- Manufactured from PVC
- Supplied blank from stock
- Price includes black digit printing with contact details and loadings

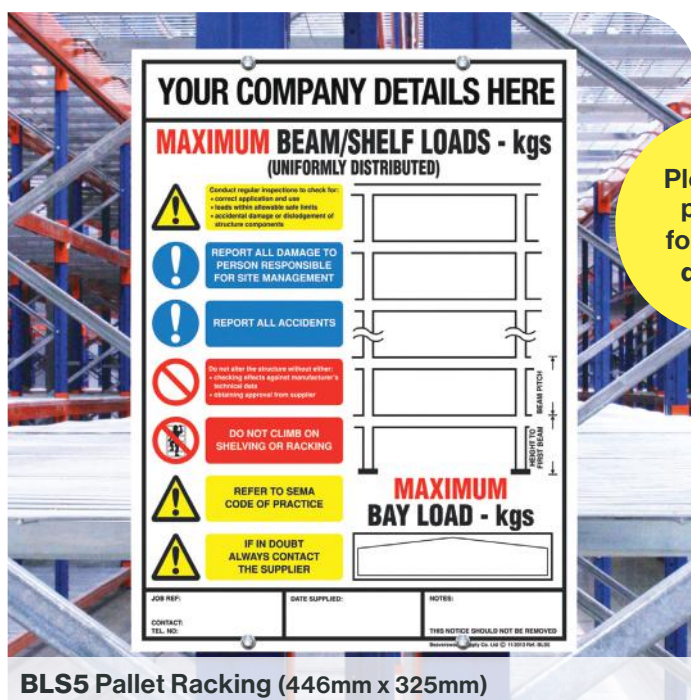

Tough and durable PVC weight load notices, detailing procedures for the maintenance of racking structures.

The range covers shelf/pallet racking, cantilever racking, drive-thru racking and mezzanine floors.

All our notices incorporate the latest Health and Safety recommendations. The signs can be overprinted with your corporate logo, address and contact details.

Magnetic Fixing Strip For Weight Load Notices

Self-adhesive

Magnetic

We Recommend!
See pages 44 - 45 for our
Weight Load ID Notices

- Comes in pack of 2x magnetic fixing strips
- Locates on any steel surface
- Industrial quality (1.5mm thickness)
- Strong magnetic grip that provides a firm, secure hold to prevent weight load signs from slipping or falling
- Easy installation – no drilling or cable ties required
- Lift and relocate – ideal for changing or updating weight load notices frequently without damaging surfaces or leaving residue

Effortlessly mount weight load notices and warehouse safety signage with our heavy-duty magnetic fixing strip. Designed for industrial environments, this magnetic strip for racking load notices ensures that important weight capacity signs stay firmly in place on steel or metal surfaces.

Ideal for pallet racking weight limit signs, warehouse load capacity signage, and industrial safety notices, this strong magnetic fixing solution eliminates the need for drilling, adhesives, or cable ties, making installation quick, clean, and hassle-free.

Floor Marking

Floor markings have multiple purposes, from highlighting warnings or special requirements to identifying aisles and bays – plus much more.

Though originally designed for warehouse use, our floor markers have rocketed in popularity in other work environments such as offices, schools, shops, hotels, or any other location where you might need to direct footfall or highlight hazards.

We can also design and manufacture bespoke floor signs and markers – simply get in touch!

Bespoke Floor Markers

Self-adhesive

- High visibility floor location labels
- Floor markers that are designed totally to your specification
- Tough and durable - made to withstand traffic in the workplace

Our high visibility floor location labels are suitable to identify specific areas of the warehouse or factory floor. The labels can be totally customised for identification of pallet positions, item numbers or packing and quarantine areas, etc.

Printed to your design, the labels have an aggressive self-adhesive backing to withstand the everyday traffic in the workplace.

Label specific areas in the workplace

Certain bespoke markers may be supplied with an additional clear non-slip overlamine to be applied over the graphic, for added print protection

To obtain a price, simply provide us with the following information:

- Quantity
- Barcodes or Graphic Details

Floor Signals

- A simple and effective solution for marking areas on the floor
- Tough PVC with an aggressive adhesive
- Capable of withstanding everyday traffic of a fully operational warehouse
- 6 colours and 6 shape options
- Apply to a clean, flat, sealed surface

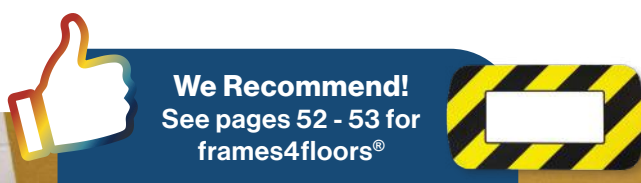

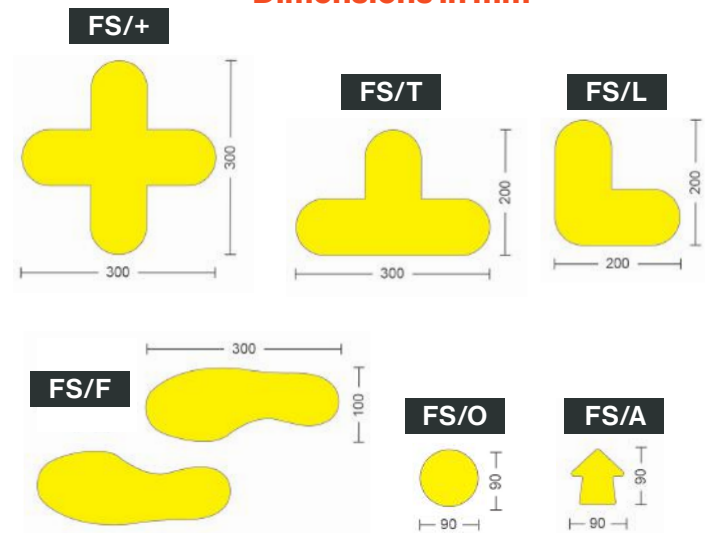

An effective solution for marking floor areas, these markers highlight walkways, traffic flow, pallet positions, and more.

Manufactured using a thin plastic membrane and laminated with an aggressive adhesive, these floor signals bond strongly to the floor and are designed to withstand everyday abrasion from forklifts to footfall and pallets. They are suitable for application onto clean, flat, sealed surfaces.

The use of different shapes and colours helps to designate different areas within the workplace and organise floor materials and flow of traffic. Clear delineation will improve product flow, ensuring everything is in the right place at the right time.

Ideal for use in 5S and Lean manufacturing areas.

Holds an
A4
message

- Flat, colour coded floor identification frames
- Available in 2 insert sizes: A4 and DL
- Choice of 6 stand out colours
- Permanent industrial strength adhesive to withstand warehouse traffic
- Ideal for identifying bulk stack locations or to highlight important information

frames4floors® are tough, colour edged PVC frames with a permanent self-adhesive backing. They enable a printed message or code to be placed and protected onto the floor.

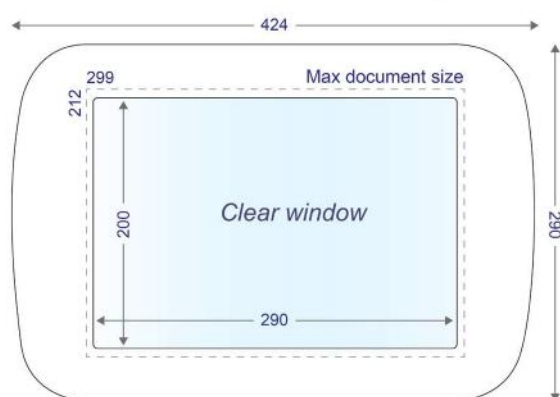

Manufactured using a thin plastic membrane, the frames bond onto the floor surface and are therefore resistant to the rigours of a busy workplace.

The frames are available with two window sizes: A4 (up to 200 x 290mm) or DL (up to 89 x 199mm).

Frames are available with six colour options, making them ideal for 5S and Lean environments.

Floor Graphic Markers

Text and Non-Text

- High visibility floor signs with text and symbol only designs
- Large 430mm diameter
- Choose from a range of 35 designs
- Highlights warnings or special requirements
- Slip-resistance tested to R10 standard
- Bespoke prints are available

Need to get that important safety message across without going to the extreme of painting your warehouse floor? Look no further than the Beaverswood® range of eye-catching, highly visible floor markers!

Printed on the underside of a tough, clear plastic film and laminated with an aggressive adhesive, these signs can withstand the wear and tear of busy industrial environments.

Available from stock with 35 standard designs, including symbol-only designs which can be easily and instantly recognised worldwide.

Although originally designed for use on the floor, these markers can also be used on walls or other surfaces provided they're dry, clean, flat, and sealed.

Floor Graphic Markers Half Circles

- Large 750mm wide x 375mm deep floor markers
- Ultra-low, 0.45mm thickness helps prevent pallets from catching the edge
- Super strong adhesive quality - suitable for use in busy workplace environments
- Slip-resistance tested to R9 standard
- Highlights the area to keep clear in front of fire doors to ensure safety
- Bespoke prints are available

These large anti-slip floor markers can be used on any flat, sealed surface. Ideal for use in front of fire exit doors, to highlight fire extinguisher areas or to warn/highlight any important messaging.

The slimline markers feature an aggressive, permanent adhesive suitable for busy industrial environments - offering quick and easy installation compared to traditional marking methods - whilst remaining extremely wear resistant.

These markers can also be used underneath our racksack® range or other bins, to highlight waste recycling areas. Being 750mm wide, they will fit between most commercial pedestrian doors, and inbetween end frames at the end of each aisle.

Available in 12 text designs and 8 non-text designs, all in an anti-slip laminate tested to R9 standard.

Projected Safety Signs

Separation Saves Lives

- Always visible – projections stay crisp in high-traffic, dusty environments
- Zero maintenance – no repainting, no fading, no downtime
- Flexible – move projectors easily if layouts change
- HSE compliant – signage remains bright and functional at all times
- Customisable – choose from standard safety symbols or bespoke designs
- Fast installation – minimal disruption to operations

Projection

The next generation of warehouse safety signage. Highly visible, maintenance-free, and always compliant.

Projected safety signs are the smarter alternative to traditional signage. Rather than paint or adhesive signs that fade and wear over time, these high-powered LED projectors cast directly onto floors or walls.

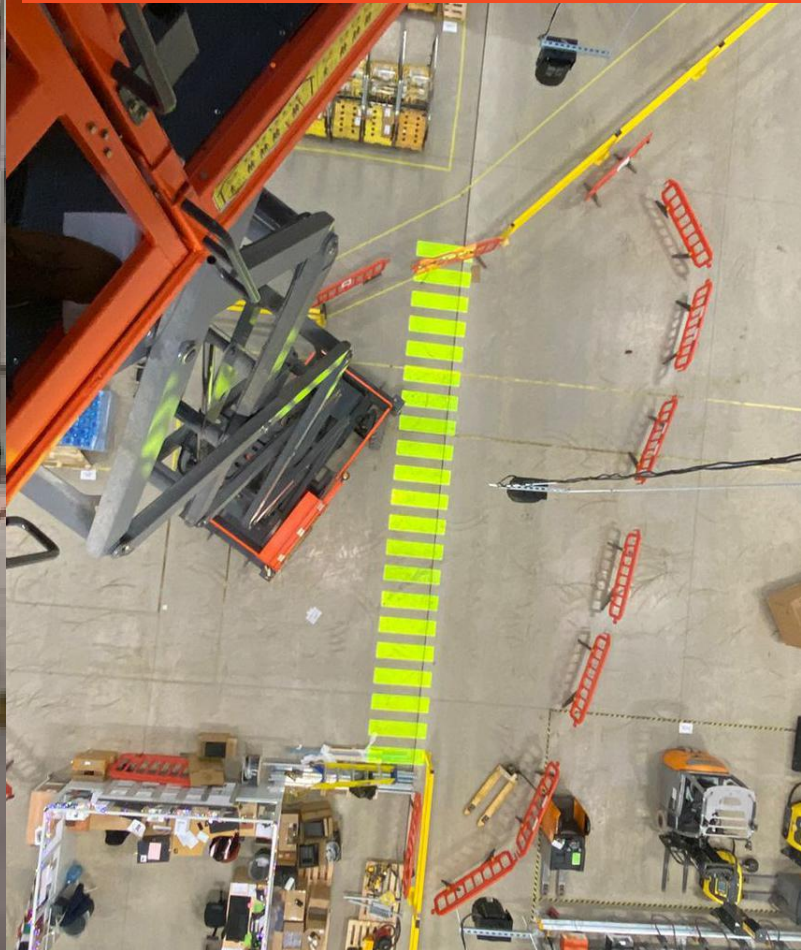

A small template or stencil is inserted into the projector, containing the required safety symbol. When switched on, the projector casts a sharp, highly visible image onto a floor or wall surface that requires virtually no maintenance.

