Surgical Specialist Team

Our Surgical Team is a coast-to-coast network of specialists with expertise in implant dentistry, regenerative therapies, biomaterials and advanced surgical solutions.

Combining diverse clinical backgrounds with practical, evidence-based experience, our specialists provide meaningful insight into both established treatment protocols and emerging innovations.

Beyond clinical support, the team partners with industry on education, product launches and promotional initiatives—bringing credible clinical perspective and strong engagement with Canada's surgical community.

Connect with our specialists to discover how their expertise can support predictable outcomes and advance regenerative implant dentistry.

HIGH-DENSITY **PTFE BARRIER** MEMBRANE
Now available through **The Surgical Room**

Space for **better** healing.
REGENERATE | PRESERVE | RESTORE

non-resorbable

synthetic

biocompatible

A non-resorbable, ultra-thin PTFE membrane designed for predictable GBR/GTR and open-healing socket and ridge preservation.

Key Benefits

- 100% synthetic high-density PTFE
- Ultra-thin (~0.08 mm)
- Impervious to bacteria due to dense structure
- Exceptional 360° tear strength
- Supports open healing in socket & ridge preservation
- Easy retrieval thanks to blue color

5+3
(Small)

5+2
(Medium)

5+1
(Large)

Indications

- Socket & ridge preservation
- Horizontal/vertical augmentation
- Fenestration & dehiscence defects
- Intraosseous defects
- Furcation defects

Available Sizes

- S - 15x20 mm (801520)
- M - 20x30 mm (802030)
- L - 30x40 mm (803040)

Optimal access and high cutting performance

Reusable SmartPeg. Up to 20 validated reprocessing cycles.

Made from the same aluminum material as the sterile single-use version, ensuring full continuity with extensive clinical documentation supporting the original ISQ method.

Optimal access

The special angle allows an optimal access and considerably better visibility of the treatment site in the premolar and molar area.

Perfect cleaning

To satisfy the stringent hygiene requirements, the straight handpiece can be dismantled.

High cutting performance and time saving

Thanks to the 1:2 speed increasing gears, it can be worked extremely precise with bur speeds up to 80,000 rpm to quickly section most molars.
