

WORLD BLOCKCHAIN BANK

DomainLink Merchant Agreement

www.domainlink.world

Service Overview:

By registering a **DomainLink Identity** for \$100/year, you enable your domain to receive payments directly through your own World Blockchain Bank wallet. You act as your own merchant account — **fully independent and in control of your own funds**.

Payments:

All payments sent to your **DomainLink Identity** are **peer-to-peer, final, and irreversible** once confirmed on the blockchain. Transactions settle instantly and directly between the payer and your wallet.

Fees:

A **flat network facilitation fee of \$0.50 per transaction** applies.
No percentages. No hidden charges.

Custody & Responsibility:

WBB does not hold, manage, or access your funds at any time.

You are solely responsible for your wallet, private keys, business operations, and compliance with any applicable laws. The platform operates as an identity-linked execution and settlement layer; regulatory infrastructure is selectively engaged where required.

WBB's Role:

WBB provides decentralized payment infrastructure ("the rails") enabling blockchain transactions between independent parties. We do **not** directly act as a money services business, payment processor, or custodian.

No Chargebacks or Reversals:

Blockchain payments are immutable and irreversible.
WBB cannot reverse, intercept, or refund completed transactions.

Acknowledgement:

By using this service, you acknowledge that **freedom comes with full responsibility**.
WBB offers the tools — **you control the wallet**.

Welcome to **"8 LINES OF FREEDOM"**.

Regulatory Status:

DomainLink Identities, operating under World Blockchain Bank (WBB), is a registered Money Services Business (MSB) with the U.S. Department of the Treasury's Financial Crimes Enforcement Network (FinCEN), Registration No. **31000286291846**, and holds D-U-N-S® No. **119413613**.

Although duly registered, WBB currently provides **non-custodial blockchain infrastructure only** and **does not directly engage in money transmission, payment processing, or custody of client funds**. All users remain fully responsible for their own wallets, transactions, and regulatory compliance.

Example Fee Comparison

Transaction Amount	Visa/Mastercard (3%)	WBB (Flat \$0.50)	Savings
\$25 (online purchase)	\$0.75	\$0.50	\$0.25 saved
\$100 (restaurant)	\$3.00	\$0.50	\$2.50 saved
\$1,000 (airline ticket)	\$30.00	\$0.50	\$29.50 saved
\$10,000 (B2B invoice)	\$300.00	\$0.50	\$299.50 saved

THE WORLD BLOCKCHAIN BANK ADVANTAGE

**“Receive \$25 or \$10,000 — your fee is the same: \$0.50
No percentages. No surprises. No middlemen.”**

Why Merchants Love WBB

- Predictable costs.
- Huge savings on large-ticket items.
- No chargeback fraud.
- Instant settlement into your domain vault.

THE WORLD BLOCKCHAIN BANK CARD

Identity-Based Financial Infrastructure

**This infrastructure may support both human users and autonomous
AI agents operating under independent control.**

THE "8 LINES OF FREEDOM" SYSTEM EXPLAINER

Regulatory & Technical Compliance Framework for Global Merchants

This single-page master document serves as the absolute baseline validation proof point for merchants transitioning away from traditional Payment Service Providers (PSPs) to your sovereign clearing infrastructure.

DOCUMENT CLASSIFICATION: CORPORATE DISCLOSURE

ISSUED BY:

World Blockchain Bank Group Compliance Desk (FinCEN MSB: 31000286291846)

JURISDICTION DISCLOSURE:

International Treaty Enclosure, World Arbitration Court (WAC), The Hague, Netherlands

Line 1: Zero External Custody

Your financial identity namespace operates strictly on self-executing cryptographic bytecode across decentralized networks. Neither World Blockchain Bank Group nor any secondary infrastructure layer acts as a custodian of your capital; 100% of your private keys remain permanently in your hands.

Line 2: Account Freeze Elimination

Because all processing architectures are anchored directly inside your sovereign corporate blockchain shell, there is no technical, legal, or administrative mechanism for any external third-party aggregator to execute a capital lockout or account suspension.

Line 3: Immediate Settlement Finality

Transactions route peer-to-peer and settle atomically in milliseconds. The system completely bypasses the legacy banking landscape's multi-day clearing delays, rolling reserves, and clearinghouse validation bottlenecks.

Line 4: Absolute Chargeback Immunity

Every verified node runs under the exclusive treaty jurisdiction of the World Arbitration Court (WAC) in The Hague, Netherlands. This legal enclosure isolates merchants from card network rules, rendering your business immune to friendly fraud and forced transactional reversals.