Ideal for a range of environments including pedestrian walkways and crossings, forklift and machinery routes, hazard zones and restricted areas, fire exits and emergency routes, speed limits, arrows, and directional signage and wall-mounted warnings and directional symbols.

Get in touch for a quote or to discuss your safety sign requirements.

Floor Marking

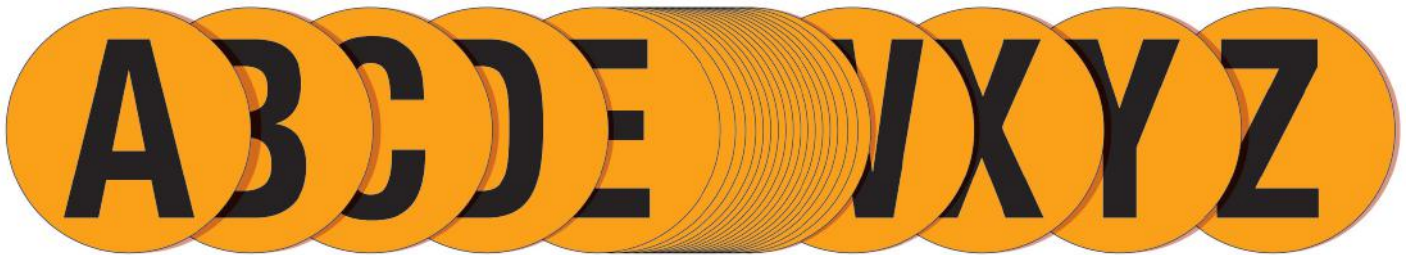

Floor Identification Markers

Self-adhesive

Letters A - Z

Numbers 0 - 10

- High visibility floor markers
- Designed to identify aisle, bay or other warehouse floor areas
- Available in A-Z and 0-10
- Slip-resistance tested to R10 standard
- Each marker is 190mm diameter

These high visibility floor markers have been designed to cope with the daily stress and strain of a modern warehouse. All our markers incorporate a permanent aggressive adhesive backing and can be used not just on the floor but any dry, clean flat sealed surface.

The 190mm diameter markers are printed with a black digit on an orange background in letters A-Z or numbers 0-10.

Simple and effective floor identification

ASFTL/YE		210 x 120	Yellow

Anti-slip Stair Treads

- Available in plain black
- Supplied in packs of 5
- Ideally suited for use on stair treads
- Bespoke options also available

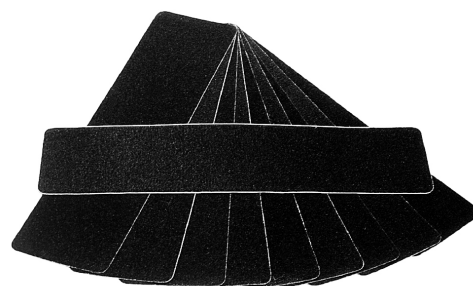

Our anti-slip treads are manufactured to the same high standards as our premium anti-slip tape, ensuring exceptional performance and reliability in demanding environments. Specifically designed for use on stair treads, these anti-slip strips provide a secure, slip-resistant surface that greatly enhances safety.

Each tread features a thick, durable carrier layer that is impregnated with diamond-hard aluminium oxide. This delivers outstanding toughness, durability, and long-lasting performance, even in high-traffic or industrial settings. The abrasive surface offers excellent grip underfoot, significantly reducing the risk of slips and falls.

Available in plain black, however, we can offer your own message to be printed, please enquire for further details.

Clearpath Safety Kit

- Cost-effective, all-in-one bundle for your safety marking needs
- Suitable for indoor and outdoor use in various settings
- Made to withstand heavy foot and machinery traffic, ensuring longevity and reliability
- Self-adhesive for easy application

Enhance the safety and visibility in your workplace with our comprehensive Clearpath Safety Kit. This all-in-one solution is designed to cater to your safety marking needs, providing a versatile and durable option for floor marking in various environments.

Includes:

1x Roll of Black/Yellow Reflective Tape

1x Roll of Photoluminescent Glow in the Dark Tape

1x Roll of Black/Yellow Floor Line Marking Tape

1x Pack of 10 Yellow Footprint Markers
(5x left foot, 5x right foot)

Code	Description
CPS01	All In One Bundle of 3 Tapes and 1 Pack of YellowA Footprint Markers

Glow in the Dark Tapes

Self-adhesive

- Clearly marks escape routes during power cuts, fires, and other low-visibility conditions
- Can also highlight obstructions or hazards in the escape route
- Self-adhesive backed for easy application
- Cut to size with scissors
- 50mm x 10m

Ensure maximum safety and visibility in low-light conditions with our premium glow in the dark floor tape. Designed for emergency exit pathways, hazard marking, and industrial safety, this self-adhesive luminous tape absorbs light from natural and artificial sources (fluorescent, LED, halogen, and tungsten).

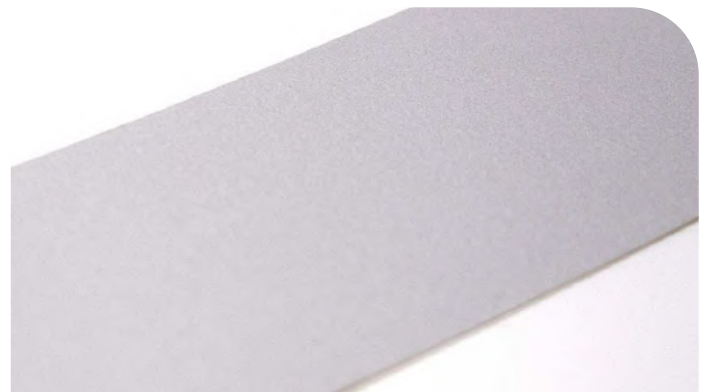

When darkness falls due to power outages, fires, or low visibility, it emits a powerful photoluminescent glow, guiding people to safety.

Code	H x W	Colour	Pack
PHT50	50mm x 10m	Pale Green	1

Reflective Tapes

- Use to highlight hazardous areas and objects in low-light areas
- Quick and easy application
- RA1 approved – meets rigorous requirements for reflectivity and durability
- 50mm x 10m
- Comes in Black/yellow or plain silver
- Other sizes and colours available

Our premium reflective floor tape enhances safety and visibility in dimly lit environments. Designed for industrial, commercial, and personal use, this high-visibility reflective tape reflects light from headlights, torches, and other sources, making hazards, obstacles, and pathways stand out even in complete darkness.

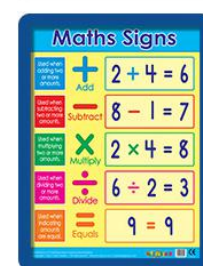

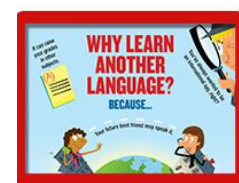

Available in black and yellow chevron reflective tape for hazard warnings and plain silver reflective tape for general safety applications, this tape is an essential tool for preventing accidents in the workplace.

Code	H x W	Colour	Pack
RT50/BY	50mm x 10m	Black and Yellow	1
RT50/PS	50mm x 10m	Plain Silver	1

Document Display

Our document display solutions are ideal for displaying prominent information thanks to their colourful frames, different sizes, and ability to adhere to most sealed surfaces with a strong self-adhesive backing.

For added flexibility, our range also includes magnetic document pockets which can be lifted and relocated.

Clear Document Pockets

Industrial Strength

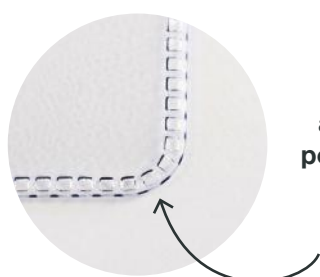

- Industrial quality document pockets with strong welded edges
- Keeps documentation neat and clean
- Available in 4 fixings - magnetic, self-adhesive, clip-on and tie-on
- Vertical and horizontal formats

A range of document pockets to suit most environments, with magnetic or self-adhesive fixings. Also available as clip-on and tie-on to suit wire bins and cages.

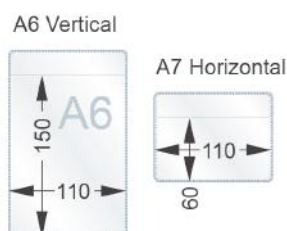

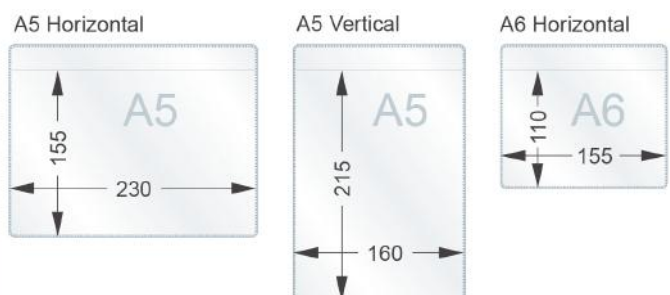

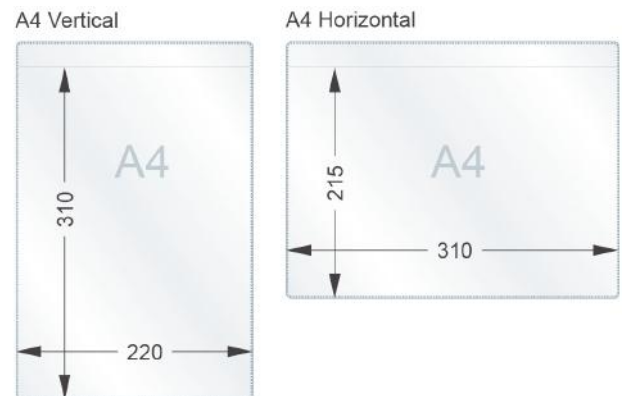

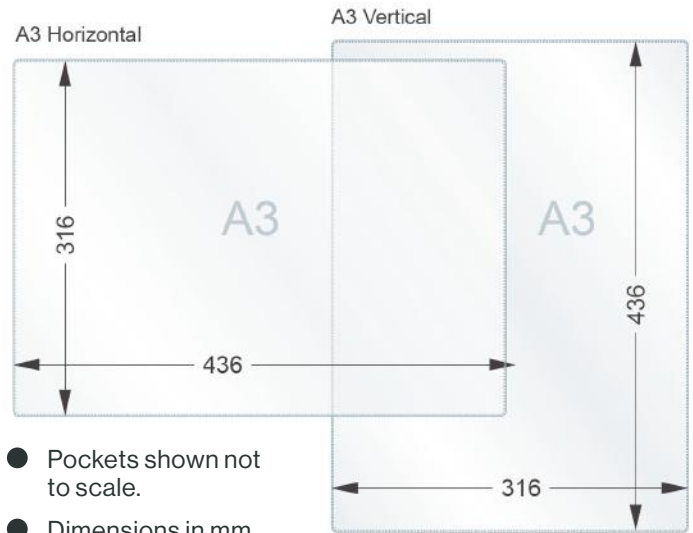

The adhesive pockets are supplied with an aggressive adhesive tape along the top and bottom edge (A7 pocket has tape along the top edge only) for a permanent fixing.

The magnetic pockets are supplied with a magnetic strip along the top, so they can be simply lifted and relocated when necessary.

