A familiar Bodahl expression with a new surface

A new material expression enters the Bodahl collection. Verona combines distinctive design with ceramic surfaces, bringing a fresh and contemporary character to a familiar Bodahl universe.

Same philosophy. New possibilities.

Rossdale

A new collection designed

Ceramic

Brings a clean ceramic
expression to our collection

Rossdale Designed to stand out

Designed by Morten Georgsen

Rossdale is more than a table. It is the result of a design journey where function, materials and aesthetics are balanced to create something truly unique. A table that feels solid yet light, strong yet refined.

All visuals in this catalogue are AI-assisted and clearly labelled accordingly. All content has been reviewed and approved by Bodahl Møbler.

NEWS

**Morten Georgsen
NO NONSENSE DESIGN**

"We believe in the power of simplicity. We design functional pieces, with perfect proportions and without superfluous elements, always seeking beauty in the essential. Our vision is to create timeless design that connects with people, from iconic furniture to innovations such as the first extendable marble table. We prioritize human needs over prestige, collaborating with leading brands and making our mark on global design."

Ceramic takes centre stage

With Rossdale, ceramic becomes a defining part of the design. The surface brings depth and visual character, while the dark metal base creates a strong contrast and gives the table a clear architectural presence.

Designed from every angle

Rossdale is not only about the first impression. From the rounded tabletop to the sculptural base, the elements work together as one complete expression. Strong enough to be noticed. Balanced enough to live with.

Freedom to Create

Miami is part of our **Concept 4 You collection** - created to give you the freedom to shape the table around the room, the customer and the expression you want. Choose between different sizes, leg designs and edge profiles.

Some tables are
made to fit in.
Others are made
to fit you.

Wild Oak moves naturally through the home. Shelving, storage and dining furniture can be combined to create a warm, coherent interior -different pieces connected by the same material character.

A collection does not need to look identical to feel connected. The recurring grain, warm tones and honest surface of Wild Oak create a natural link from one piece to the next..

Freedom to Create

Roma is part of Concept 4 You, giving you the flexibility to adjust the table to the project. Choose the combination that fits the room and the expression you want.

AI-GENERATED

Roma captures a familiar Bodahl expression: solid proportions, visible wood character and a table that feels confident in the room. It is a design that has become a natural part of the Bodahl collection.

The lively grain, knots and tonal variation of Rustic Oak give every tabletop its own identity. These natural features are part of the material – and part of the Roma character.

A classic doesn't stand still.

A New Surface More Possibilities

A refined ceramic look, designed for everyday living and made to fit effortlessly into modern interiors.

Bring a clean ceramic expression to the Bodahl collection. Ceramic surfaces are combined with metal constructions to create tables that feel modern, practical and easy to place across a wide range of interiors.

The collection is developed for customers looking for the look and feel of ceramic in an attractive price category - without compromising on a strong visual identity.