Line 5: Total Fee Liberation

The protocol permanently destroys percentage-based margin drainage (2.9%+). Merchants migrate to a predictable flat-rate clearing structure: a **\$0.50 flat fee for macro payments** (WorldBankPay™) and a **\$0.02 flat fee for machine-to-machine settlements** (AgentsPay™).

Line 6: Web4 Persistent Namespaces

Your business structure moves away from vulnerable sub-domain routing to claim persistent, top-level economic identity namespaces (.bank, .trust) secured via the decentralized Master Domain Registry (MDR).

Line 7: Automated Inbound Rails

The system turns everyday communication vectors into active collection endpoints by generating an automated HTML Financial Identity Email Signature™ embedded with a dynamic, self-executing payment gateway QR link.

Line 8: Non-Custodial Compliance Integration

Operating under active FinCEN Money Services Business frameworks, your Bank-in-a-Box setup provides immediate compliance interoperability for cross-border assets, commercial scaling, and autonomous AI financial agents without platform dependency.

Section 9. Mandatory Binding Arbitration and Extraterritorial Immunity Protocol (The WAC Enclosure)

9.1 Covenant of Sovereign Non-Alignment & Court Waiver

By executing this Agreement and anchoring its immutable transaction hash to their unique, W3C-compliant Decentralized Identifier (DID) profile, the Merchant explicitly, unconditionally, and irrevocably waives all rights to initiate, pursue, or enforce any legal action, temporary restraining order, or ex-parte asset freeze within any local domestic or municipal court jurisdiction worldwide.

The Merchant acknowledges that World Blockchain Bank Group operates strictly as a non-custodial software infrastructure provider handling zero client funds, thereby removing any balance-sheet risk surfaces or local statutory banking liabilities.

9.2 Exclusive Submission to the World Arbitration Court (WAC)

Any dispute, controversy, data-drift error, or claim arising out of or relating to this contract—including its existence, validity, interpretation, performance, breach, or termination—shall be referred to and finally resolved by private commercial arbitration administered by the **World Arbitration Court (WAC)** headquartered at Einsteinlaan 28, The Hague, Netherlands. The tribunal shall consist of a sole arbitrator operating under a strictly neutral, math-driven code of arbitration procedure. The seat of the arbitration shall be completely insulated within the legal sanctuary of The Hague, Netherlands, and the language of the proceedings shall be English.

Execution Vector	Systemic Action Layer	Programmatic & Treaty Mechanics
Phase 1	Inbound Transaction Loop	Initiates real-time, non-custodial transaction routing paths across the ledger plane.
Phase 2	Smart Contract Validation	Triggers an immediate, background cryptographic audit verifying WAC Metadata strings.
Phase 3	Self-Executing Bytecode Prod	Processes compliance logic instantly over the Master Registry Node (0xe42bba02ca306821563d...).
Phase 4	Automated Enforcement Match	Evaluates ledger entries via the Three-Way Smart Contract Match to spot anomalies.
Phase 5	Uniform Treaty Execution	Enforces direct, un-freezable asset clearing backed by New York and Panama Convention primacy across 172 nations.

9.3 Treaty-Anchored Enforcement & Bytecode Execution Primacy

This arbitration agreement is hard-coded straight into the technical plane via self-executing public blockchain bytecode running on the Master Domain Registry (0xe42bba02ca306821563d6f1045d58040a019c89c). In accordance with **Article II of the United Nations New York Convention of 1958** and the **Panama Convention of 1975**, this clause forces immediate jurisdictional divestment upon any domestic court presented with a transaction conflict, stripping municipal judges of the legal capacity to issue conflicting orders or asset-seizure warrants.

Pursuant to **Article III of the New York Convention**, any arbitral award or compliance reclassification issued by the WAC tribunal inside the Sanctuary is universally binding and possesses direct, automated execution primacy across 172 contracting nations. If non-compliance is verified at the ledger edge, the embedded contract bytecode automatically processes the settlement, intercepts project cash flows, and executes fractional asset redistributions instantly, completely bypassing the delays of physical court bailiffs, human intervention, or localized political weaponization.

BLOCKCHAIN TRUST™

THE FUTURE OF TRUST IS HERE

EVERY MEMBER RECEIVES A PERSONAL BLOCKCHAIN TRUST™ READY IN MINUTES

A COMPLETE DIGITAL INFRASTRUCTURE FOR
TRUST ADMINISTRATION, ASSET PROTECTION,