Tie-on pockets can secure around a maximum diameter of 60mm, whilst clip-on pockets are ideal for use on wire bins and cages.

It's the fine details that make a difference, which is why our pockets have industrial strength welded edges and rounded corners to improve their durability

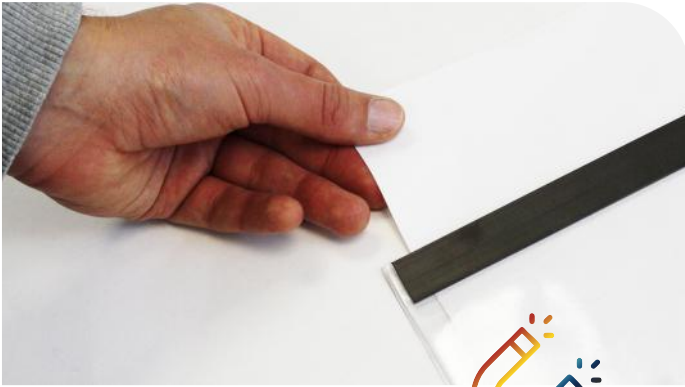

The A7 size can also be used as visitor badge pockets

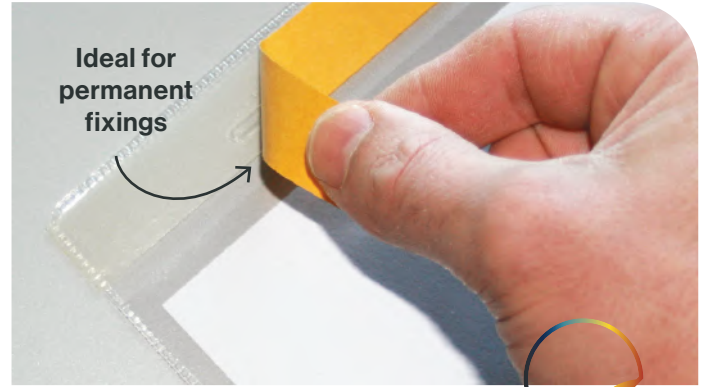

Magnetic fixing - Ideal for relocating on steel surfaces

- Industrial strength coloured document pockets
- Turn your noticeboard into a colourful information centre
- Available in 2 sizes, 3 fixings and 5 stand out colours
- A4 and A5 pockets are available in vertical and horizontal formats
- Supplied in packs of 10

Make your important documentation stand out with these coloured document pockets. The pockets, which are available in 5 colours, will help to transform plain noticeboards into a bright and bold information centre perfect for 5S and Lean management systems.

These coloured document pockets are ideal in the office, warehouse or anywhere in the workplace.

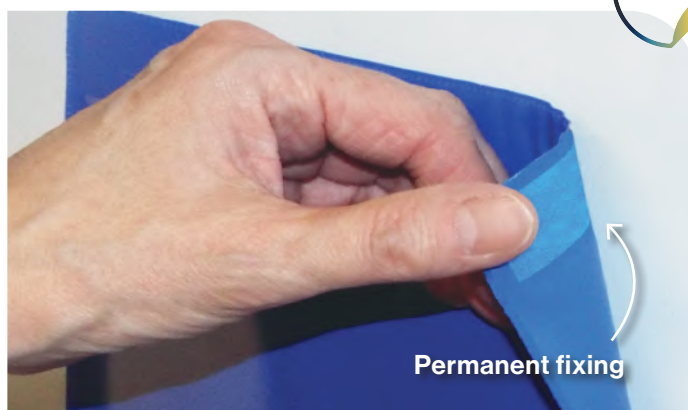

Magnetic Coloured Pockets

Suits steel surfaces

- Ideal for steel cupboards, magnetic boards and other steel surfaces
- Quick and easy to move
- Magnetic fixings are also suitable for cold stores

Self-adhesive Coloured Pockets

Permanent fixing

- Aggressive adhesive offers a permanent fixing solution
- Adhesive tape at top and bottom edge
- Will adhere to most non-porous surfaces such as plastic and metal

Magnetic Wrap-around Pockets

- Designed for industrial roll cages or mesh containers
- Available in sizes - A4, A5 and A6
- Manufactured from tough plastic
- Front flap to protect contents
- Longer headers suit trolley handles
- Available in packs of 10 or 50

Three hard wearing information pockets in sizes A4, A5 and A6. Each pocket has a unique looped magnetic header that is designed to wrap around the mesh of a cage.

A special flap shields the opening of each pocket providing your document with protection.

The clear PVC face enables the message to be clearly seen without the need to remove the document.

Hanging Pockets

- Information pockets manufactured in tough plastic
- Unique hooked header design
- Hang onto crates, trolleys and more
- Two sizes available - A4 or A5
- Available from stock
- Available in packs of 10 or 100

Our premium hanging pockets feature a unique hooked header, designed to hang and grip onto the edge of an industrial wooden case or plastic crate.

This pocket offers a dual function, to either store documents linked to the case or to provide identification where a conventional label will not adhere to a wooden or textured surface.

The hanging pocket is also suitable for trolleys, stillages, pallet converters and many more items that have a hanging rail of up to 25mm maximum thickness.

WCP5H/100	163 x 234	100

Suitable for hanging onto trolleys

Ring Binders

- Create quick and flexible information centres
- 2 or 4 hole ring binders
- Magnetic or self-adhesive backed, offering a flexible fixing system

Keeping multiple pages of information readily available in a prominent visual position can be difficult. Fortunately, Hold-All® Ring Binders provide the solution!

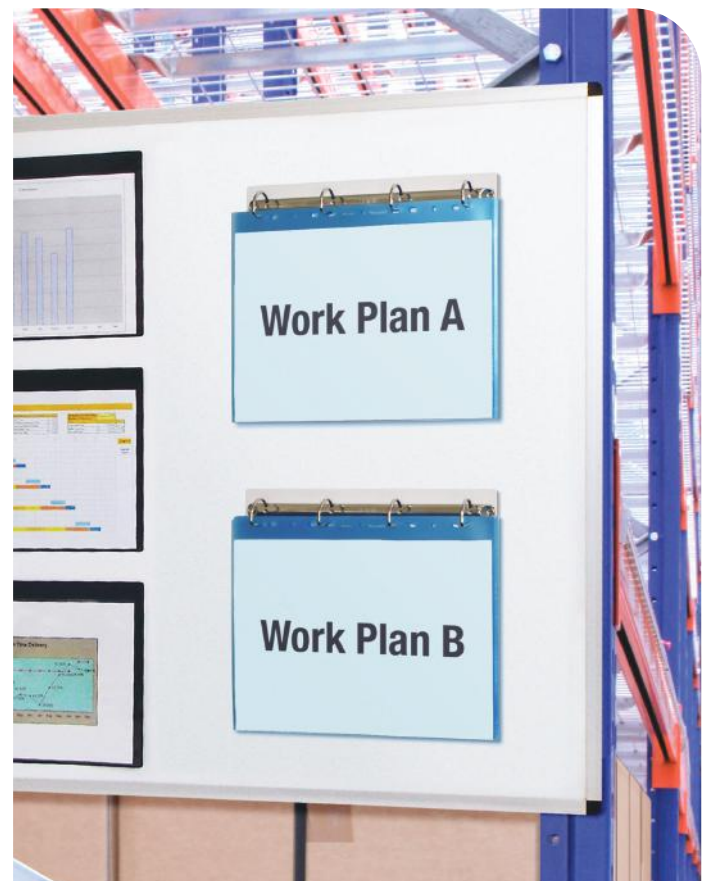

These binders are ideal for storing health and safety, fire action, production planning, or any other important information.

Magnetic or self-adhesive backed, the binder offers documents a versatile fixing system for either magnetic receptive boards, steel surfaces or sealed surfaces. Use self-adhesive where heavier folders are involved.

Self-adhesive

Magnetic

Available with 2 or 4 ring options

Literature Holder

- Large storage capacity document holder
- Built to protect important documents where you need them
- Holds up to 20 A4 standard sheets of paper
- U-shaped opening for easy access
- Magnetic fixing for quick and easy relocation time and time again
- Self-adhesive fixing for a strong, permanent fixing
- Available in packs of 5

Self-adhesive

Magnetic

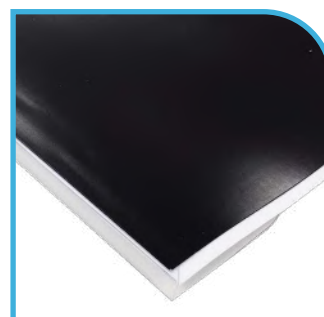

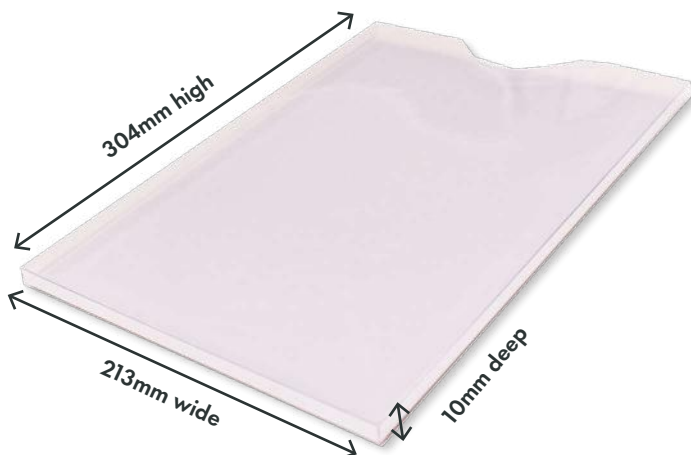

Because important documents deserve a VIP spot!

The Literature Holder has been designed to provide a convenient and secure way to store your important papers. This high-capacity file can hold up to 20 standard A4 sheets, making it perfect for keeping essential documents organised and easily accessible, wherever you work!

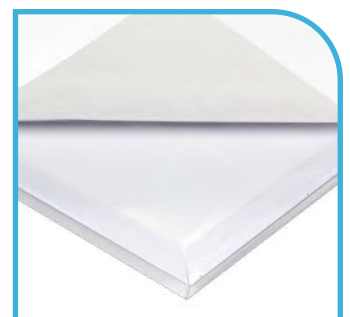

Constructed from durable PVC, this sturdy box file offers maximum protection for your documents. The U-shaped opening allows for effortless insertion and removal of papers, without the need to lift the front cover.

The magnetic fixing offers a quick, reliable attachment to any metal surface, ensuring your files are always within reach. Alternatively, the self-adhesive fixing offers a more permanent solution that will adhere to any smooth, sealed surface.

Tough Weather Resistant Pockets

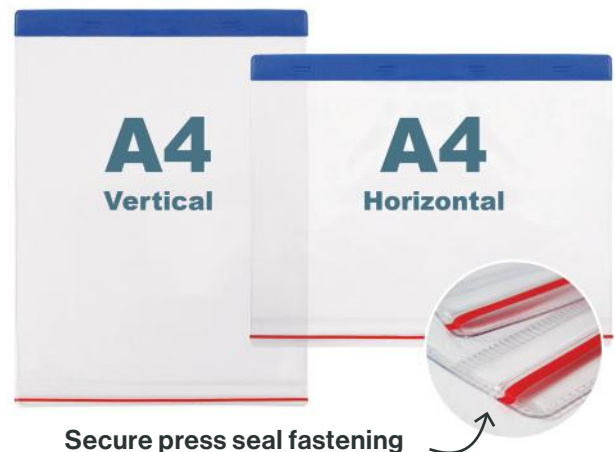

- Protect your documents outdoors with these industrial quality clear pockets
- Secure press seal fastening
- Multiple fixing options - magnetic, self-adhesive or tie-on

Industrial strength pockets designed for external use with a press seal weather resistant fastening.

The pockets have sufficient room for numerous A4 size documents, plus pens and other stationery etc.

Available in horizontal or vertical formats, these pockets have 3 fixing options. A strong magnetic fixing, allowing the pocket to be located to a ferrous steel surface, yet easily lifted off. A self-adhesive fixing for permanent locations, and a tie-on fixing that allows the pocket to be secured around a picking trolley handle or the mesh of a roll cage. This fixing allows for a maximum diameter of 60mm.

