

Maxwell's Electric & Magnetic

Written by 한대균

About the Author

Hello! MY name is 한대균.

I'm a first-year
middle school student.

I like learning science, play games,
and learning Trombon.

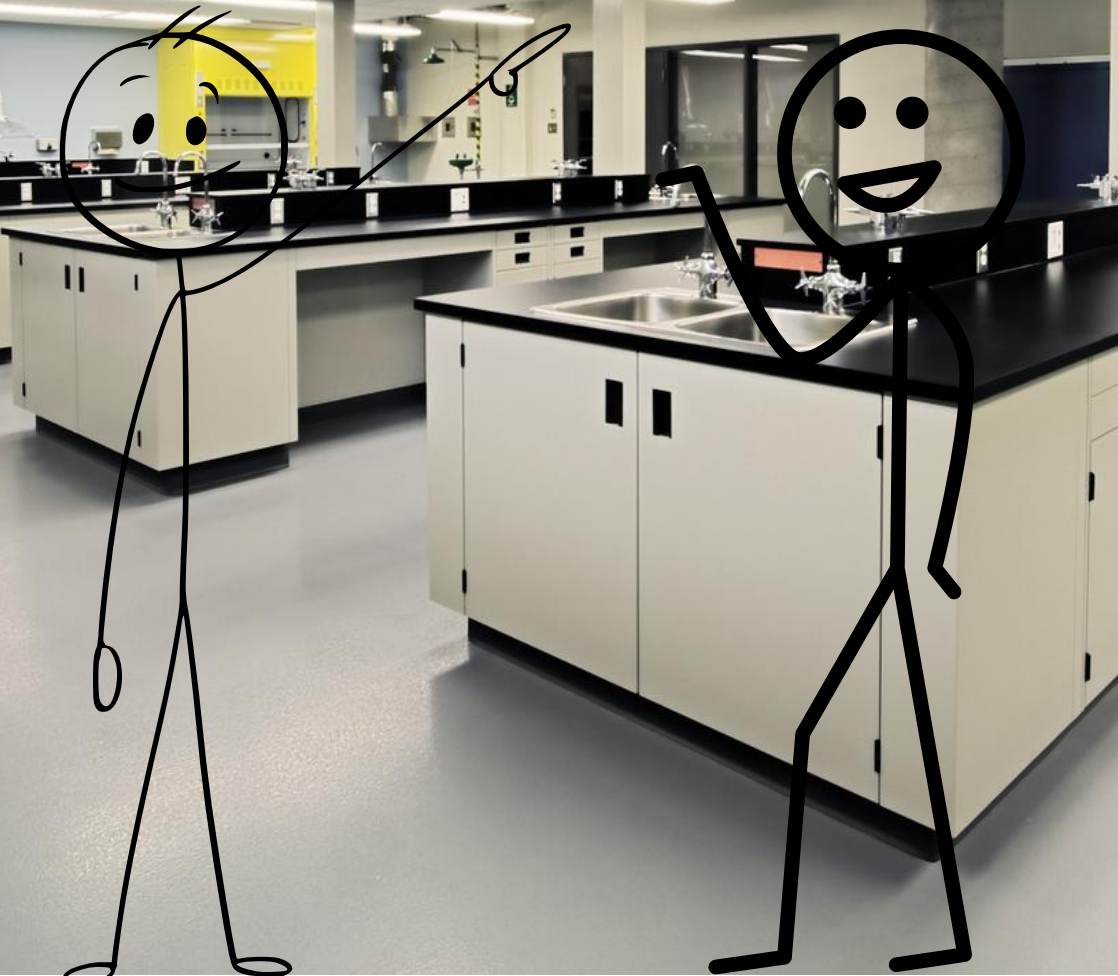

I wrote this story because I wanted
to teach science.

Thank you for reading my book. I
hope you enjoy it.

