TRACK LIGHTING SYSTEMS

2026 PORTFOLIO

CONTENTS

04

LED NEXTRACK CORE

A modern track spotlight delivering high-quality light with a fixed 36° beam angle, designed for professional and demanding interiors.

05

LED NEXTRACK VISION

A track spotlight with excellent lighting performance and an adjustable beam angle of 30–60°, offering greater freedom in lighting design.

06

LED NEXTRACK LINE

A linear LED track luminaire with high luminous output and adjustable light direction, ideal for uniform and functional space illumination.

08

NEXLINE S-LINE

A classic track spotlight for replaceable GU10 light sources, featuring an additional reflector that enhances aesthetics and visual comfort.

10

NEXTRACK GO

A complete track lighting kit for replaceable GU10 light sources that allows for quick and flexible creation of a functional accent lighting system.

11

NEXLINE G-LINE

A minimalist track spotlight designed for GX53 light sources. Its compact size and simple form ensure easy installation and practical everyday use.

12

ACCESSORIES

A comprehensive range of accessories enabling flexible configuration and expansion of the lighting installation.

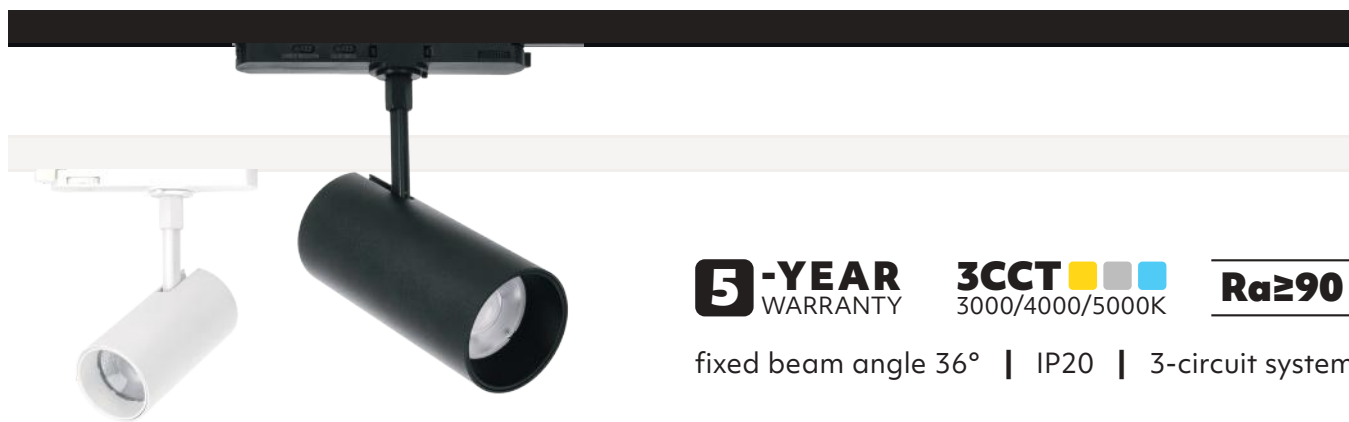

TRACK LIGHTING SYSTEMS

Light defines space, creates atmosphere, and gives interiors their unique character. Our track lighting systems are designed for those who value **design freedom**, modern aesthetics, and a conscious approach to lighting design. Thanks to **adjustable luminaires and easy repositioning** along the track, the light can always adapt to the rhythm of life and the changing needs of the interior – without any modifications to the installation.

This is how dynamic lighting compositions are created – from subtle accents to bold focal points that draw attention. Versions with replaceable light sources provide additional flexibility, allowing designers **to tailor colour temperature and output to individual requirements** and freely shape light in any space.