Magnetic Fixing

The magnetic frames4docs® have a very strong pull force and can be applied to almost any flat steel surface. The clever design allows for easy insertion and removal of documents without the necessity of moving the frame. However, if required, simply lift and relocate the frame with ease. The magnetic frames are suitable for use on magnetic notice boards, steel cupboards, solid racking and shelving ends, and most other metallic surfaces.

MODULEAN®

RACK END BOARDS

Transform dead-space into working-space!

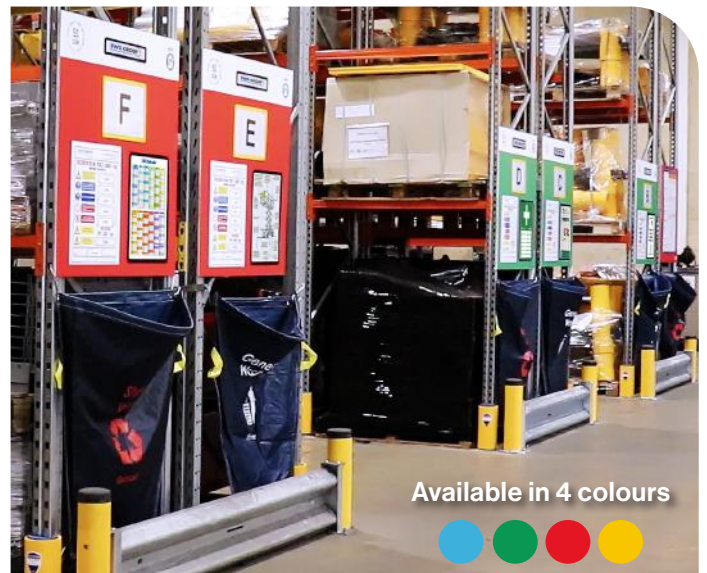

- Keep your warehouse organised with Modulean® Rack End Boards
- 2000mm high x 900mm wide, suitable for warehouse racking
- Make use of otherwise redundant end of aisle racking space
- A range of standard boards available
- Supplied with the products on display
- Each board is available with either single or double aisle markers

Being 2000mm high x 900mm wide, these Rack End Boards have been designed to fit warehouse end of aisle racking systems. 1100mm wide boards are also available to order to suit both sizes of pallet racking – please contact the sales office for details.

Available in 7 shadow board designs, each in 4 different colour options - blue, green, red and yellow. Each board is available with either single or double aisle markers in the form of our best seller frames4docs®, making the inserts easy to change and replace as frequently as required.

Aisle markers can be printed with inserts to suit your warehouse needs - please let us know what aisle information you need.

Impact Protection

From heavy-duty safety bollards (ideal for corners, entrances, and structures) to bumper barriers (perfect for identifying working boundaries) – we have it all!

We're delighted to offer an innovative range of impact protection and high-visibility safety products from market leaders Brandsafe and Rack Armour®.

These products are designed to reduce the chance of collisions and accidents on site, saving you money on otherwise costly repairs.

They can be used internally and externally to prevent damage and protect people from harm.

Essential, Core, Plus

One Range. Three Levels of Protection.

To make it easier to choose the right impact protection, Brandsafe is divided into three performance levels: Essential, Core, and Plus.

Each level is designed to meet different operational needs, vehicle traffic amounts, and risk profiles. This helps you select the right solution for your environment, without over- or under-engineering.

Brandsafe 

Brandsafe 

Brandsafe 

ESSENTIAL

Everyday protection for standard industrial environments

The **Essential** range meets the most common safety needs in warehouses, logistics hubs, and industrial sites.

Designed for low-to-medium intensity impacts, Essential offers reliable and cost-effective protection for daily operations. It helps protect people, racking, walls, and equipment without unnecessary complexity.

Ideal for:

- Light to moderate vehicle traffic
- Standard forklifts and pallet trucks
- General warehouse and production areas
- Projects where budget efficiency is key

CORE

Durable protection for busy, high-activity sites

The **Core** range is built for environments with frequent vehicle movement and higher operational demands.

Offering improved durability and long-term performance, Core is the best choice for busy industrial and logistics facilities where impact risks are higher, and protection must work day after day.

Ideal for:

- High-traffic warehouse aisles
- Regular forklift and MHE activity
- Loading, picking, and despatch areas
- Sites requiring a balance of performance and value

PLUS

Maximum protection for high-risk, safety-critical areas

The **Plus** range provides the highest level of impact protection for demanding environments where safety is essential.

Built to handle heavy vehicle traffic and high-energy impacts, Plus delivers outstanding resilience, longevity, and performance. It helps protect critical infrastructure, high-value assets, and people in the toughest conditions.

Ideal for:

- Heavy vehicle and HGV traffic
- High-risk or safety-critical zones
- Areas with repeated high-impact exposure
- Sites prioritising maximum protection and lifespan

Choosing the Right Level

Whether you're protecting a single hazard point or specifying protection for an entire facility, the Brandsafe Essential, Core, and Plus ranges help you match risk level, performance, and budget, without compromising safety.

For help in choosing the best solution, contact us for expert advice.

Projects

Impact protection solutions, built around your environment

No two warehouses are the same. Different layouts, different traffic flows, different risks.

That's why Brandsafe impact protection projects aren't about pushing individual products; they're about designing the right combination of protection to suit your site, your operation, and your people.

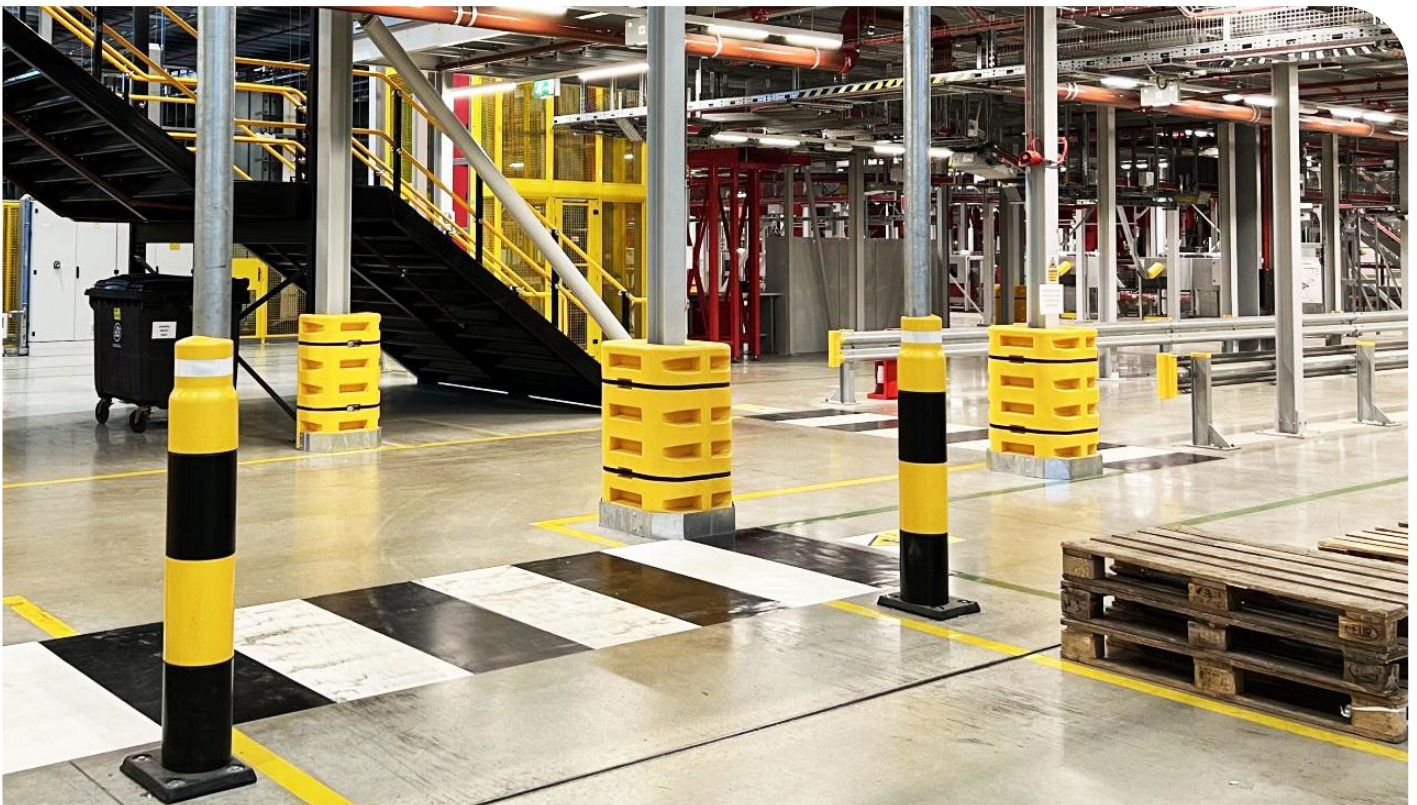

From busy distribution centres and manufacturing facilities to loading bays and pedestrian walkways, we support projects of all sizes with durable, high-performance impact protection systems designed to reduce damage, downtime, and risk.

A complete approach to impact protection

As part of a Brandsafe project, we can supply and specify a wide range of protection solutions, including:

- HGV landing plates to absorb impact and protect structures in loading bay and yard environments
- Pedestrian safety gates to control access and improve separation between people and vehicles
- Anti-topple barriers to prevent stacked goods from falling onto pedestrians or equipment
- Cornerwrap protection to safeguard exposed edges and vulnerable columns
- Door protection goalpost systems to prevent costly door, frame, and wall damage

These elements can be used individually or combined into a fully integrated protection scheme tailored to each site's hazards, traffic, and layout.

Designed to fit. Built to last.

Every Brandsafe project focuses on:

- Site-specific solutions, not off-the-shelf assumptions
- Durable materials engineered to withstand impacts
- Clear visual protection that supports safer working environments
- Long-term value, reducing maintenance and replacement costs

If it needs protecting, we can help design a solution.

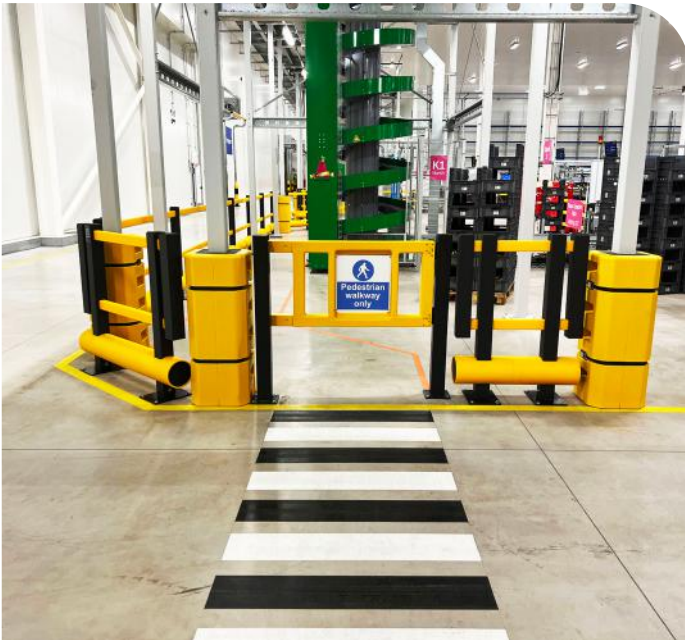

Looking for something specific?

The examples shown here are just part of what's possible.

We offer many additional impact protection products and configurations, and we're always happy to advise on the best approach for your application.

Get in touch to discuss your project requirements, and we'll help you find the right solution for your environment.

PAS 13 Polymer Safety Barrier Range

Resetting the Bar on Impact Safety

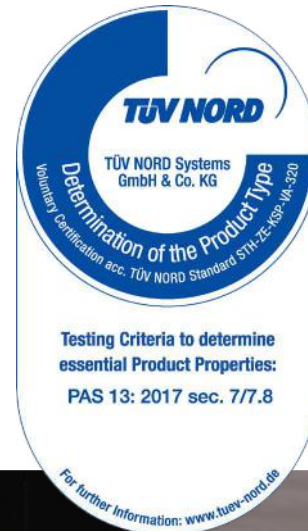

We're delighted to offer the Brandsafe PAS 13 barrier range, independently certified by TÜV Nord.