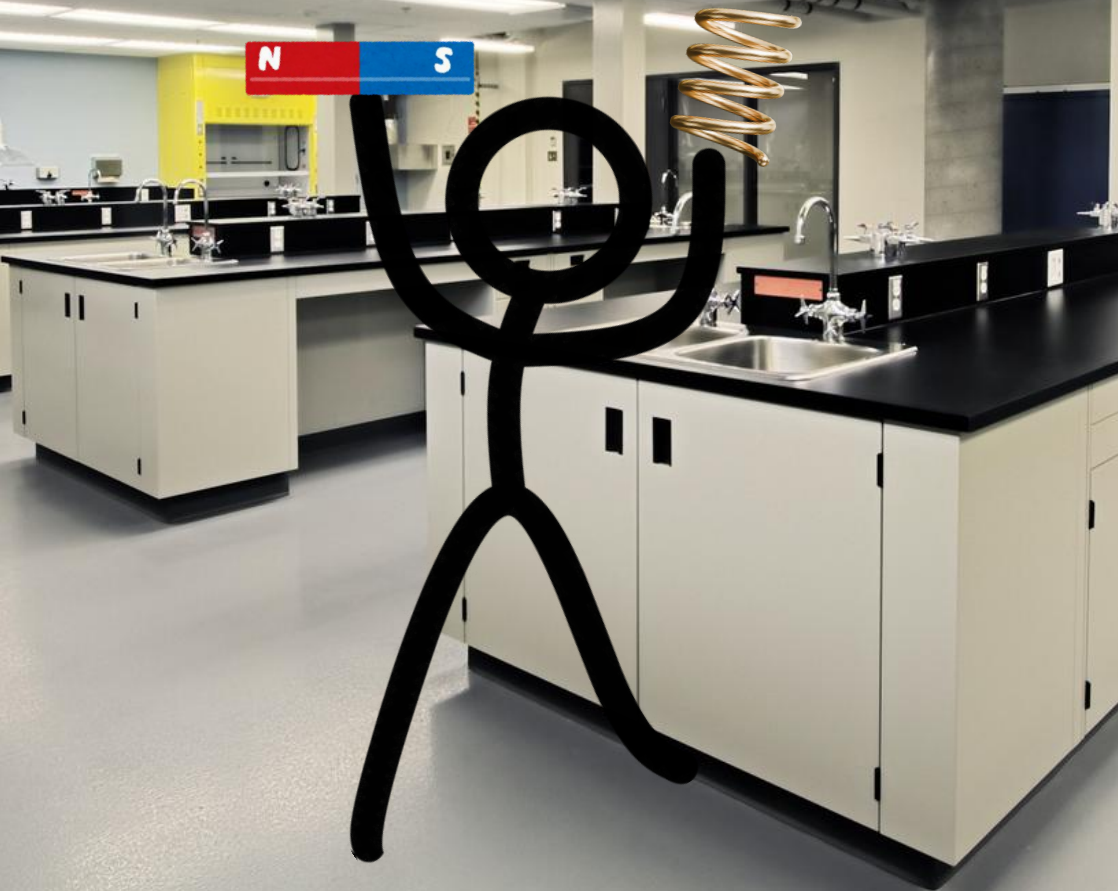

**Eden and Oliver are
doing science classes**

Eden asks
“what is electric?”