By obtaining PAS 13 accreditation, these polymer safety barriers are proven to meet strict safety standards.

This guarantees their high performance, longevity, and ability to withstand greater impacts than similar products on the market.

The range includes pedestrian barriers, bumper barriers and heavy duty bollards.

PAS 13 is the only global code of practice that advises on the types of barriers suitable for workplace use to separate vehicles and pedestrians. It includes guidance on how safety barriers should be tested to demonstrate their resilience.

Brandsafe

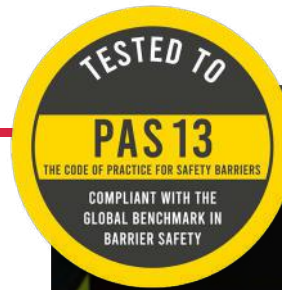

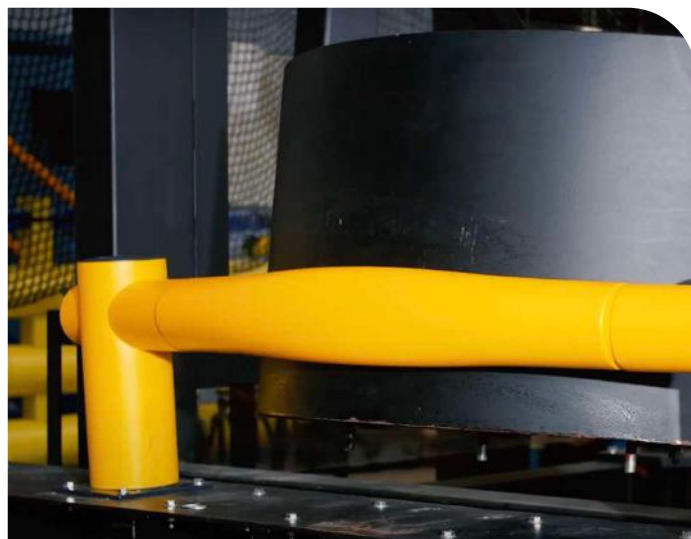

What is PAS 13?

PAS 13, which stands for Publicly Available Specification 13, is an official document produced by the British Standards Institution (BSI). It provides independent and detailed guidelines on best practices for utilising a product or process.

PAS 13 holds global recognition as the only code of practice for industrial safety barriers. It serves as the most reliable source of guidance for optimising safety and improving traffic management in industrial environments. Engineers, architects, contractors, health and safety professionals, and other stakeholders involved in the design, construction, deployment, and maintenance of safety barriers are encouraged to refer to this code. It's founded on the principles of risk assessment and recommends the selection of appropriate safety barriers based on identified hazards and risks.

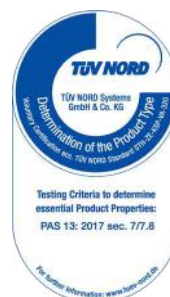

Adhering to PAS 13 ensures that safety barriers are effective in safeguarding individuals and assets from potential hazards, minimising the risk of accidents and injuries in industrial settings. Compliance with this code of practice plays a critical role in promoting overall safety and protection.

What Does TÜV Nord Certification Mean?

While manufacturers can carry out their own tests, their claims lack the backing of independent verification.

IWS Group, our parent company, has taken the initiative to have our testing capabilities certified by TÜV Nord, a globally esteemed independent test house.

By partnering with such a reputable institution, IWS Group has ensured its Brandsafe safety barriers are rigorously evaluated and their performance validated through an objective and reliable process.

At Beaverswood®, we prioritise transparency and trust. As such, we're delighted to provide our customers with peace of mind knowing these safety barriers have undergone thorough testing under the scrutiny of an independent authority.

Rack End Barriers

- Manufactured from polyethylene (HDPE) polymer with steel base plates
- Deflects under impact
- Single barrier
- Available in 3 sizes
- Quick and easy installation

The flexible barrier design, absorbs the load of impact, away from a vehicle and ground fixings to minimise damage and repair time.

Available as a single barrier that stands at 320mm high. Available in 3 widths of 900mm, 1100mm, and 2400mm.

Fully recyclable, non-toxic and suitable for use in food production and freezer environments. All fixings provided.

The barriers are available in safety yellow and grey, making them highly visible to personnel and vehicles. These low maintenance polymer barriers, don't rust, corrode, fade or require re-painting.

Code	Description	Length (mm)
RBBS90/SYG	Single Rack End Barrier	900
RBBS11/SYG	Single Rack End Barrier	1100
RBBS24/SYG	Single Rack End Barrier	2400

Bumper Barriers

- Manufactured from polyethylene (HDPE) polymer with steel base plates
- Deflects under impact
- Single or double barrier options
- Bespoke lengths start at 1400mm and upwards
- Quick and easy installation

These low level bumper barriers offer complete warehouse protection by creating safe zones. They provide the right amount of visibility and strength, whilst maximising space.

Available in single or double bumpers, depending on the level of protection required - single barriers stand at 370mm high and double barriers at 670mm high. Bespoke sizes are available – please enquire.

Fully recyclable, non-toxic and suitable for use in food production and freezer environments. All fixings provided.

The barriers are available in safety yellow and grey, making them highly visible to personnel and vehicles. These low maintenance polymer barriers, don't rust, corrode, fade or require re-painting.

Code	Description	Length (mm)
LBBS19/SYG	Single Low Level Bumper Barrier	1900
LBBS34/SYG	Single Low Level Bumper Barrier	3400
LBBS49/SYG	Single Low Level Bumper Barrier	4900
LBBD19/SYG	Double Low Level Bumper Barrier	1900
LBBD34/SYG	Double Low Level Bumper Barrier	3400
LBBD49/SYG	Double Low Level Bumper Barrier	4900

Pedestrian Barriers

- Manufactured from high-density polyethylene (HDPE) polymer
- Designed with safety and segregation in mind
- Highlights safe pedestrian areas
- Bespoke lengths start at 1400mm and upwards

Safety Yellow & Black

Safety Yellow

These highly durable pedestrian barriers are ideal for highlighting safe pedestrian areas and guiding people in the right direction, internally or externally.

The barriers are available in safety yellow and black and an all safety yellow option, making them highly visible to personnel and vehicles. Alternative colours available on request. These low maintenance polymer barriers, don't rust, corrode, fade or require re-painting.

Bespoke lengths start at 1400mm and upwards, all with 3 rails. Other sizes are available upon request, subject to minimum order quantity. Please note, these barriers do not act as impact protection alone.

Code	Description	Length (mm)
PB315/SYG	Pedestrian Barrier - 3 rail	1500
PB330/SYG	Pedestrian Barrier - 3 rail	3000
PB345/SYG	Pedestrian Barrier - 3 rail	4500

Please state colour required when ordering - (/SYG) Safety Yellow & Black and (/Y) All Safety Yellow.

Pedestrian Bumper Barriers

- Manufactured from high-density polyethylene (HDPE) polymer
- The bumpers add extra deflection and strength to the pedestrian barriers
- Single or double bumper options
- Bespoke lengths start at 1400mm and upwards

Single or double bumper options

Safety Yellow & Grey

Where pedestrians and MHE frequently pass each other, there isn't protection than pedestrian bumper barriers.

Easy to see and durable, they are ideal for warehouse and pedestrian segregation. Fully recyclable, non-toxic and suitable for use in food production and freezer environments. All fixings provided.

Available in single or double barrier bumper options depending on the busyness of your warehouse.

The barriers are available in safety yellow and grey, making them highly visible to personnel and vehicles. These low maintenance polymer barriers, don't rust, corrode, fade or require re-painting.

Code	Description	Length (mm)
PBBS19/SYG	Single Bumper Pedestrian Barrier	1900
PBBS34/SYG	Single Bumper Pedestrian Barrier	3400
PBBS49/SYG	Single Bumper Pedestrian Barrier	4900
PBBD19/SYG	Double Bumper Pedestrian Barrier	1900
PBBD34/SYG	Double Bumper Pedestrian Barrier	3400
PBBD49/SYG	Double Bumper Pedestrian Barrier	4900

Heavy Duty Bollards

- **Manufactured from high-density polyethylene (HDPE) polymer**
- **Ideal for corners, entrances and structures**
- **Deflects under impact without damage**
- **Available in 3 size heights**

These heavy duty safety bollards are a cost effective solution to protect corners, entrances and structures.

Manufactured from high-density polyethylene (HDPE) polymer, these bollards are able to take the impact of multiple hits and simply reform afterwards with little or no damage.

Available in 3 heights - 600mm, 900mm or 1200mm. Standard 200mm tube width. Other sizes are available upon request, subject to minimum order quantity.

The bollards are available in safety yellow and grey, making them highly visible to personnel and vehicles. These low maintenance polymer bollards, don't rust, corrode, fade or require re-painting.

Safety Yellow & Grey

Gives safe working boundaries for MHE drivers

Code	Description	Height (mm)
HDB60/SYG	Heavy Duty Safety Bollard	600
HDB90/SYG	Heavy Duty Safety Bollard	900
HDB12/SYG	Heavy Duty Safety Bollard	1200

ImpactSAFE Heavy Duty Bollards

- **Bolt down bollards with built in shock absorption to cushion impact forces**
- **Benefits from removable polymer cover kits**
- **Available in 5 standard colour options**
- **1000mm, 1300mm and 1600mm height options**

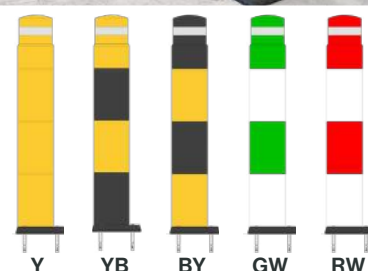

These bollards have been designed with built in impact absorption to prevent floor anchors being pulled from the floor and cracking the slab underneath.

Featuring a 168mm diameter steel core, galvanized base plates, and a polymer bollard cover kit, including 4 safety-plus floor anchors. Available in 5 vibrant standard colour options, each with 50mm reflective bands, these bollards offer maximum visibility and safety, day or night. They are ideal for external escape doors and high traffic areas.

The mild steel, high density polyethylene (HDPE) and rubber materials are fully recyclable.

5 vibrant colour options available

Code	Description	Height (mm)
IHDB10	ImpactSAFE Heavy Duty Bollard	1000
IHDB13	ImpactSAFE Heavy Duty Bollard	1300
IHDB16	ImpactSAFE Heavy Duty Bollard	1600

Please state colour required when ordering.

Floor Level Barriers

- **Manufactured from high-density polyethylene (HDPE) polymer**
- **Provides subtle protection at low levels**
- **Ideal for placing behind bays**
- **Available in 1200mm length**
- **High visibility colour**

These floor level barriers are ideal for providing subtle protection at low levels from order pickers, with minimal space intrusion in the warehouse.

Manufactured from high-density polyethylene (HDPE) polymer and fixed to the floor, these barriers are strong and durable enough to take knocks and bumps. They are ideal to prevent pallets being hit against walls. These low maintenance polymer barriers, don't rust, corrode, fade or require re-painting.

Available in a length of 1200mm. The barriers are available in safety yellow and grey, making them highly visible to personnel and vehicles. Alternative colours available on request, subject to minimum order quantity.

Safety Yellow & Grey

Strong and durable protection at low levels

Code	Description	Length (mm)
KBB12	Floor Level Barrier	1200

Height Restriction Clatter Bars

- **Ideal for hanging under mezzanines, doorways and other structural beams**
- **Prevents clashes and damages to the surrounding environment**
- **Clear height warning solution for all vehicle operators**
- **Chains and fixings sold separately**

These polymer extruded clatter bars are a highly visible height warning solution for all vehicle operators.

Ideal for hanging under mezzanines, doorways and other structural beams to prevent clashes and damage to equipment or infrastructure.

Available in 4 standard lengths - 1250mm, 1500mm, 2000mm and 2500mm.

The clatter bar can be fixed onto an i-Beam, lindaptor, boom bar, metsec slab decking and insulated panels.

Supplied in yellow, unless specified. Colour, chain length and signage are fully-customisable, allowing the the clatter bar to fit to a specific environment.

Code	Description	Length (mm)
HCB12	Height Restriction Clatter Bar	1250
HCB15	Height Restriction Clatter Bar	1500
HCB20	Height Restriction Clatter Bar	2000
HCB25	Height Restriction Clatter Bar	2500

Flexi Delineators

- Polyurethane posts that will flex, bend and crush, then return to shape
- 80mm diameter posts supplied with 3 floor anchor bolts
- 1000mm high
- Choice of 4 high visibility colours

These flexi posts are ideal where demarcation of traffic routes are paramount for safety. The posts can be used on their own or combined with plastic chains to help segregate traffic and pedestrian routes.

Code	Description
FDP/Y	Yellow Post with Silver Reflectors
FDP/B	Black Post with Yellow Reflectors
FDP/WB	White Post with Blue Reflectors
FDP/BS	Black Post with Silver Reflectors
FDK/FK	Chain Fixing Kit
PCH/BY	Black and Yellow 8mm Plastic Chain x 25M

Suitable for tarmac or concrete

Chain Fixing Kit comprises of 1x Top Cap and 2x S-Clips. 1x Chain Fixing Kit is needed per post. (please order separately)

Flexi Delineators Parking Bay Signage

- Highly visible signage with diamond reflectors pre-fitted to delineator
- Moulded from flexible polymer
- Disabled and electric vehicle signs
- 1000mm high, 80mm diameter post

Designed to delineate electric car charging bays with highly visible signage, diamond reflectors and soft on impact to car bumpers.

Code	Description	W x H (mm)
FDPS/EV	Electric Vehicle	80 x 1000
FDPS/DP	Disabled Parking	80 x 1000

Lamp and Sign Post Protectors

- Easy to install clam-shell design
- Highly visible colours and diamond grade reflector band
- Replace the Lamp Post Wrap not the lamp post
- Available in 1250mm high kits

Moulded in the UK from tough Polyethylene, these radical new protectors with high density foam impact absorbing cores make vulnerable lamp posts visible to drivers.

All kits come with a foam core suitable for all sizes. Choice of 3 high visibility colours available.

Code	Description
LPK/YS	Yellow and Silver Hi Vis
LPK/BS	Black and Silver Hi Vis
LPK/BY	Black and Yellow Hi Vis

Suitable for lamp posts with diameters of 50mm – 210mm

Speed Bumps

- Available in 2 heights
- Suitable for domestic and commercial vehicles
- Individual Yellow and Black speed bumps

These compression moulded speed bumps help calm the speed of vehicles, with a choice of 2 sizes: 50mm high suited to domestic vehicles, and 75mm high suited to commercial applications.

Sold in individual units, each Speed Bump section is 500mm long. End sections are 210mm long.

Code	Description
SB50	50mm High Speed Bump Section
SBE50	50mm End Section
SB75	75mm High Speed Bump Section
SBE75	75mm End Section
SBFIX	Pack of 4 Fixing Bolts and Plugs

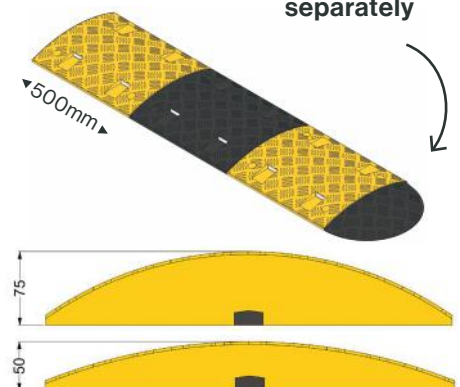

Please state colour required when ordering - (/Y) Yellow and (/B) Black.

Fixing bolts are supplied separately - suitable for use in both tarmac and concrete - sold in packs of 4. Each individual Speed Bump section requires 4 bolts. End sections require 2 bolts.

End section sold separately

To order simply measure the width of your road in mm and divide it by 500 to work out how many pieces are required. If you require curved end sections at each end deduct 1 Speed Bump section from your total.

Wheel Stops

- Hi vis strip for pedestrian and driver visibility
- Manufactured from robust and semi-flexible PVC
- Supplied with Fixing Kit

Wheel Stops that cater for all domestic and commercial vehicles including: cars, vans, coaches, trucks, HGVs / LGVs. They are ideal for controlling the parking of all vehicles. Designed to eradicate bending and splitting associated with hollow rubber Wheel Stops. Fixings provided are suitable for concrete and tarmac substrates.

Commercial Wheel Stops and domestic Wheel Stops are available in Yellow or Black.

Domestic Wheel Stop

Commercial Wheel Stop

Code	Description	L x W x H (mm)
DWS	Domestic Wheel Stop	900 x 200 x 80
CWS	Commercial Wheel Stop	1000 x 200 x 130

Please state colour required when ordering - (/Y) Yellow and (/B) Black.

Electric Vehicle Protection Kits

- Strong and robust impact protection for charging points
- Three standard product packages to choose from
- Domestic, commercial and industrial applications
- Cost-effective coverage for assets
- Bespoke solutions upon request

A range of impact protection for EV charging points.

Light Duty Kit includes: 2 Protection Posts.

Ideal for private and small car parks.

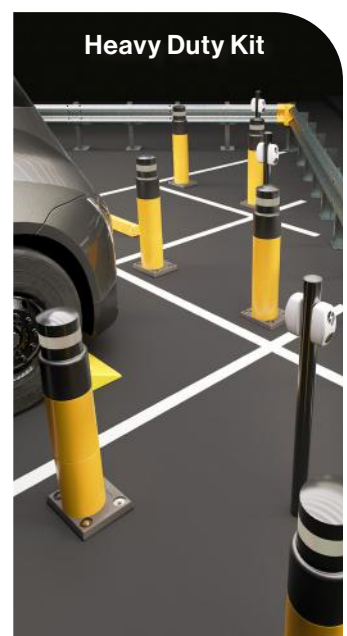

Medium Duty Kit includes: 2 Protection Posts and 1 Domestic Wheel Stop.

For industrial and larger public car parks, when there is a medium-to-high risk of impact damage.

Heavy Duty Kit includes: 2 Bollards, 1 Commercial Wheel Stop and optional Armco Safety Barriers.

For when larger industrial vehicles, such as HLGVs and HGVs, are being used regularly.

Code	Description
EVKIT/LD	Light Duty Kit
EVKIT/MD	Medium Duty Kit
EVKIT/HD	Heavy Duty Kit

Electric Vehicle Charging Stencil Kits

- A cost-effective, highly visible and long lasting solution
- Help drivers locate the correct area efficiently to charge their electric car
- Stencil is 600mm x 600mm

Code	Description	H x W (mm)
STENEV	Stencil Only	600 x 600
STENEV-KIT	Stencil Kit*	600 x 600

*Please state colour required when ordering - (/RE) Red, (/YE) Yellow and (/WH) White.

Armco Accessories

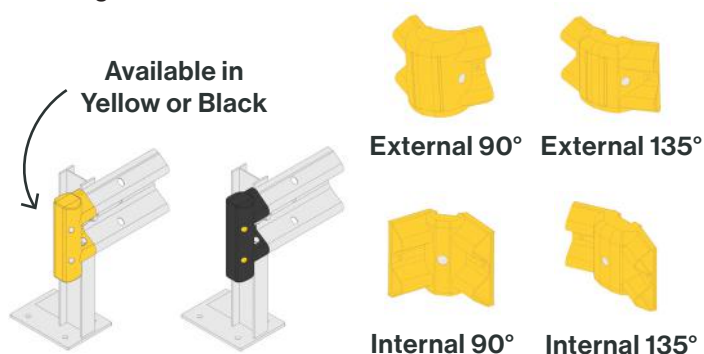

- Polymer moulded Armco accessories
- Provides a safe and visual termination to sharp Armco rails
- Retrofit compatibility with all Armco terminals
- Flexible under impact

Improve safety in the workplace with the Armco range. Available for steel corners and ends - with four different end designs (standard, pedestrian, fishtail and end).

Made from polymer, these Armco accessories are highly visible, simple and quick to install. Designed with retrofit compatibility with all steel armco rails, to save costs and install time.

The range is available in yellow or black, except the Armco end which is only available in yellow. Together, with diamond grade reflectors, they not only offer an aesthetic look but also contribute towards safety.

All fixings included.

What's the difference?
Armco ends are made from soft polymer and help protect pedestrians from sharp edges.
Standard ends are made from hard polymer ends that protect from sharp edges and provide additional impact protection.

PolyWRAP SpaceSaver Column Protectors

- Designed to save valuable space and protect columns
- 5 size options moulded to fit snug to your specific column size
- Recess feature to cover base plates and studs 320mm x 320mm
- Ratchet security strapping
- Simple and quick to install - no mechanical fixing needed

These column protectors are quick and easy to install and are made from 100% recyclable polyethylene. They are ideal for protecting mezzanine columns without taking up valuable floor space.

Foam Inserts

When the actual column is approximately 20mm smaller than the standard PolyWRAP column sizes – then a foam insert is required (2 per column). These are cut to order to ensure it fits perfectly to your column. If you're unsure, please contact the sales office.

Code Description

CPR/SK	High Steel Fork Impact Skirt
--------	------------------------------

Rack Armour® Upright Protection

- The original polymer racking guard
- No1 in the world
- Patented and innovative design to deflect and absorb the impact
- Manufactured from high-density polyethylene (HDPE) polymer
- Lifespan of 15 years +
- Zero maintenance and no floor damage
- Easy installation - no fixings required

Rack Armour® has been a global success for over a decade. Its innovative design and functionality has revolutionised racking protection and provides a proven reduction in damage levels - saving time, money and hassle.

Available in 5 sizes to ensure the correct fit, with Euro E being ideal for larger racking. Its tight fit ensures that Rack Armour® can't be knocked off whilst pallets are retrieved. When a direct impact occurs and cannot be deflected by the outer shell, the interior foam absorbs the impact energy until it's diffused. These upright protectors fit all makes of pallet racking and are transferable. Made from high-density polyethylene (HDPE) which is non toxic and fully recyclable.

Rack Armour® has been tested to meet and exceed international standards, including FEM 10.2.16.

Available from stock in 2 highly visible colours that clearly gives safe working boundaries for MHE drivers. Other colour options are available - please contact the sales office for further details.

Impact Protection

Why Rack Armour® Beats Metal Every Time

When it comes to warehouse safety, not all racking protection is as effective as each other. While metal guards may be cheaper to buy, you'll feel the cost every time you have to replace one.

Metal guards are rigid and unforgiving. Upon impact, they often dent or warp easily, becoming less effective and requiring frequent replacement. Worse still, the collision usually damages the concrete flooring underneath, which must be repaired before a new guard can even be installed. This creates unnecessary costs and disruption that no warehouse manager wants to deal with.

It's time to upgrade to a smarter, longer-lasting solution.

Rack Armour® is the leading name in upright racking guards and offers a smarter, more durable alternative designed to deliver long-term value and superior protection for warehouse racking.

Metal Guards vs Rack Armour®

VS

Metal Guards

- Installing metal guards takes time, which can be very costly if paying for an independent team to install.
- They need to be drilled into the flooring to make secure.
- The shape of the guards is not ideal when taking an impact and will dent, either weakening the guard or rendering it obsolete.
- In the event of a collision, not only will you have to replace the guard, but it often causes damage to the flooring which needs fixing before fitting a new guard.

Rack Armour®

- Installing Rack Armour® is easy – they simply clip onto the racking with no fixings required!
- Patented design – the curved outer shell and for the shock-absorbing foam insert that absorbs impact and deflects it.
- Should you need to replace it, there is ZERO damage to the floor.
- Rack Armour® can be quickly and effectively switched out in minutes.
- Can be supplied with a label with your branding/ contact details.

Shelving and Storage

A well-organised warehouse, workshop, or storage space is essential to any business, which is why we're proud to offer a wide selection of high-quality storage and shelving products from Anco Storage®.