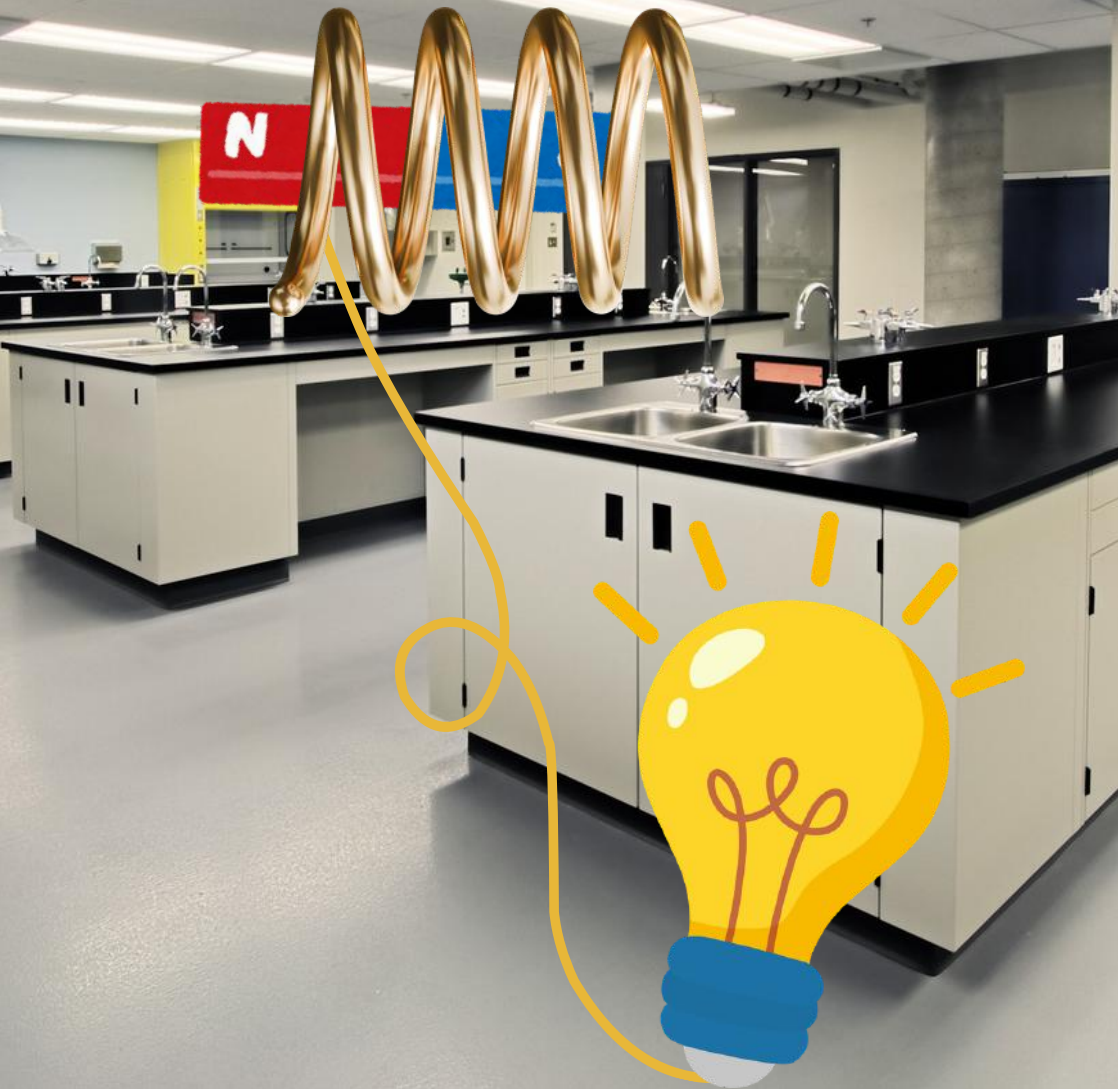

Let's do an experiment

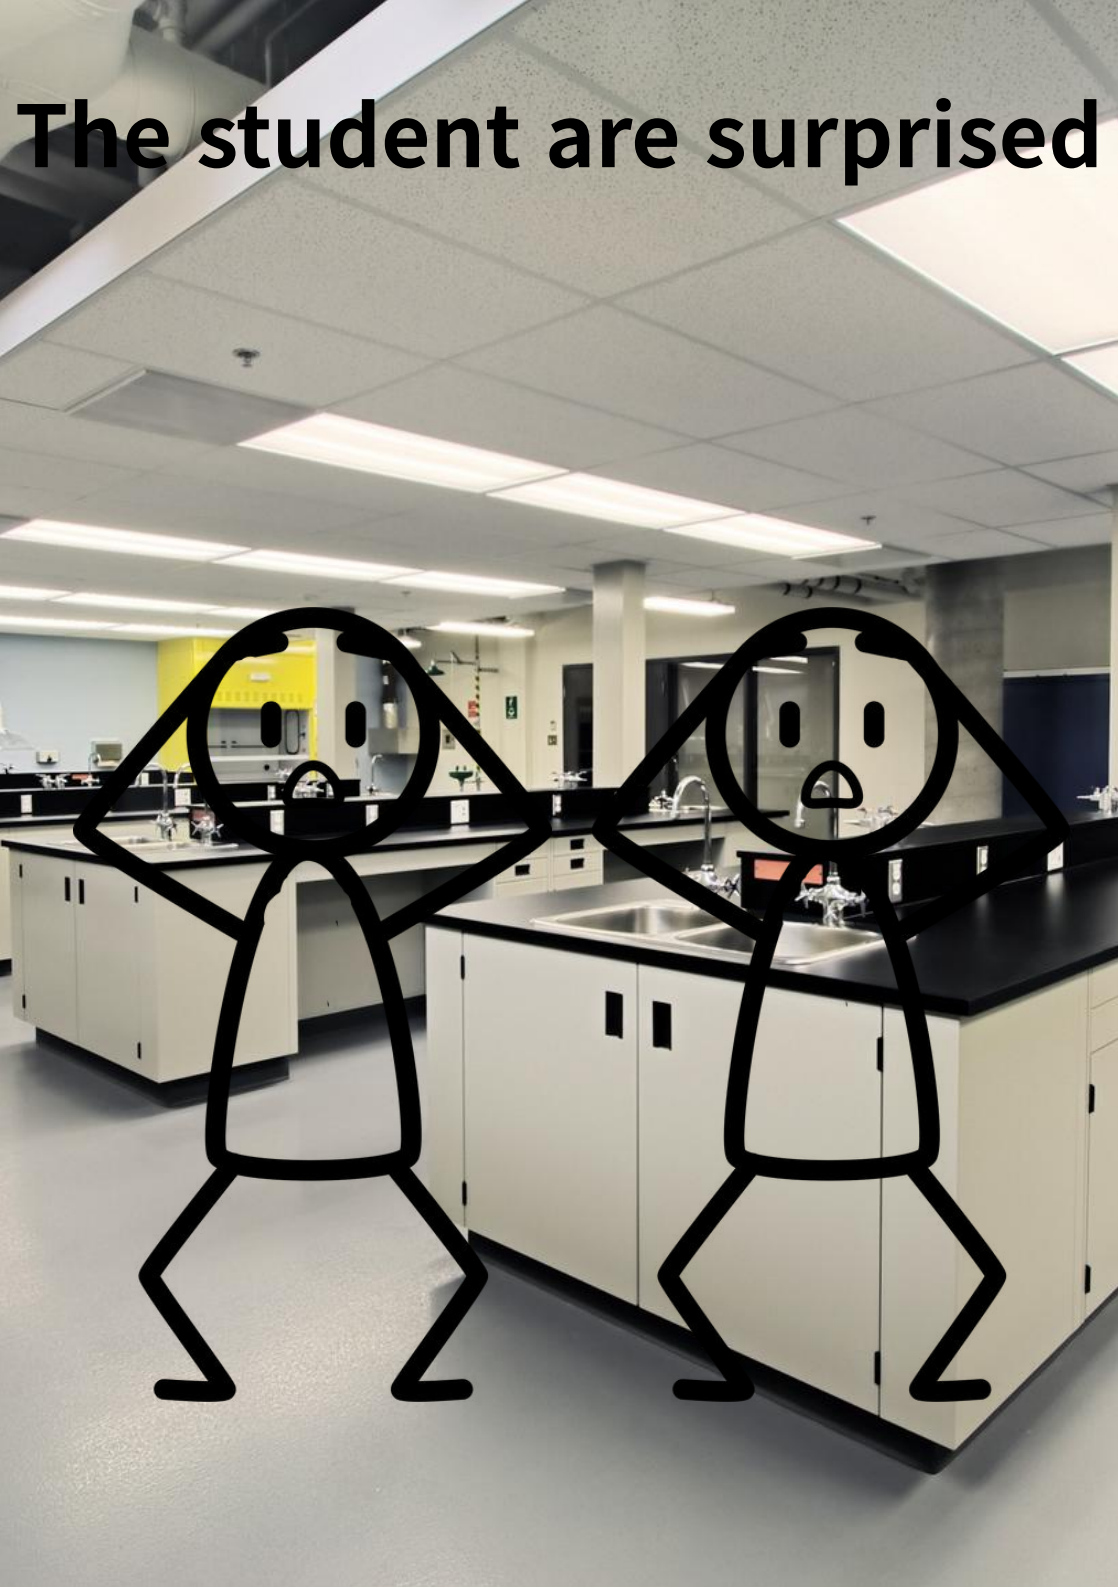

The magnet moves and the magnetic field charges

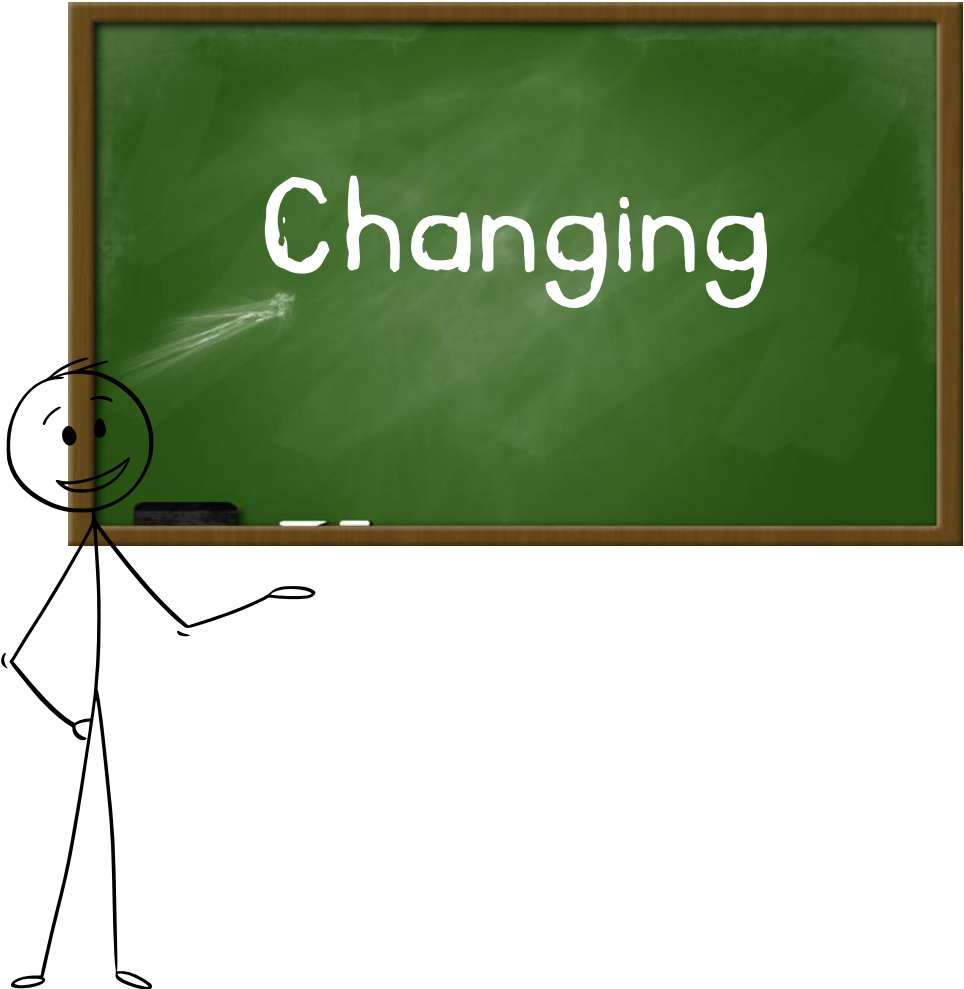

**An electric current is
created and a light bulb
is turned on**

The student are surprised

A stick figure stands to the left of a green chalkboard. The stick figure is pointing its right hand towards the word 'Changing' written on the chalkboard. The chalkboard has a brown frame and a small chalk tray at the bottom. The word 'Changing' is written in white chalk.

Changing

**Changes in magnetic
fields produce electricity**

**Students say
science is amazing**