Whether you need rivet racking for storing long or bulky items, or bin shelving for small parts and tools, we've got you covered!

Shelf Trays on EXPO 4 Racks

- Designed for strength and ease
- Spring loaded shelf stop
- High density storage system
- All bays are complete with white shelves and fixings
- Labels included with every plastic tray

The shelf trays feature a spring loaded shelf stop at the back of the tray. This means the tray can be withdrawn from the shelf and suspended offering around 90% clear picking. This stop also acts as a handle to make it easier to carry.

With shelf trays available in 3 depths, 2 widths and 2 heights any configuration can be designed to offer the maximum high density storage solution. Trays can be subdivided from left to right and all trays and dividers come with labels.

Ideal for the warehouse, workshop and storeroom

Heavy Rivet Racking

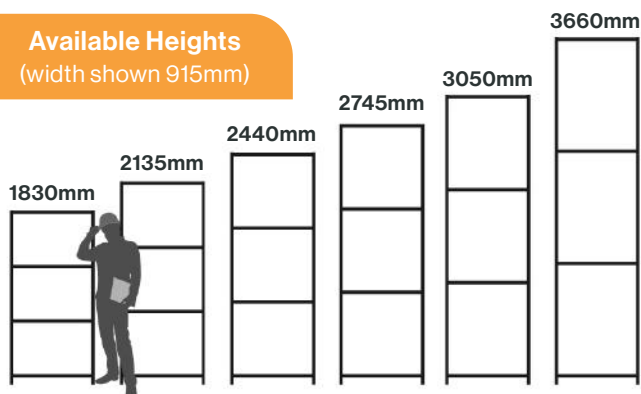

- Cost effective solution for storing long or bulky items
- Offers shelf loads of up to 600kg (UDL) and bay loads of 2800kg.
- Highly flexible industrial shelving, offering you strength and versatility

Our Heavy Rivet uses a 1830mm “L” shape face beam. Heavy Rivet bays are available in depths from 305mm to 1220mm deep.

The quality of the materials and robust construction ensures it will meet the rigors of the toughest workplace. The vast range of bay sizes allows for a solution to meet your storage needs and the available space.

Available in blue/orange or blue/grey.

Available Heights (width shown 915mm)

Rivet racking uses a central deck support which not only supports the chipboard panel but ties the front and back beams together.

Rivet Racking Bays with Bins

- Strong, robust and versatile bin storage solution for any workplace
- Ensure items can be identified quickly
- Three options of shelf bins
- Each shelf bin kit includes Rivet Racking bay with 7 shelf levels

Our range of Rivet Racking bays with bins have been designed to offer a range of shelf bins in 'larger sizes' for storing increased volumes.

Available in three shelf bin options - 280mm wide, 420mm wide or a mixed variation of these sizes.

Shelf bins with a semi-open front and a large labelling area, it ensures items can be identified efficiently. The bins are available in blue shockproof plastic and can be nested when not in use to save space.

Get organised and label your shelf bins with Label Holders. **Please see pages 16 - 19 .**

TS Longspan Racking

- Store all your heavy and bulk items with ease
- Strong 'Z' beam design offers shelf load capacities up to 950kg
- Shelf levels include deck supports to match beam capacities
- Deck support slots into the beam to eliminate beam spreading or rotating

Chipboard Decking

Solid Steel Decking

Wire Mesh Decking

Deck supports are supplied on depths of 610mm and greater.

Chipboard Decking

Well-suited for storing non-palletised items, cartons, and individual products. Cost-effective and easy to install, but may not be suitable for very heavy loads.

Solid Steel Decking

Hard-wearing and easy to clean down, making it suitable for storing medical and food grade items.

Wire Mesh Decking

Popular for pallet racking systems. Ideal for fire safety compliance, as it allows water to pass through in the event of a fire. Suitable if your warehouse deals with food or pharmaceutical products.

TS Longspan Racking Frames

Frames

Starter price includes: 2x frame and 3x beam levels.

Extension price includes: 1x frame and 3x beam levels.

Frame includes: 2x uprights with all bracing and fixings (assembly required).

Beam level includes: 2x beams, chipboard decking, all deck supports and safety pins.

EXPO 4G Boltless Shelving

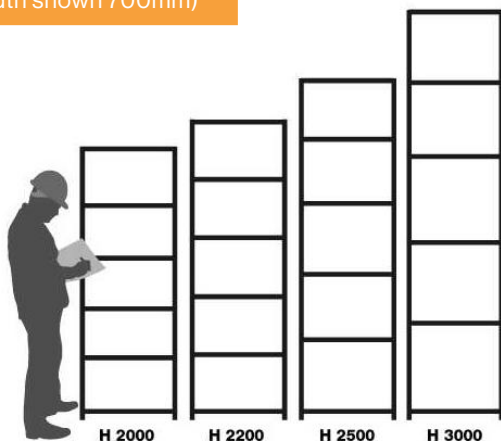

- Hard-wearing galvanised steel
- Up to 200kg shelf capacity
- Adjustable shelves every 25mm
- Unique clip fit shelving design enables assembly in minutes
- Easy to adjust and reconfigure
- Highly versatile and customisable
- Two widths and three depth options

EXPO 4G offers loadings of up to 200kgs per shelf and is supplied in an all-galvanised finish. It's the ideal solution for all kinds of storage solutions, whether it's a few bays for the office, a multi-tier system, or high bay project for the warehouse.

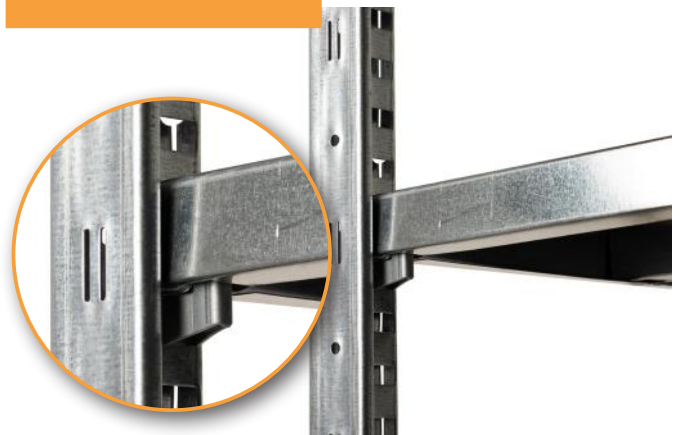

A traditional shelf supported on four clips and adjustable in increments of 25mm to give maximum flexibility.

Available Heights (width shown 700mm)

Component Organisers

- Ideal for organising your small parts storage
- Manufactured from high quality polypropylene
- 8 options available to suit your needs
- Suitable for any workplace

Component organisers are the ideal small parts organiser for your item storage needs. The body and frame are made from durable high impact polypropylene and the drawers and partitions are made from transparent polypropylene.

Each drawer comes with its own removable horizontal partition, effectively doubling the number of compartments which can be used in the component organiser.

The component organisers can be screwed directly on a wall with the pre-configured holes or mounted on a wall with specially designed frames. The component organisers can be mounted on metal louvre panels with the help of four clips for better mounting which can be fitted on the back wall of the cabinet.

Plastic Storage Bins

- Strong and robust plastic bins manufactured from shock proof plastic
- Easily identify contents
- Ideal for heavy duty industrial applications
- Available in 9 sizes and 3 colours
- Stack or hang on louvre panel
- Labels included with each bin

Plastic Storage Bins that can be used in any environment time and time again.

The quality and ergonomic design means all our plastic bin can be stacked securely or hung on louvre panels.

Please see page 121 for Louvre Racks and Trolleys.

These bins are efficient in any small part picking environment. They have a large identification area as well as a large open picking face, meaning the contents can be easily identified and picked efficiently.

Available in 3 colour options, making them ideal for 5S and Lean environments.

racksack® is the original waste segregation solution, simplifying what can sometimes be a complicated and laborious process to separate waste. This enables users to create a sustainable, tidier, safer, and more productive workplace. Not only this, but these clever recycling sacks don't encroach on valuable floor space which is often at a premium (especially in warehouses).

With quality that's impossible to miss, you know when it's racksack®!

- Easy collection of waste
- Easy to fix and easy to remove
- Helps improve waste segregation
- Hard-wearing and re-usable
- Made from strong, durable polyester
- Available in 8 standard text and symbol designs
- Other designs and special prints such as logos are available upon request

racksack® is the market-leading solution for waste segregation in the industrial work setting, providing a simple and cost-effective system that's easy to implement.

This innovative family of products will help you to be compliant with the current EU and UK waste segregation legislation.

Designed for most racking and shelving systems between 900mm and 1100mm, the racksack® saves valuable floor space and simplifies what can sometimes be a complicated and laborious recycling process, enabling you to create a tidier, safer and more productive workplace.

Made from strong, durable polyester that withstands the rigours of a busy industrial environment. The flexible method of 'S' hook fixings means the racksack® can be hung over or hooked onto any substrate.

Three strong handles are woven into the edge of the sack - one on each side for carrying and one on the base - so that the sack can be easily tilted from the base and emptied.

Available in 8 standard text and symbol designs, including a completely blank sack.

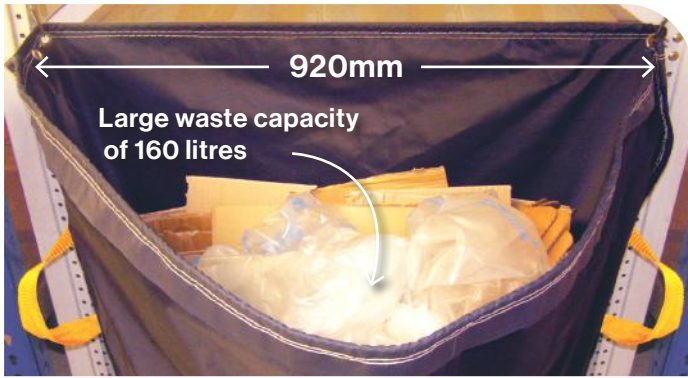

The racksack® family includes products that can be attached to warehouse racking, shelving, trolleys, roll cages, stillages, mobile steps and more.

racksack® - Text Designs

Code	H x W (mm)	Pack
RSB1	1000 x 920	1
RSB5	1000 x 920	5
RSB10	1000 x 920	10

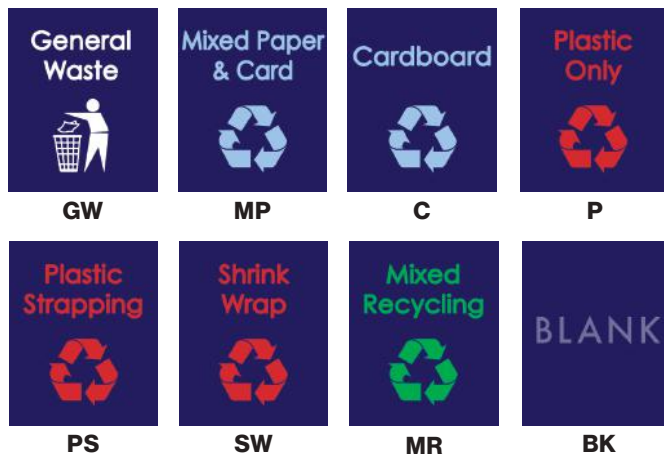

Please add the design code to the end of the reference when ordering: for example general waste design in Blue, pack of 5, would be RSB5/GW.

Handles at the sides and base are double stitched to tough woven polyester for increased durability.

Available in a range of standard text designs or you can customise your own...

Brand your racksack®

Other designs and special prints including logos are available on request. Customise your racksack® with your company name or logo, any waste product symbol or text you require and in any one colour print.

Optional wall-mounted hooks for racksack® blue and racksack® clear. Ideal for easily hanging racksack® from walls. Sold in individual pairs.

Wall-mounted hook for racksack®

Symbol-only designs available in standard blue or premium clear

racksack® clear

- Clearly see what materials are inside the racksack®
- Enhance security measures to prevent theft
- 10 standard waste designs available
- Premium clear front with blue backing
- Other designs and special prints such as logos are available upon request

The clear racksack® range gives warehouses the transparency they need when segregating waste and recycling. The premium clear material helps identify when incorrect waste has been placed into the wrong segregation sack.

The transparent design enhances security measures to help prevent theft.

Available in 10 of our popular standard designs - 5 text prints and 5 symbol-only prints.

racksack® mini

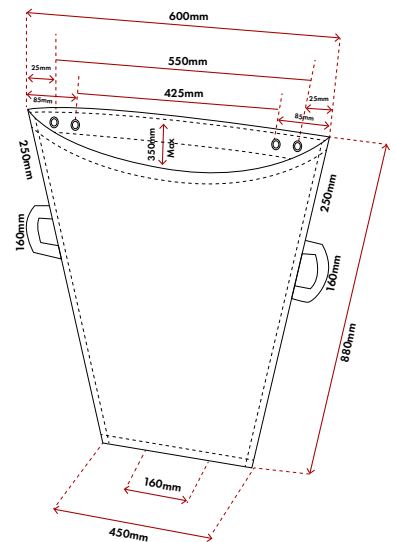

- Smaller racksack® designed for workstations and workbenches
- Ideal for packing benches; picking stations; assembly stations; desks; shelving and smaller racking areas
- Thanks to the new fastening options, you can also attach the racksack® to many different fixtures, such as pedestrian barriers and walls

Made from tough waterproof polyester, the racksack® mini can adequately withstand the rigours of an industrial environment. Three strong handles are woven into the edge of the sack, one on each side for carrying and one on the base, so the sack can be easily emptied.

Available in 4 text or 3 symbol only design options, including a blank option. Sold individually or in packs of 5 and 10. Fasten with the 'S' hook; the bungee loop or wall mounted hook.

racksack® mini can be fixed in three ways:

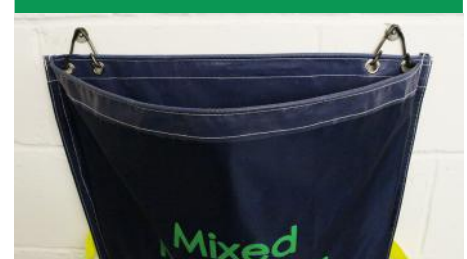

2 Steel S Hooks

Bungee Loop

Wall Mounted Hook

racksack® nano

- Designed for use with forklift and pallet trucks
- Thanks to the new velcro fastening, any chance of snagging is eliminated
- Available in 3 text or 3 symbol-only design options, including a blank option
- Supplied with bungee loop fixing
- 600mm high x 450mm wide
- Other designs and special prints including logos are available on request

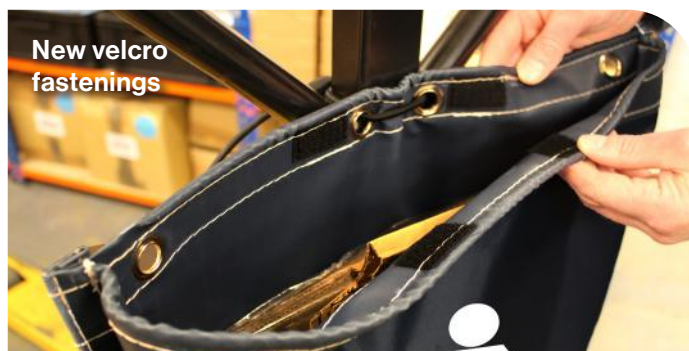

Introducing racksack® nano, based off direct customer feedback for an even more compact solution than racksack® mini!

This small and sturdy waste segregation sack is 600mm x 450mm, the perfect size to attach to forklift trucks and pallet truck handles, making it easy and convenient to collate waste materials on the move. Once full, racksack® nano can be emptied into a standard size racksack® or straight into the main waste collection point on site.

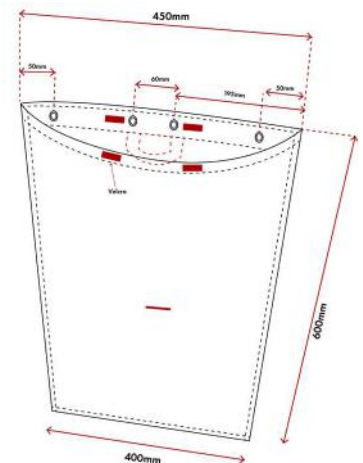

Featuring ties at the back and coming with bungee loop fixings as standard, racksack® nano is quick and easy to secure in place. Plus, to eliminate the possibility of snagging as the forklift or pallet truck moves around the warehouse, racksack® nano features a velcro fastening on the mouth, allowing it to be firmly closed.

Like the rest of the racksack® range, racksack® nano is available with various eye-catching designs on the front, making separation of waste materials a breeze.

racksack® nano promotes a cleaner and more organised workplace as it provides a place to deposit waste packaging while on the move – no more laborious to-ing and fro-ing from a standard floor bin!

racksack® rollcage

- Organise waste packaging materials as you go
- Easy collection and segregation of waste
- Ideal for 800mm wide roll containers
- Hard-wearing and re-usable
- Can be overprinted for volume orders

Keep your workplace neat and tidy by fitting the racksack® rollcage, ideal for use on 800mm wide roll containers. Made from tough waterproof polyester, the large capacity twin pocket sacks can adequately withstand the rigours of an industrial environment.

Fits easily by hooking over the sides or can also be secured via eyelets in the top corners. Straps help secure the middle of the sack.

racksack® trolley

- Organise waste packaging materials as you go
- Easy collection and segregation of waste
- Easy to fix and easy to empty
- Hard-wearing and re-usable
- Single or Double pocket versions
- Can be overprinted for volume orders

Keep your picking areas clean and tidy as you go by fitting these trolley recycling sacks. Not only do you keep unwanted waste materials off the floor, but you also help segregate waste. Made from tough waterproof polyester, these Single or Double pocket trolley sacks can adequately withstand the rigours of an industrial environment.

Ideal for hooking onto handles of picking trolleys up to 580mm wide, or they can be secured via eyelets in other locations. Once full, simply take the sack to your main waste station and empty the pre-segregated waste.

Combined pockets when used together: 73 Litres.

Inspiration Hub

See the possibilities. Build your perfect solution.

Your space. Your vision. Our products.

Welcome to the Inspiration Hub – your starting point for discovering how our products can work together to create smart, practical, and stylish solutions for any environment.

Over the next few pages, we'll show you how our product range can be combined to suit a variety of scenarios and sectors, including:

Warehouses – Streamline operations and maximise storage space.

Offices – Enhance productivity and organisation.

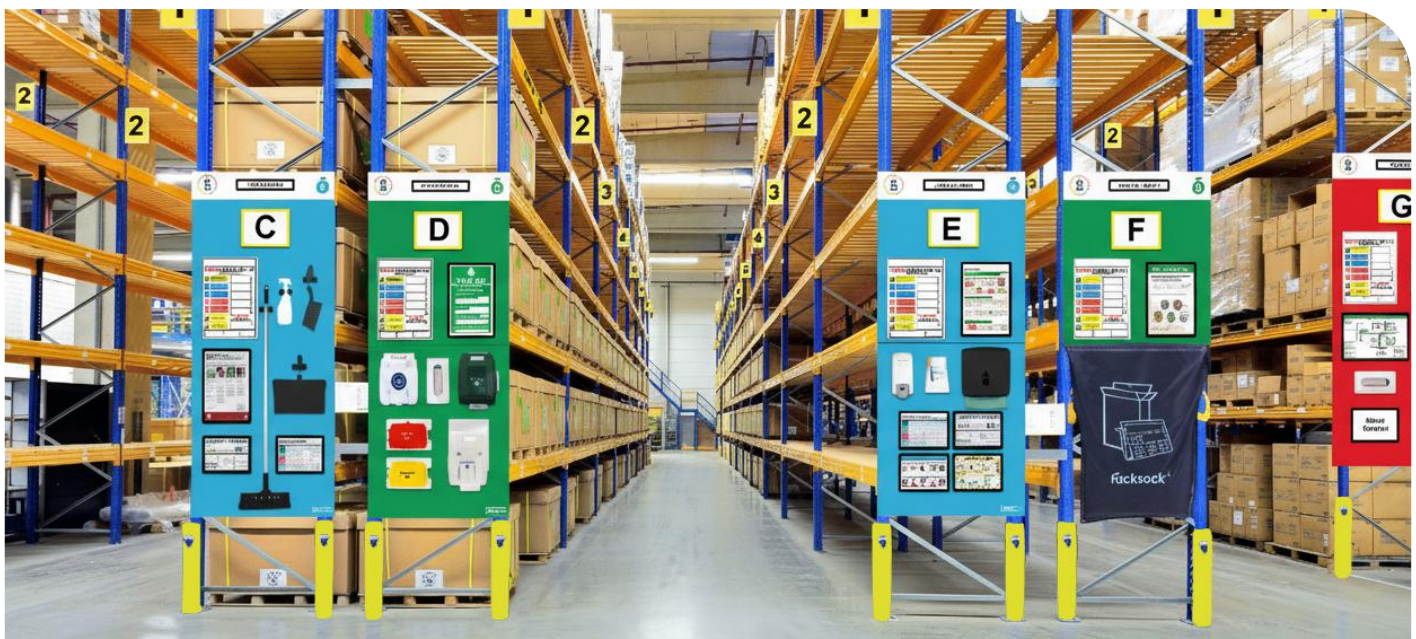

Education – Support learning with durable, flexible setups.

Supermarkets – Optimise space while keeping things accessible and attractive.

And more – Whatever your sector, we've got you covered.

Providing you with a complete solution, our products are known for their durability and reusability, making them a cost-effective and sustainable option. Whether you're looking to solve a specific challenge or create a full, tailored setup, you'll find plenty of ideas here to spark your next project.

Let's turn inspiration into reality.

Rack End Solutions Inspiration Hub

Warehouse space is at a premium in the UK and Europe, with soaring demand pushing businesses to work smarter with the space they have. That means finding innovative ways to do more with less and maximise every square metre.

racksack® is an ideal way to reduce clutter and streamline waste segregation without sacrificing valuable floor space. Designed to hang neatly on racking, it keeps waste sorted at the point of use, helping warehouses stay clean, compliant, and efficient.

They pair perfectly with other rack end solutions – including Modulean® rack end boards for displaying key information, rack end barriers for impact protection, floor markers for visual guidance, weight load notices for safety compliance, and aisle markers for navigation. Together, these products create a complete, space-savvy system for a safer, more efficient warehouse.

Warehouse Mezzanines Inspiration Hub

Mezzanine floors are a great way to maximise vertical space, but they must be safe, clearly marked, and easy to navigate.

Our range of products helps you achieve exactly that, with column protectors that safeguard structural supports from accidental impact to keep your mezzanine secure and your people protected, weight load signs that clearly display essential load information to meet safety regulations and give staff confidence, and frames4docs® that combine protection with communication by displaying notices, diagrams, or instructions exactly where they're needed.

By integrating these products, you can create a mezzanine that's safer, clearer, and more efficient – all while maintaining a professional appearance.

Offices Inspiration Hub

A place for everything. A system for everyone.

A well-designed office is more than just desks and chairs. Our products help you create a space where information flows easily and everything has its place.

This includes Modulean® shadow boards to keep schedules, workflows, and updates visible for teams at a glance, frames4docs® to protect and highlight key notices, policies, or announcements, label holders to quickly and neatly identify files, shelves, and storage areas, and floor markers to guide movement and mark zones.

By combining these products, you can transform your office into a clear, organised, and professional environment that supports focus and efficiency.

Hospitals and Doctor Surgeries Inspiration Hub

In busy medical environments, clear communication and easy navigation are essential. Our products are designed to help staff, patients, and visitors move confidently and access information quickly – all while maintaining a clean, professional look.

This includes Modulean® shadow boards to keep vital equipment such as first aid kits and emergency information in one clearly visible location, frames4docs® to securely and hygienically display medical notices, procedure guides, or compliance documents, and floor signal markers to direct patients and staff to different zones or departments with clear, colour-coded guidance.

By combining these products, hospitals and surgeries can create well-structured, easy-to-navigate spaces that enhance safety and patient care.
